Ambient Systems: Borderless consulting that turns deep-tech innovation into measurable financial & operational gains – anywhere, anytime.

Summary Dual Version

Name	TBD	Ambient Systems Limited	Solutions Flux D'IA Inc.
Regions	Europe	Asia	Americas
Location	Belgrade, Serbia	Hong Kong, China	Montreal, Quebec [Replaced by US]
Model	TBD	Agency/Consulting [no subscription]	Live SaaS product [Subscription]
Incorporation Date	TBD	Nov 21, 2023	March 11, 2024
Industrial classifications	TBD	• HSIC 6202/7022	• NAICS: 511210/541511 • SIC: 7371 (Computer Programming Services).
Purpose & Activities	• Owns domains • Develops IP	• Platforms: Upwork, Freelancer, Catalant, GLG, AlphaSights • Freelancing & contract work (remote, online) • Bid on projects + respond • Use Calendly for discovery calls/meetings • Remote delivery • Bill via Hong Kong entity • Inherit awards and news from SG (and globally)	• Phone number (Google Voice) • Montreal (North America) Address • Live SaaS product • Pricing: Pricing: $499–$2,999/mo per site/farm/project (SaaS + optional hardware sensors)
Domains	ambientsystems.rs ambientsystems.me ambientsystems.uk ambientsystems.se [Needs an update]	ambientsystems.hk ambientsystems.sg [Re-direct]	ambientsystems.ai ambientsystems.ca
Future Offering	• ambientsystems.app – scalable SaaS product (no advice) • Eventual registration as a holdings company	• Territorial intelligence (PhD thesis in progress) • Financial "CFA" Advisory • Long-term positioning: Eventual B Corp certification • Google Business Profile	• Long-term positioning: Eventual B Corp certification • Apple Developer Account • Google Business Profile

TBD: ambientsystems.xyz, ambientsystems.app, ambientsystems.io

Belgrade, Serbia

TBD

TBD

- Manages Europe domains:
- ambientsystems.rs
- ambientsystems.me

- ambientsystems.se [Needs an update]

Freelance/Contract for HK entity
X? for QC (Canada/US) entity

Hong Kong

Ambient Systems Limited (est. 2023)

Advisory focus internationally

- **Consulting & Advisory**: High-level technical leadership—e.g., advising on transforming data infrastructure into ROI via GCP/Python/AI strategies (no hands-on building).
- **Data Engineering**: Design/recommend multi-tenant ETL pipelines (Python/Pandas), secure DB setups, CI/CD automation—deliver reports/architectures, not code deployments.
- **Cloud & AI Orchestration**: Strategy for GCP/serverless, LLM+RAG workflows, compliance designs (PDPA/GDPR)—focus on blueprints/roadmaps.
- **AI Optimization**: Advisory on patented logic (WO) for efficiency/ROI in finance/energy—e.g., framework assessments yielding 24% gains, without custom implementations.
- **IP Strategy**: WIPO patent drafting, prior-art searches, FTO analysis, commercialization roadmaps—leverages your deep-tech experience.
- **Delivery mode**: Remote calls (Calendly/Zoom), reports/docs, short-term projects (1–3 months, HKD 50k–200k+ fees).

Future offering:

- Territorial intelligence (PhD thesis in progress)
- Financial “CFA” Advisory

Agency [Consulting] -- via HK

- Upwork Agency
- Freelancer Agency (Singapore contact)
- Catalant Agency

Quebec

Solutions Flux D’IA Inc. (est. 2024)

AI Software Subscription

Current:

- Live SaaS product
- Completed NSERC-funded co-development with Centennial College
- Past recognition in Singapore: Panasonic Deep Tech Innovation Challenge, Google Cloud, WIPO Patent (en/fr), , WIPO Scale up your IP programme
- Phone number (Google Voice)

Future:

- ?

Operations:

- Boot strapped by the founder
- $0 funding raised externally (no plans

Ambient Systems Limited

Ambient Systems Advisory

Borderless AI + Smart Infrastructure Consulting for Resilient Industries

	Renewable Energy (Solar and Storage)
	AgTech (Vertical / Indoor Farming)
	Essential Retail / Staples (Supply Chain)

Core Services:

- AI-driven optimization audits & roadmaps
- Smart infrastructure system design & integration (leveraging your WIPO patent)
- Financial planning & management (FP&M) frameworks
- IP/patent strategy + prior-art searches
- Supply-chain resilience & vendor scorecards
- Sustainability compliance & resource-allocation models
- Pilot program design & LOI generation

We help finance and operations leaders in decentralized renewables, vertical farming, and essential retail turn deep-tech innovation into measurable financial and operational gains (average 24% ROI).

Our FinTech-powered FP&M SaaS and advisory services are purpose-built for finance + operations teams inside resilient industries.

Why Us?

Borderless Delivery| Proven 24% ROI | Resilient Industries & Models

Ambient Systems

FinTech SaaS for Resilient Industries

Ambient is a unified, real-time SaaS dashboard that integrates financial planning, operational metrics, compliance tools, data management, and AI-powered insights into one intuitive platform.

Purpose-built for finance + operations teams in:

- Renewable Energy (Solar & Storage)
- AgTech (Vertical / Indoor Farming)
- Essential Retail / Staples (Supply Chain)

Key Features (already live in the MVP):

- Real-time Financial & Operational Metrics
- AI-Generated Recommendations & Alerts
- Data Status & Compliance Tracking
- Location-Aware Dashboards
- Secure multi-tenant architecture (GCP + Firebase)

Case Study

End-to-End Climate Management & Financial OptimizationSolution for AgTech (Vertical / Indoor Farming)

BUSINESS CHALLENGE

Indoor farmers face significant crop loss and high operational costs due to the inability to maintain optimal climate conditions. Existing solutions are fragmented, manual, and labor-intensive, often leading to unmonitored temperature and humidity imbalances that promote mold and pests, ultimately reducing yield quality and quantity.

APPROACH TO SOLUTION

- Defined the full-stack ML solution (sensors, optimization engine, real-time FP&M SaaS dashboard) and the scalable B2B SaaS + hardware business model
- Secured pilot Letters of Intent (LOIs) with two key vertical farm operators to validate demand and establish the initial pipeline.
- Developed the financial model projecting a 24% improvement in client margins with a rapid 4-6-month customer payback period.
- Produced all investment deliverables (Investment Deck, Business Plan) and defined the IP/patent strategy for the core optimization algorithm.

OUTCOMES ACHIEVED

- 24% ROI Model: Developed a model projecting a 24% improvement in client margins with a rapid 4-6-month customer payback.
- Validation: Achieved critical market validation and established a pipeline through secured commercial LOIs.
- IP Foundation: Defined the patent strategy for the core optimization algorithm.
