GUIDE FOR CROWDPITCHING PRESENTATIONS

Updated [redacted]

About Crowdpitching

Crowdpitching is a platform for technology providers to exhibit and pitch their technologies to the audience for commercialisation or co-development to technology seekers. This guide will help exhibitors to prepare the crowdpitching presentations for TechInnovation 2021. The presenter must be registered as a TechInnovation exhibitor. This can be done by the Lead Exhibitor of your booth.

General Guidelines

- Maximum **five minutes** per crowdpitching presentation of up to six slides.
- Please use the TechInnovation 2021 Powerpoint template provided for the first and last slide of your presentation.
- Assume that your viewers are laypersons so avoid using technical terms.
- Keep your slides concise.
- Images and diagrams are useful for illustrating your points.
- If you use acronyms, make sure the terms used are spelt out in full at the first mention.
- Check your slides for grammar and spelling mistakes.
- No restriction on the use of company name, product name or trademark in the slides.

Recommended Presentation Template

Overview	Contents
Organisation Profile (1 slide)	• Give a brief overview of your organisation • What is the main business? • What are the strengths and capabilities of the organisation? • Do not give a long history of the organisation.
The Problem Statement (1 – 2 slides)	• Explain the problem statement or the context in which the technology was developed • What is the current problem or challenge faced by society and businesses? • Are there current solutions to the problem? • What are the limitations of current solutions? Eg, high cost, low efficiency etc.
The Technology Offer (1 – 2 slides)	• Present the technology or solution to solve the problem • Describe the technology offer. Use images and diagrams to illustrate. • What are the innovative aspects of the technology? • Why is this technology advantageous over other existing technologies? • What is the development status? Eg, ready-to-market, prototype demonstrated in operational environment etc • What other areas or markets can it also be applied in? • Show that the technology solves the problem with use cases, if any
Mode of Collaboration (1 slide)	• State the type of partnership you want to establish with technology seekers • Licensing agreement / Go-to-Market Commercialisation • R&D collaboration / Co-development • Business partnership / Co-investment • Test-bed opportunity in an operational environment • Invite the audience to visit your booth for discussion

Why You Should Participate in Crowdpitching

A pitching platform for innovators to showcase their enabling technologies to the international audience.

Look for collaboration partners for commercialisation or co-development through these pitching opportunities.

