Undesired Interactions Between Building Conditions and Crops

(External Building Conditions)

Temperature

(Vertical Racks Ecosystem)

Soil Acidity **Lighting** **Nutrients**

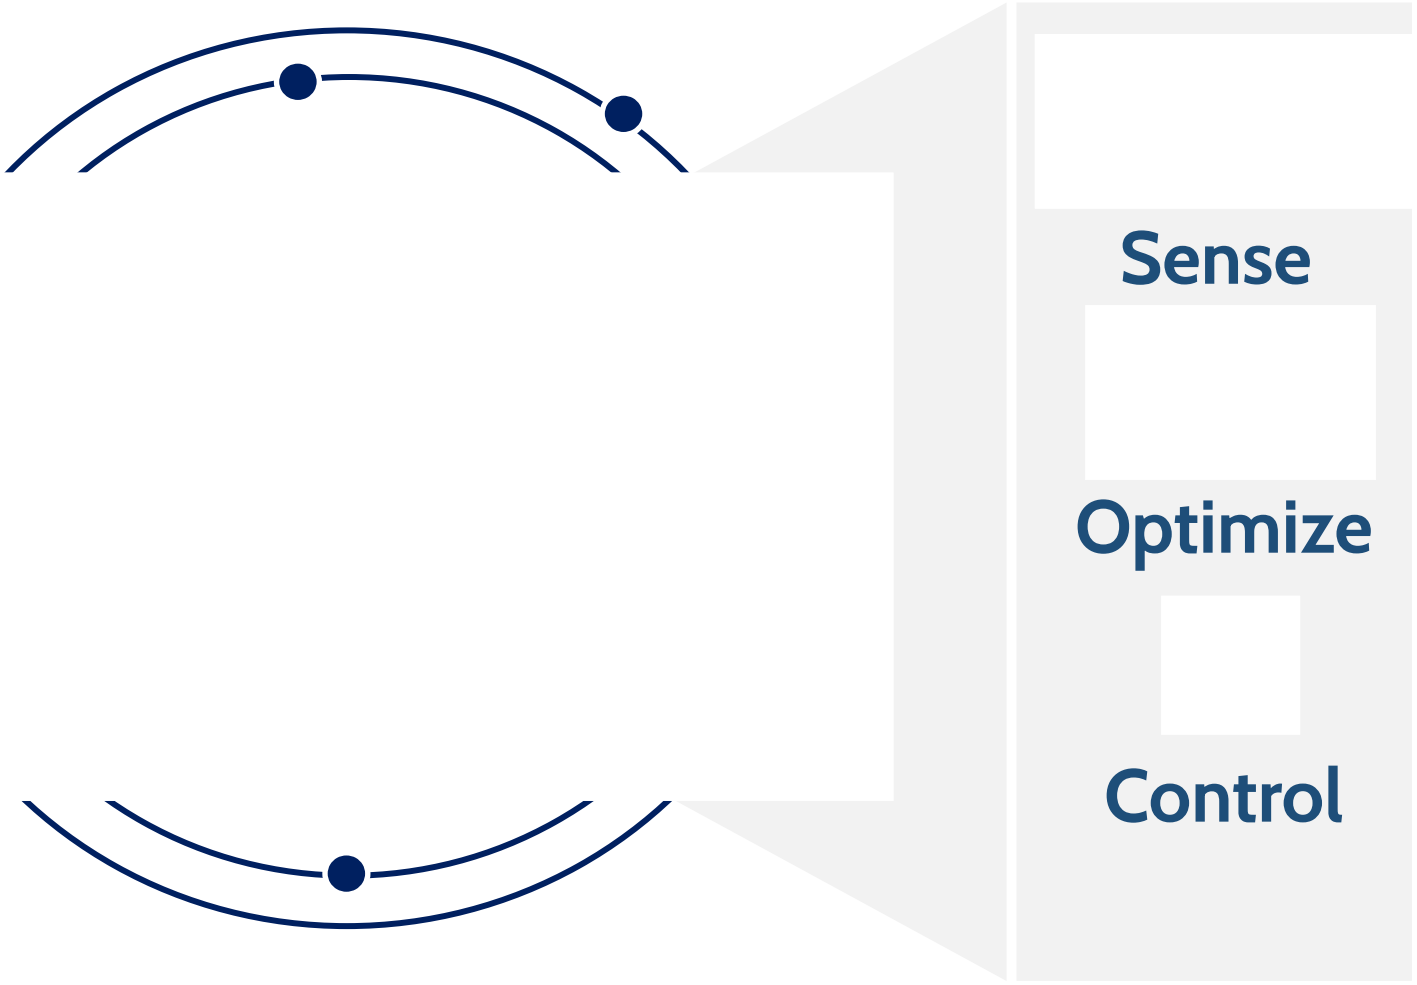

Humidity

Building Conditions affect crops

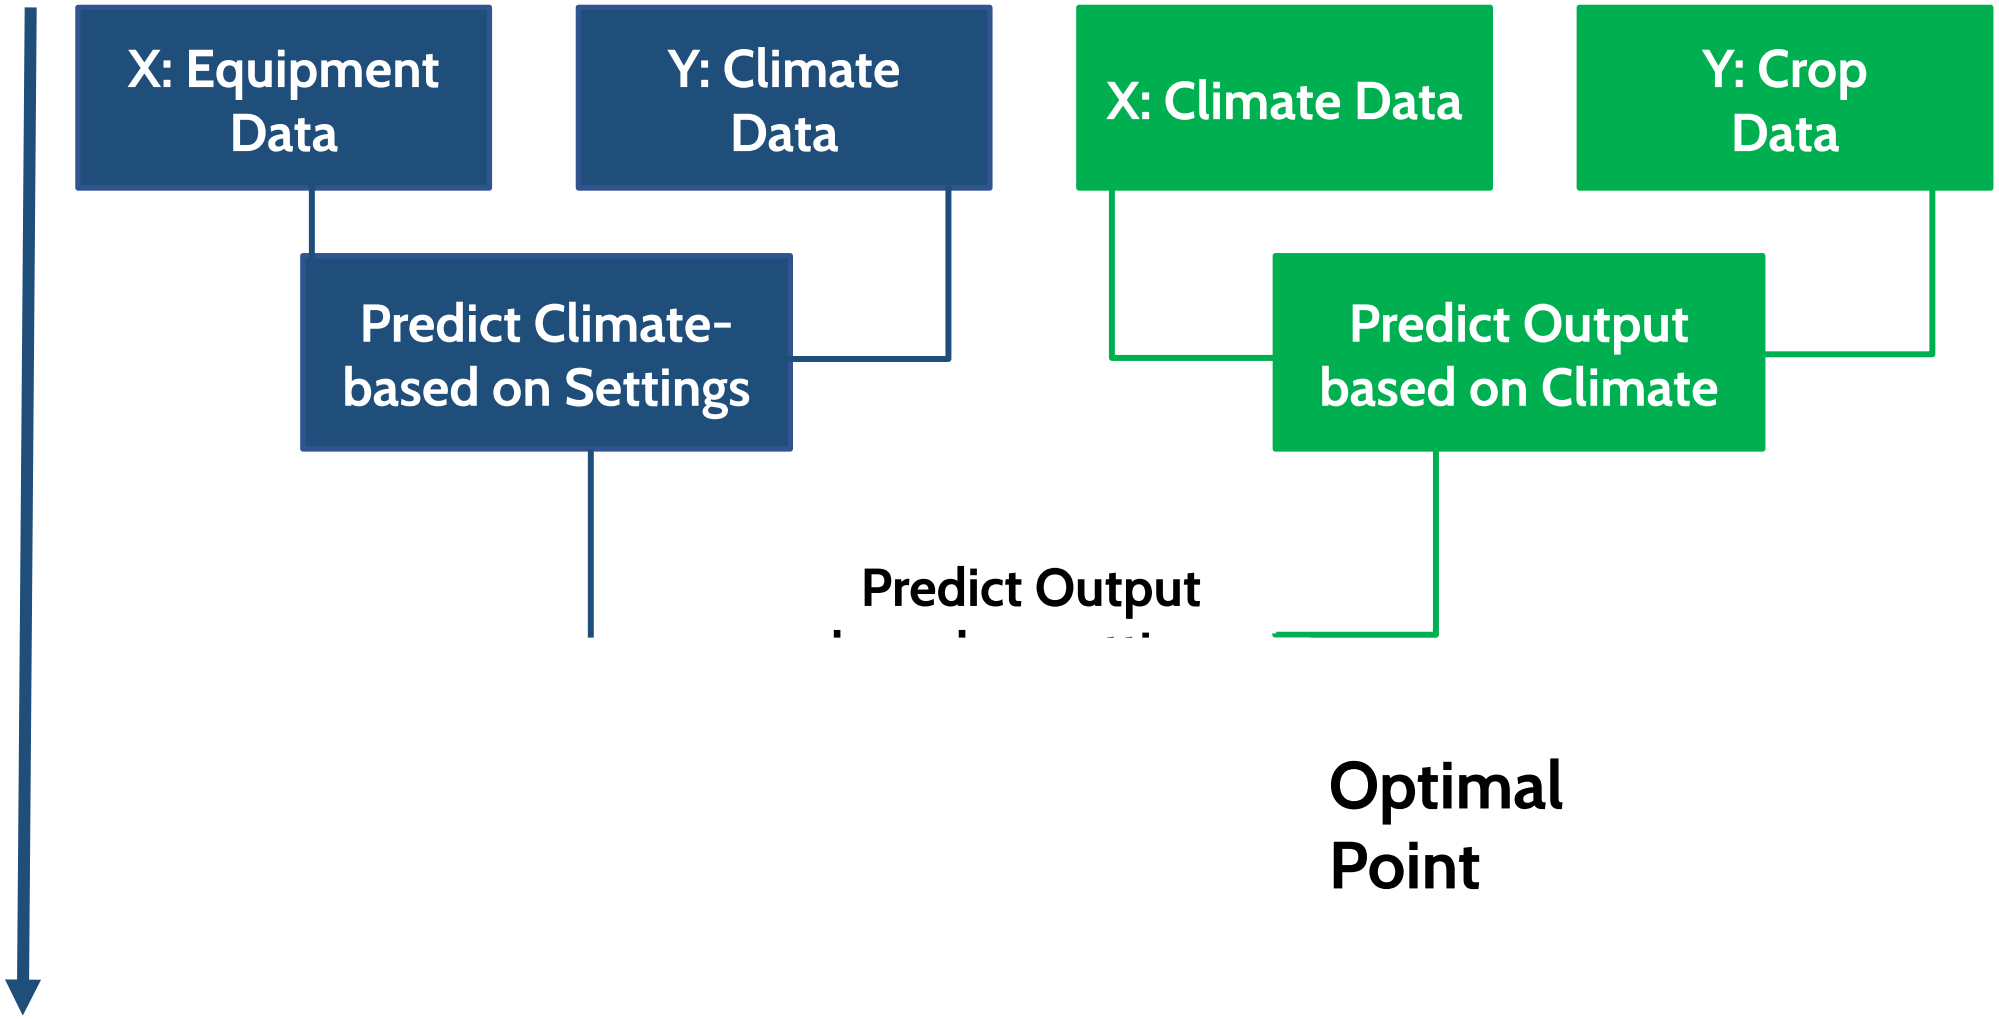

- Inconsistent Environment
- Habitat for Mold and Pest
- Affect level of photosynthesis

Climate Management Platform for Indoor Farms

AMBIENT SYSTEMS
Climate At Your Service

Patent: Computer System for Management of Buildings with Indoor Farms

Singapore patent pending: 10202105064T

Three Stage Supervised Learning

Optimal Point

Trade Secret: Operational Data on Creating an Optimal Indoor Climate

