OUR MISSION

Our mission is to empower better financial operations through a comprehensive three-pillar approach that provides streamlined financial planning, automated reporting, and valuable insights to support the decision-making process.

We aim to achieve this mission through:

- Developing a user-friendly platform
- Utilizing cutting-edge technology in sensing, wireless, and AI
- Providing excellent customer support
- Investing in research and development
- Hiring top talent
- Staying committed to sustainability

VALUES

Innovation

Pioneering cutting-edge solutions and pushing the boundaries of what's possible in financial operations.

Value Creation

Delivering tangible and measurable value to our clients through strategic financial management.

Efficiency

Streamlining processes and optimizing resource allocation to maximize productivity and cost-effectiveness.

Expertise

Applying deep tech expertise and industry knowledge to advance financial performance.

A BRIEF COMPANY HISTORY

Ambient Systems was incorporated in Singapore on July 5, 2021, after receiving pre-seed investment from National University of Singapore Graduate Research and Innovation Programme (NUS GRIP).

However, the company has roots in 2020. The company's founder, , initially proposed the use of sensors and AI in smart homes and healthcare facilities to balance energy savings with indoor air quality and other considerations.

Since 2020, we've focused mostly on commercial real estate segments in addition to healthcare, such as Vertical Farming, which is popular in Singapore due to the land constraints and Government's bold vision of achieving 30% local food production by 2030.
