
AMBIENT
SYSTEMS
Reimagining the future of smart cities

[redacted] hold significant ts

Commercial Buildings: 6.6%

Road: 11.9%

Aviation: 1.9%

Shipping: 1.7%

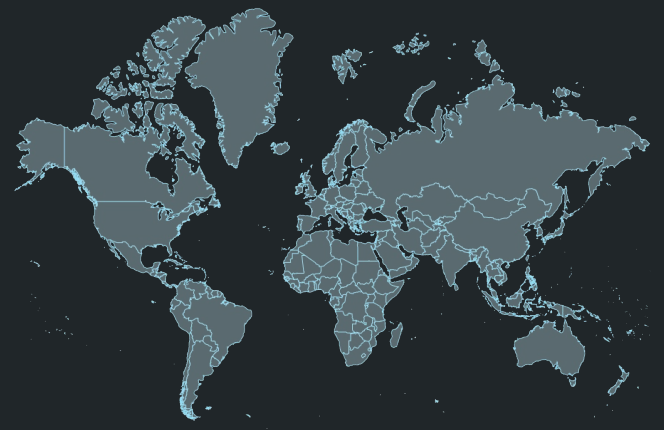

Transportation: 16.2%

Industry: 24.2%

~ 50% of global CO_2 emissions

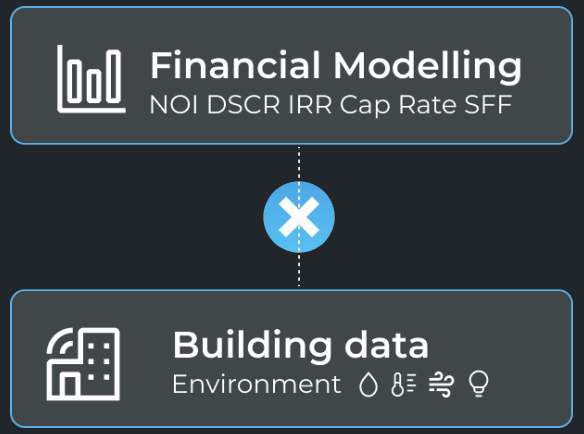

CURRENT SOLUTIONS

Decarbonization solutions are missing key items

01

Climate Targets not Fully Included

02

Financial Modelling disconnected from Technical Data

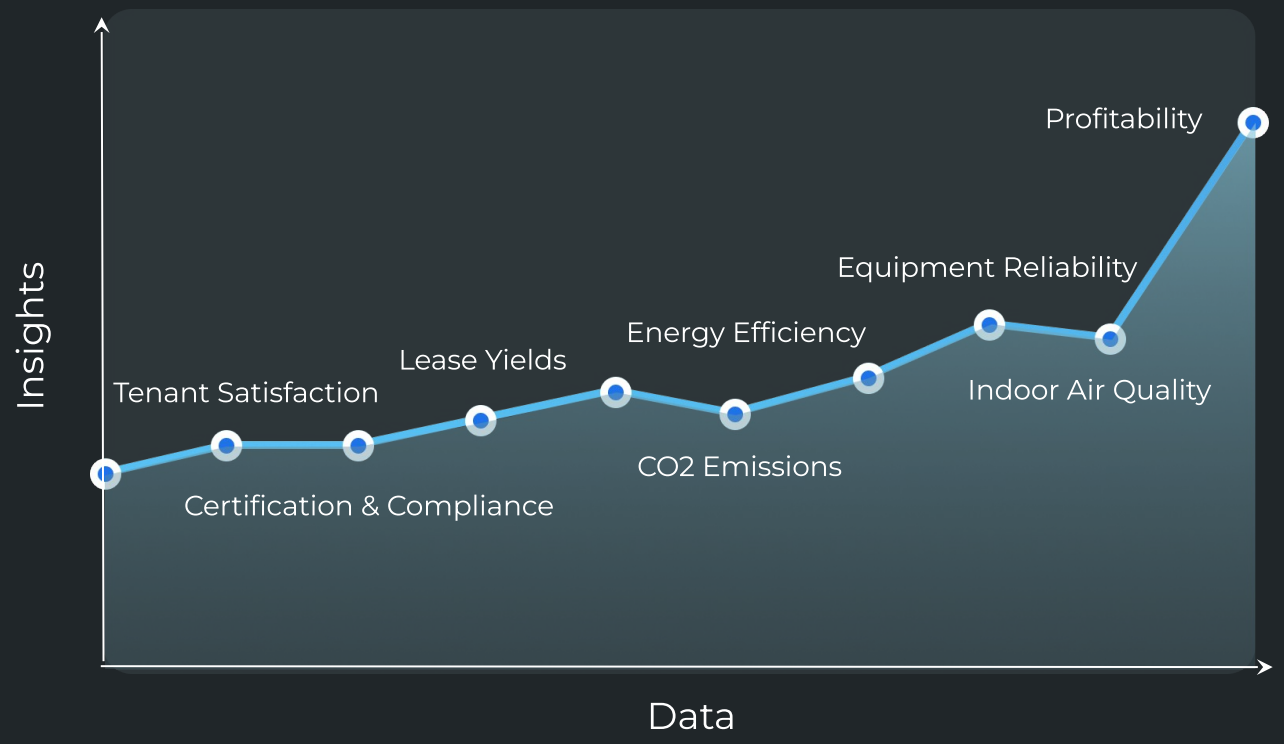

03

Hard to Find Analytical Expertise

AMBIENT'S SOLUTION

Empowering asset managers to hit their decarbonization targets based on data science

Minimize transition risk by:

