Climate Management for Cities of Tomorrow

Modern Buildings Face Many Challenges

1. Climate Change
2. Urban Pollution
3. Indoor Contaminants
4. Rising Energy Costs
5. Increasing Technological Complexity

New building type with few existing solutions

1. Indoor farming is a rapidly growing industry with 24% CAGR*.

2. Asia-Pacific is a global leader in indoor farming with a market value of >$350M.

3. Clear need from several farm operators in Singapore.

Competitive Landscape

Ambient provides a tailored solution for the indoor farming beachhead market by positioning itself at the intersection of multiple segments.

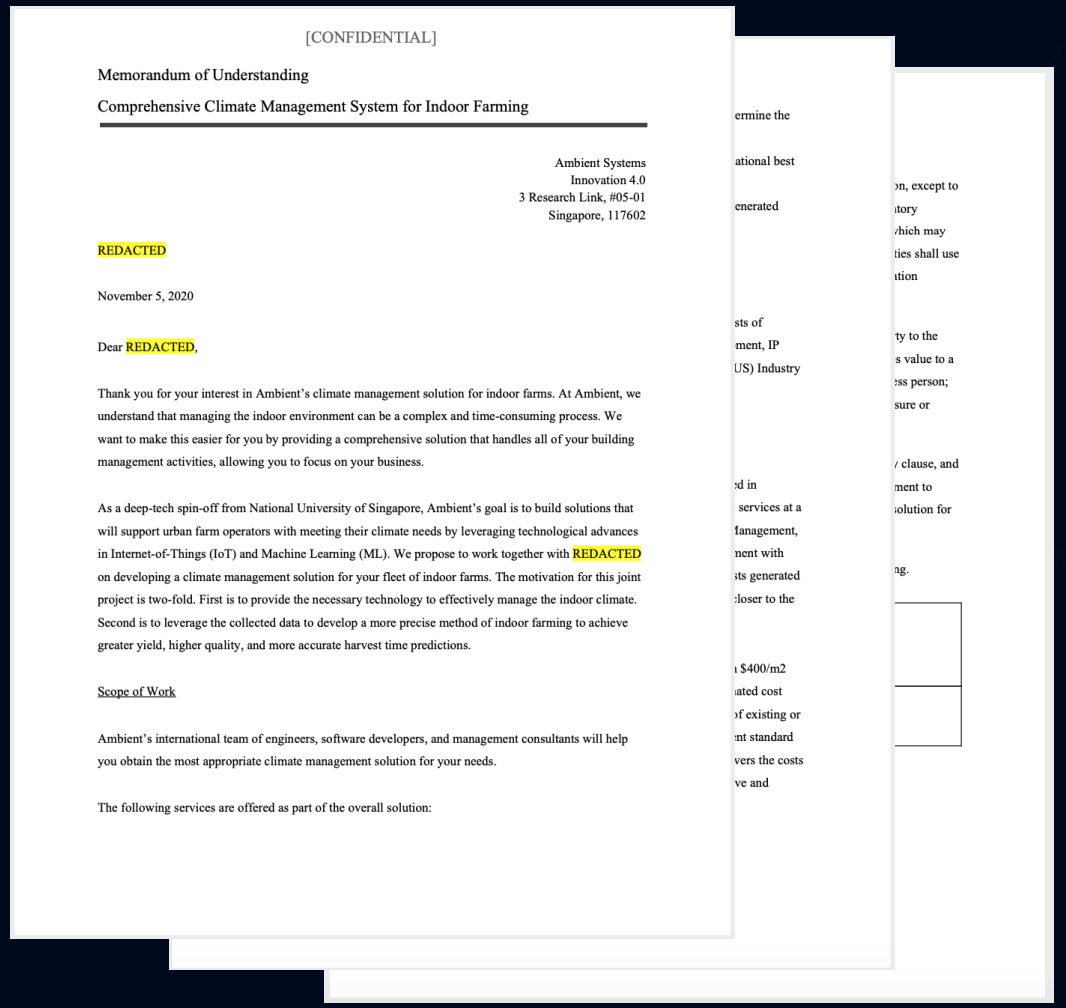

Smart-building technology for indoor farms

	Ambient	Autogrow	75F	Johnson Controls
Segment	Multiple	Indoor Farming Controller	Smart Buildings	OEM
Proximity to Customer (Low Logistics Cost)	✓ Yes	✗ No	✗ No	✓ Yes
Indoor Farming Features	✓ Yes	✓ Yes	✗ No	✗ No
Modern Web-based UI	✓ Yes	✗ No	✓ Yes	✗ Some
Wireless IoT Network	✓ Yes	✗ No	✓ Yes	✓ Yes
Advanced Optimization Methods	✓	✗ No	✗ Some	✗ Some
Pricing	Quotation (based on area)	$3000 for one unit + Installation Fees	Quotation	Quotation

Innovative revenue model leverages value-sharing of additional savings and revenues

Section	Component	Cost
CAPEX		
Services	Audit and Design	Complimentary
	Installation	$4,000 - $5,000
Hardware	Ambient Smart Sensors	$1,500 - $2,500
	Ambient Edge Nodes	$2,500 - $4,500
	Ambient Control Unit	$4,000 - $6,000
	CAPEX SubTotal	**$12,000 - $18,000**
