

Making Decarbonisation Accessible
Through
Applied Data Science

VISION

Empower real estate leaders
to achieve net zero portfolio growth
through data science innovation

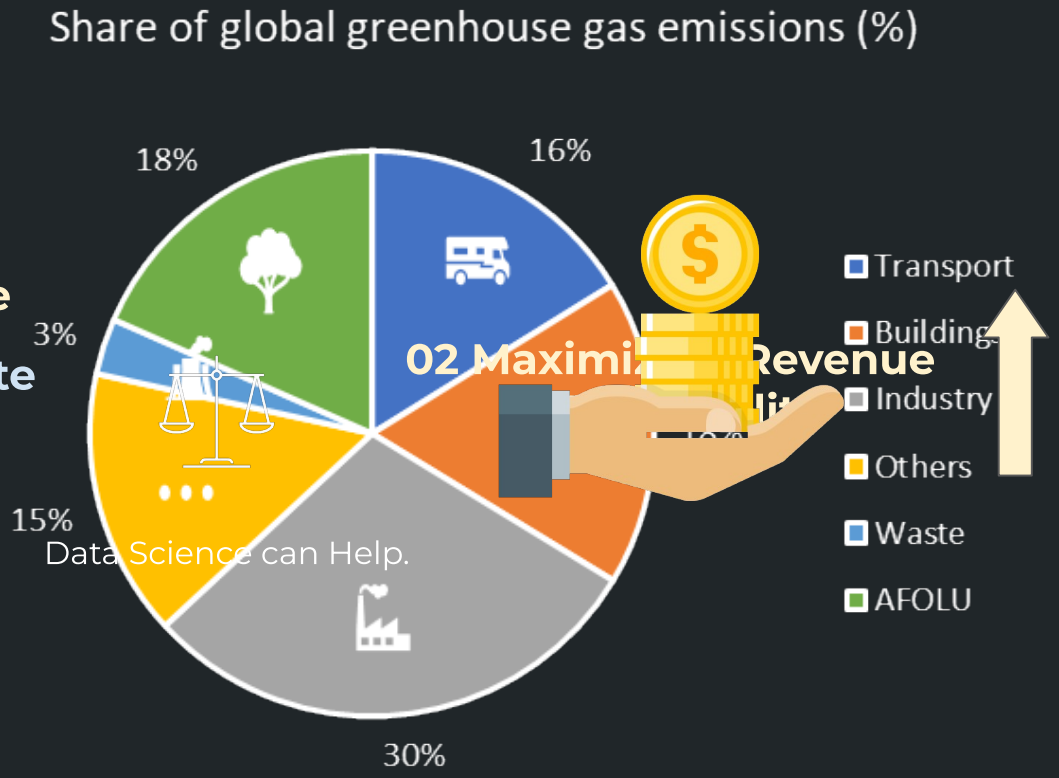

Problem

Energy-intensive businesses face difficulty balancing emission costs with revenues and profitability

01 Mitigating Climate Transition Risk

02 Maximizing Revenue & Profitability

Market Opportunity

Market size of Big Data Analysis of both APAC and global are achieving sustainable growth

APAC[1]

Asia Pacific's spending on big data analytics (BDA) solutions will **grow by 19% in 2022** and will rise 1.6 times to **US$53.3 billion by 2025**.

Global[2]

