Description and Business Model

Describe shortly your startup. Which problem you solve and what is your solution?

Ambient's key technology is enterprise analytics software for 'traditional' energy-intensive industries like construction, buildings, and agriculture, among others. Although AI platforms and technologies are widely available, they require extensive customization. This puts them beyond the reach of traditional industries that rely on software and IT as an enabling function.

How do you make money?

Fees

What is the startup´s unique value proposition?

Disruptive or new technology

Who is your primary target customer?

B2B (Large Corporations)

Traction