OPEX		
Operations	Secure Data Management	Complimentary
	System Maintenance	Complimentary
	Parts Replacement	Complimentary
Ambient Platform	Facility Analytics	Value-sharing
	ACMV Optimization	Value-sharing
	Predictive Maintenance	Value-sharing
	Yield Prediction	Value-sharing
	OPEX SubTotal	**$0**
	Estimated Total Cost	**$12,000 - $18,000 + OPEX value-sharing**

REDACTED

November 5, 2020

Dear REDACTED,

Thank you for your interest in Ambient's climate management solution for indoor farms. At Ambient, we understand that managing the indoor environment can be a complex and time-consuming process. We want to make this easier for you by providing a comprehensive solution that handles all of your building management activities, allowing you to focus on your business.

As a deep-tech spin-off from National University of Singapore, Ambient's goal is to build solutions that will support urban farm operators with meeting their climate needs by leveraging technological advances in Internet-of-Things (IoT) and Machine Learning (ML). We propose to work together with REDACTED on developing a climate management solution for your fleet of indoor farms. The motivation for this joint project is two-fold. First is to provide the necessary technology to effectively manage the indoor climate. Second is to leverage the collected data to develop a more precise method of indoor farming to achieve greater yield, higher quality, and more accurate harvest time predictions.

