
AMBIENT
SYSTEMS
Reimagining the future of smart industries

THE PROBLEM

Building operation management is limited by people and processes.

Talent Shortage

Lack of highly trained and experienced operators who can optimize multiple intelligent systems.

Technological Complexity

Many operate with **outdated legacy systems** and physical equipment that **lack interoperability.**

Competing Priorities

Different physical systems have **different requirements** based on the unique needs of occupants and operators.

THE OPPORTUNITY

Digital Transformation through integrated Cyber-Physical experiences

Machine Intelligence

Edge Devices

Cyber Security

Automation

One Platform
Vetted by Experts

THE OPPORTUNITY

Ambient aims to solve a ubiquitous challenge across industries

THE SOLUTION

Applied AI for Cyber-Physical Systems

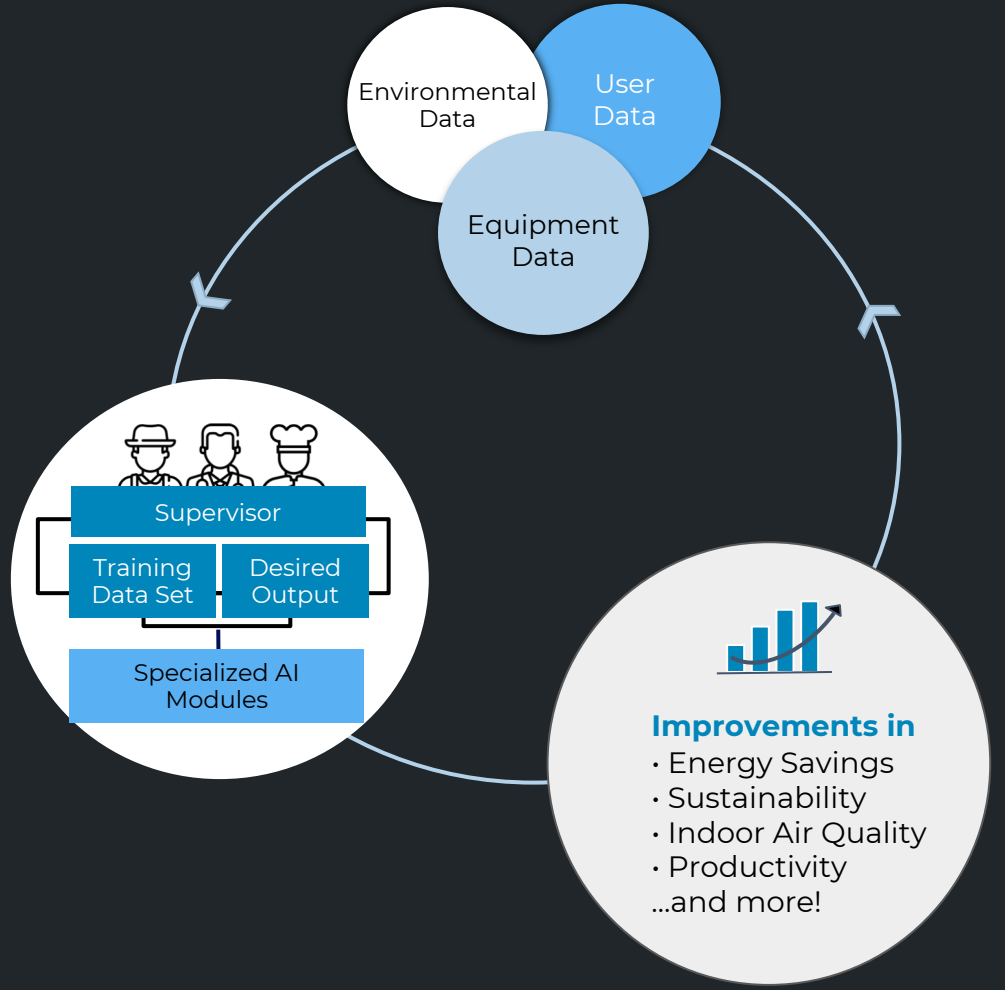

Streamlined real-time optimization of indoor operations with Ambient's proprietary algorithm

