Problem

Real estate owners and operators struggle to optimize their facilities.

1. Limited Resources

It’s hard to find highly trained and experienced building operators who can optimize multiple facilities.

2. Technological Complexity

Many buildings operate using outdated legacy systems and equipment that lack interoperability.

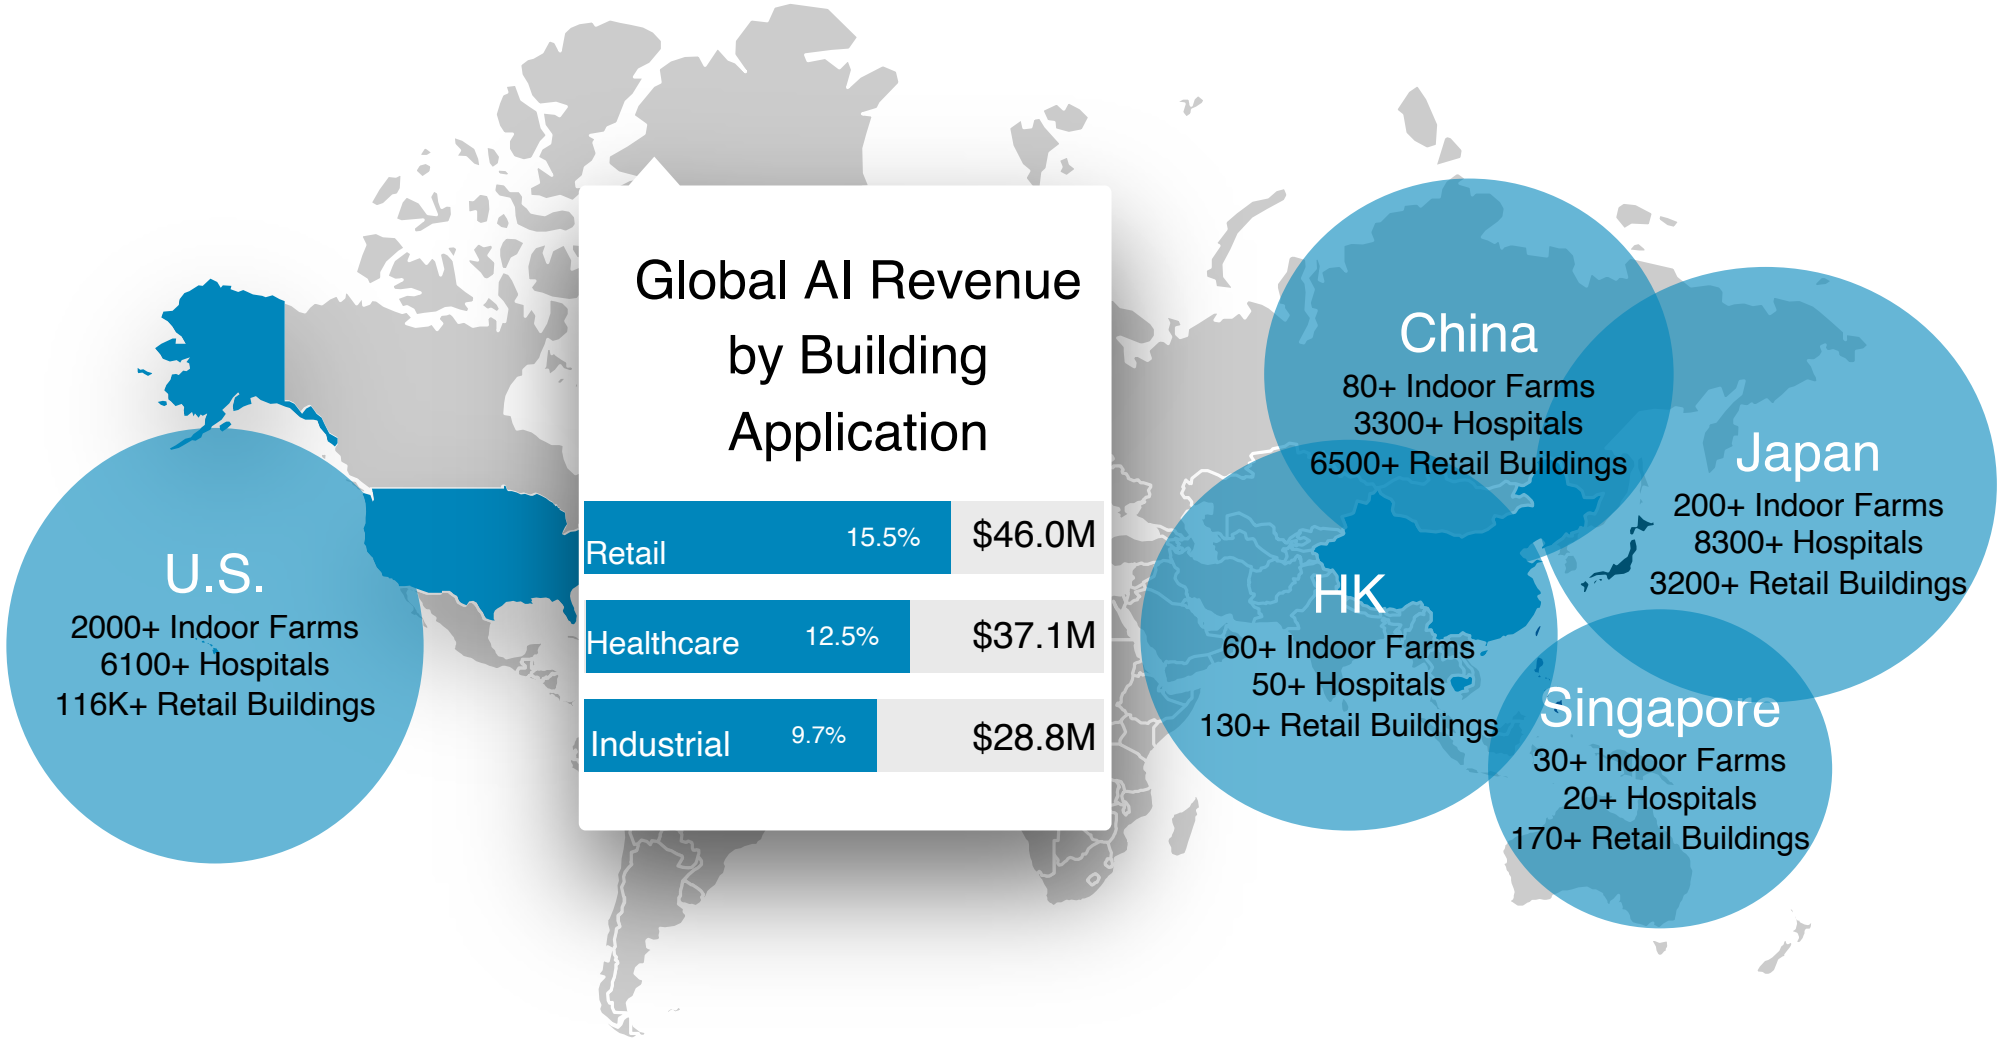

3. Competing Priorities

Different buildings have different system requirements based on the unique needs of occupants and operators.

Specialized buildings require more than energy management

Indoor Farms	Hospitals	Retail Stores
Parameter Schedule Harvest Prediction	Zone Control Bacteria Detection	Customer Experience