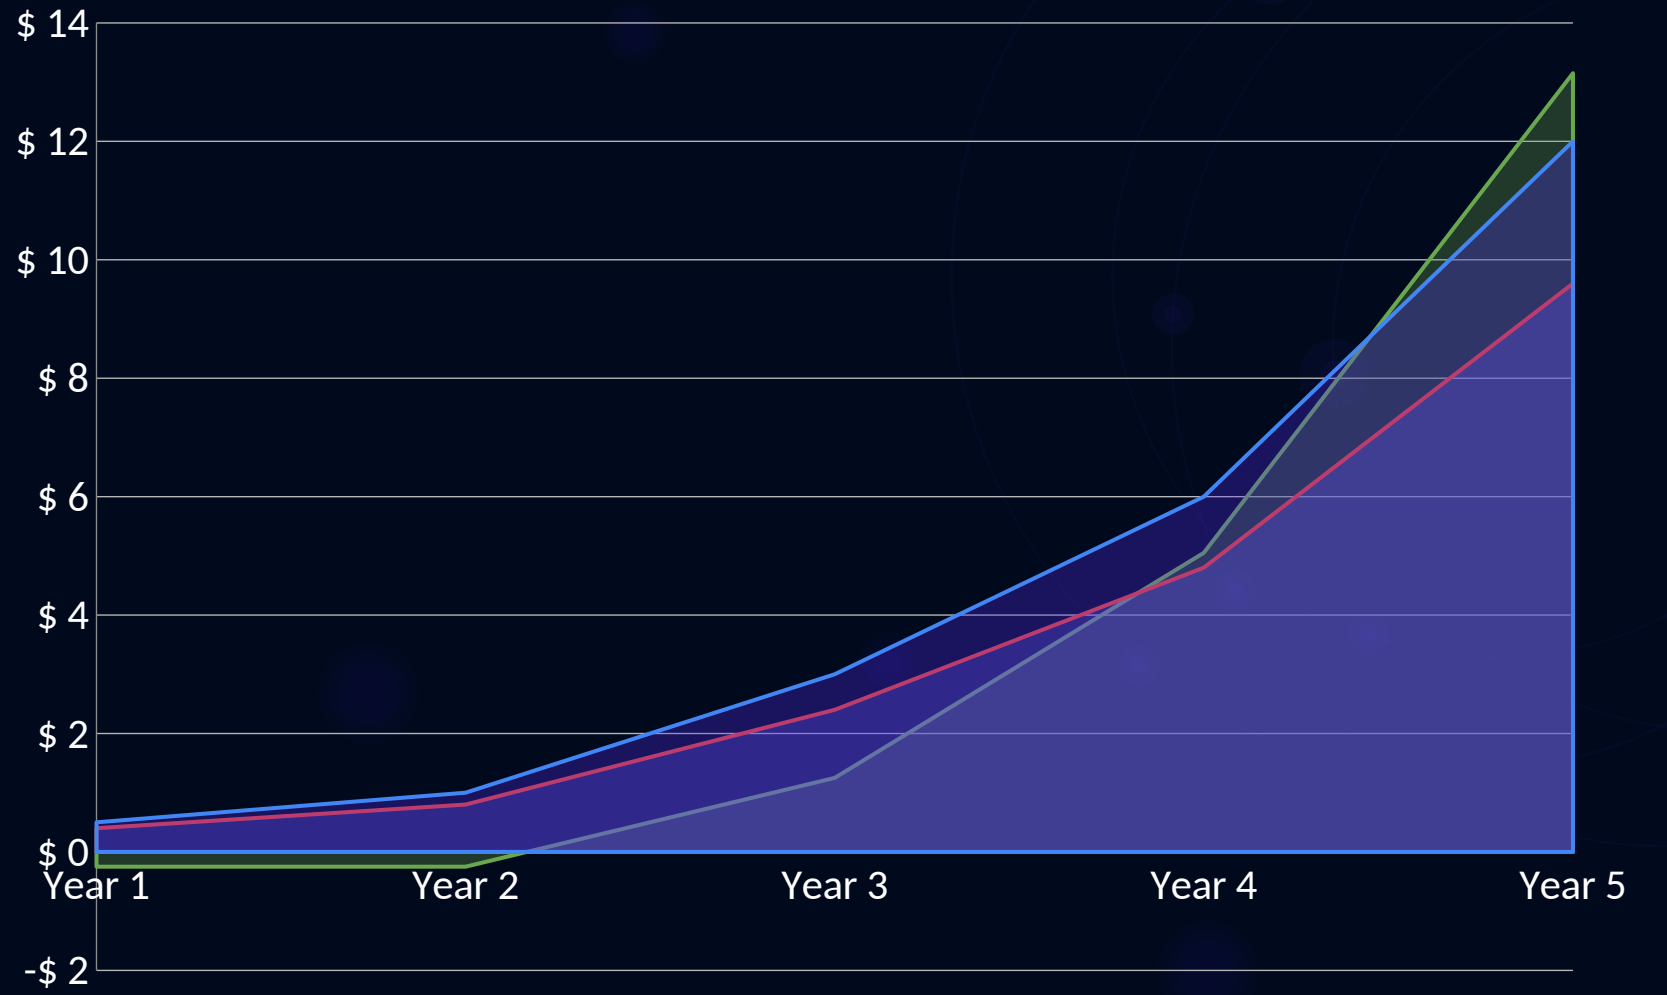

Scope of Work

Ambient's international team of engineers, software developers, and management consultants will help you obtain the most appropriate climate management solution for your needs.