Setting Up Your Zoom Client for Meetings App

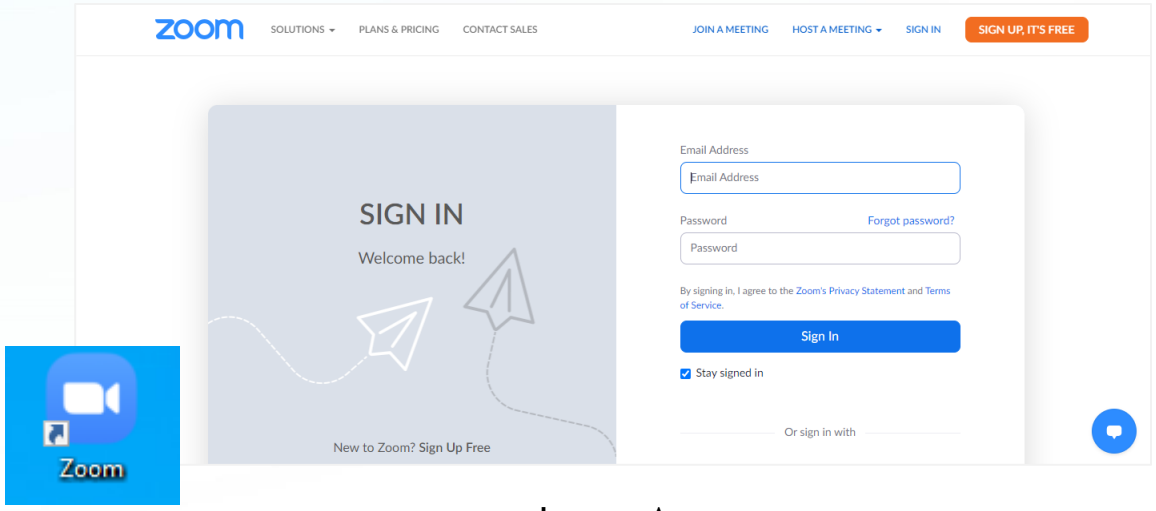

Image A

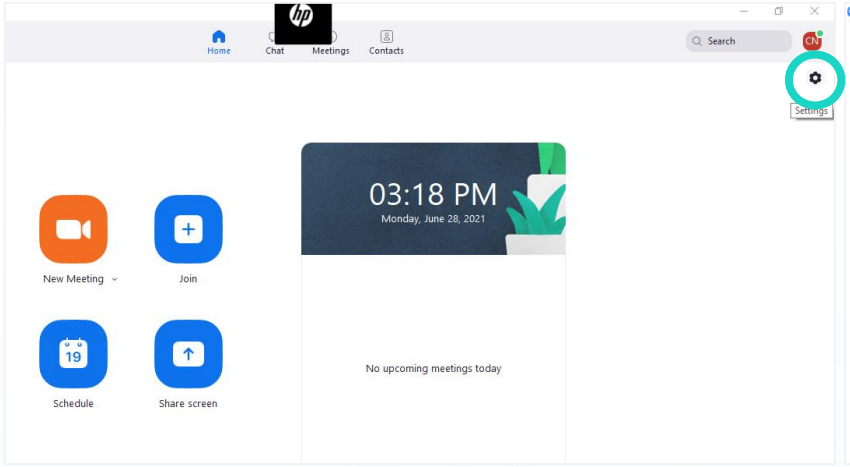

Image B

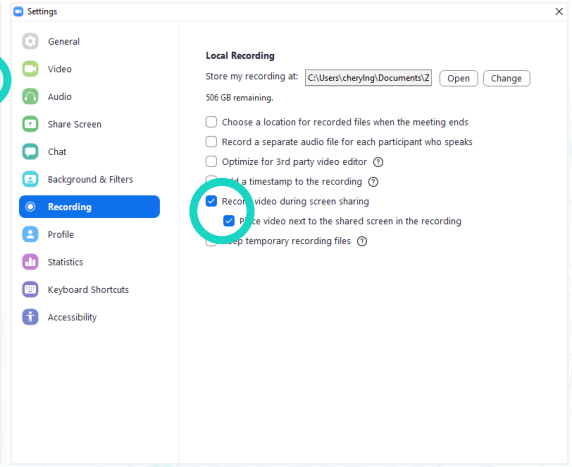

Image C

1. Sign into Zoom at https://zoom.us/signin and download the Zoom Client for Meetings app for Windows, Mac, or Chrome OS on your desktop. (See Image A)

2. Click on the Settings icon on the top right hand corner of the Zoom app. (See Image B)

3. Go to the Recording module and select “Record video during screen recording”. (See Image C)

4. Check the box “Place video next to the shared screen in the recording”

Note: You can save your recordings via local or cloud.

1. For the local recording option, the Zoom app will begin compressing the screen recording and save it in your selected folder.

2. For cloud recording, your video will appear in your Zoom account within a few minutes or a few hours depending on its length.