Climate Data

	Parameter
Current POC	Air Temperature
	Relative Humidity
	CO2
	Spectrum Light

Crop Data

	Parameter
Full-scale Plot	Soil Temperature
	Soil Moisture
	pH level
	Electrical Conductivity (EC_w)
	Crop specific parameters

Building Data

Equipment Settings
• Equipment setpoints • Light schedules • Chiller Plant settings • AHU Fan settings • Auxiliary Devices

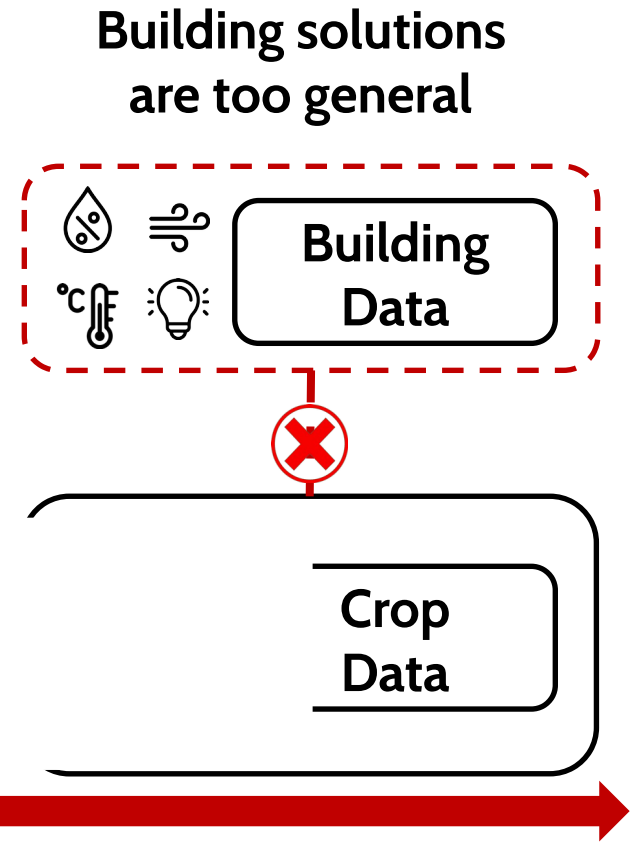

Proof of Concept: Strawberry Farm

Pilot Test	Findings	Potential Improvements
	CO2 at 25% of the optimal	• Increased photosynthesis by up to 75% • Earlier flowering • Higher fruit yields by up to 30%
	Temp at 70% of the optimal	• Increased leaf and petiole growth • Greater sucrose • More biomass at the roots

Ambient proprietary method provides equipment setpoints to achieve optimal targets

About Us

- **MComp, Computer Science**
  National University of Singapore
- **BASc, Civil Engineering, Sustainable Energy**
  University of Toronto
- **Serial Entrepreneur**
  5 years experience in cleantech, deep tech

, Finance
Singapore Management University

- **Strategy and Fundraising**
  3 years experience across e-commerce, gaming and payments

1. Experienced Team with tech, strategy and fundraising background

2. Our Indoor Farming launch market growing at a CAGR of 24%

3. Received with Indoor Farms

4. Full Product Launch by End of 2021

5. Clear Go-To-Market Strategy towards Agri-tech Hubs
