
AMBIENT
SYSTEMS
Climate At Your Service

Indoor Farming requires coordination of complex parameters, such as lighting, moisture, and CO2, requiring constant monitoring and adjustments to ensure HIGH-QUALITY output

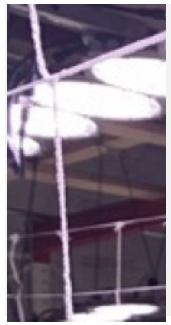

AMBIENT SYSTEMS

Too Many Manual Systems = Labor Intensive

Savings Potential Through Increased Human Productivity

Utilities

AMBIENT SYSTEMS

Undesired Interactions Between Building Conditions and Crops

(External Building Conditions)

Temperature

(Vertical Racks Ecosystem)

Soil Moisture

Lighting

Nutrients

Humidity

Building Conditions affect crops

- Inconsistent Environment
- Habitat for Mold and Pest
- Affect level of photosynthesis

AMBIENT SYSTEMS

Current Solutions are Lacking

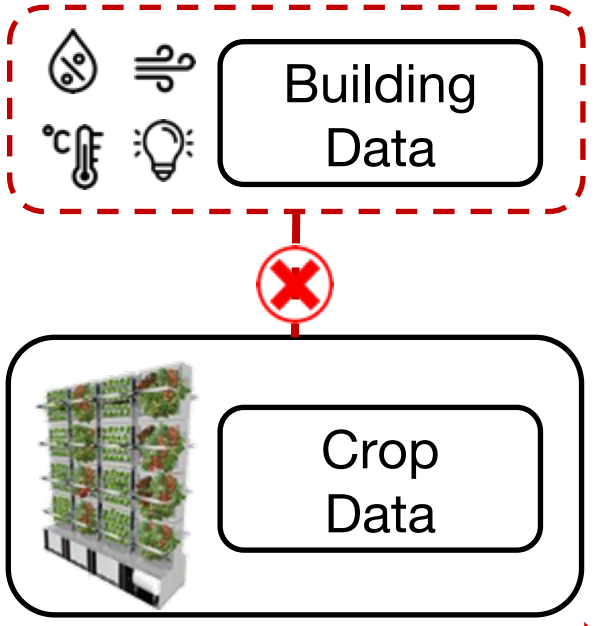

Farm systems do not collect building data

Container farms not built for scale

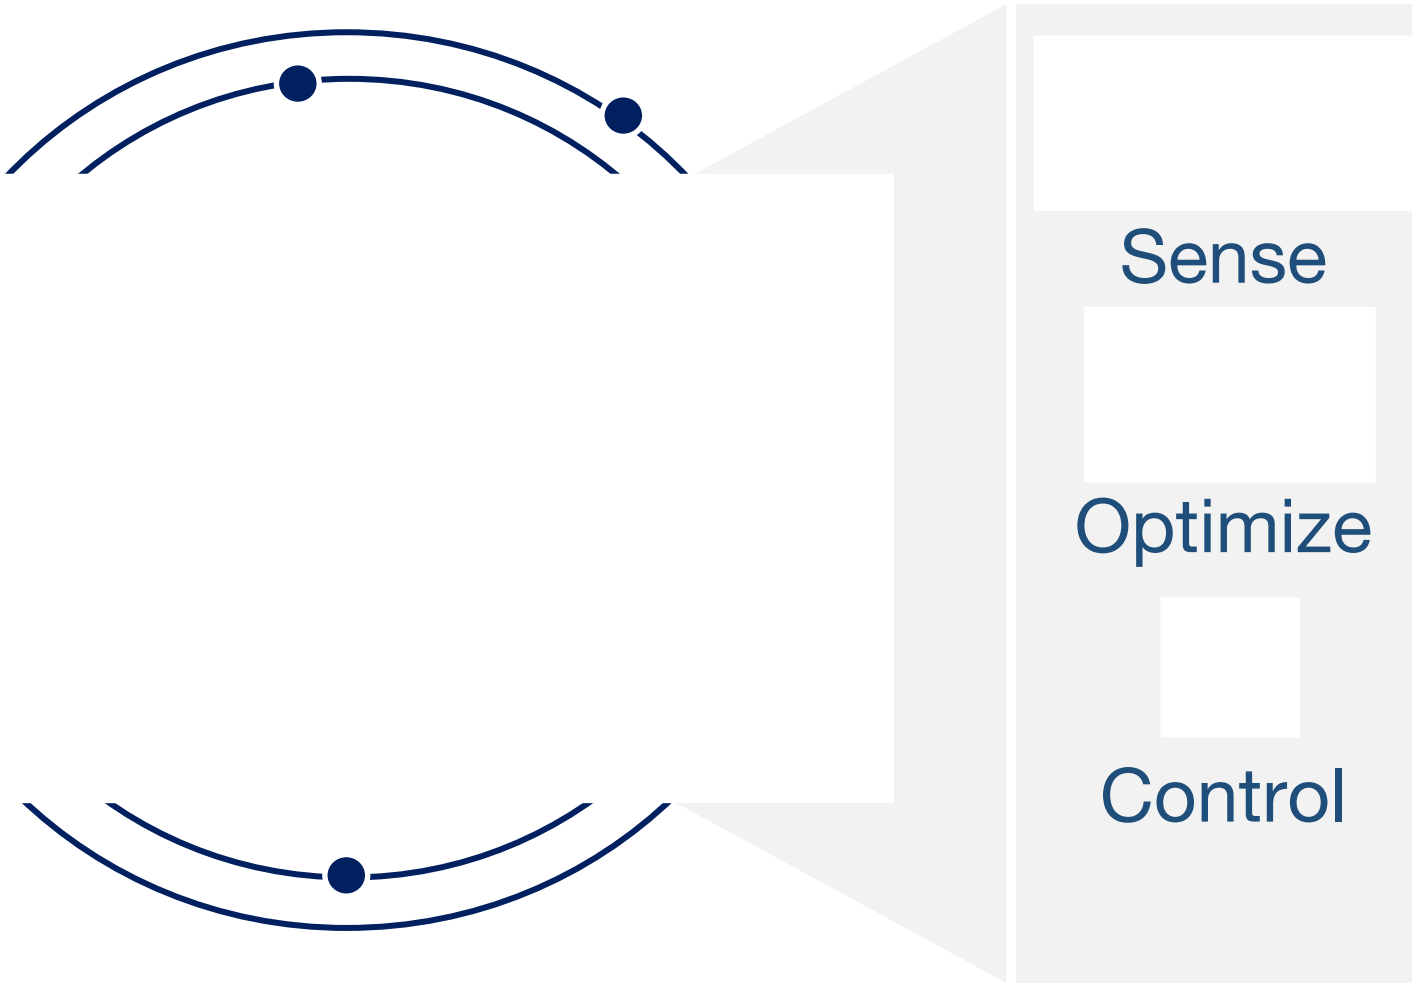

Building solutions are too general

AMBIENT SYSTEMS

Building Management Solution for Indoor Farms

Singapore patent pending: 10202105064T

1. Connected

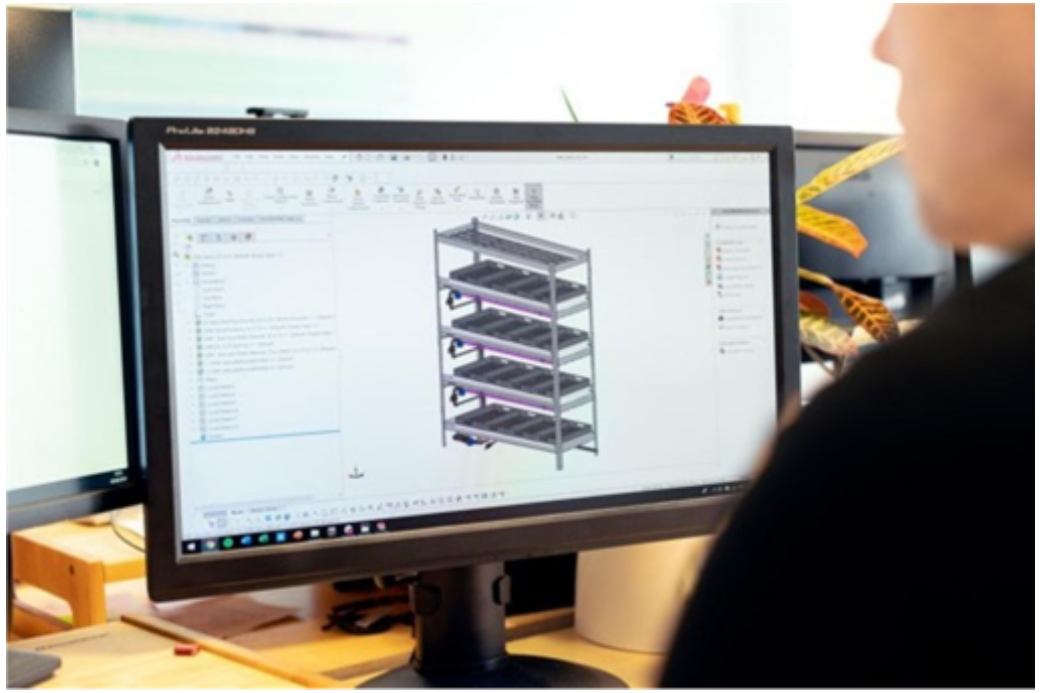

Integrated with essential equipment and control systems

Seamless Building Integration

Connect the indoor farming system to the existing building management system – or have Ambient implement them based on your requirements. Enjoy full connectivity across the farm and perform real-time environmental adjustments based on crop.

