Describe your unique value proposition:

Ambient Systems: Revolutionizing Financial Planning in Commercial Real Estate with AI

Ambient Systems is a software platform that empowers finance professionals in the commercial real estate (CRE) sector to accelerate financial planning and enhance decision-making through generative AI. Our core product enables users to create faster, more accurate financial models while integrating real-time operational insights — helping asset managers, REITs, and developers make better investment and capital allocation decisions.

What sets us apart is our focus on automation and intelligent scenario modeling. In CRE, financial planning is often constrained by manual spreadsheets, delayed market inputs, and disconnected systems. We streamline this process using AI to ingest operational data, simulate real-world scenarios, and produce forecasts and pro formas in minutes instead of weeks.

Our solution is not just a modeling tool — it's a decision support engine. Whether a user needs to adjust assumptions due to interest rate hikes, model lease turnover scenarios, or analyze ROI under different development paths, our platform dynamically adapts and recalculates, offering data-driven answers at speed.

We stand out from traditional CRE software in three key ways:

Speed and Adaptability: Our generative AI produces financial outputs and scenario analyses at a fraction the time traditional tools require.

Integration of Operations and Finance: We bridge the gap between on-the-ground performance data and high-level financial planning, ensuring decisions are rooted in real performance.

Accessibility for Mid-Sized Firms: Unlike bulky enterprise tools, Ambient Systems is designed to serve leaner firms with high growth ambition, giving them enterprise-grade insight without enterprise-level complexity or cost.

We are currently developing our MVP and conductir

active outreach to firms in Canada, the U.S., and Eastern Europe. We've already held 50+ discovery calls with CRE professionals and identified consisten pain points our system addresses — including delays in planning cycles, risk of human error, and poor visibility into operational data when preparing investment pitches or asset strategies.

Ambient Systems reflects our belief that smarter rea estate decisions come from better data and faster insight. As CRE becomes more competitive, volatile, and capital-intensive, our platform equips finance teams with the tools to act quickly, accurately, and confidently.

This product is built not just as a technical tool, but a a strategic enabler. By eliminating bottlenecks and empowering financial teams with intelligence and speed, we help companies unlock value, minimize risk, and position themselves for smarter growth.

Target Audience and Market:

Our primary customers are finance professionals in commercial real estate firms across Canada and the U.S., including REITs, asset managers, property developers, and private equity real estate investors. We serve the $30B+ Canadian CRE market, with plar to expand into high-growth corridors like Austin, Texas. Our early adopters are firms seeking operational efficiency through technology, especially those struggling with outdated tools and manual processes. Long-term, we aim to serve mid-sized ar enterprise clients who value speed, insight, and smarter capital allocation.

Looking Back: What milestones or accomplishments has your business achieved so far?

1. Registered Ambient Systems federally in Canada
2. Participated in the Business Inc. program (East Yor cohort)
3. Conducted BD outreach to 2,000+ leads in Canada and Europe
4. Validated product-market fit through dozens of discovery calls
5. Developed our MVP platform architecture
5. Initiated partnerships with Serbian SMEs for low-cost UX/UI design, marketing, BD, and AI engineerin

Looking Ahead: What do you envision for your business over the next 1–3 years, and how do you plan to bring that vision to life?	Launch our MVP publicly and secure our first 10 clients Expand into the U.S. market (Austin, San Francisco, NYC) File WIPO protections for our AI architecture and designs IP Raise a pre-seed round and grow our international global technical and BD team Reach $100K in ARR by 2026
Which categories would you like to apply to?	Resilience & Reinvention – For businesses that experienced a major challenge and had to change their business model to continue operating Flying Start – For businesses under two years in operation who have quickly developed early tractior and have experienced considerable growth
Community Impact Award: How has your business made a social impact or improved the wellbeing of your local community?	While Ambient Systems is a tech startup, our impact extends beyond code. As a founder with immigrant roots, I've built this company using community resources -- notably the Toronto Public Library network and local entrepreneurship programs like Business Inc. In turn, I actively share knowledge with other underrepresented founders and support local SMEs especially in Serbia and Canada, through business development and AI adoption strategies. We've initiated early partnerships with Serbian small manufacturers to support affordable tech-enabled outsourcing, creating economic opportunities in underutilized markets. This kind of decentralized support structure -- working locally and internationally -- allows Ambient to remain grounded while still growing globally. The goal is not just commercial success, but empowerment: creating a model for how resilient, resourceful entrepreneurship can emerge from underserved contexts.