01. Streamlining data collection & analysis

02. Quantifying embodied & operational emissions

03. Identifying decarbonization pathways

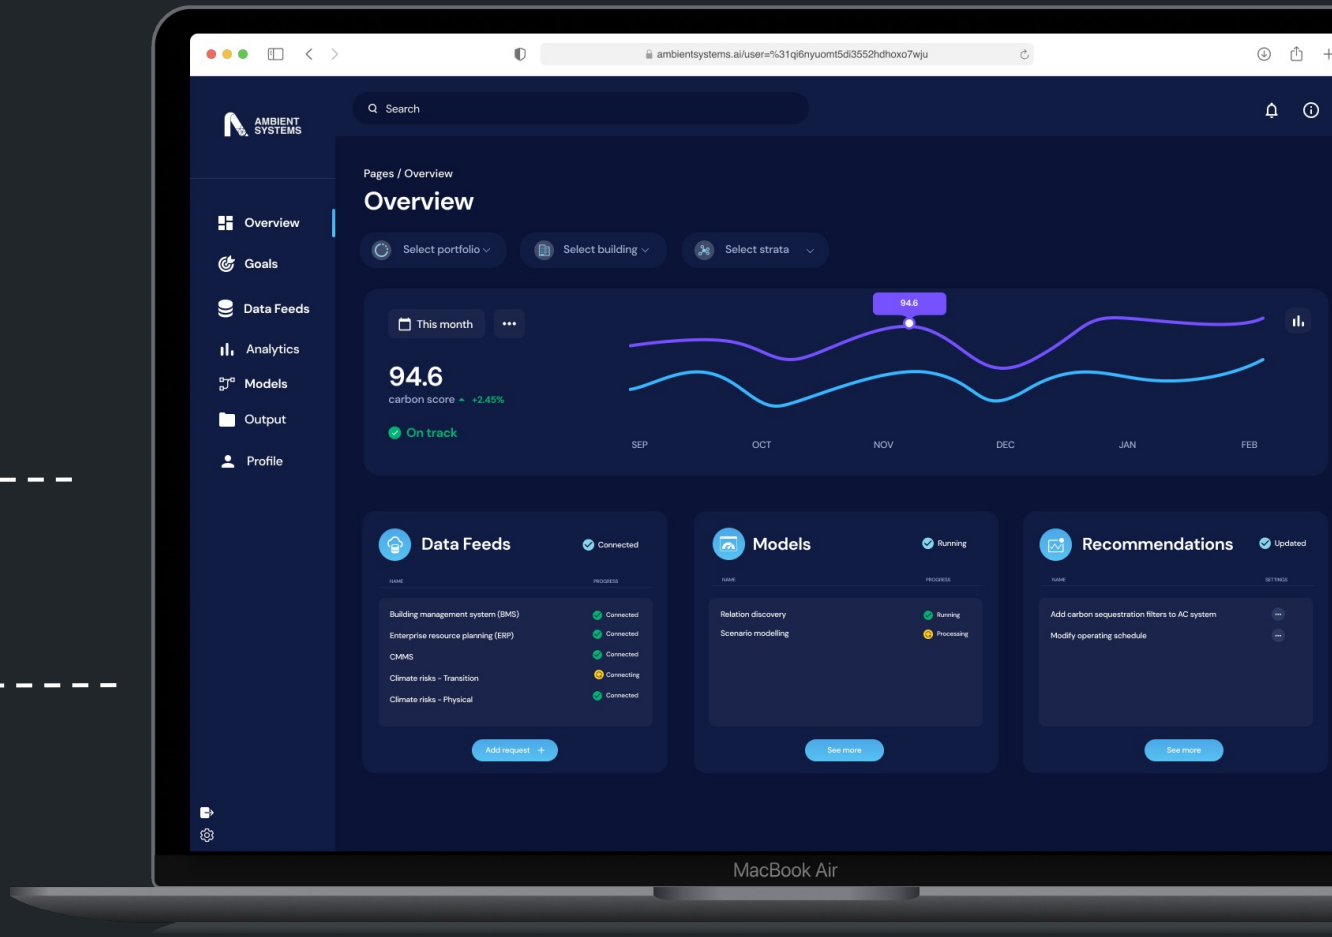

PRODUCT

All-in-one Decarbonization Platform for Physical Assets – powered by the Cloud & Data Science

AUTOMATE LIFE CYCLE ASSESSMENT TO QUANTIFY CARBON FOOTPRINT

EFFICIENTLY IDENTIFY NET ZERO PRODUCTS & STRATEGIES

AUTOMATICALLY DELIVER INSIGHTS & REPORTS TO STAKEHOLDERS

BUSINESS MODEL

Ambient provides a tailored SaaS offering for end-to-end asset decarbonization

Flexible On-demand Subscription

No more onboarding, training and manpower reliance. Fast up-time and results through Ambient's subscription service

Simple and Affordable Pricing Plans

No more reliance on expensive consultants or in-house teams. One platform powered for all your data science use cases

Specialized AI Models built on Domain Expertise

Reach business goals across energy efficiency, environment, and compliance with Ambient's state of the art AI models

APPLICATIONS

Ambient can be used to decarbonize a broad range of facilities and physical assets

