Challenge detail (Please select challenge 1 if the challenge owner has only one challenge statement)

Challenge 1

First name

Ivan

Last name

Damnjanovic

Position

Founder & Director

Email

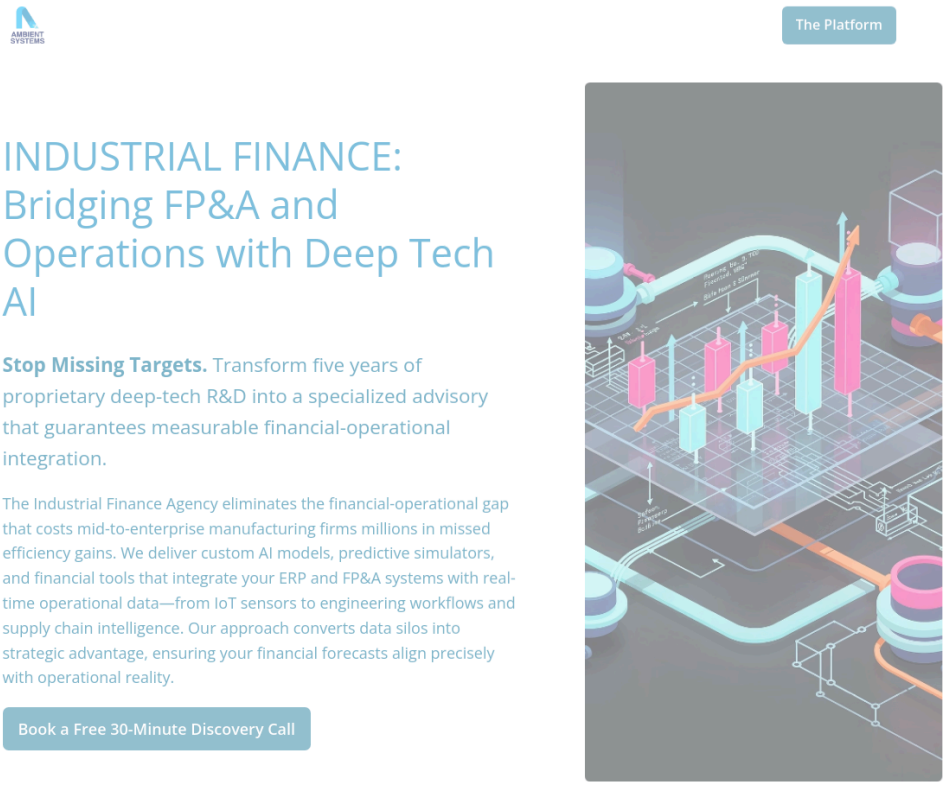

ivan@ambientsystems.ai

Phone number

[redacted]

Company Website

https://industrial-finance-vnnejo8.gamma.site/

Country

Hong Kong

Year of establishment

2023

Number of employees

1

Your category

Startup (Seed)

Business summary (around 200 words)

Ambient Systems is an integrated technology agency that uses 5+ years of R&D to provide engineering, FP&A, IP, and Industrial AI services through fixed, rapid engagements (€1,500–€3,500).

Incorporated in Hong Kong with Singapore contact address, we support key clients in Asia to consolidate control and expand globally by cutting costs and accelerating process decision making through data-based technology prototypes.

Proven results include:

• 24% ROI in vertical farming yield optimisation (Singapore-based facility)

• 12% OpEx reduction in energy costs

• TRL-6 level IP and technology

We specialise in optimisation, energy-system modelling, and IP co-development in global supply chains -- skillset directly applicable to reducing lead-times in sustainable energy projects, such as wind or oil & gas.

Past corporate collaborations include competition wins with Panasonic, Google Cloud, and National University of Singapore (NUS) GRIP.

We invoice from Hong Kong, deliver globally, and are immediately available to work on Singapore-based projects.

Proposal to the challenge (minimum 100 word)

Ambient Systems proposes a fixed-price, 4-week Intelligent Twin Proof-of-Concept on one critical PetroVietnam business process (e.g., Procurement). Leveraging our Ambient Platform and "Agency Model," we will deliver a scalable prototype by ingesting PVN regulations and data into a and modeling the workflow as a Process Digital Twin. The core deliverable is the AI Agent " ," which simulates the impact of regulatory changes and identifies workflow bottlenecks, providing a clear Impact Analysis Report and recommendations for process optimization. This engagement costs a transparent €1,500 – €3,500 (Fixed Price), with specific milestones including: Week 1: Definition; Week 2: Functional Process Twin Build; Week 3: AI Simulation and Analysis; and Week 4: Final Review and a Roadmap for scaling the solution to wider enterprise governance. This PoC guarantees tangible outcomes in efficiency and transparency, allowing PVN to safely test policies and turn compliance into a competitive advantage.

Collaboration track record

Panasonic (via ACE Singapore), Google Cloud for Startups Hackathon Singapore, NUS GRIP

Investor of the company

Currently bootstrapped / angel-investor backed. Previous NUS institutional round.

Pitch Deck, Company introduction material (less than 10 MB)

Ambient Systems

Integrated technical expertise in engineering, FP&A, AI, and IP.

Turning five years of deep-tech R&D into specialized consulting that delivers direct results.

Based from Belgrade with global operations in Hong Kong.

if you have any requests or question—for example, arranging a meeting—please fill in.
※Kindly note that we may not be able to fulfill all requests.

> To maximize the value of the 4-week sprint, we request a brief, 30-minute introductory call to jointly select the single most critical business process for modeling and verify data access with your technical lead.

Do you wish to share your application, including , with the supporters and other challenge owners?
(If you choose "Yes", you may be contacted by the supporters or other challenge owners based on the contact information provided in the application)

> Yes, I agree.

How did you know this event?

> Informed by event supporters

If you have been informed of the event from the event supporters such as VCs and accelerators, please fill out the name of your referral.

> JETRO Singapore Innovation Team invitation e-mail reminders.