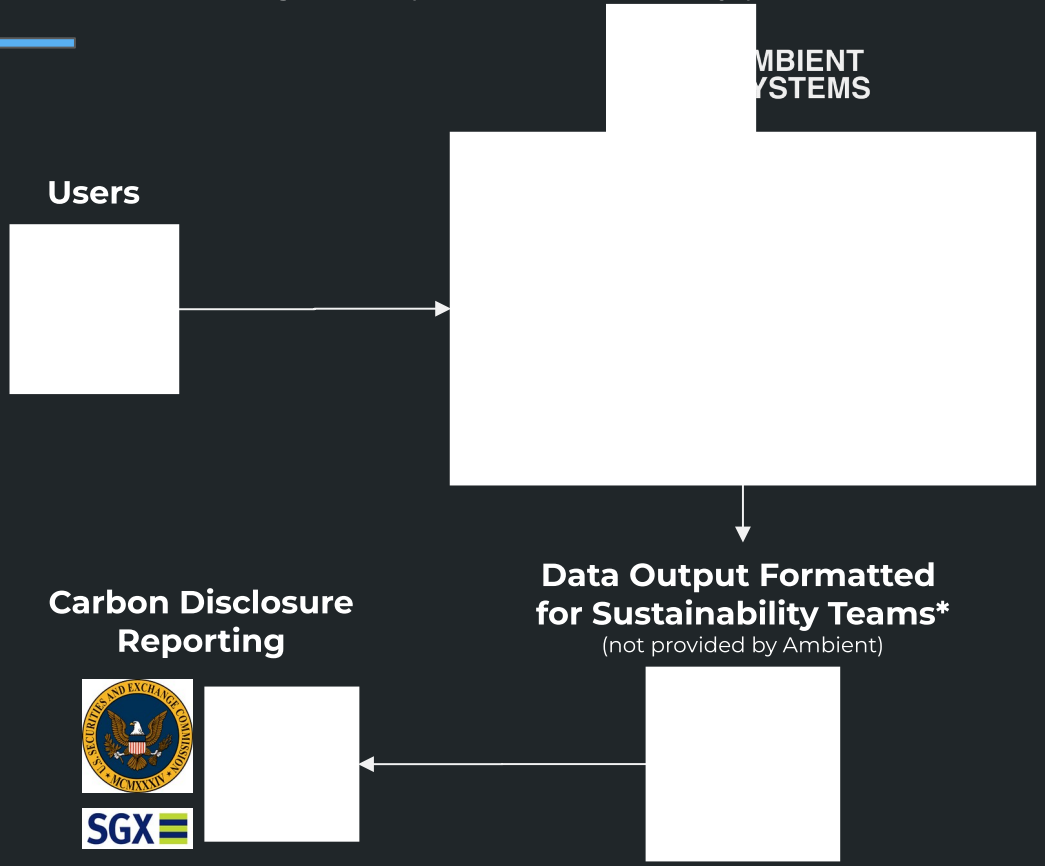

The global big data and analytics services market is expected grow from $107.85 billion in 2021 to **$121.65 billion in 2022** at a compound annual growth rate (CAGR) of 12.8%. The market is expected to reach **$196.95 billion in 2025** at a CAGR of 12.8%.

Solution

Innovative data management platform enabled by powerful new SaaS technology

80% Fewer Man Hours
(than conventional in-house processes or consultancies)

100% Transparent
(data and models easily verifiable by qualified auditors)

Minimized Errors

(reduced business resource for evaluating and selecting decarbonization measures)

Business Model

SaaS Subscription Model based on number of live data streams and machine learning applications

- Process Optimization
- Predictive Maintenance
- Asset Optimization
- AI-based Demand Response
- AI-based Light Control