BENEFITS

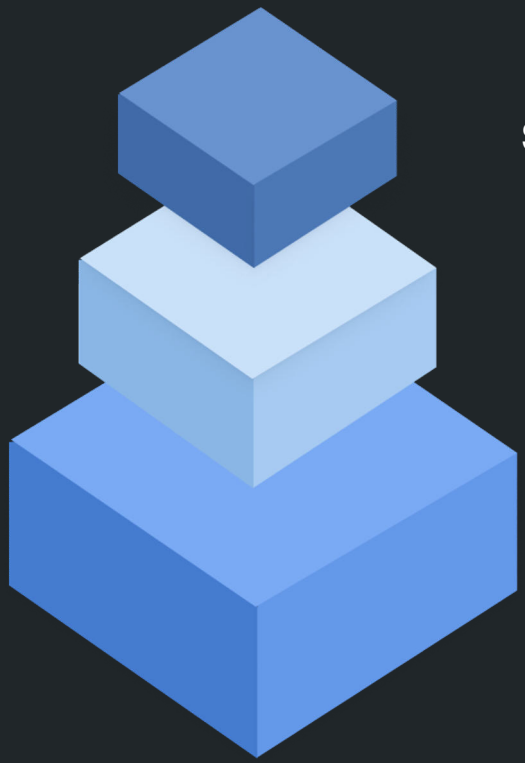

System optimisation beyond energy efficiency

Enables systems to function autonomously based on their physical surroundings

MARKET POTENTIAL

AI adoption in industries & homes presents a $18B opportunity growing at 28%

$1B

Serviceable Obtainable Market
APAC.
- Industries : $500M
- Homes: $500M

$9B

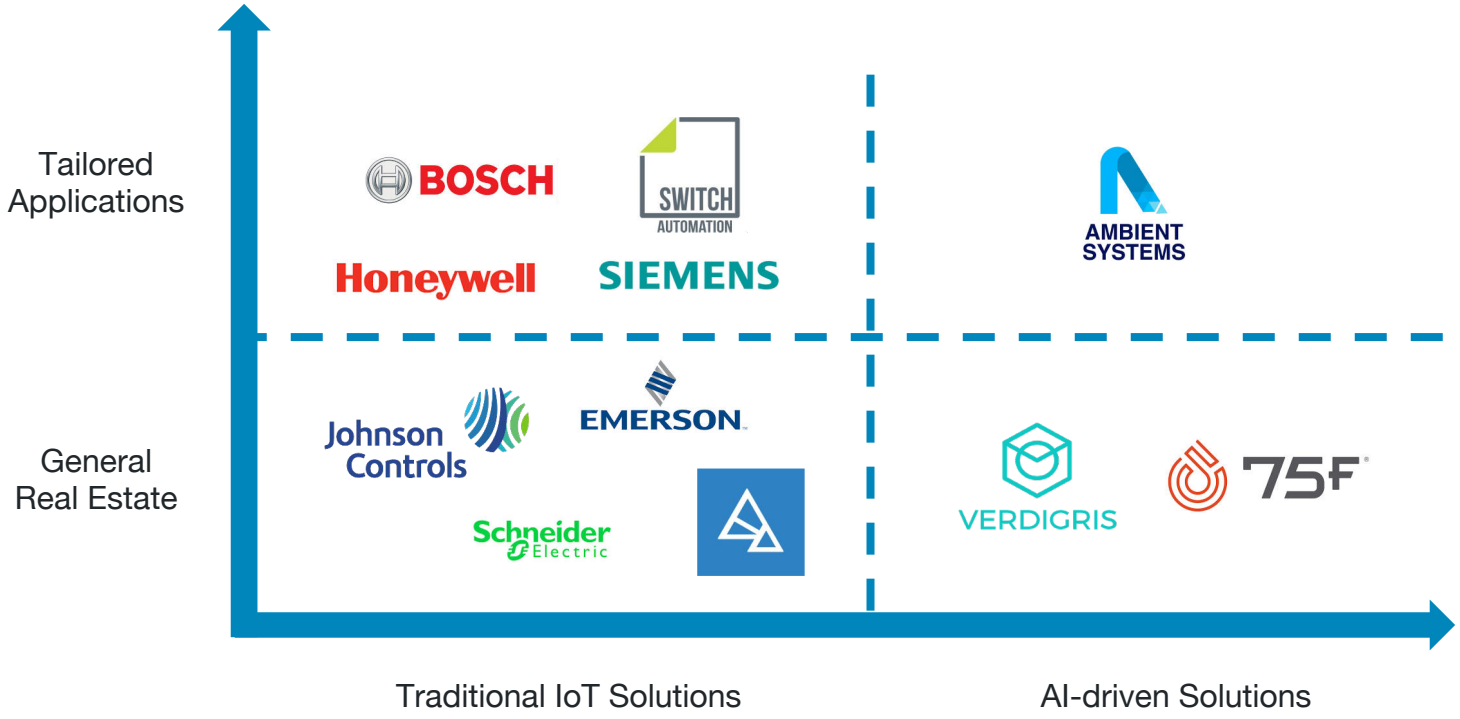

Serviceable Obtainable Market
APAC, EU.
- Industries : $4.5B
- Homes: $4.5B

$18B

Total Addressable Market
APAC, EU, US, growing at 28% CAGR until 2030

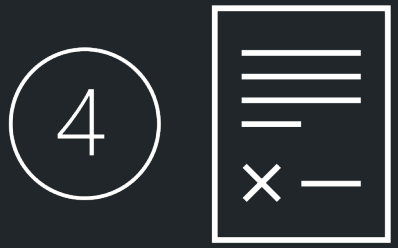

DIFFERENTIATION

We offer tailored AI-driven platform solutions that are inherently scalable.

MARKET POTENTIAL

Received traction with beachhead market and support from industry partners

Four agreements with AgTech companies in Singapore valued at approximately SGD $200K