Setting Up Your

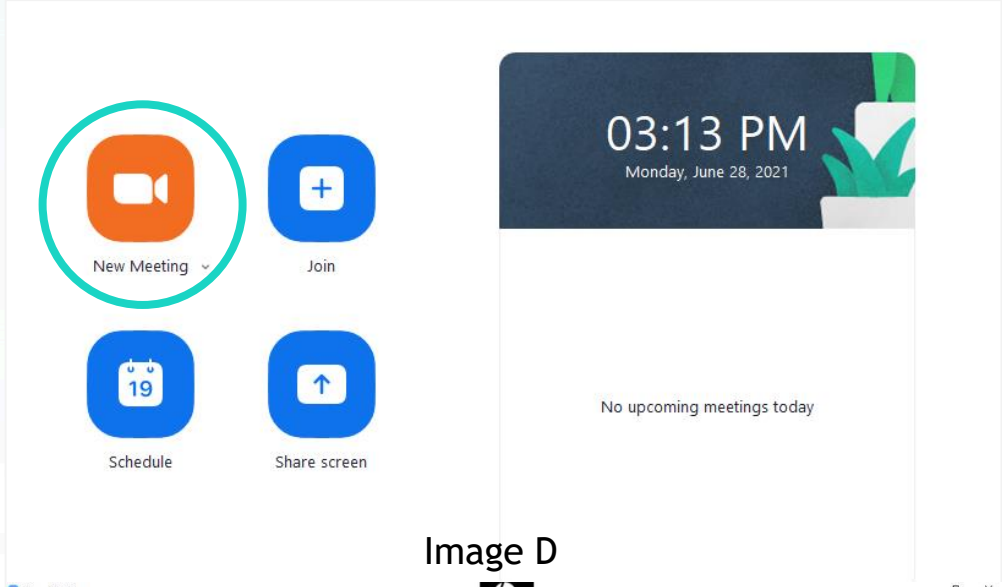

Image D

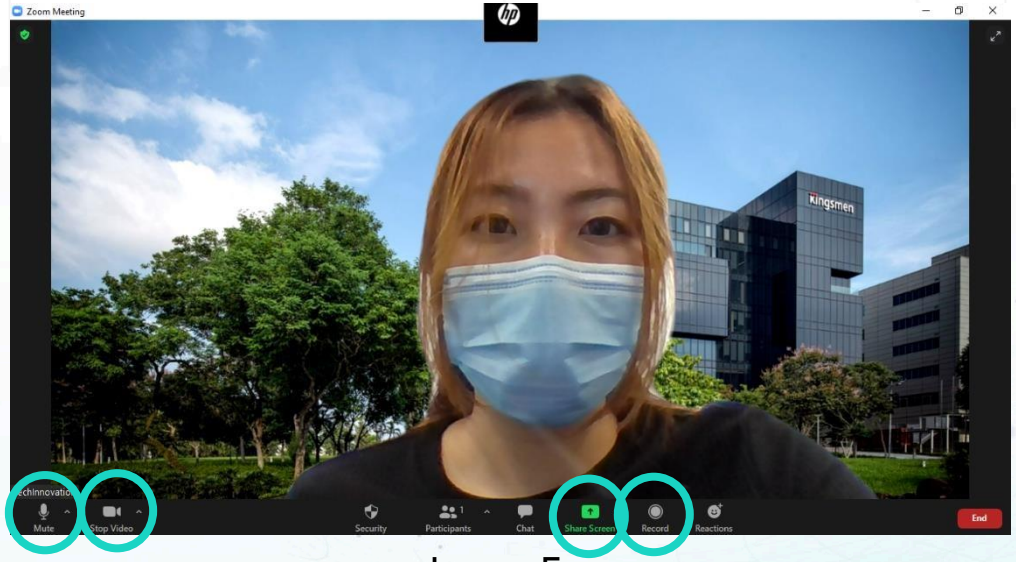

Image E

5. Start a new . (See Image D)

6. Click “Join Audio” to set up your microphone. (See Image E)

7. Click “Start Video” to set up your video. Ensure that your camera is placed at the eye-level. We recommend that you use a natural background, instead of a virtual background.

8. Once you are ready, click “Record” to start recording your presentation.

9. Click “Share Screen” and select the window with your presentation materials, i.e. slide decks and/or videos in full screen mode.

