
AMBIENT
SYSTEMS
Reimagining the future of smart industries

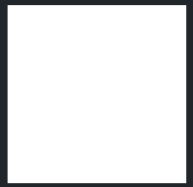

THE PROBLEM

Building operation management is limited by people and processes.

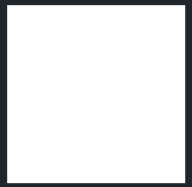

Talent Shortage

Lack of highly trained and experienced operators who can optimize multiple intelligent systems.

Technological Complexity

Many operate with **outdated legacy systems** and physical equipment that **lack interoperability.**

Competing Priorities

Different physical systems have **different requirements** based on unique needs of occupants and operators.

THE OPPORTUNITY

Digital Transformation through on-demand AI-driven automation

Machine Intelligence

Edge Devices

Cyber Security

Automation

AI Models
Vetted by Experts

THE SOLUTION

Applied AI for Cyber-Physical Systems

Streamlined real-time optimization of building operations with Ambient's proprietary algorithm

APPLICATION

COVID-19 has exacerbated the challenge of maintaining optimal IAQ across every industry

Limited space for onsite installation of new technologies in existing buildings

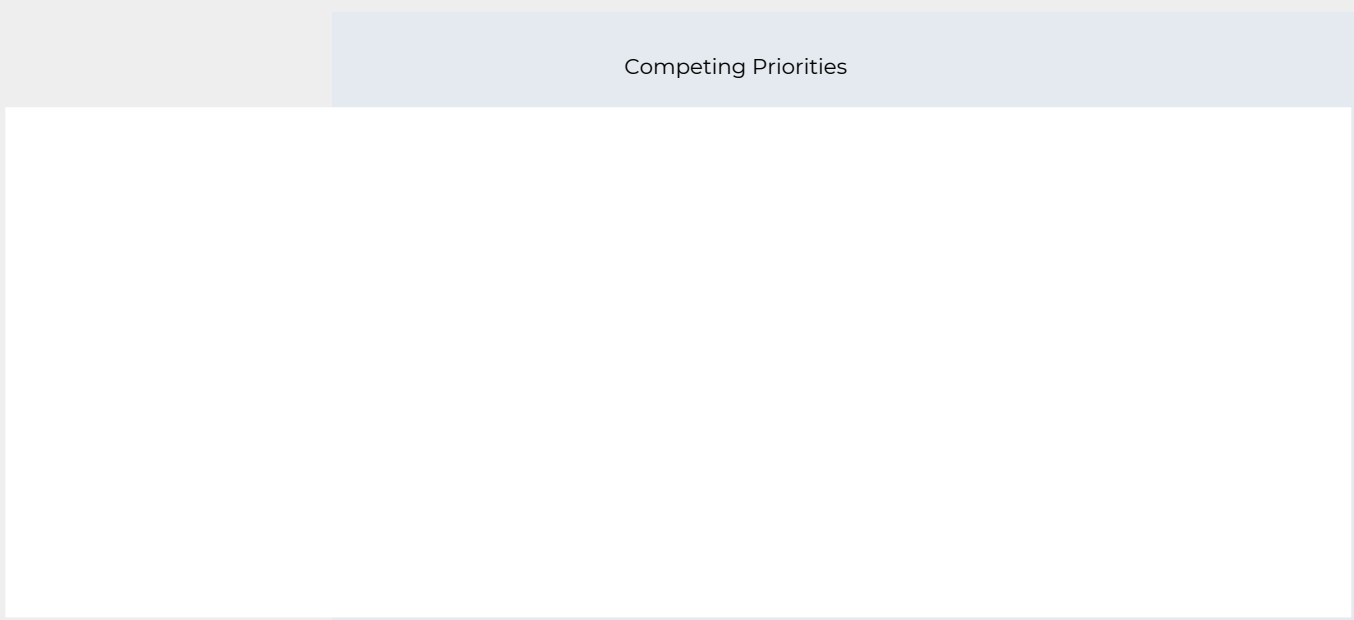

Lack of solutions that are energy efficient or have low carbon footprint

Solutions available are not always cost effective and proven technologies

Managing complex building interactions such as IAQ is an emerging environmental concern validated by Industry & Academia, and our own market validation