Unlocking USD$8.3 bn of revenue across specialised segments

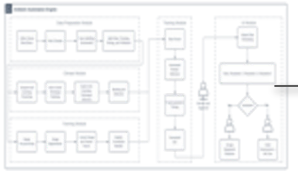

AI Platform Backed by IP

Sense

MVP sensors co-designed with manufacturing partners

Optimize

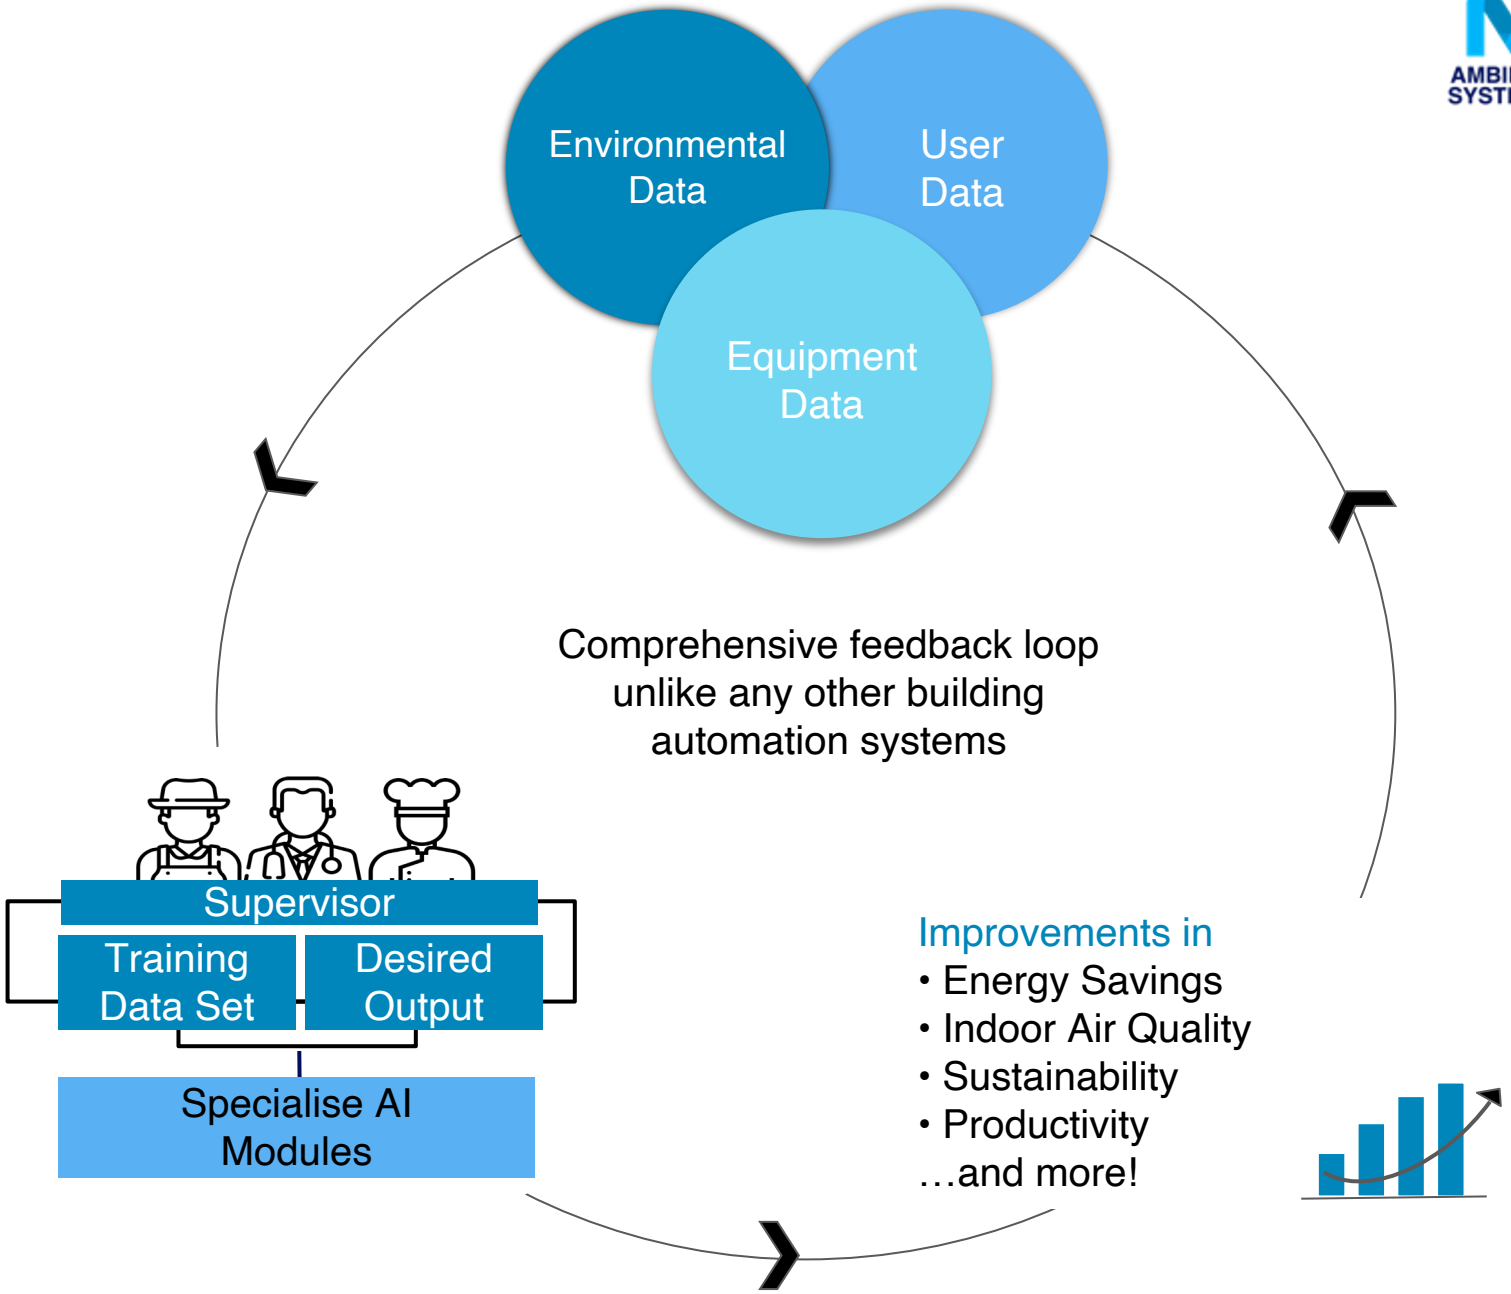

NUS National University of Singapore

Patent Pending Invention from National University of Singapore (NUS)

Control

Offering full-stack web application after development

Building Optimization beyond Energy Savings

One step ahead with AI-enabled prescriptive maintenance

AMBIENT SYSTEMS
Climate At Your Service

Artificial Intelligence	Machine Learning	Deep Learning
		Datapoints gathered 
Automated Offerings • Building Performance Optimisation • Building Process Optimization	Smart Offerings • Asset Optimization • AI-based • AI-based Lighting Control	Cognitive Offerings • Predictive Maintenance

