Ambient

Real-Time Financial & Operational Intelligence for Sustainable Industries

The Problem

Fragmented Data

Finance and ops teams drown in siloed metrics, manual reporting, and missed regulatory deadlines.

No Real-Time Visibility

Zero live insight into financial health, operational performance, or compliance status.

Compliance Risk

Regulated sectors face mounting pressure to hit decarbonization targets while managing costs.

Introducing Ambient

Ambient is a **unified, real-time SaaS dashboard** that integrates financial planning, operational metrics, compliance tools, data management, and AI-powered insights into one intuitive platform.

Built natively on **Firebase** with a clean **React + Material-UI** interface—turning complex sustainability challenges into structured, actionable intelligence.

Made with GAMMA

Key Features

Unified Overview

Live financial & operational tables, AI recommendations, alerts, and camera feeds.

Financial Planning Suite

Goal-metric selection, planning canvas, and action-plan workflows.

Compliance Hub

Accounting management, regulatory reporting, and instant request workflows.

AI Recommendations

Confidence-scored insights tied to user metrics and industry benchmarks.

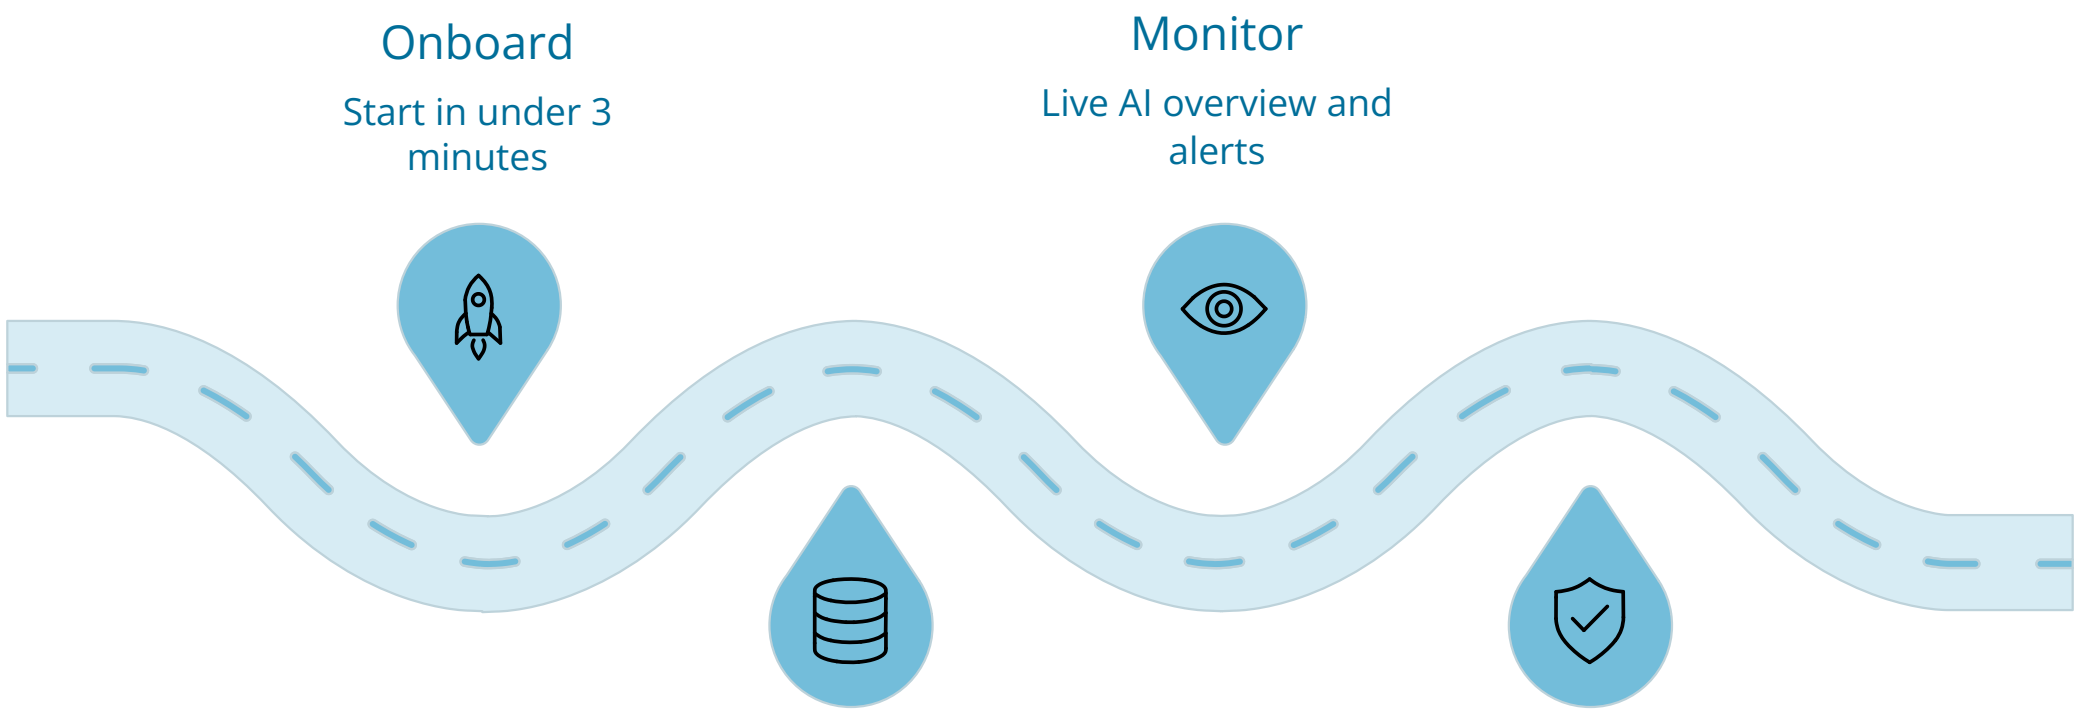

Data Library

Centralized repository auto-linked to selected metrics with live status indicators.

-time, date-filtered alerts via Cloud Functions with in-app history.