Recording Your Crowdpitching Presentation

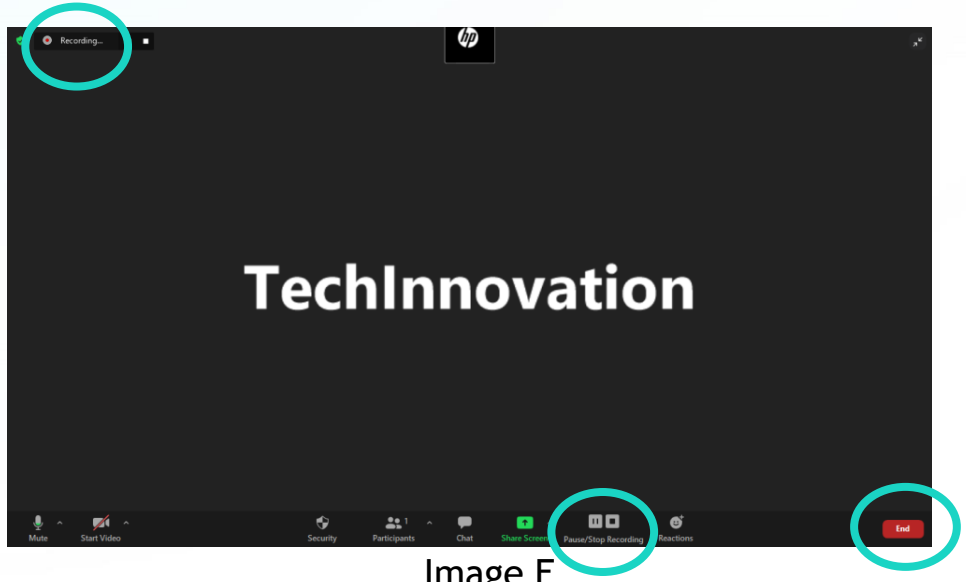

Image F

Image G

10. Once the “Record” button changes to “Pause/Stop Recording”, it means your recording has started. (See Image F)

    The “Recording…” text at the top left of your Zoom window is also another indication that the recording has started.

11. This is your view when recording with your shared screen. (See image G)

    Please ensure that your face is positioned at the centre of the screen before starting your recording.

12. Once you have completed your recording, exit your shared screen mode and click on the “Stop” button. (See Image F)

13. For Zoom to begin processsing your recorded clip, click on “End” to exit your meeting session. (See Image F)

Your Crowdpitching Presentation

Click on the video file in your selected folder to review your presentation.
You may edit your video to cut out any bloopers.