Industrial

Manufacturing
R&D
Life Sciences and BioTech

Retail

Malls
Shopping Centers
Grocery Stores

Offices

High Rise
Low / Mid Rise
Data Centers

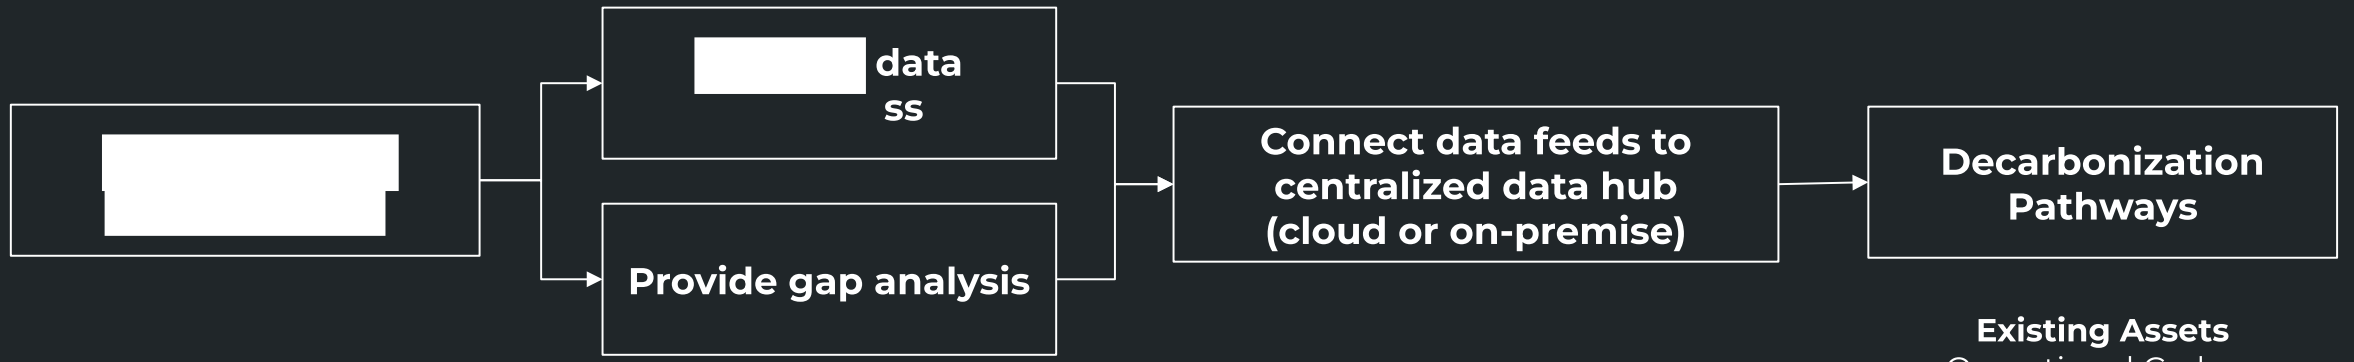

Transportation & Logistics

Public Transit
Airports
Warehouses and DCs

IMPLEMENTATION

Ambient delivers net zero pathways directly to front-line service teams & decision makers

1. [redacted]
2. Requirements
3. Minimize energy intensity of existing services & products

Technical
CMMS
BMS/BIM
CMMS

Risk
Energy Prices
Climate Risks
Labour & Materials Costs

Operational
Electricity
Gas & Fuel
Water

Existing Assets
Operational Carbon
(51% of emissions)

- Demand Shaping
- Electrification
- Efficiency
- DERs Deployment

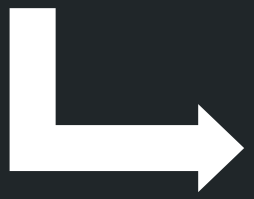

New Assets
Embodied Carbon
(49% of emissions)

- Passive Design
- Material Alternatives
- Efficient Design
- Construction Electrification
- Materials Routing
- Design for Recycling