2. Centralized

Important data in one easy-to-access place

Monitoring In Real-Time

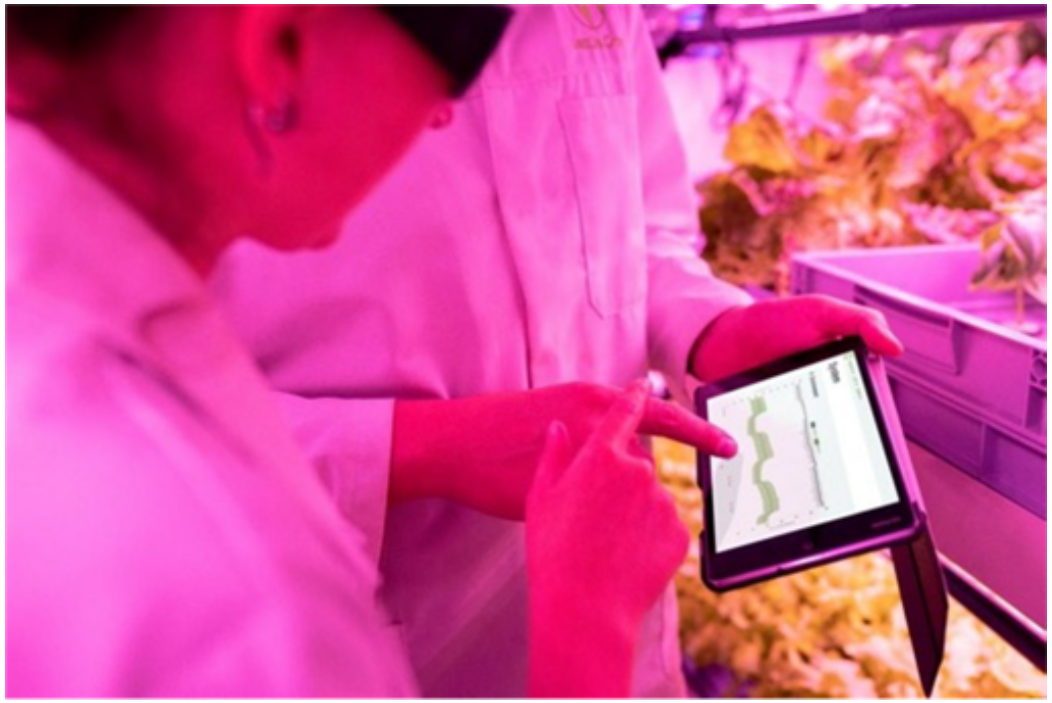

Access real-time data through online dashboards and securely archive all critical operational information. Start measuring most important crop parameters like temperature, relative humidity, CO2, and light intensity.

3. Automated

-enabled optimization

Grow With Data Insights

Leverage latest models to improve the harvest and reduce operational costs. Apply data-driven solutions to understand key factors that affect plant growth and quality, enabling better crop health and more accurate harvest timing predictions.

Data-Driven Automation

Climate Data

Crop Data

Equipment Settings

	Parameter
Monitor	Air Temperature
	Relative Humidity
	CO2
	VOCs

	Parameter
Crop Insights	Soil Temperature
	Soil Moisture
	pH level
	Electrical conductivity (EC_w)
	Crop specific parameters

Sample Action
• Adjust temperature • Adjust ventilation • Adjust lights • Install fogging machines • Install CO2 regulator • Increase light intensity • Increase natural light

+24%

energy savings,
man-hour savings,
reduction in crop loss

Break-even in

6 to 12 months

AMBIENT SYSTEMS

About Us

Product & Engineering

- **MComp, Computer Science**
  National University of Singapore
- **BASc, Civil Engineering, Sustainable Energy**
  University of Toronto
- **Serial Entrepreneur**
  5 years experience in cleantech and deep tech

, Finance
Singapore Management University

- **Strategy and Fundraising**
  3 years experience across e-commerce, gaming, and payments

Design & Marketing

- **Specialist Diploma, Communications**
  Nanyang Polytechnic / Temasek Polytechnic
- **Creative**
  3 years experience across graphic design and content creation for various brands

Work With Us

Indoor Farms
interested in building automation solutions

Advisors
with expertise in Agri-tech / Artificial Intelligence / Building Technology

Technology Partners
specializing in sensor hardware and system integration