Uploading Your Crowdpitching Presentation to YouTube

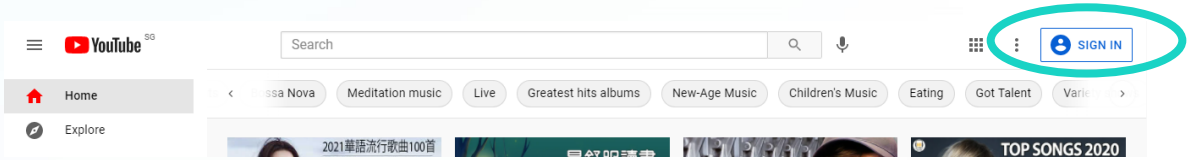

Image H

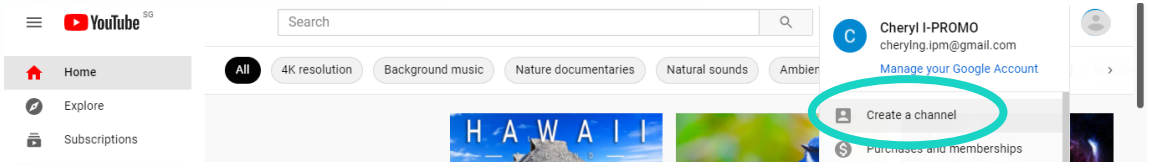

Image I

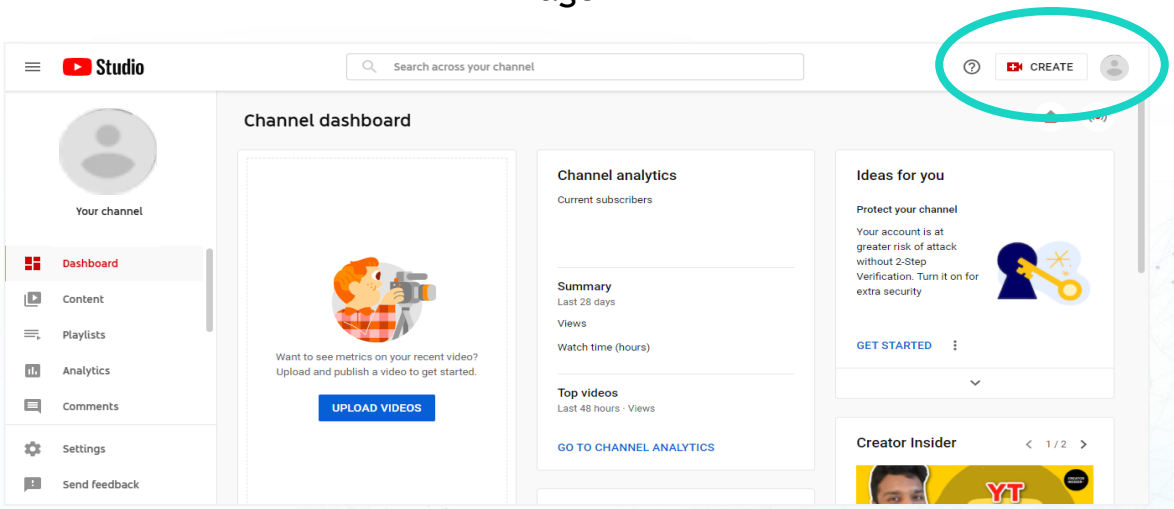

Image J

1. Register for a **YouTube** account at https://www.youtube.com/ (See Image H)

2. Click your profile picture at the top right hand corner of the window and select “Cr**eate** a **channel**”. (See Image I)