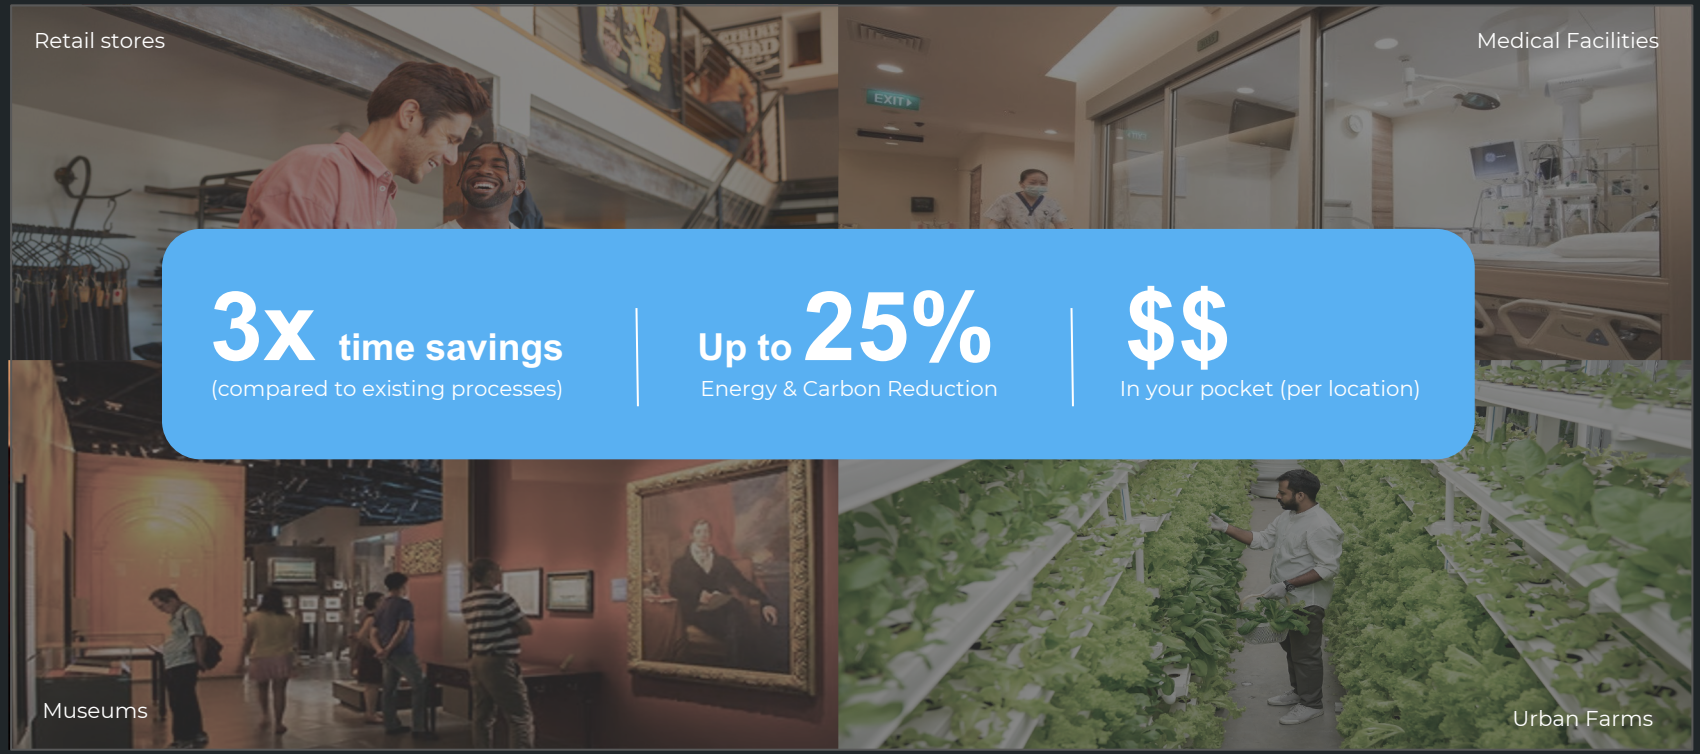

Before: IAQ management process

After: IAQ management process (with Ambient)

