AMBIENT SYSTEMS

Ambient Systems

Integrated technical agency, driving financial performance for world’s most competitive brands.

Company Overview

Ambient Systems: Global & Borderless

Integrated Deep-Tech Expertise -- Engineering, FP&A, AI & IP | From Asia-Pacific Hub to

A Lean, Borderless Agency Delivering High-Impact Results Globally

- ✓ Born from 5+ years of award-winning NUS deep-tech R&D (PCT-patent, platform prototype @ TRL 6)
- ✓ Now operating from HK hub with Belgrade R&D and international networks (Japan, Europe).

3+

Globally-competitive Regions (Asia, Americas, and Europe)

10+

Combined Experience (Founder + Company)

Delivery node (via HK)

Ambient Systems: Borderless consulting that turns deep-tech innovation into measurable financial & operational gains – anywhere, anytime.

Introduction

Agency Overview

Technical agency driving financial performance through engineering, artificial intelligence, and intellectual property.

Offers:

- ✓ AI applications for industries
- ✓ Streamlined financial planning & analysis (FP&A)
- ✓ Intellectual Property research & development (R&D)
- ✓ Software subscription (in development)

Services:

1. **Civil Engineering & Energy Systems**
   Drafting and load calculations.
   Solar array design, microgrid optimization, building energy efficiency.

2. **Supply-Chain Management & Vendor Optimization**
   Sourcing strategy, customs optimization, vendor scorecards.

3. **Vertical Farming / CEA Optimization**
   Layout design, yield modeling, environmental controls.

4. **IP Strategy & Patent Support**
   Prior art searches, patent filing support, freedom-to-operate analysis.

Case Study

End-to-End Climate Management Solution for Indoor Farming

BUSINESS CHALLENGE

Indoor farmers face significant crop loss and high operational costs due to the inability to maintain optimal climate conditions. Existing solutions are fragmented, manual, and labor-intensive, often leading to unmonitored temperature and humidity imbalances that promote mold and pests, ultimately reducing yield quality and quantity.

APPROACH TO SOLUTION

- Defined the full-stack ML solution (sensors, optimization engine, dashboard) and the scalable B2B SaaS + Hardware business model.
- Secured pilot Letters of Intent (LOIs) with two key vertical farm operators to validate demand and establish the initial pipeline.
- Developed the financial model projecting a 24% improvement in client margins with a rapid 4–6-month customer payback period.
- Produced all investment deliverables (Investment Deck, Business Plan) and defined the IP/patent strategy for the core optimization algorithm.

OUTCOMES ACHIEVED

- 24% ROI Model: Developed a model projecting a 24% improvement in client margins with a rapid 4–6-month customer payback.
- Validation: Achieved critical market validation and established a pipeline through secured commercial LOIs.
- IP Foundation: Defined the patent strategy for the core optimization algorithm.

AMBIENT SYSTEMS

Results achieved personally at prior ventures.

Case studies in distributed mining, SEC big pharma disclosures, and image recognition.

	Distributed Mining Company	Conflict Minerals	Image Neural Network
Challenge	Uncontrolled OpEx (Energy Costs). No link between real-time operational data and financial planning; resulting in reactive procurement.	Urgent SEC 3TG Conflict Minerals disclosure. Major pharmaceutical client required rapid compliance under a tight regulatory deadline.	Startup needed a robust, high-accuracy AI vision model to automatically detect artisanal mining by analyzing satellite imagery across complex biomes.
Action	Developed Big Data predictive OpEx models using operational and market data. Integrated models for real-time cost visibility at site level.	Led data analysis and consolidated raw data from 20+ international offices. Advised on compliance risk mitigation for SEC disclosure requirements.	Led as Principal Investigator (PI). Designed and implemented Convolutional Neural Network (CNN) models. Developed an automated data collection and prediction pipeline.
Outcomes	12% sustained reduction in global energy costs, achieving millions in OpEx savings.	Successfully met critical U.S. regulatory disclosure. Delivery executed under urgent, one-day notice.	Delivered a validated CNN image classification model and system architecture.

Our approach

Transparent Pricing

Explore: 30-minute call

- We discuss your challenge, goals, and constraints.
- No pitch–just a questioning conversation to see if we can solve your problem.

Prototype: fixed-Price Proposal in 48 Hours

- Clear scope, defined deliverables, flat fee.
- You know exactly what you're paying and what you're getting before committing a dollar.

Iterate: in 30-60 Days

- Fast deliverable outcomes, tangible outcomes, and clear next steps.
- Most engagements pay for themselves in the first month.

Direct Access to Award-Winning Technical Leadership

Your Lead Architect

Industrial Record	Award-Winning Tech	Global Delivery Hub
• 10+ Years Asia-Pacific • Scaled YC-backed ventures. • 12% OpEx Reduction in heavy industry/mining.	• Panasonic Deep Tech Winner • PCT-Awarded PoC • Google Runner-up	• HK Set-up • HK Top Talent Pass for on-site • America's regional presence for potential partnerships

Chief Systems Architect & Founder

PhD Researcher
(Business Management)

M.Sc. Computer Science

Intellectual Property Expert.

Integrated Regional Delivery: Utilizing the Hong Kong hub for immediate on-site deployment in ASEAN (Authorized via HK Top Talent Pass).