3. Set a channel name and photo before selecting “Confirm to **create** your **channel**. (See Image J)

Uploading Your Crowdpitching Presentation to YouTube

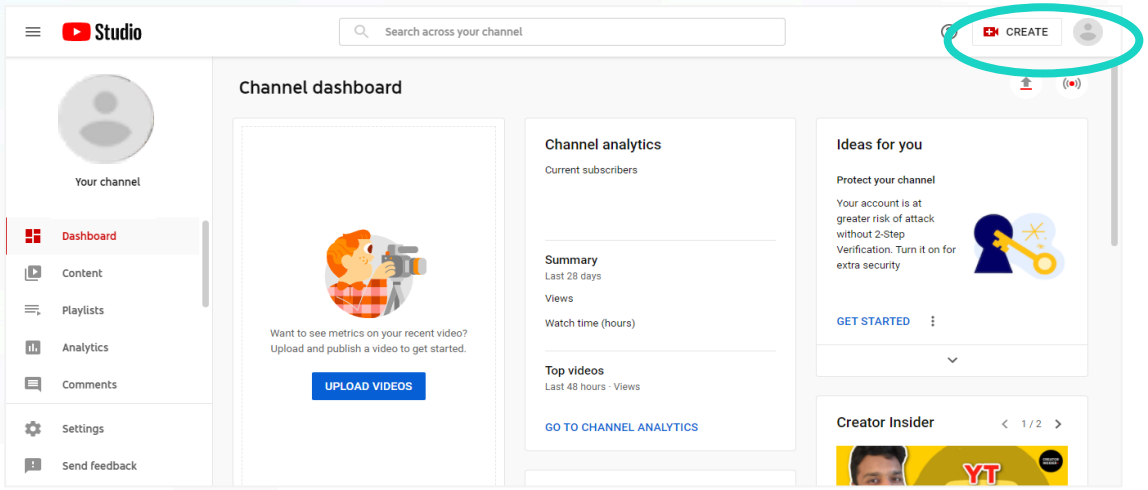

Image K

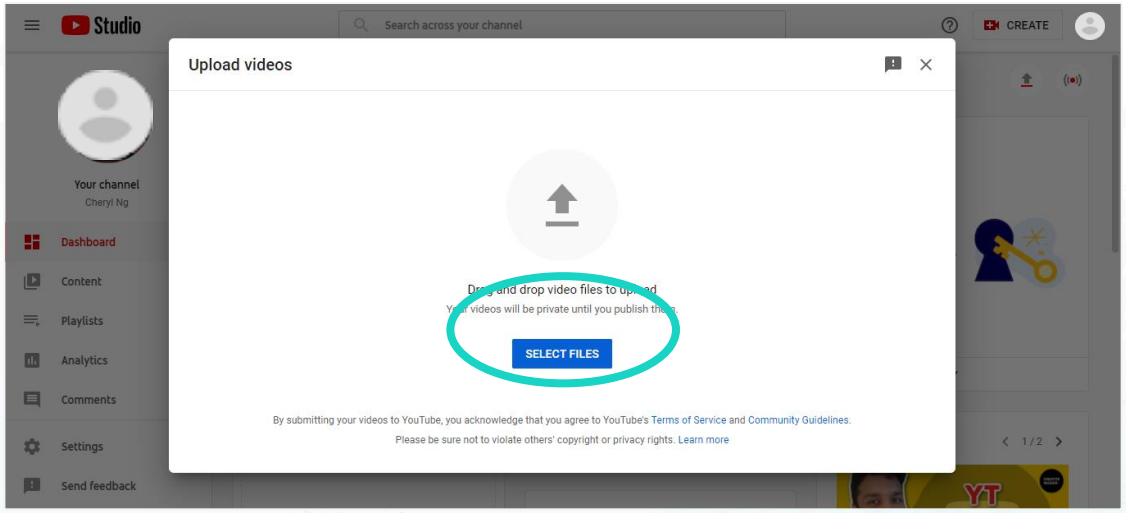

Image L

5. After creating your channel, open at http://studio.youtube.com/ (See Image K)

6. Click “CREATE” at the top right hand corner of your window and then select “Upload Videos”.

7. Click “Select File” and choose the file you would like to upload. Alternatively, you could drag and drop the video file to upload it. (See Image L)