HOW DOES IT WORK

Machine learning module provides recommendations based on operational data

COMPETITIVE ANALYSIS

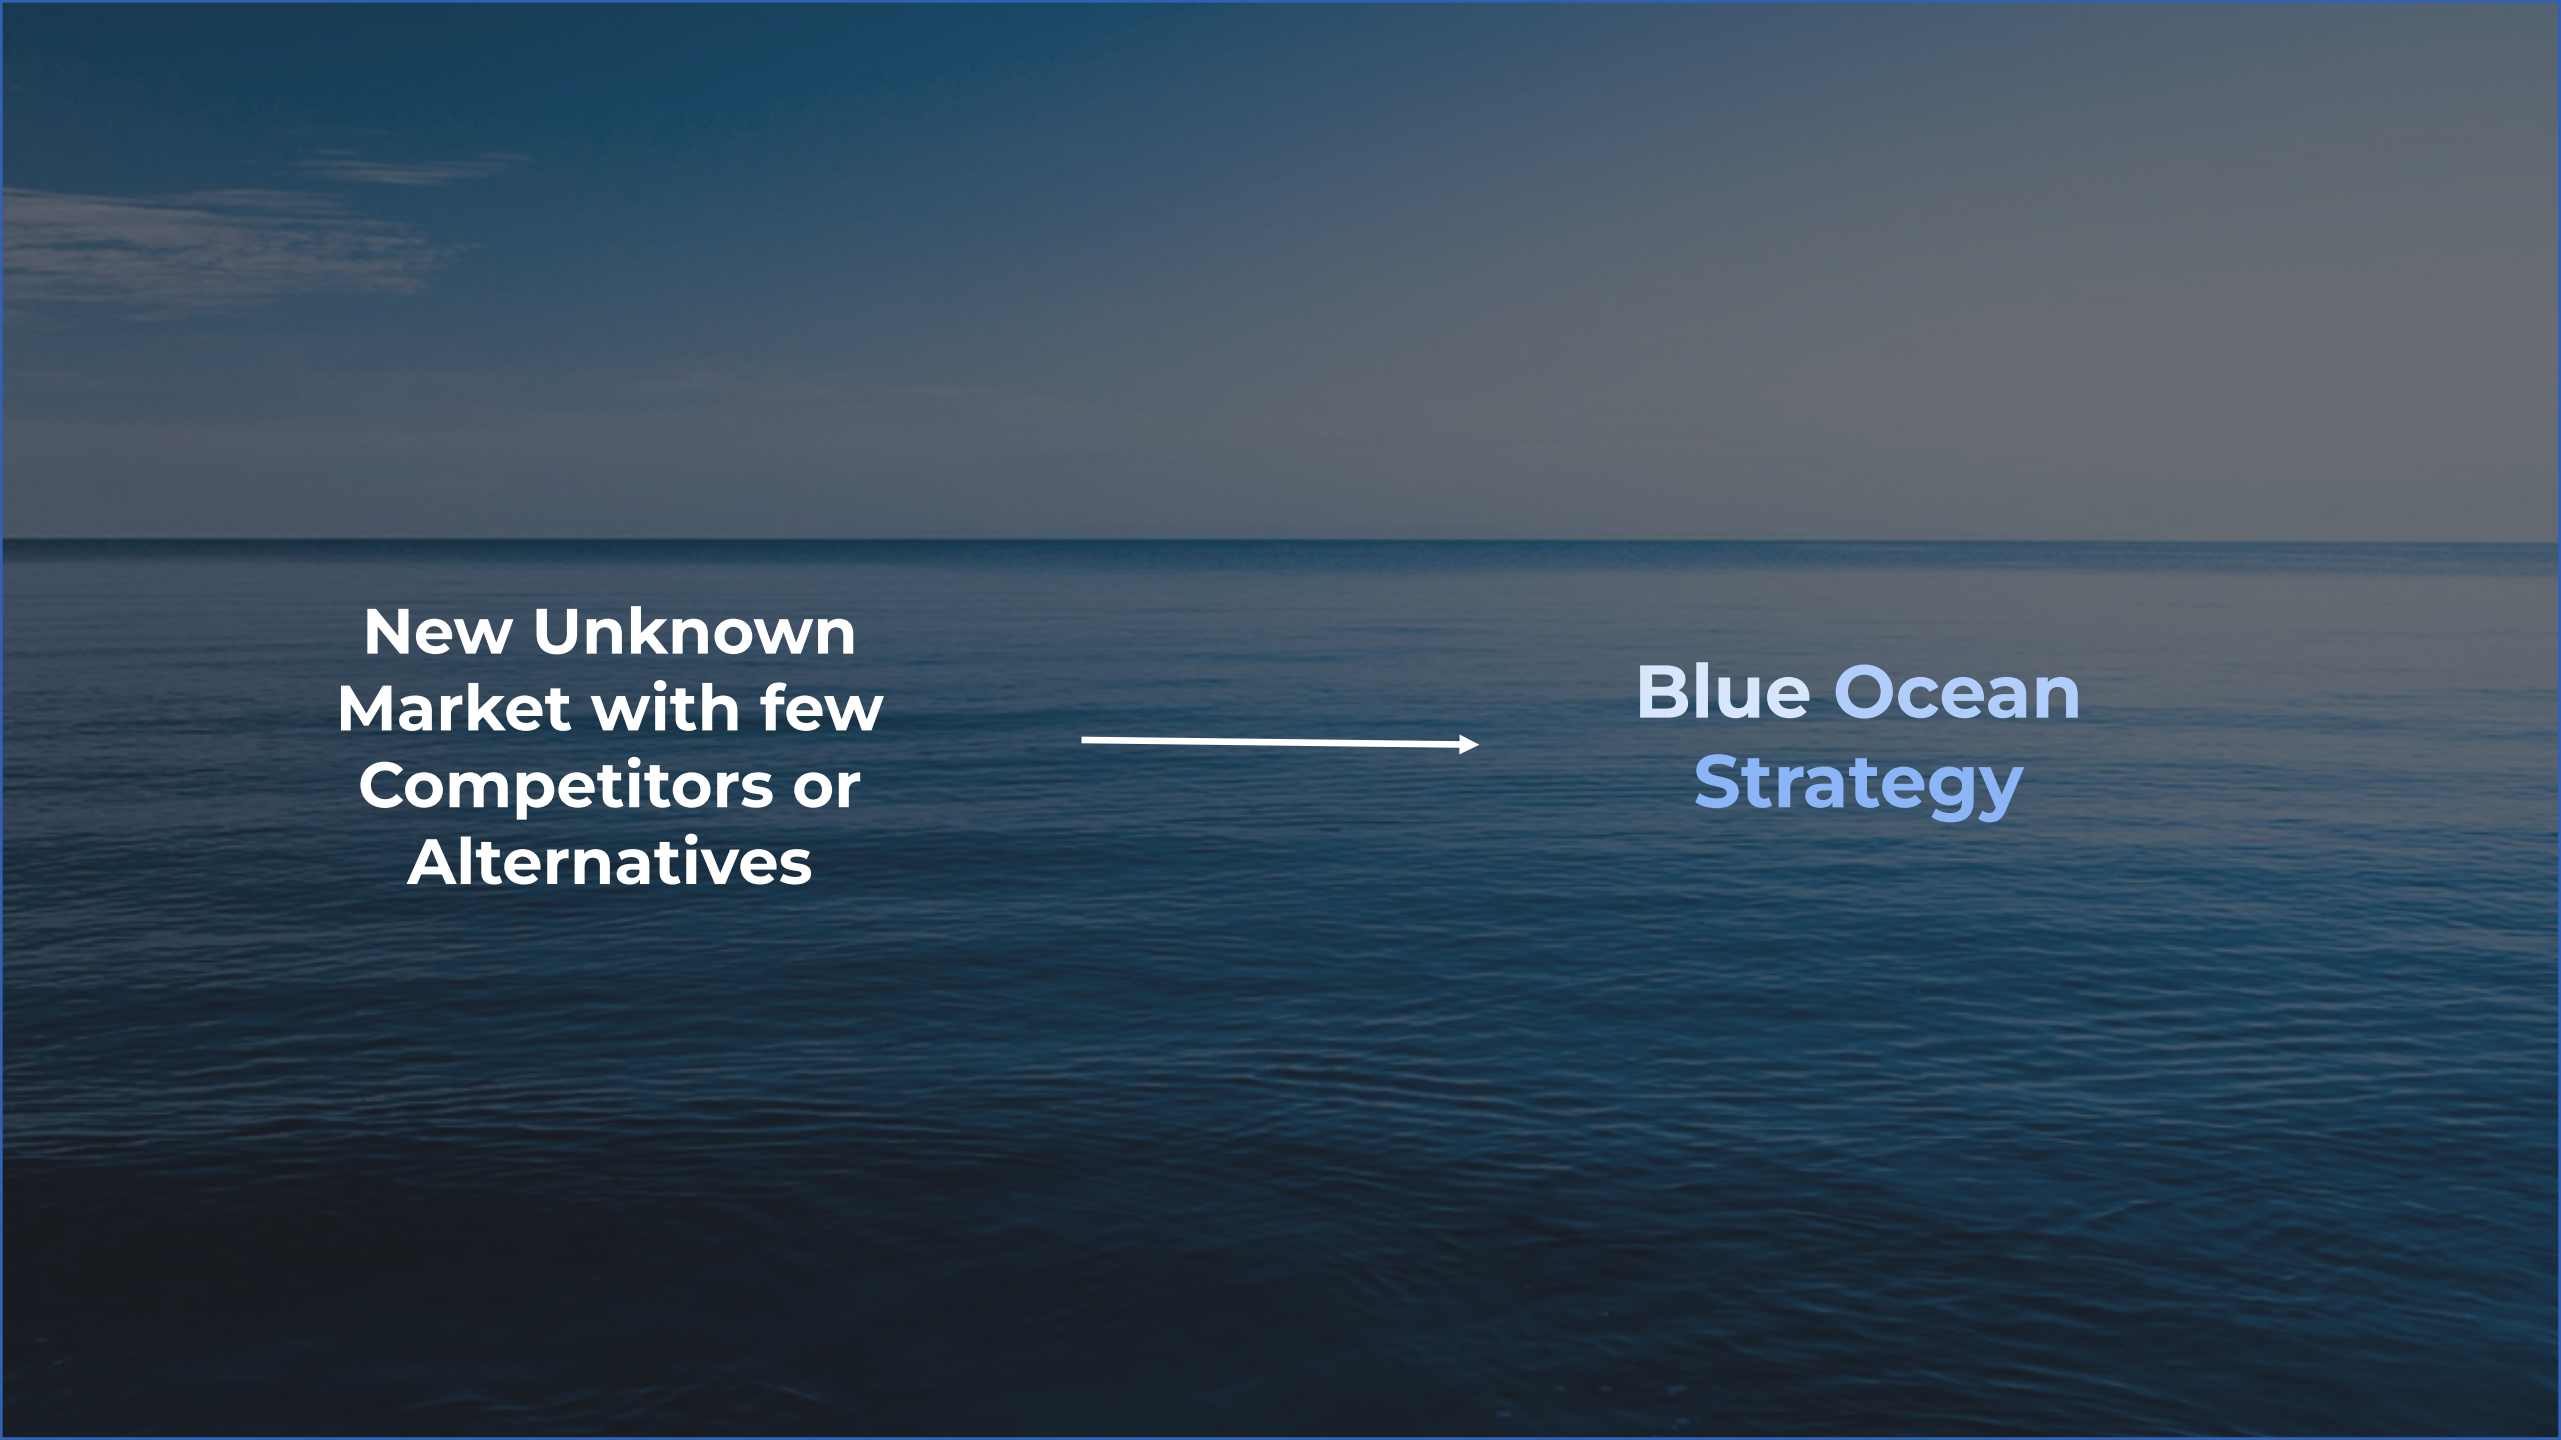

Ambient combines decarbonization domain expertise with machine learning capabilities

DIFFERENTIATION

Ambient aims to be a leader in service, cost, and customization

	Ambient Systems SaaS Subscription	**Alternative: Hire a consulting agency**	**Alternative: Hire an in-house team**
Service	On-demand Subscription with Dedicated Account Engineer	Fixed Project Duration Limited Maintenance Service Multiple Points of Contact	Hard to recruit Requires on-boarding Expensive training Management overhead High turnover risk
Cost	Fixed	Variable	Variable
