Traditional Farming Methods are increasingly unreliable

Global Warming has brought about issues such as

Rising Temperatures, Irregular Climates

Private and Confidential

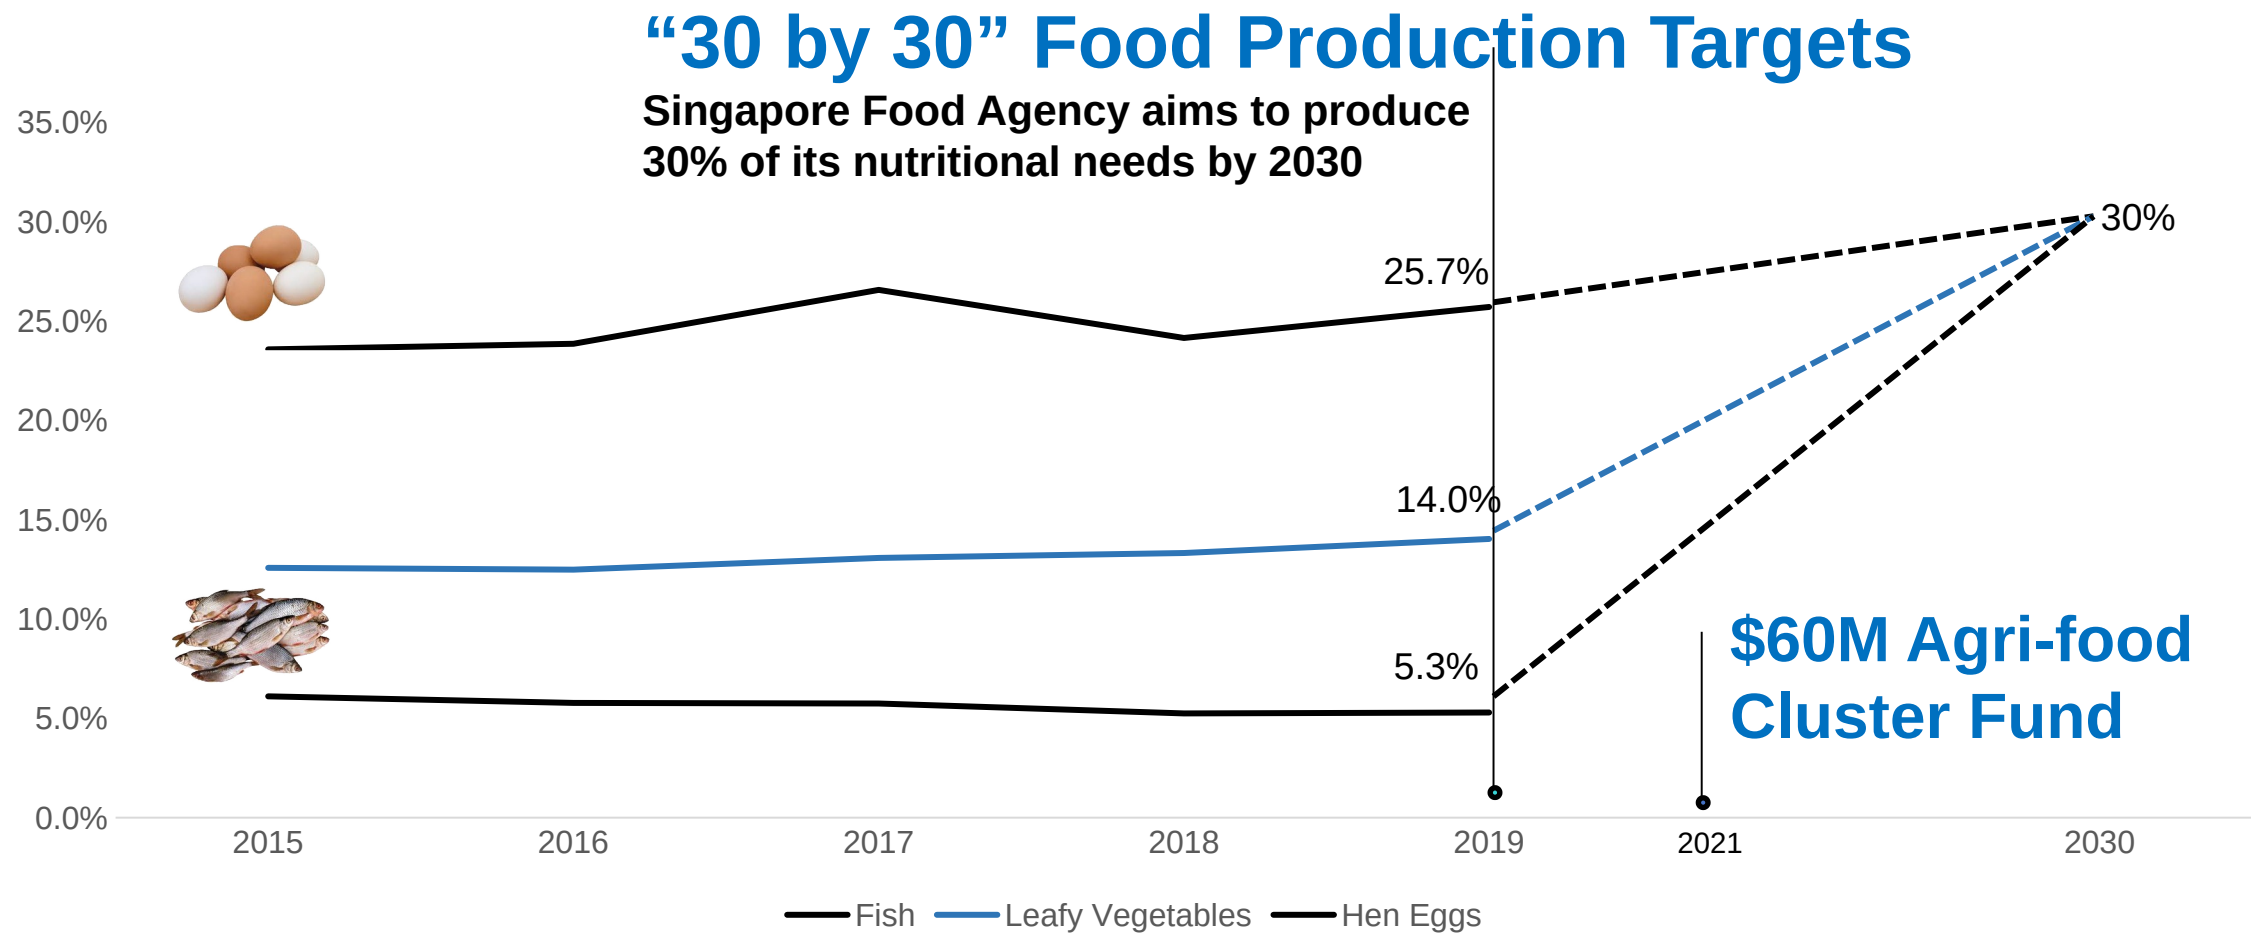

Covid-19 has disrupted traditional farming

Traditional Farms were hit hard by the Covid-19 Pandemic

Quarantines, Disruption to Supply Chains

Local farms sees supports from local government sectors

*Agriculture sector of Singapore is engaged mainly in the production of eggs, fish and vegetables for local consumptions
(1) Fish only includes seafood from coastal and land-based farm production and excluding local landings of seafood (seafood catches from local waters)
Source: Agri-food and Veterinary Authority, Singapore Food Agency, National Parks Board