Uploading Your Crowdpitching Presentation to YouTube

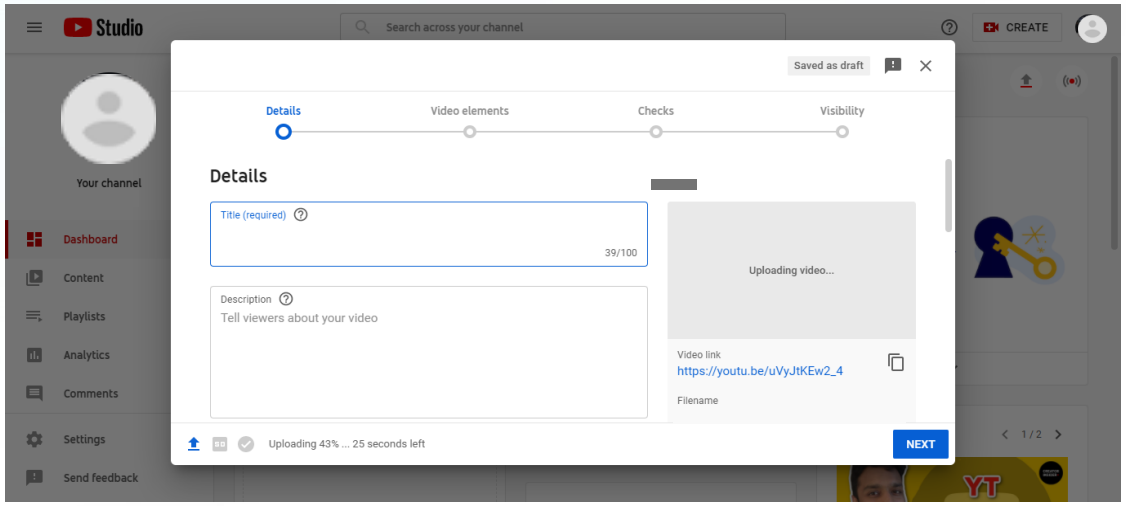

Image M

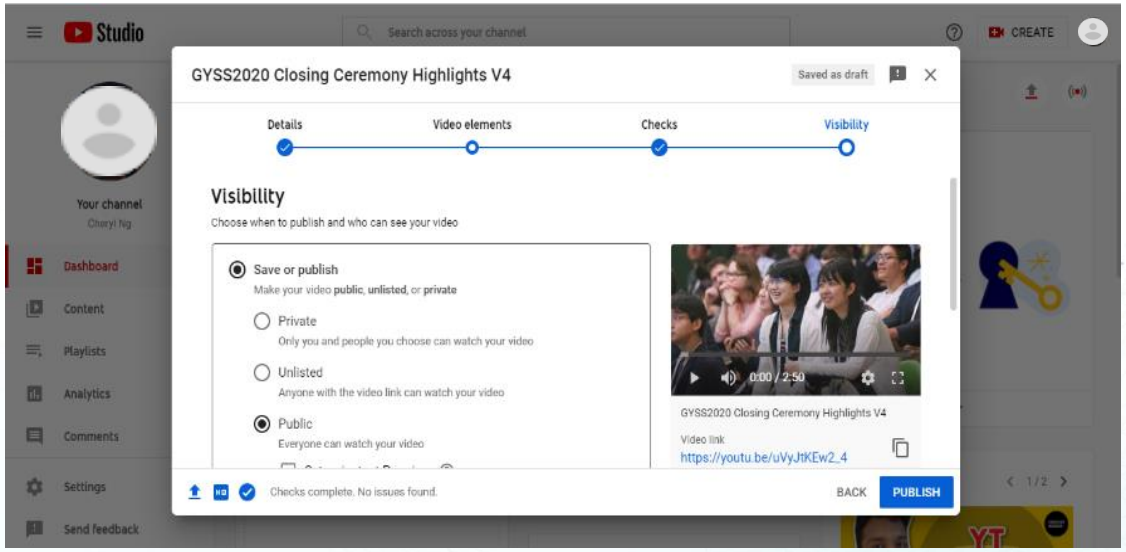

Image N

8. While waiting for your file to be processed, you may edit the Title, Description and Thumbnail of your video. (See Image M)

9. Please ensure that your video is saved as “Public”. Click “Publish” when done.

10. Once your video is published, please include the URL in the Tech Offer submission portal.

Recommended Technical Specifications

Audio Requirement

- Please use a suitable microphone or earpiece with microphone
- Avoid using wireless devices such as wireless headphones or headsets (e.g. Airpods etc)
- Ensure that your camera is placed at eye-level
- To avoid distractions and interferences, put your mobile devices away from you (ie do not place on your table), as during the recording, vibration noises will be picked up

Internet Requirement

- Kindly ensure that you are connected to stable WiFi/LAN cable to avoid disruption in recording

Others

- Avoid using the mouse during your presentation, as the clicking sound will be picked up during recording
- Use a natural background for your recording. If you are using a virtual background, please minimise hand gestures during your presentation.

