Investment

Is your startup incorporated?	Yes
Incorporation Date	05/07/2021
Funding Stage	Seed
Raising	US$ 1m
Investor(s)	NUS, Family and Friends

Description

Elevator Pitch (50 words)
Finance is central to managing smart cities. Yet CFOs are left with mainly accounting data. Ambient empowers them with the multi-dimensional data and platform needed for smart financial planning & analysis.

Problem / Opportunity (100 words)
Right now, most businesses are using tools that were designed for a different era. These tools work well in a reactive way—you collect data when you need it, then compile it and analyze it months later. But what if there was a better way? What if you could use technology to gather data faster and more efficiently?

Solution / Product (100 words)
Ambient provides SaaS subscription for financial planning & analysis (FP&A) that is finance driven over data driven. We believe FP&A process begins with a business need, followed by data. Technology and UI we developed reflects this finance-first approach.

Business Model (50 words)
We provide a two-tier offering. Entry-level subscription costs $99/month for SMEs $999/month for enterprise. This is projected to grow to $5k/month and $200k/month for SME and Enterprise users based on subscription to more accessible and affordable data science as a service offering. Similarly, we provide clients with customized add-on subscriptions for reporting tools, such as decarbonization for commercial real estate players.

Competitive Advantage (50 words)
Customer-centric solution that leverages latest advances in technology for product differentiation in design, speed, and accuracy. Our value prop is an effective, efficient, and tailored FP&A process for target industries.

Traction (50 words)
Completed a proof-of-concept (POC) with a vertical farm in Singapore in 2021 and secured a patent for this invention. Built a CRM pipeline of 40 prospects in the two main markets (confidential). Vertical Farming: Archisen, Singrow, Sustenir, + 4 more. Real Estate & Construction: Lendlease, Keppel, Obayashi, + others. We also have channel partnership with companies like Microsoft, universities, and government-linked organizations.