AgTech in Singapore Presents an overall **$1M** market opportunity

Appendix

Why Now: Trends Driving AI Adoption

AMBIENT SYSTEMS

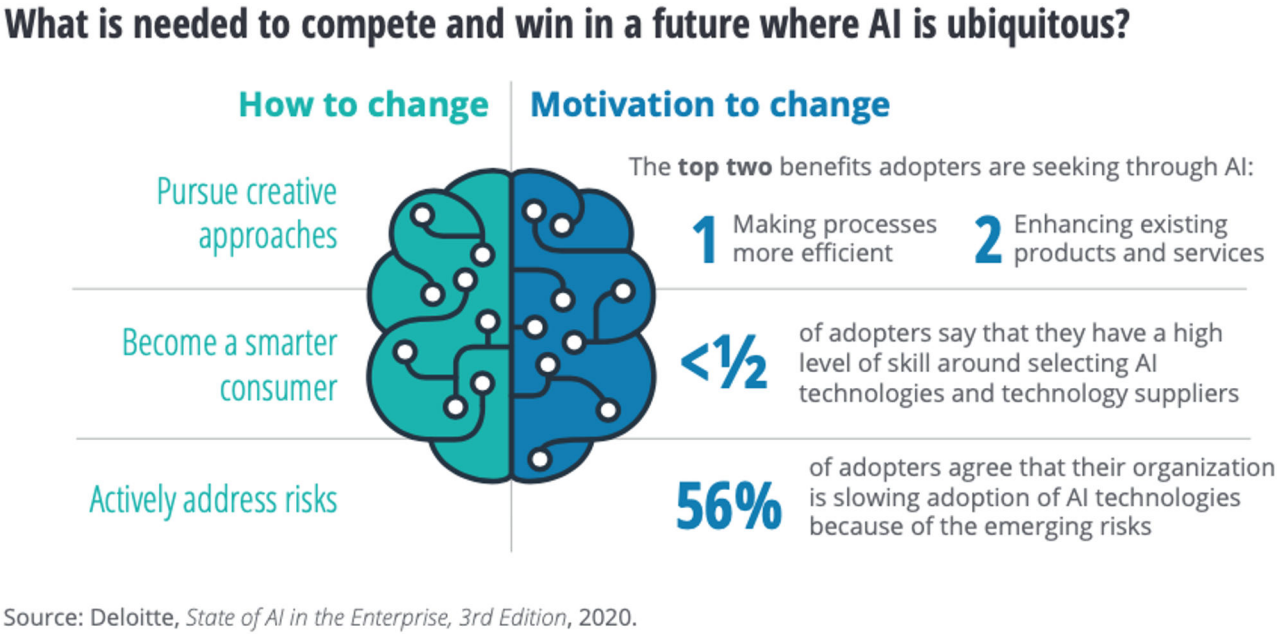

Productivity	Sustainability	Cybersecurity
1. Process Optimization	1. Energy Efficiency	1. System Complexity
2. Enhanced Visibility	2. Carbon Management	2. Increased Attack Surface
3.	3. ESG and UN SDG Reporting	3. Compliance

Market Trends: Digitization

Market Trends: AI-enabled Productivity

Source: Deloitte

Increasing Focus on Sustainability

90%

of consumers are concerned about the Environment

Source: Sustainability Matters Now
More Than Ever for Consumer Companies BCG, 2020

50%

of CXOs see tackling climate change as their generation's top priority

Source: Industry 4.0: At the intersection of readiness and responsibility Deloitte, 2020

Ambitious targets to green the built environment in Singapore by 2030:

80% green buildings

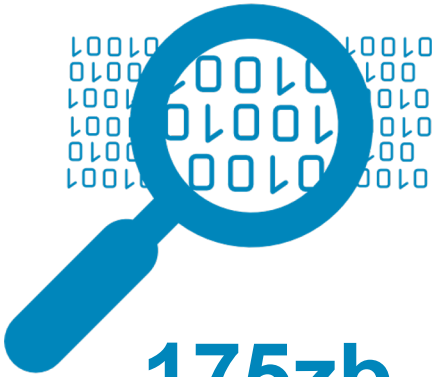

80% improvements in energy efficiency

80% new buildings to be super lower energy

Source: Industry 4.0: At the intersection of readiness and responsibility Deloitte, 2020

Source: SP Digital

Market Trends: Cyber Security

175zb

predicted collective sum of the world's data by 2025