No implementation fee

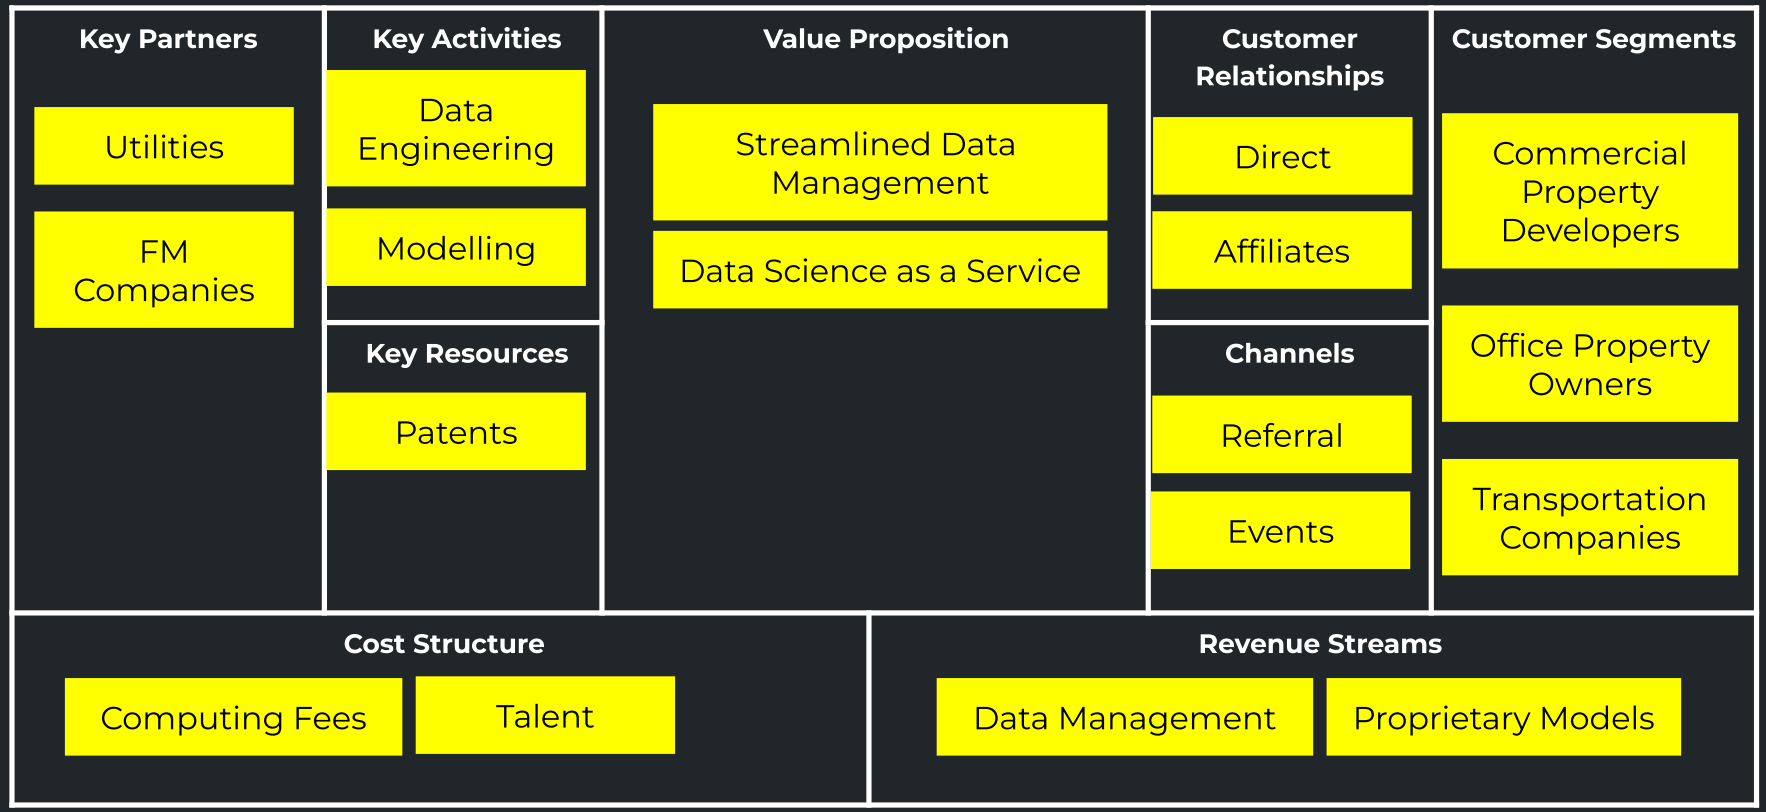

No new hardware

equired training

Our Initial BMC

We thought the main challenge was analytics, but it seems to be **data management**

A-HA Moments

We discovered that there is an unmet need for understanding the problem through data