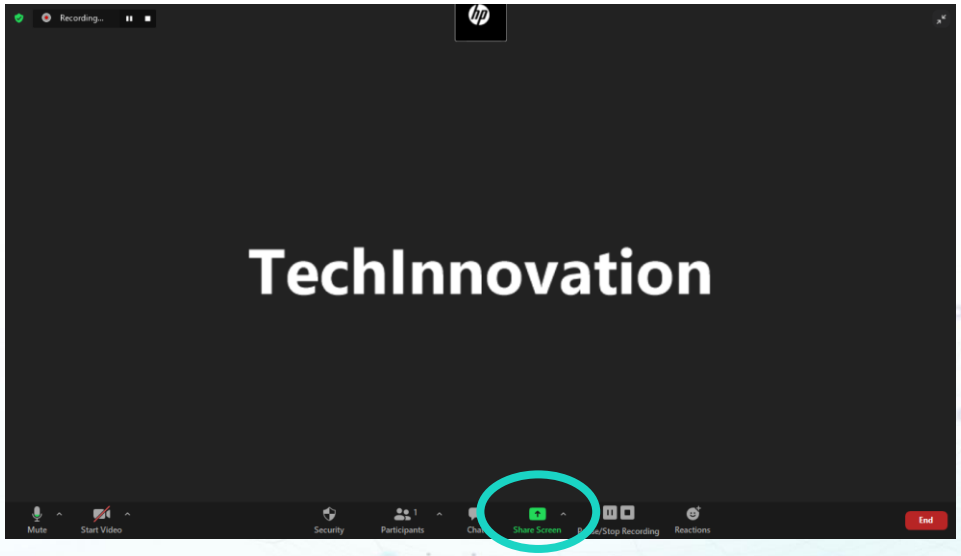

Recommended Technical Specifications

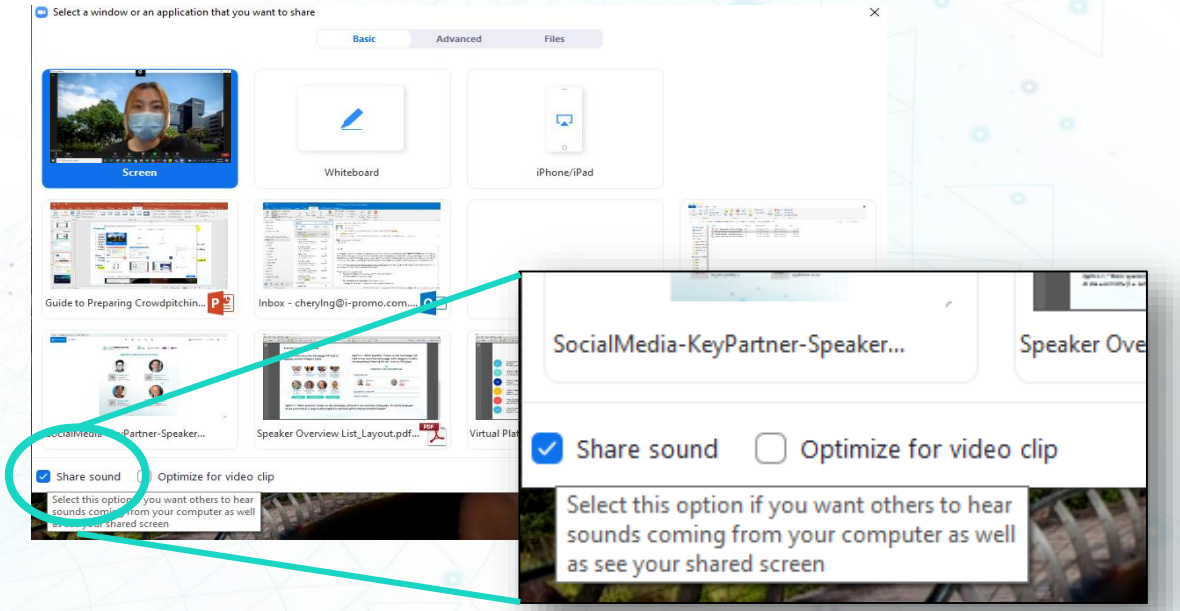

Presentation slides

- Presentation deck should be in PowerPoint format
- Presentation slides recommended to be in 16:9 format/slide size

Sharing of videos

- If you have videos in your presentation, do remember to click on “Share Sound” so that the video’s audio can be heard. 1080p Resolution Videos are recommended.
- However, do note that videos may appear with lags thus please check your final video recording.

Additional Notes

Ambience

- Set up in a quiet place – your audience should not be able to see or hear any of your colleagues, family or pets in the frame.
- For a professional frame, do remove distracting oddities such as plants that may seem like it is “sticking out of your head” when in video as well as visible cables or water bottle in your background.
- Front lighting on camera is key! – your audience wants to see your face. Make sure that the lighting is in front of you and that no harsh lighting is emitting from behind you (i.e. sitting back-facing a window) as this will make your face dim.

Grooming

- Be dressed in something that exudes your brand positioning
- If you are using a virtual background, please avoid clothing colours that are similar to your background.
- Avoid wearing big, clanky accessories that may cause noise distraction