The following services are offered as part of the overall solution:

1. Signed an MoU with a farm operator in Singapore
2. In conversation with two more leading farm operators
3. Identified gap for similar solution in the healthcare sector

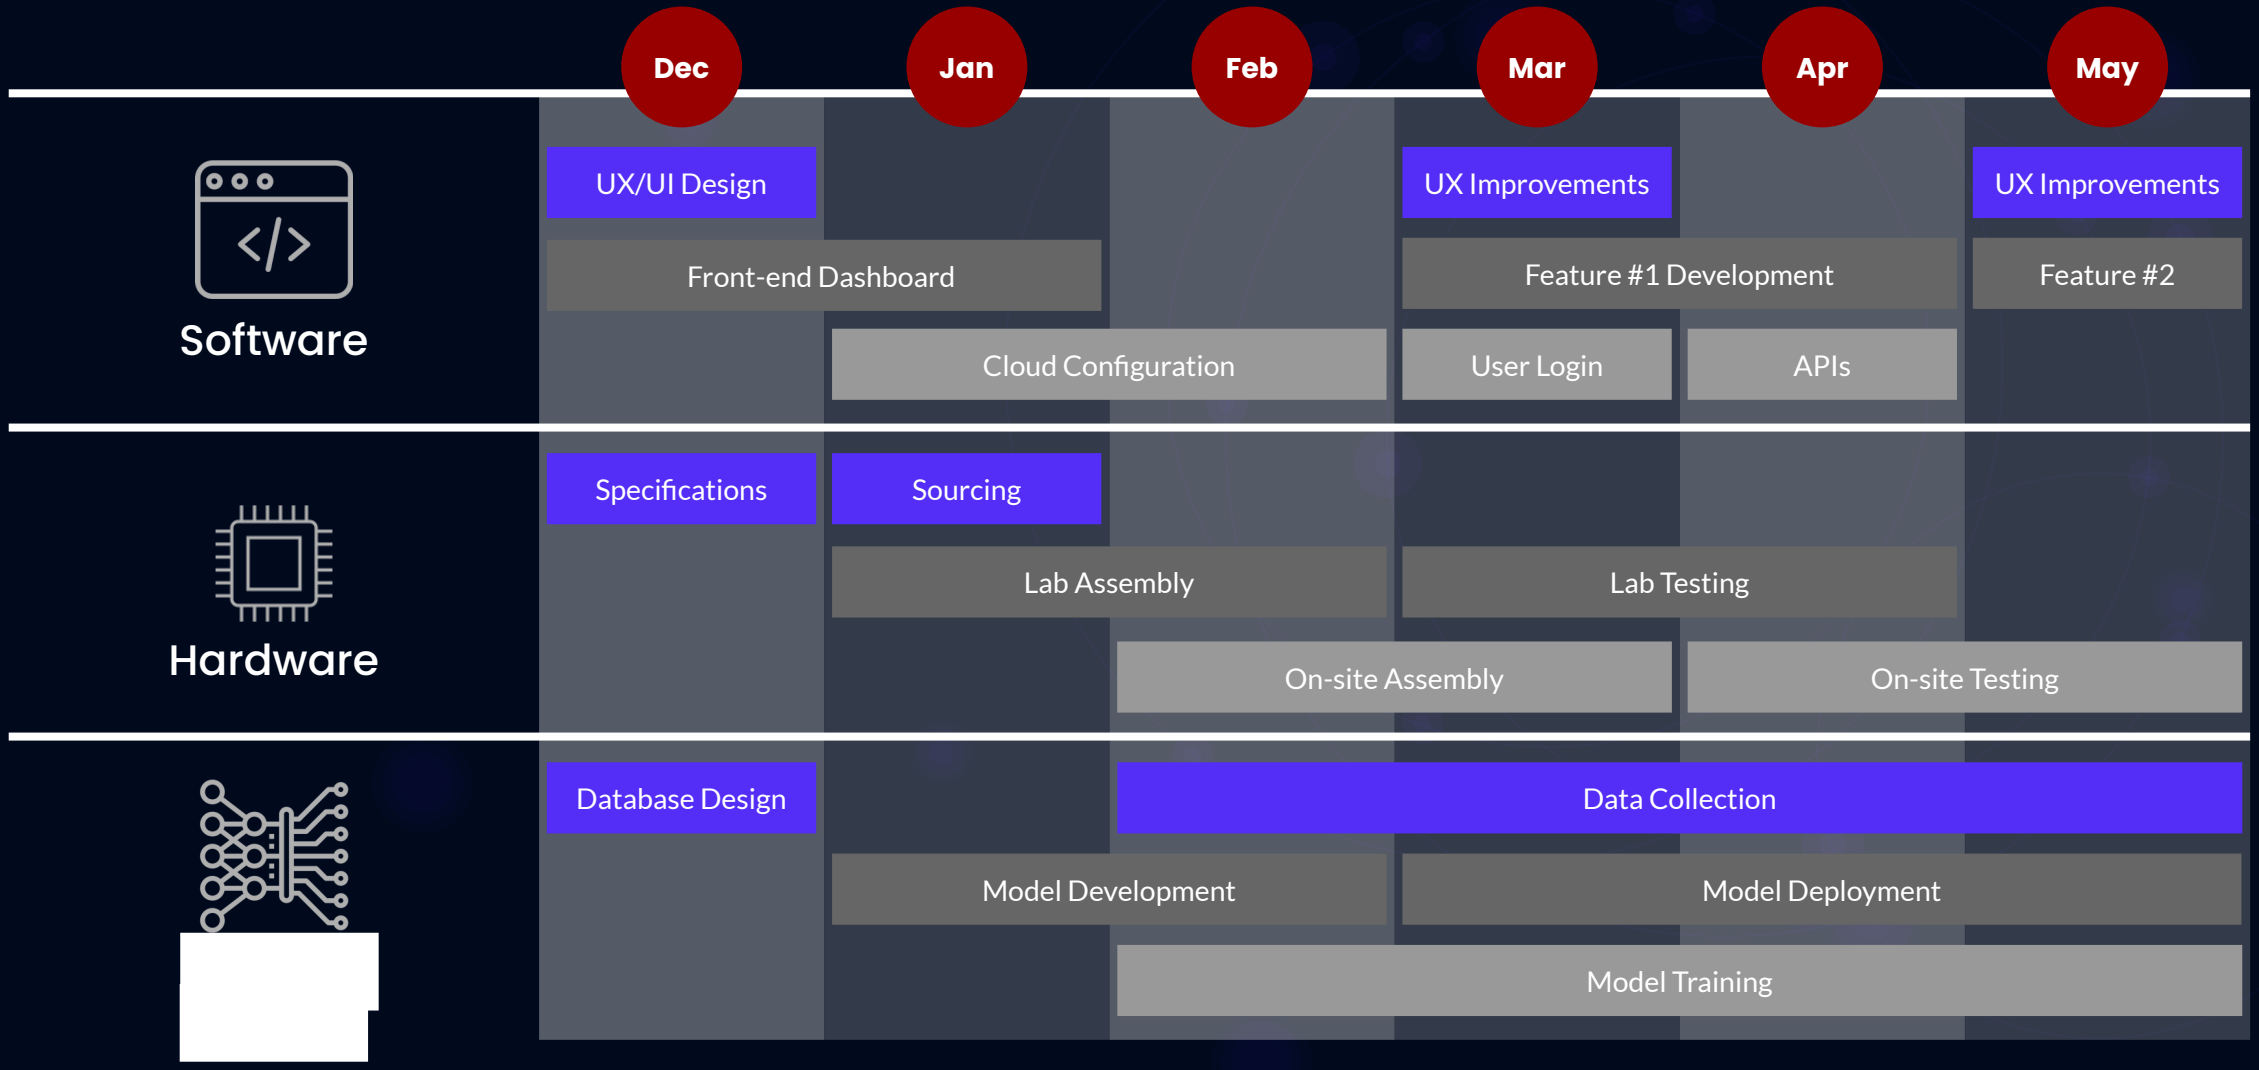

Raising $650k with break-even in year 3

Ambient Systems

An international team consisting of experienced entrepreneurs, engineers, and management consultants with a **wealth of experience across major markets.**

Product Development

Computer Science Master's Student
NUS (Singapore)

Corporate Development

Raised over $23M for ventures in highly regulated industries in Canada & EU

Ambient Systems

Climate Management for Cities of Tomorrow

Summary

1. Identified product-market fit as a smart-building technology provider for indoor farms.
2. Developed a competitive offering and IP through hardware-software co-design.
3. Confirmed pilot project with farm operator starting in January 2021.