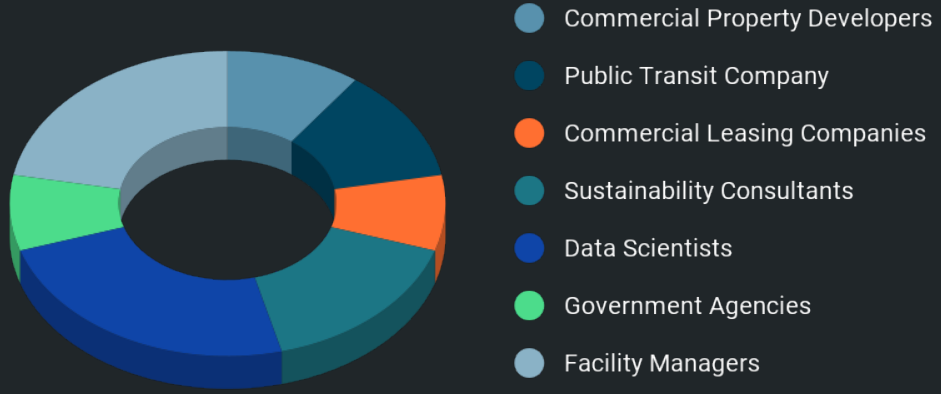

Insight #1: Real estate companies are pressured to lead the industry and support the government on tight margins

Our biggest challenge is continuing to lead the industry in terms of sustainability while maintaining profitability for shareholders

