

Ambient Systems

Integrated technical expertise in engineering, FP&A, AI, and IP.

Turning five years of deep-tech R&D into specialized consulting that delivers direct results.

Based from Belgrade with global operations in Hong Kong.

Introduction

Agency Overview

Driving financial performance through engineering, AI, and IP.

Background

Offering expertise after five years of building an award-winning, PCT-patented NUS deep-tech AI technology startup that achieved technical readiness (TRL 6).

Our Mandate

- ✓ Industrial applications
- ✓ Streamlined FP&A
- ✓ Intellectual Property R&D
- ✓ Software subscription (in development)

Service Lines:

1. **Civil Engineering & Energy Systems**
   Drafting and load calculations.
   Solar array design, microgrid optimization, building energy efficiency.
2. **Supply-Chain Management & Vendor Optimization**
   Sourcing strategy, customs optimization, vendor scorecards.
3. **Vertical Farming / CEA Optimization**
   Layout design, yield modeling, environmental controls.
4. **IP Strategy & Patent Support**
   Prior art searches, patent filing support, freedom-to-operate analysis.

Active on Leading Platforms: Upwork, Freelancer.com, Catalant, AlphaSights, and —connecting with clients who need immediate, specialized expertise.

Previous Experience

Results achieved personally at prior ventures.

Case studies in distributed mining, SEC big pharma disclosures, and image recognition.

	Distributed Mining Company	Conflict Minerals	Image Neural Network
Challenge	Uncontrolled OpEx (Energy Costs). No link between real-time operational data and financial planning; resulting in reactive procurement.	Urgent SEC 3TG Conflict Minerals disclosure. Major pharmaceutical client required rapid compliance under a tight regulatory deadline.	Startup needed a robust, high-accuracy AI vision model to automatically detect artisanal mining by analyzing satellite imagery across complex biomes.
Action	Developed Big Data predictive OpEx models using operational and market data. Integrated models for real-time cost visibility at site level.	Led data analysis and consolidated raw data from 20+ international offices. Advised on compliance risk mitigation for SEC disclosure requirements.	Led as Principal Investigator (PI). Designed and implemented Convolutional Neural Network (CNN) models. Developed an automated data collection and prediction pipeline.
Result	12% sustained reduction in global energy costs, achieving millions in OpEx savings.	Successfully met critical U.S. regulatory disclosure. Delivery executed under urgent, one-day notice.	Delivered a validated CNN image classification model and system architecture.

Solution for Deltamas City, Indonesia: Industrial Finance AI Digital Twin: Guaranteed OpEx Reduction for Deltamas Tenants

Challenge #3: Innovative solutions for tenants in Industrial Areas

Delivery Milestones (4-week PoC Sprint):

- **Week 1: Scope & Data Linkage**
  - Pilot and (Connect energy/logistics data to the software).
- **Week 2: AI Model Prototype**
  - Deploy Functional Predictive Model for EMS/Logistics (Forecasts consumption/demand, identifies deviations).
- **Week 3: Financial Intelligence Layer**
  - Live OpEx Reduction Dashboard (Converts operational data into real-time Cost Variance and financial attribution).
- **Week 4: Validation & Testing**
  - Final ROI Analysis Report (Quantified savings for pilot tenant) and 6-month roadmap for roll-out across the Industrial Area.

Deltamas

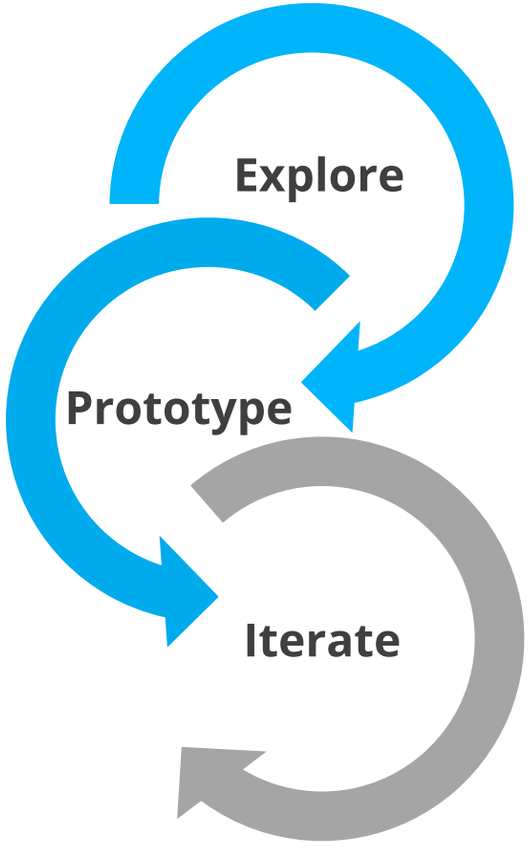

Potential Outcomes:

- **Guaranteed OpEx Reduction (10-12%)** for the pilot tenant (e.g., in energy consumption/logistics costs).
- **Real-Time Cost Variance Attribution.** Converts operational risks (e.g., EMS failure, logistics delays) into instant financial warnings.
- **Functional Industrial Finance AI Prototype.** A validated model for forecasting and optimizing the selected operational challenge (EMS or Logistics).
- **Immediate Enhancement of Industrial Area Value.** service offering from basic infrastructure to advanced financial-operational consulting.

Business model

Our approach

Transparent Pricing

Book a Free 30-Minute Call

- We discuss your challenge, goals, and constraints.
- No pitch–just a questioning conversation to see if we can solve your problem.

Receive Fixed-Price Proposal in 48 Hours

- Clear scope, defined deliverables, flat fee.
- You know exactly what you're paying and what you're getting before committing a dollar.

Get Results in 30-60 Days

- Fast deliverable outcomes, tangible outcomes, and clear next steps.
- Most engagements pay for themselves in the first month.

Most engagements start between **€1,500–€3,500 fixed price**.
No hourly billing. No scope creep. No surprise invoices.

Let us bring the tech to you.

Current: Based in Belgrade with global operations in Hong Kong, available for remote engagements globally.

Future: Centralizing global operations in Belgrade after mid-2026 to serve European clients.

Ready to Start?

Five years of deep-tech R&D evolved into affordable technical expertise and applications.

First call is free.
Quote in 24 hours.
Results in 4-6 weeks.

Why Ambient Systems for Indonesia - Japan Fast Track Pitch

- Proven impact in global supply-chain and energy projects
  - 12 % OpEx reduction (decentralised mining client)
  - 24 % ROI (Singapore-based vertical farming project)
- Repeated collaboration with Japanese corporates and IP programmes
  - Panasonic, Google Cloud, NUS GRIP
- Expert team, Hong Kong incorporated, Singapore dedicated contact address
  - rapid 4-week delivery, fixed-price engagements
- Experienced in secure contracts, timely execution, and joint IP development
  - WIPO-certified processes
- Established network in Asia-Pacific and Europe
- Invoice from Hong Kong entity, Singapore mailing address provided
  - Immediately available for on-site or remote collaboration
