BEAMP Cycle 6 Application Form

Name of Lead Applicant *

Ivan Damnjanovic

Job Title of Lead Applicant*

Founder, Director, President

Email*

ivan@ambientsystems.ai

Contact Number*

65 [redacted]

Legal Name of Company *

Ambient Systems Pte. Ltd.

Brand Name of Company

Ambient Systems

Company Website*

https://www.ambientsystems.ai/

Have you been incorporated in Singapore?*

Yes

Company UEN*

202123300C

Please attach your latest ACRA business profile*

trustBar_I251031000630.pdf (0.1MB)

Country of HQ*

Serbia

No. of Year(s) of Incorporation *

4

Latest FY Annual Revenue*

Less than S$500K

Company Employment Size *

Less than 10

How much funding have you raised? *

Less than 250K SGD

Which track are you applying for? Select either one or both.*

Market Development

Note:

Accelerate Solution Development (ASD) - Your proposed solution still needs to be developed and refined before testing is done.

Market Development (MD) - Your proposed solution is ready to be tested in the market.

Which of the following challenge statements does your solution address?*

CS9 - Intelligent Verification System for Concrete Compliance and QA Risk Management - Expand Construction Pte Ltd

How mature is your project?*

TRL 6 - Technology demonstrated in relevant environment

Please select the relevant capabilities of your proposed solution

Electronics

Sensors & Instrumentation

Environment, Clean Air & Water, Waste

Green Building

Sensor, Network, Building Control & Optimisation

Indoor Environment Quality

Infocomm

Internet of Things & Wearable Technology

Artificial Intelligence

Natural Language Processing & Semantic Technology

Smart Cities

Big Data, Data Analytics, Data Mining & Data Visualisation

Delivery & Distribution

Planning & Order Processing

Manufacturing

Materials

Advanced Materials

Sustainable Materials

Con-tech

Field Management Solutions

Pre-cast & Modular Construction Methods

Digital Design & Modelling

Building Materials

Other capabilities not listed here.

IoT,ESG,digital twin,QA,finance,carbon metrics

Please upload your proposal*

Intelligent-Verific...tems.pdf (1.6MB)

If available, please provide the link(s) to your solution demo or prototype demo

Please provide the relevant track record or CV of the participant and core development team (if any).

2025_Ivan_Damnjanov...logy.pdf (0.2MB)

Please feel free to upload any additional materials that can help us in our evaluation

What is/are your objective(s) for participating in the Built Environment Accelerate to Market Programme?*

Ambient Systems aims to participate in the Built Environment Accelerate to Market Programme (BEAMP) to validate and commercialize its AI-driven compliance verification technology within Singapore's built environment sector. Through the programme, we seek to collaborate with industry partners such as Expand Construction to pilot our solution on live projects (e.g., NS Square), demonstrating how AI can automate concrete QA and ESG reporting processes.

Our key objectives are to:

1. Localize our patented Ambient Verify and Ambient Twin platforms for Singapore's construction standards and regulatory requirements;

2. Advance the technology readiness level (TRL 6→9) through applied testing and mentorship;

3. Establish a Singapore-based entity focused on ConTech and sustainability innovation; and

4. Build strategic partnerships for regional deployment across Asia.

BEAMP provides the ideal ecosystem to integrate R&D, industry validation, and commercialization under Singapore's Construction 4.0 and Green Building frameworks.

How did you learn about BEAMP?*