Insight #2: Solutions are too early or too generic for customer's business needs

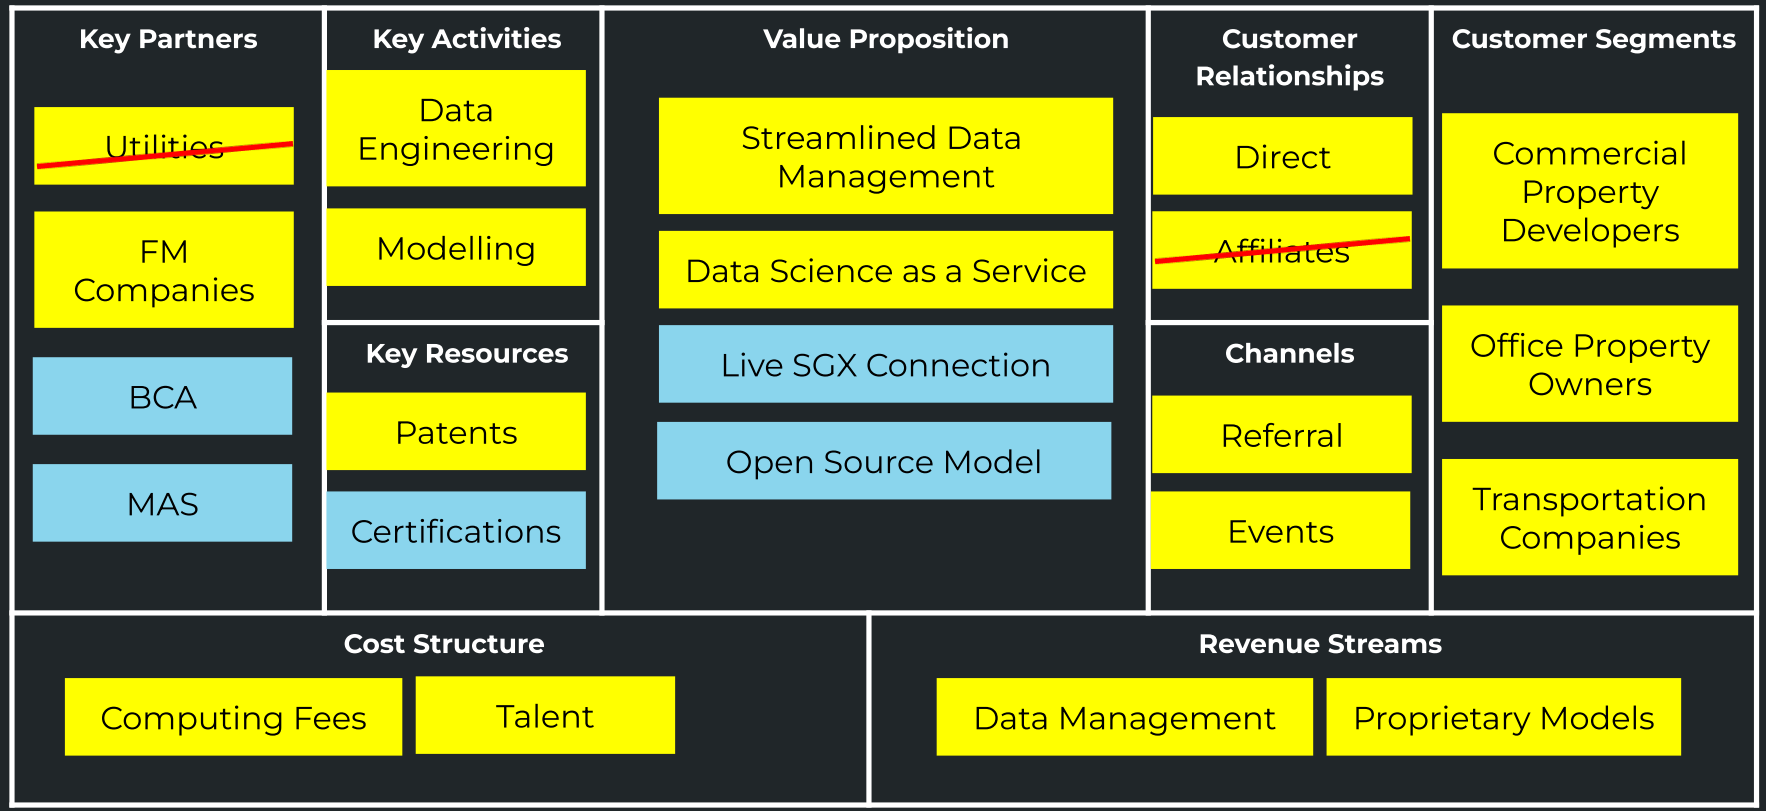

We spoke with suppliers offering carbon reporting services and products, but they do not see the industry (built sector) from our perspective