Bringing the optimal environment conditions indoors

OPTIMAL CONDITIONS DEPENDS ON SEVERAL FACTORS

Day-time Temp: 20-24C
Night-time Temp: 10-12C
Humidity: Low humidity
(Crown): 18C
Light Intensity: 800-1200 micro-mol/m2/s PPF

FARMERS HAVE NO CONTROL ON BUILDING CONDITIONS

No access to building data

QUALITY CROP ARE TIME-SENSITIVE

Crop growth requires real-time monitoring

LACK OF DYNAMIC SOLUTION FOR OPTIMAL ENVIRONMENT

No infrastructure integration with Air Conditioning and Machine Ventilation (ACMV)

Agri-tech remains key area of investment in Southeast Asia

Farm Management Software, Sensing & IOT is the top 5 most invested Agri-tech category in the region (2019)

Climate At Your Service

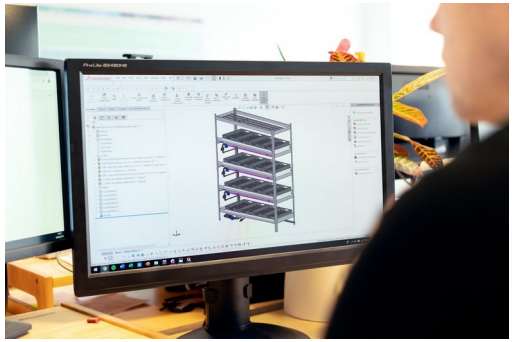

Connected.
Integrated.
Automated.

