Ambient Systems - PVN Pitch

Slide 1: Introduction

"Good evening, esteemed METI, JETRO, and challenge owners. I'm Ivan Damnjanovic, Founder of Ambient Systems—a borderless agency driving financial performance via engineering, FP&A, AI, and IP. From Toronto today, I'll show how our 5+ years of R&D delivers results for APAC-Japan firms like PetroVietnam."

"Quick question: How often do approval bottlenecks disrupt your ops? Our twin solves that."

(Smile at camera, pause 3 sec. Share screen now. 25 sec.—Hook grabs attention virtually.)

Slide 2: Company Overview

"Ambient is a lean and global firm, born from NUS R&D with a PCT-patented platform at TRL 6. We are registered in Hong Kong with Belgrade operations—where I'll be based for future projects—and networks in Singapore, Europe, Japan, and US. We have $150K invested in R&D, and 10+ years' experience across 3+ regions. Our HK hub enables seamless remote delivery, turning deep-tech into gains—anywhere."

(Highlight stats on screen; energetic tone. 25 sec.—Add a world map icon to visualize networks if possible.)

Slide 3: Agency Overview

"We offer AI for industrial finance, FP&A, and IP R&D, with software subscriptions in-development. Specific services include energy engineering, supply-chain optimization, vertical farming, and patent support—all fixed-price for quick wins."

(Point to list via cursor; keep brief. 15 sec.—No change; it's tight.)

Slide 4: Case Study

"For a Singapore farm with climate issues, we built an ML solution—consisting of sensors, engine, and dashboard—securing LOIs and a 24% ROI model with 4-6 month payback. This validated market and IP, proving our ability for end-to-end execution."

"Just like PVN's fragmented data, we unified silos for holistic gains."

(Emphasize ROI; relate to PVN: "Similar to your ops challenges." 20 sec.—Tie stronger to their "fragmented process data.")

Slide 5: Previous Experience

"Just as we cut 12% OpEx in mining by data integration, we can unify PVN's processes. Track record: 12% savings, urgent SEC disclosures, CNN satellite models—delivering under pressure remotely."

"These mirror PVN's regulatory demands, with AI for real-time insights."

(Scan table with cursor; tie to PVN. 20 sec.—Add "real-time" to echo PVN's compliance monitoring ask.)

Slide 6: PoC/Solution

"For PVN's approval bottlenecks, our Digital Twin PoC **leverages multi-agent AI and knowledge graphs**: Week 1 ingest data **(using your anonymized dossiers and metadata)**, Week 2 build twin, Week 3 simulate policies **in a safe sandbox for regulatory changes**, Week 4 roadmap **with expert consultations**. Outcomes: Bottlenecks identified, safe testing, dashboard—15%+ gains, scalable to ESG."

(timeline arrow; stress remote scalability. 35 sec.—Bold additions directly pull from PVN's "collaboration needs" for tech/assets, showing integration.)

Slide 7: Our Approach

"Simple: 30-min explore call, fixed-price prototype in 48 hours, iterate 30-60 days. Pays back fast; scalable remotely or on-site."

(Follow cycle diagram. 15 sec.—No change; reinforces low-risk.)

Slide 8: Leadership

"Why us? in Computer Science and bridge tech-business. With 6+ APAC years, I'll lead from HK base with Top Talent Pass for Vietnam/Japan on-site if needed."

(Point to photo/credentials; personal trust build. 25 sec.—Capitalize "Master's" for consistency; no big add.)

Slide 9: Why us for Inno Vietnam–Japan

"Ready for JETRO co-dev: 12% OpEx cuts, 24% ROI in Singapore, Panasonic Deep Tech Challenge win, City.Tech Tokyo exhibit, Google Cloud runner-up, WIPO PCT. HK invoicing, remote and on-site available."

"Let's co-design KPIs and deploy at your offshore sites for ADX expansion."

(Highlight logos; strong regional tie. 20 sec.—Add ties to PVN's "co-design" and "deployment support" assets.)

Slide 10/11: Appendix/Details

"Thank you. Appendix has details—**including how we predict and optimize governance per your vision.** Let's Q&A on driving PVN efficiency virtually or in-person."

(Stop share; invite interaction. 10 sec.—Reference leadership message for aspirational close.)
