Building Management Solution for Indoor Farms

Automate Building Management

About Ambient

Ambient is a deep-tech spin-off from the National University of Singapore (NUS) that is developing an integrated hardware-software solution for climate management of vertical farms.

The product leverages intellectual property on securely combining various sources of data and machine learning to enhance building performance.

AMBIENT'S FLAGSHIP PRODUCT

MONITORING

Measure most important parameters for vertical farm operations, starting with temperature, relative humidity, CO_2, and light intensity.

SEAMLESS INTEGRATION

Connect easily to the existing building management system and mechanical equipment or have Ambient implement them based on your requirements.

REAL-TIME ACCESS

Access real-time data through online dashboards and receive push alerts anytime and anywhere.

MACHINE INTELLIGENCE

Securely archive your critical data and leverage latest machine learning models to improve the harvest and reduce operational costs.
