
AMBIENT
SYSTEMS

Singapore Population
6m in 2022
(2.7m more than in 1992)

World Population
8,000m in 2022
(2,500m more than in 1992)

Traditional ways of construction will need to be re-invented while using the same:
land, energy, and materials

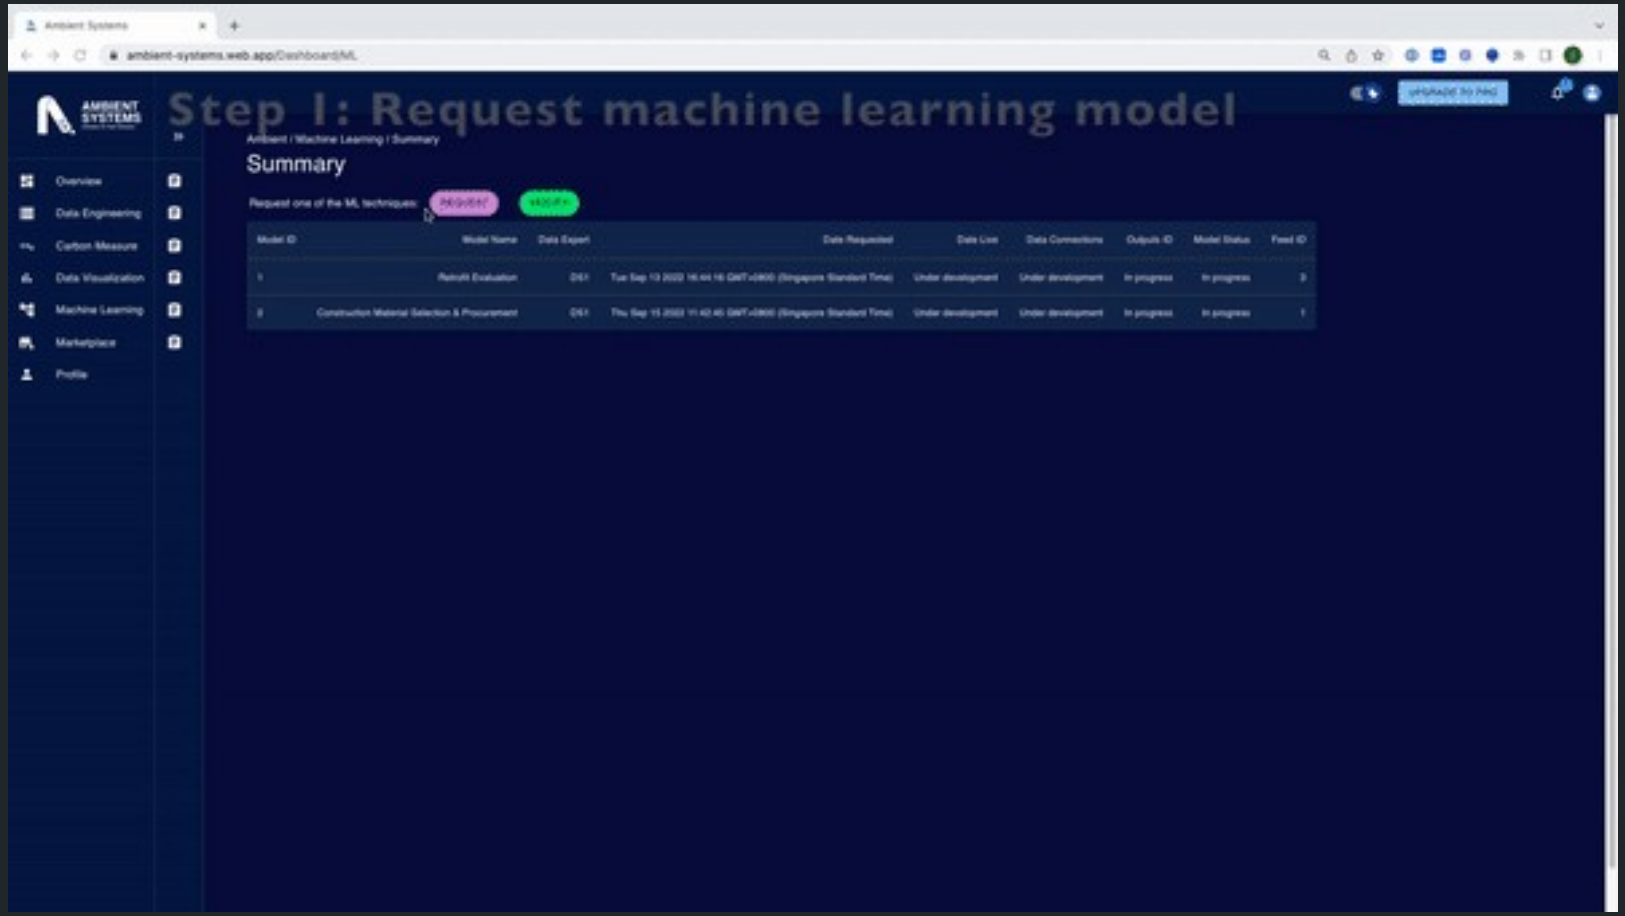

VISION
Leverage data science
to automate analytics
in highly technical industries