Resilience & Reinvention Award -What major challenge(s) or setback(s) has your business faced, and how did you adapt your business to continue operating?

Ambient Systems was originally envisioned as a general-purpose AI SaaS platform for financial modeling. However, early outreach revealed how saturated and vague the generic AI tools market hac become. Realizing this, we pivoted our entire produc strategy toward a highly specific niche: commercial real estate (CRE) finance.

This reinvention wasn't easy. It meant shelving much of our initial codebase, redoing all messaging, and rebuilding our go-to-market from scratch. But it was the right move. We interviewed dozens of CRE professionals, identified pain points in scenario modeling and operational data usage, and rebuilt a new MVP -- fast, specific, and valuable.

In the midst of this pivot, we also navigated personal financial limitations, relying on minimal capital, home workspaces, and community support like the Toronto Public Library for focused work. Through this, we've proven that resilience isn't just about pushing throug -- it's about listening, changing direction, and still moving forward.

Flying Start Award -How has your business gained early traction. What milestones or achievements have you made that reflects this (ex: revenue, units sold, clients served.)

Ambient Systems is a Canadian AI startup helping commercial real estate (CRE) finance professionals accelerate financial planning. In our first year, we've:
Conducted over 50 discovery calls
Built a market-specific MVP for AI-powered financial modeling
Participated in the Business Inc. Program at the East York Civic Centre
Reached over 2,000 prospects across Canada and Europe

We've also refined our customer value proposition through direct feedback and are actively piloting the platform with early adopters. Our traction lies in validating a painful industry gap -- and positioning Ambient as the first solution purpose-built for speed and operational insight in real estate financial planning.

Big Leap Award - How has your business grown in recent years? What milestones or achievements have you made that reflects this?

In the past year, Ambient Systems has taken a bold leap from concept to execution, marking real-world progress across product, partnerships, and market validation.

What began as a broad AI idea evolved into a focuse platform for commercial real estate (CRE) finance. Over the last 12 months, we developed and refined a working MVP tailored to CRE financial modeling -- targeting a sector that still relies heavily on spreadsheets and manual processes.

In this same year, we:
Registered Ambient Systems Inc. federally in Canada laying a corporate foundation to consolidate global assets and IP.
Were accepted into the City of Toronto's Business Inc Program (East York), gaining direct mentorship, network access, and validation in our home ecosystem.
Launched structured business development campaigns, generating 4,000+ qualified leads across finance sectors in Canada, Serbia, Singapore, and Hong Kong -- testing cross-market potential.
Re-engaged with early investors and formalized traction reports, reaffirming support from NUS GRIP and international collaborators.

These milestones reflect a leap not just in product readiness, but in strategic maturity. We've moved fro ideation to action, building a product that addresses real market gap, testing it with global professionals, and preparing to onboard our first users.

The next leap: onboarding and revenue.

How would $5,000 do to help your business?

A $5,000 grant would directly support two crucial ne steps in Ambient Systems' growth: (1) pilot user onboarding and (2) marketing automation.

First, we plan to use the funds to offer onboarding support to our initial users (e.g., financial modeling workshops, onboarding calls, documentation tools). This ensures high satisfaction and data-driven feedback for future development.

Second, we'll allocate funds toward content marketi and automated lead nurturing to convert the 2,000+ finance leads already in our database. This includes email automation tools and case-study style s.

Every dollar would go toward tightening the product market fit and preparing Ambient for its first revenue milestone. This grant would be catalytic -- not just helpful -- at this stage of our growth.

Terms and Conditions Agreement By submitting this application, I agree to the terms and conditions of the competition, including:• Providing accurate and truthful information. • Allowing my business name and story to be shared for promotional purposes if selected as a finalist or that the personal income of the applicant is less than $35,000 per year as reflected on the most recent Notice of Assessment.• Agreeing to participate in any promotional activities related to the competition if selected as a winner.• Understanding that the funding must be used for the business as outlined in the application and may require proof of to providing progress updates on how the funding has impacted the business if requested by the organizers.• Agreeing that the decision of the selection committee is final and cannot be contested.• Acknowledging that incomplete or false applications will result in disqualification.