Modelling	Based on domain expertise	Limited domain expertise	Requires multiple hard-to-find experts to tune Technical uncertainty and risk Expensive and complex IT vendor management process Cybersecurity risks

New Unknown Market with few Competitors or Alternatives
Blue Ocean Strategy

COMPETITIVE ADVANTAGE

Deep domain expertise in energy and engineering with connections to a global network

Domain Expertise

1. Saved $130MM of annual energy costs for world's biggest gold mining company using Big Data
2. Building Science know-how for efficient envelope design
3. Developed 200+ solar energy projects in Asia

Engineering Tech Stack

1. Built using leading cloud vendors (AWS, GCP, and Azure)
2. Embedded machine learning (Jupyter, MATLAB, Tableau)
3. Partnership with synthetic data companies to augment existing datasets

Global Partner Network

1. Member of United Nations & One Young World Ambassador Network for Sustainable Energy
2. Leveraging climate risk data from Switzerland's largest insurer
3. ASHRAE and IFMA Member

ABOUT US

The team behind Ambient

CEO
Deep tech entrepreneur with 3+ years experience in clean tech and machine learning

UX/UI Designer
Service & UIUX Designer with background in VC & Industrial Design

Data Scientist
MIT Machine learning engineer with experience building cross-industry AI applications at Meta and AWS

Developer
Experienced developer of gaming apps and web applications

Mentors & Advisors

Dr.
Experienced technology executive, investor, and educator with 35 years of leadership experience at Oracle and Hewlett-Packard

TRACTION

Backed by leading local institutions and intellectual property

- Launched in July 2021 in Singapore
- Deep tech startup focused on machine learning innovation
- Founder sole inventor of Singapore patent (10202105064T)
- International team with members in Singapore, Toronto, Boston, and Belgrade
- $100k funding from National University of Singapore investment arm
- Agreements with 2 companies in Singapore + 1 in negotiation
- Domain expertise in civil engineering, construction, and cyber physical systems
- Team background in computer science, engineering, finance, and clean tech

VISION

Ambient empowers managers of physical assets to achieve net zero portfolio growth through data science innovation