Imagine construction with 10-20% less greenhouse gas emissions

Or reducing labour man-hours by 15-25%

This could be our reality

Product Intro

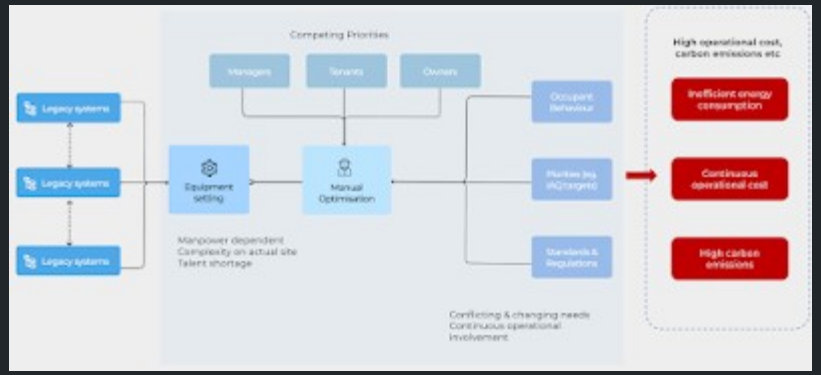

Streamlining FP&A for Technical Industries

Common Process

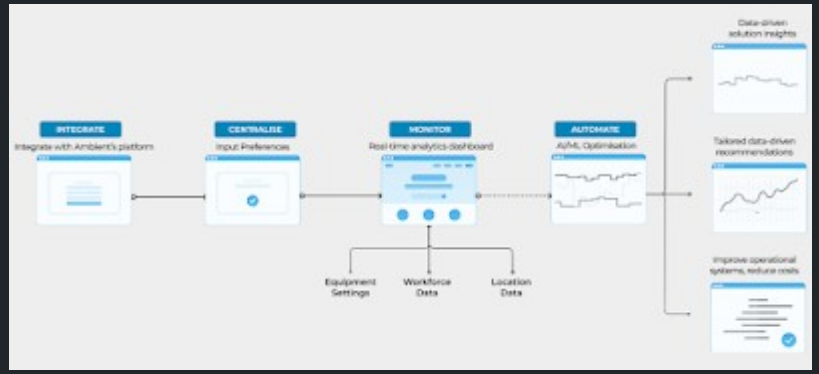

6-12 months

$100k to complete

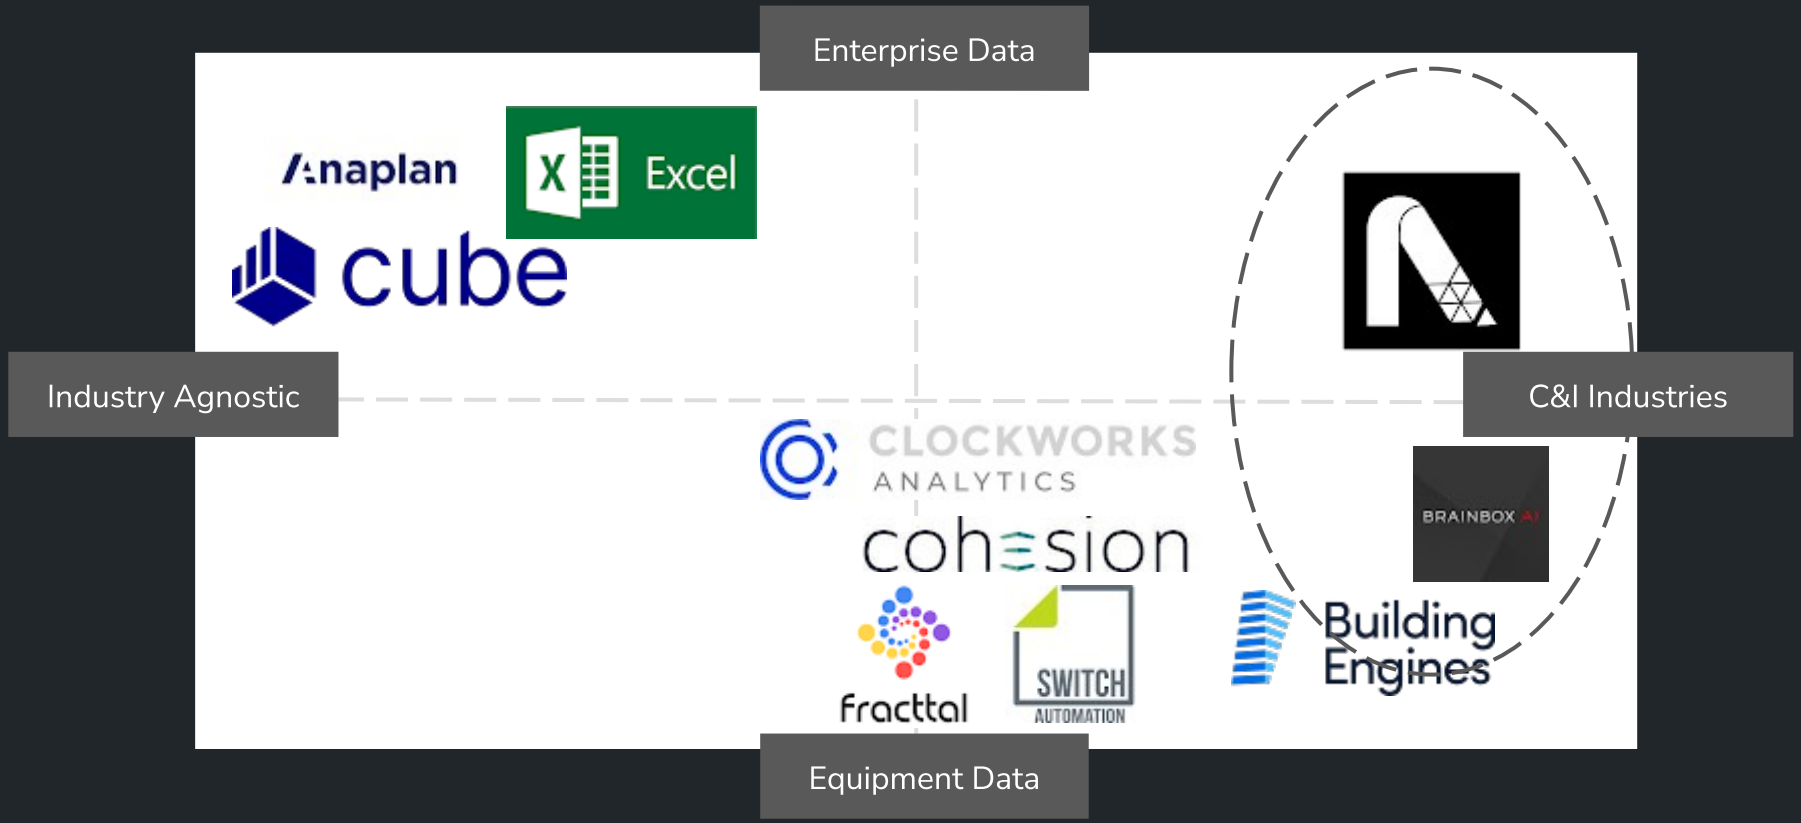

Ambient's Process

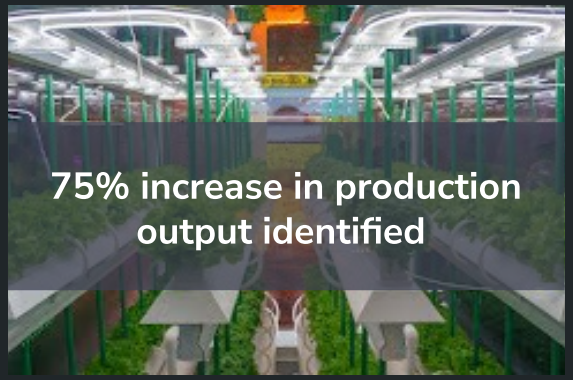

3 clicks and a few data sources

Real-time analytics software for the industrial sector

Proven and Validated across Industries

Optimising for maximum Crop output and quality

Indoor Farm
Singapore

Equipment Settings

Temperature
RH
CO2
Light

Crop Output & Quality

Optimising Energy Costs for Profitability

Gold & Nickel Mines
Africa and Central America

Energy Intensity

Unit Economics

Distributing Finite Energy Optimally

Sustainable Energy
Nepal, Cambodia, Indonesia