Our Features

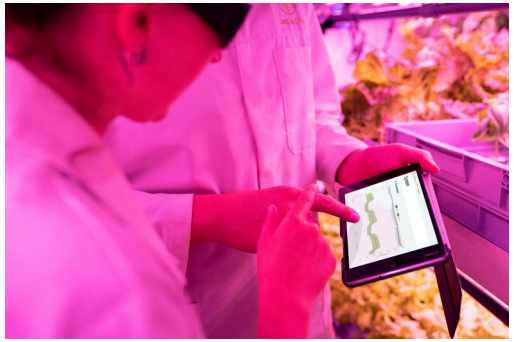

Seamless Building Integration

Enjoy full connectivity within your farm and perform real-time environmental adjustments based on crop

Monitoring In Real-Time

Access real-time data through online dashboards and receive push alerts anytime anywhere

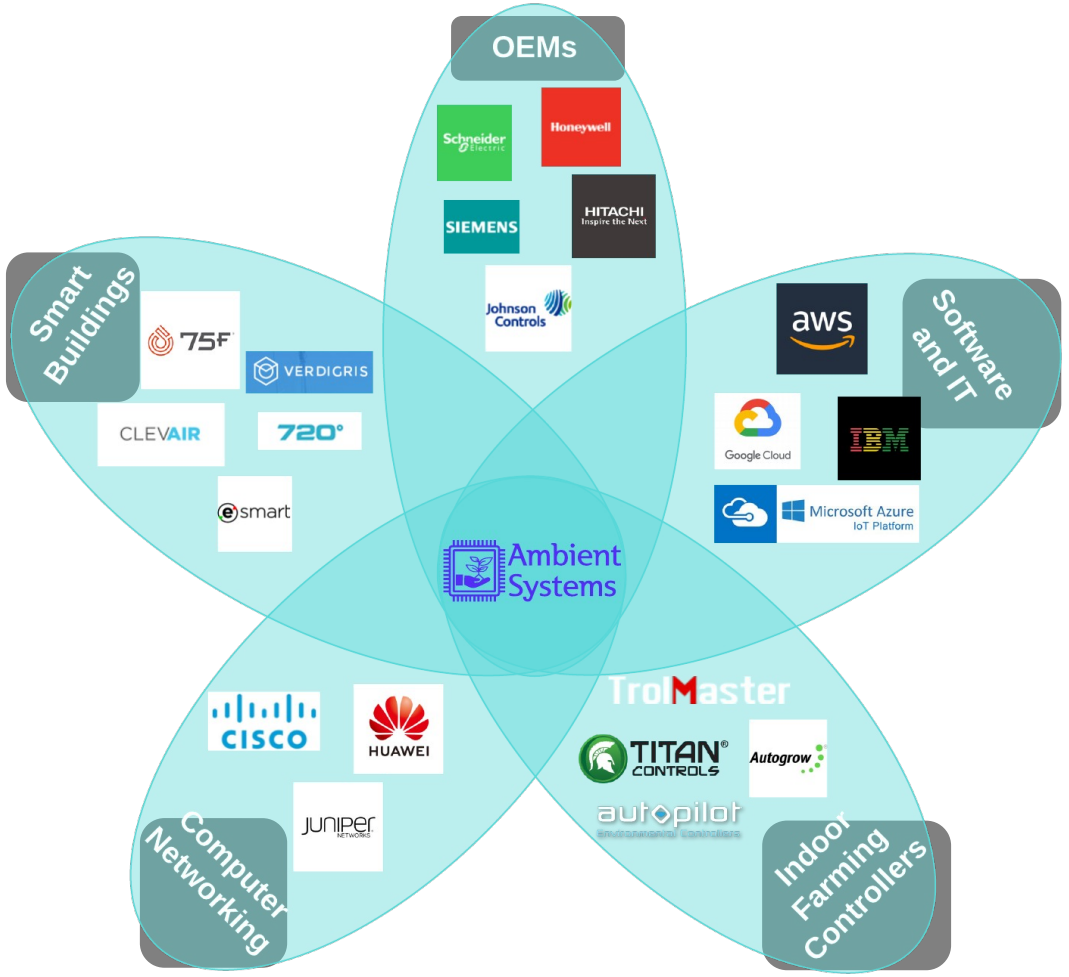

Grow With Data Insights

Apply data-driven solutions to understand factors that affect growth and quality, enabling better crop health

About Us

Ambient is a deep-tech spin-off from the National University of Singapore that is developing an integrated hardware-software solution for climate management of vertical farms.

The product leverages intellectual property on securely combining various sources of data and machine learning to enhance building performance.

Product Development

- **MComp, Computer Science**
  National University of Singapore
- **BASc, Civil Engineering, Sustainable Energy**
  University of Toronto
- **Serial Entrepreneur**
  5 years of experience in cleantech & deep tech start-ups (YC-backed)

Corporate Development

- **BBM, Finance**
  Singapore Management University
- **Strategy and Fundraising**
  3 years of experience across e-commerce, gaming and payments