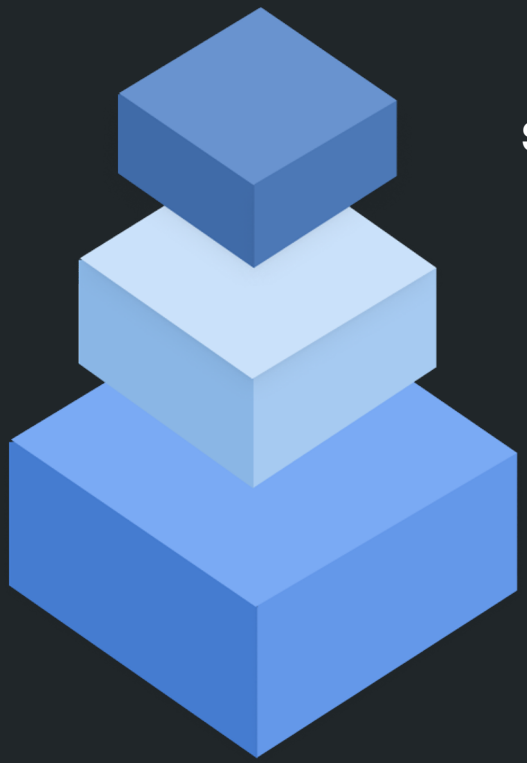

APPLICATIONS

Ambient aims to solve a ubiquitous challenge across industries

MARKET POTENTIAL

AI automation in businesses & homes is a $18B+ global market, growing at 28%

$1B

Serviceable Obtainable Market (SOM)
APAC.
- Businesses: $500M
- Homes: $500M

$9B

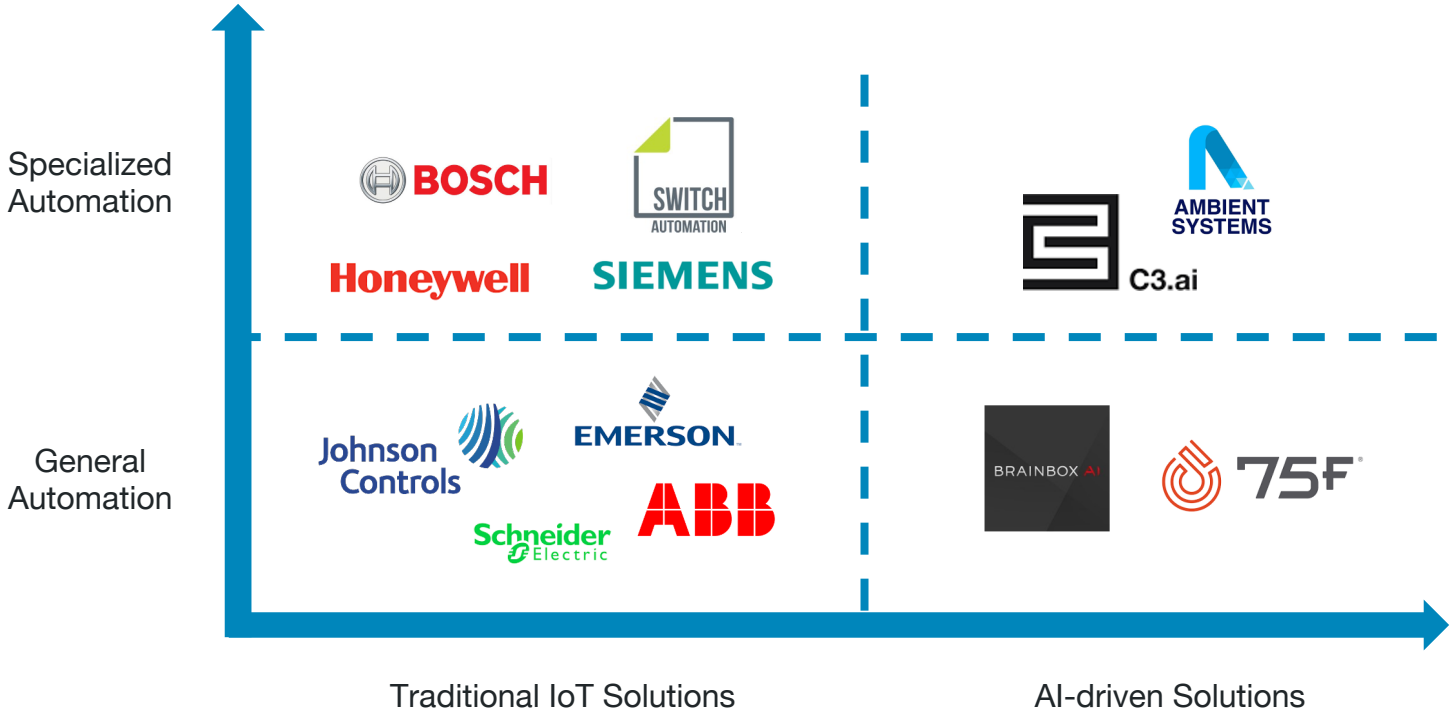

Serviceable Available Market (SAM)
APAC, EU.
- Businesses: $4.5B
- Homes: $4.5B

$18B+

Total Addressable Market (TAM)
APAC, EU, US

COMPETITIVE ANALYSIS

Ambient offers AI-driven automation beyond energy efficiency

DIFFERENTIATION

Ambient aims to be a leader in service, cost, and customization

	Ambient	Data Scientist	In-house
Service	On-demand Subscription	Limited Time Project	Hard to recruit Requires on-boarding Training Management overhead High turnover risk
Cost	Affordable	Expensive	Expensive
Customization	Specialized	Generic	Generic Requires multiple experts to tune Technical uncertainty and risk Expensive and complex IT vendor management process Cybersecurity risks

MARKET VALIDATION

Traction with beachhead market in AgTech and support from industry partners