50+ interviews conducted

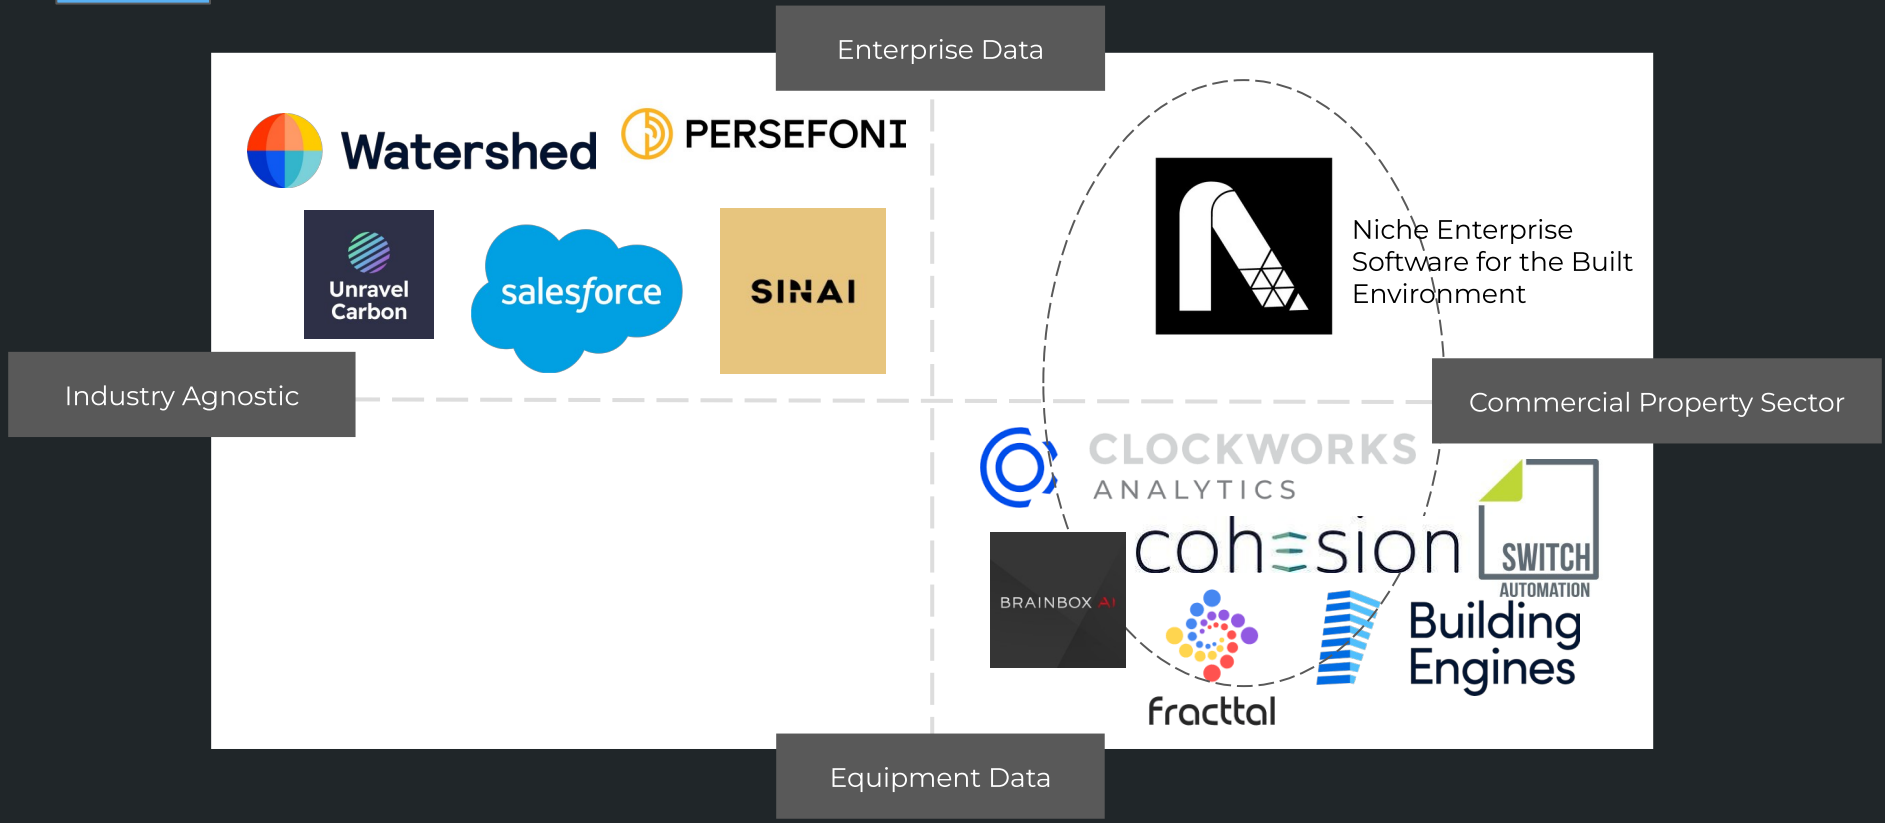

Final BMC

We adjusted our BMC to reflect government's initiatives and made an open source version of our product

Competition

Alternatives cover generic carbon reporting for financial disclosures and building equipment automation

Applications

Ambient's potential launch markets are based on team's past experiences on similar projects

Optimising for maximum Crop output and quality
Indoor Farm
Singapore, 2021

Optimising Energy Costs for Profitability
Gold & Nickel Mines
Africa and Central America, 2014

Distributing Finite Energy Optimally
Sustainable Energy
Nepal, Cambodia, Indonesia, 2017

We applied data management in AgriTech, Mine, and Energy fields.

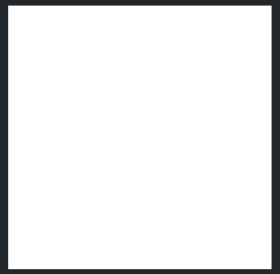

About Us

Ambient Leadership Team

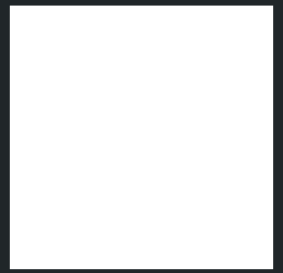

CEO
Scientist and entrepreneur with 5 years of experience in sustainable energy and machine learning across Canada and APAC

