#000000

White
Hex
#FFFFFF

Reversed White Brand Logo

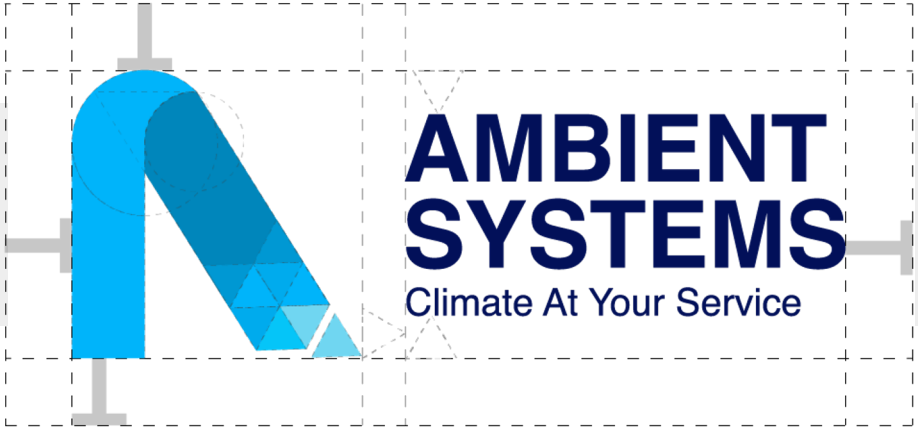

The backgrounds must be dark enough to ensure the legibility of the reversed white brand logo. Use only when it is not possible to use the recommended full colour version.

space refers to a boundary placed around the brand logo where there should be no other artwork in it, to maintain its legibility and visibility.

Take the height of “T” to form a clear space around the brand logo.

Other artwork can be placed here

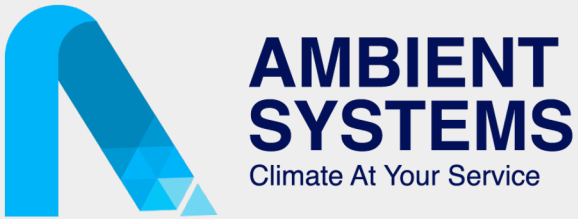

Other artwork can be placed here

Responsive Brand Logos

4 variants to work with for different channels and applications, only use these to optimise the logo for different context.

Incorrect Logo Usage

Examples of how **not to** use the brand logo.

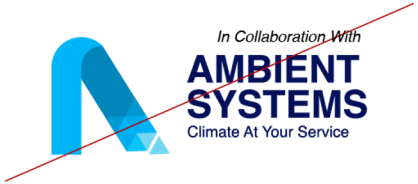

Do not place the full colour brand logo on a background colour that does not have a strong contrast against the brand logo elements.

Do not modify the proportion or structure in any way to fit your usage.

Do not change colours of elements, use only specified colours in .

Do not place any text or graphical artwork within the brand logo's clear space boundary.

Typography

Recommended among existing fonts in Google Slides.

Bold
Building management system powered by machine learning (AI).

Normal
Building management system powered by machine learning (AI).

Light
Building management system powered by machine learning (AI).

Roboto

Recommended font among existing fonts in Google Slides to complement .

Roboto Black
Building management system powered by machine learning (AI).

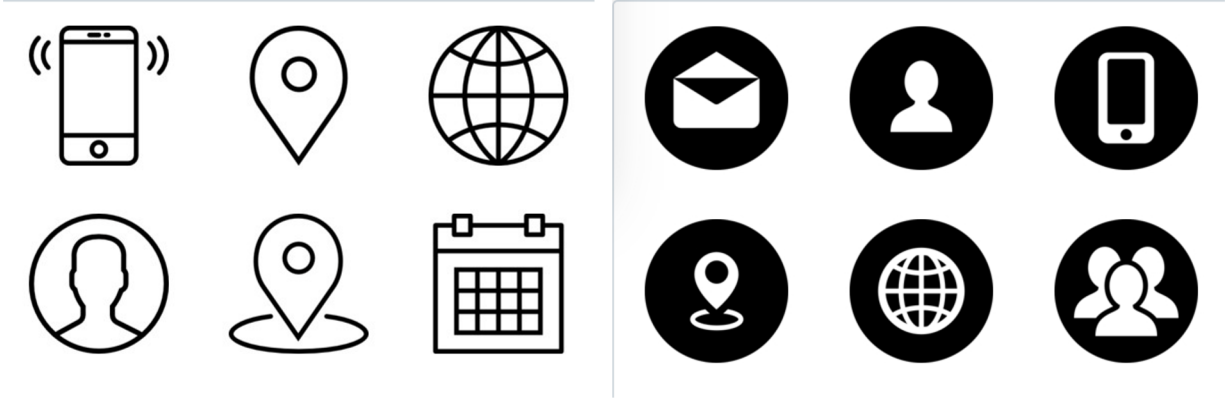

management system powered by machine learning (AI).

management system powered by machine learning (AI).

Roboto Light
Building management system powered by machine learning (AI).

Iconography