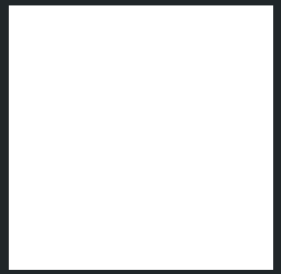

Three agreements with
AgTech companies in Singapore
valued at S$150K annually

AgTech in Singapore Presents an overall **S$ 1M** market opportunity

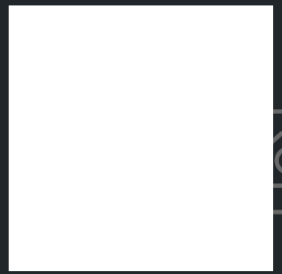

OUR TEAM

CEO
Engineer with 3+ years startup experience in clean tech and deep tech

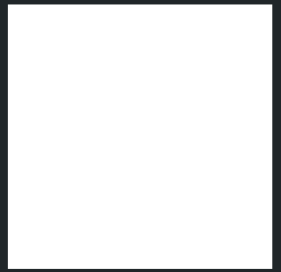

COO
Business operator and entrepreneur with background in VC and APAC Unicorn startup

Scientist
Lead developer for cutting edge machine learning models across industries

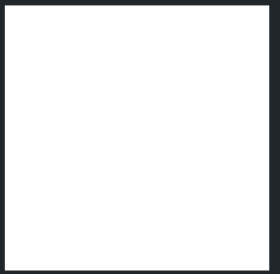

Web Developer
Built websites and applications for top brands in APAC

Digital Product

Service & UIUX Designer with background in VC & Industrial Design

Graphics & Creative

Graphic Designer with background in visual communications

MOVING FORWARD

Company Roadmap

THE ASK

Raising USD 300K Pre-Seed Round with USD 75K committed

$37.5K
RAISED

$37.5K
COMMITTED

$225K
FUNDING GAP

Use of Funds

- Runway: 12-18 months (~ mid 2023)
- Hire core team: Engineering, Design, and Marketing
- Enable co-innovation and joint-product development
- Markets: Singapore and APAC
- WIPO and filing costs