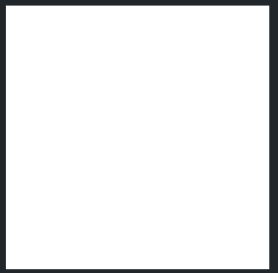

Mentors & Advisors

Dr.
Experienced technology executive, investor, and educator with 35 years of leadership experience at Oracle and Hewlett-Packard

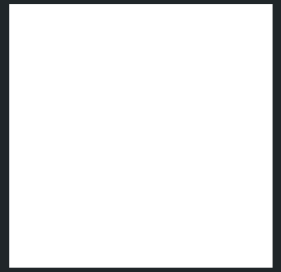

Thought leader and influencer in areas of future of work and human capital with over 50,000 followers across LinkedIn, Spotify, and

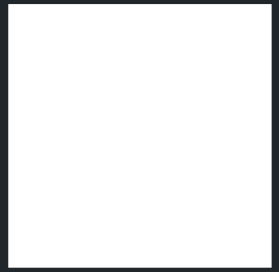

Experienced engineer and entrepreneur currently mentoring innovative IoT and AI spin-offs at the National University of Singapore

About Us

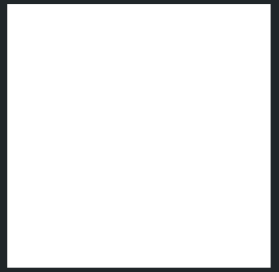

The team behind Ambient

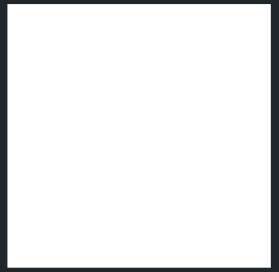

Software Engineering Intern
CS Master student from National University of Singapore School of Computing. Focused on software development.

Data Analyst Intern
Statistics Master student from National University of Singapore. Experience in applied data mining, machine learning, and deep learning.

Analyst Intern
Undergraduate majoring in Data Science and Analytics from National University of Singapore. Experience in data cleaning, visualization and machine learning.

Undergraduate major in Business Administration from National University of Singapore specializing in marketing and finance. Focused on marketing campaigns.

Moving Forward

Company's roadmap and timeline

The Ask

We will need $250k in the next 12-18 months to:

1. commercialize the enterprise SaaS product (3 POCs by EOY) and
2. build momentum for seed round (aiming to close by Q3 2023).

Market Opportunity cont'd

Accelerating investments on business intelligence and data analytics will be the main trend

Gartner's report: 58% of respondents to their survey of over 1,800 IT leaders (who are mostly CIOs) said their enterprise would be **spending more on business intelligence and data analytics** next year

In almost all industry sectors represented, the majority plan to **accelerate their business intelligence and data analytics investments.**

What's notable is that they include industries that have been most disrupted by the COVID-19 crisis — including healthcare providers, **oil and gas**, consumer goods, **transportation**, **retail** and automotive.

Product Roadmap

Product ready for commercial use with further enhancements by September and January

Version	v0.1	v1.0	v1.1	v2.0	v3.0
Date	June 10, 2021	June 10, 2022	August 10, 2022	September 10, 2022	January 10, 2023
Product Name	POC	Prototype	MVP	TBD	TBD
Software App	-	✔	✔	✔	✔
Data Science Models	AgriTech	-	Real Estate (Embodied)	Real Estate (Operational)	✔
[redacted]	-	-	✔	✔	✔
Vendor Configurations			Standard APIs	Custom APIs	✔
External Data Feeds (Live)	-	-	-	Risk Data Energy Prices	✔
External Data Feeds (Periodic)	-	-	Material Carbon	Product Catalogue	✔

Pricing Plan

Open Cloud Alternative to Carbon Accounting Software – with proprietary ML capabilities

Free | Limit of 2 free data feeds

Perfect for SMEs with small or no sustainability or data teams

$0/month per project

- Up to 500MB database & 1GB file storage
- Up to 50MB file uploads
- Up to 5 free users
- Social OAuth providers
- Up to 500K Edge Function invocations
- 1-day log retention
- Community support

Free projects are paused after 1 week of inactivity.