Seagate 2018

65% of Organisations have a shortage of Cybersecurity staff

(ISC)² 2019

59% of Companies have experienced a data breach caused by a vendor or third party

Ponemon Institute 2018

51% of Cybersecurity professionals say their organisation is at risk due to Cybersecurity staff shortage

(ISC)² 2019

Undesired Interactions Between Building Conditions and Crops

(External Building Conditions)

Temperature

(Vertical Racks Ecosystem)

Soil Moisture

Lighting

Nutrients

Humidity

Building Conditions affect crops

- Inconsistent Environment
- Habitat for Mold and Pest
- Affect level of photosynthesis

Current Solutions are Lacking

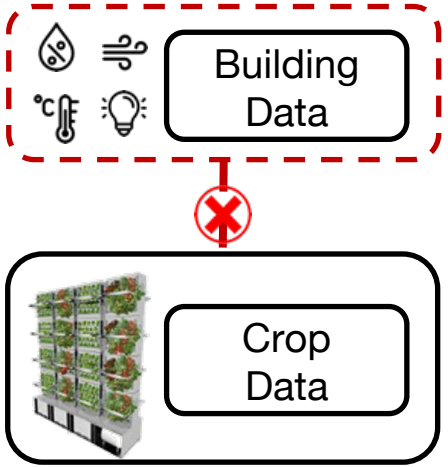

Farm systems do not collect building data

Container farms not built for scale

Building solutions are too general

Data-Driven Automation

AMBIENT SYSTEMS

Climate Data

Crop Data

Equipment Settings

Monitor	Parameter
	Air Temperature
	Relative Humidity
	CO2
	VOCs

Crop Insights	Parameter
	Soil Temperature
	Soil Moisture
	pH level
	Electrical conductivity (EC_w)
	Crop specific parameters

Sample Action
• Adjust temperature • Adjust ventilation • Adjust lights • Turn on fogging machines • Turn on CO2 regulator • Balance irrigation and humidity levels