Finite Available Power

Energy Allocation per Equipment

Current & Future Construction Focus Co-Development

Real Estate Developers & Owners

Sustainability Reporting

Contractors & Builders

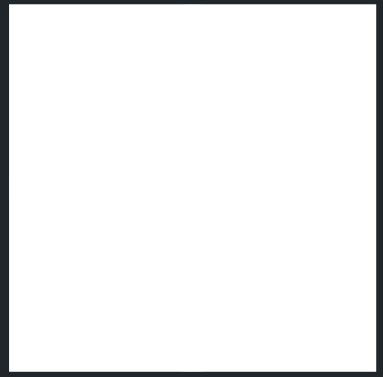

Predictive Maintenance

Operators & Service Providers

Retrofit Analysis

Founded by tech & finance experts

Founder

Hiring

CFO & Chief of Staff

(Co-Founder Roles)

Team Members

- 2 industry advisors
- 3 part-time developers
- 1 marketing intern
- 2 data analytics interns

We've completed cutting edge incubators and programmes in Singapore for technology and AI startups

Comparisons

Obayashi Feature Requests & Ambient Readiness

No.	Requested Feature	Category	Current Readiness	Future Readiness (post BEAMP)
1	Calculate Emissions from Logistics Vehicles	Function	1	5
2	Calculate Emissions from Construction Machines	Function	1	5
3	Visual Analytics	Model	1	3
4	Breakdown of Emissions per Vendor	Platform	3	5
5	Breakdown of Emissions per Vehicle or Machinery	Platform	3	5
6	Identify Operation Abnormalities	Model	3	5
7	Integration with Other System (e.g., PM and logistics)	Platform	3	5

Ambient delivers net zero pathways directly to front-line service teams & decision makers

1. [redacted]
2. Meet Regulatory Requirements
3. Minimize energy intensity of existing services & products

Technical
CMMS
BMS/BIM
BOM

Risk
Energy Prices
Climate Risks
Labour & Materials Costs

Operational
Electricity
Gas & Fuel
Water

Existing Assets
Operational Carbon
(51% of emissions)

- Demand Shaping
- Electrification
- Efficiency
- DERs Deployment

New Assets
Embodied Carbon
(49% of emissions)

- Passive Design
- Material Alternatives
- Efficient Design
- Construction Electrification
- Materials Routing
- Design for Recycling

Ambient's differentiation is ingenuity and simplicity