Premium | Unlimited data feeds

For enterprises of all sizes with ambitious decarbonization and digitization targets and dedicated sustainability teams

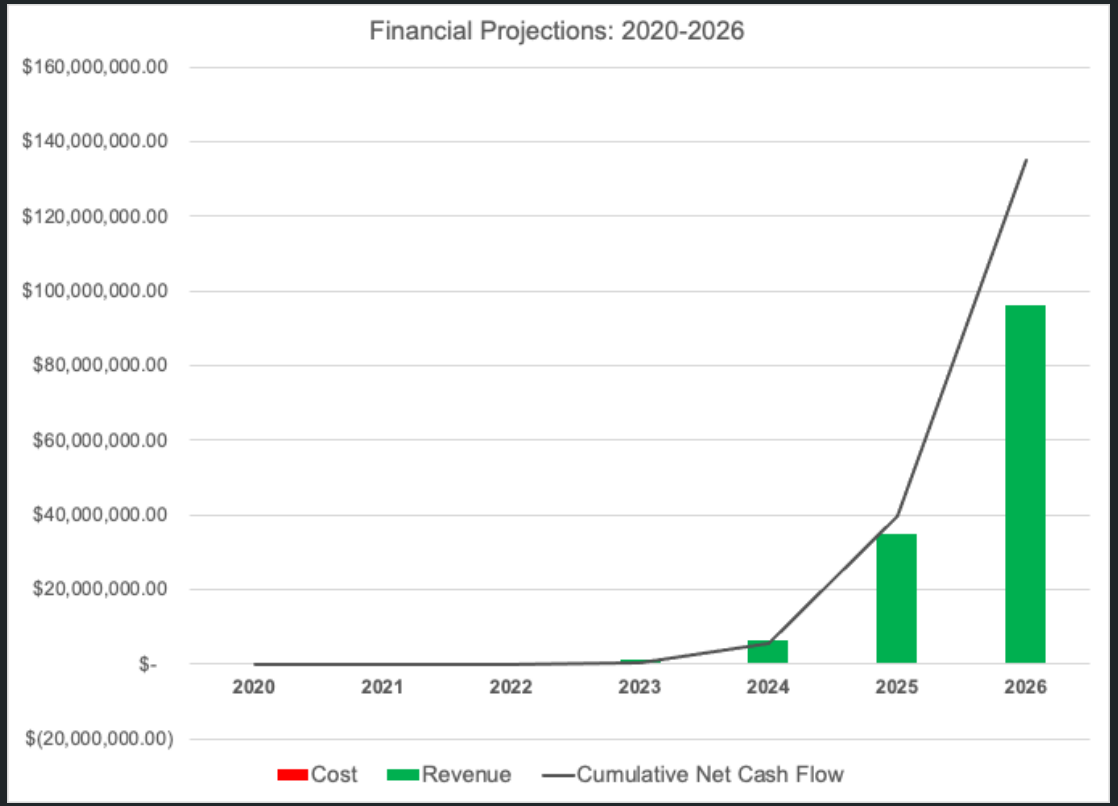

$1,000/month per live data feed
$10,000/month per live AI model

Everything below plus what's included in the base plan

- 8GB database & 100GB file storage
- 5GB file uploads
- Up to 15 users
- Social OAuth providers
- 2M Edge Function invocations
- Daily backups
- 7-day log retention
- No project pausing
- Email and chat support

Financial Projection

Ambient aims to achieve $100MM ARR by Q3 2025 with expected valuation of $2.5B

Use of Funding

We will allocate funding across three domains in the next 6-12 months

$100k

Product Development & Customer Acquisition

- Generate awareness and demand for the product
- Manage customer pipeline, consisting of current and potential users
- Close SaaS agreements with target companies

$100k

Engineering & Data Science

- Adapt the software platform from customer feedback
- Customized data science model library
- Data engineering to enable key use cases
- Cybersecurity certifications

$50k

Admin Overhead and Professional Services

- Corporate Secretary and Accounting
- $10k payment to NUS
- $20k legal fees for Shareholder Agreements (SHA), Subscription Agreements (SA)