Identify general issues ✓

Understand energy consumption by analysing primary datapoints ✓

Personalised control ✓

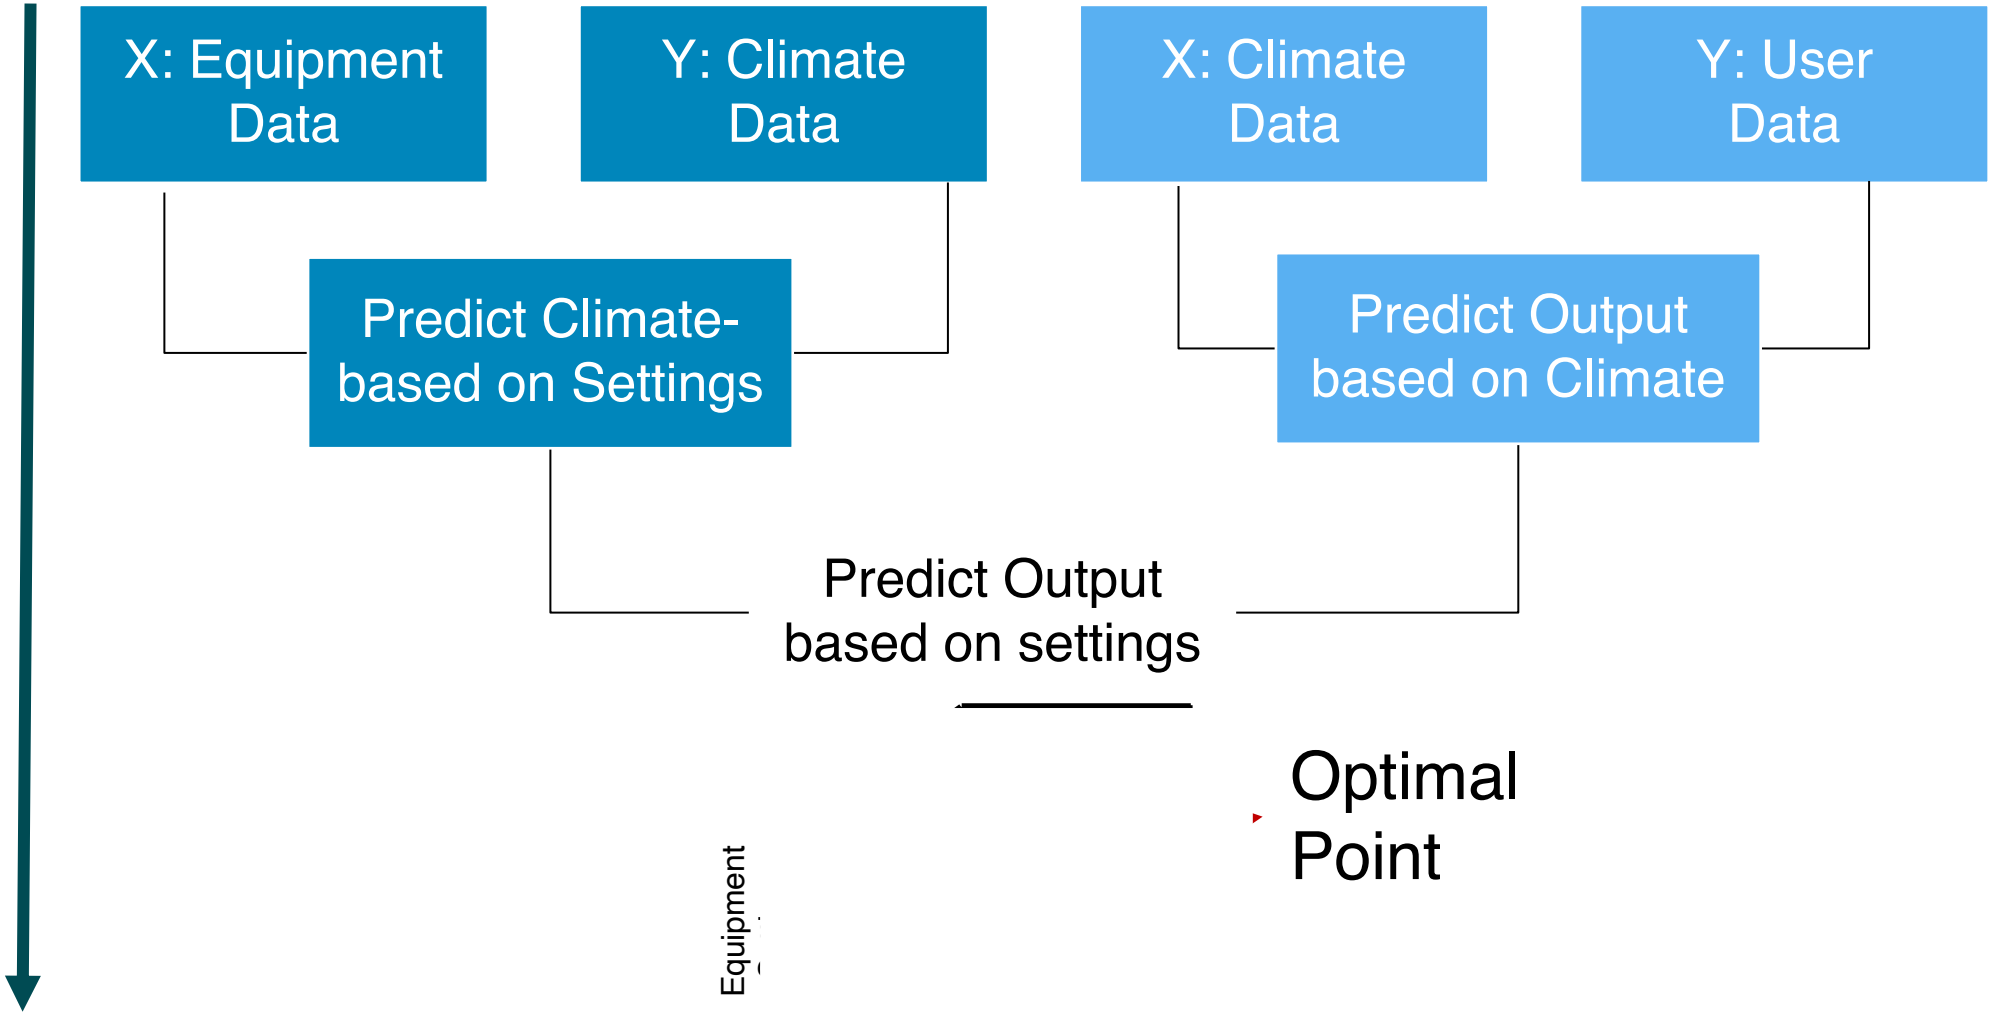

Understand energy flow and building occupancy ✓

Collect external datapoints ✓

Underlying Magic: for Management of Building Equipment

Singapore patent pending: 10202105064T

Three Stage Supervised Learning

Indoor Farming Overview

Savings potential and optimize personnel costs which account for 90% of total expenses

Increase energy savings, man-hour savings, and reduce crop loss by 24%

6.72B market with CAGR=23.6%

Indoor farm operators
seeking to optimize crop performance through customized insights across key parameters.

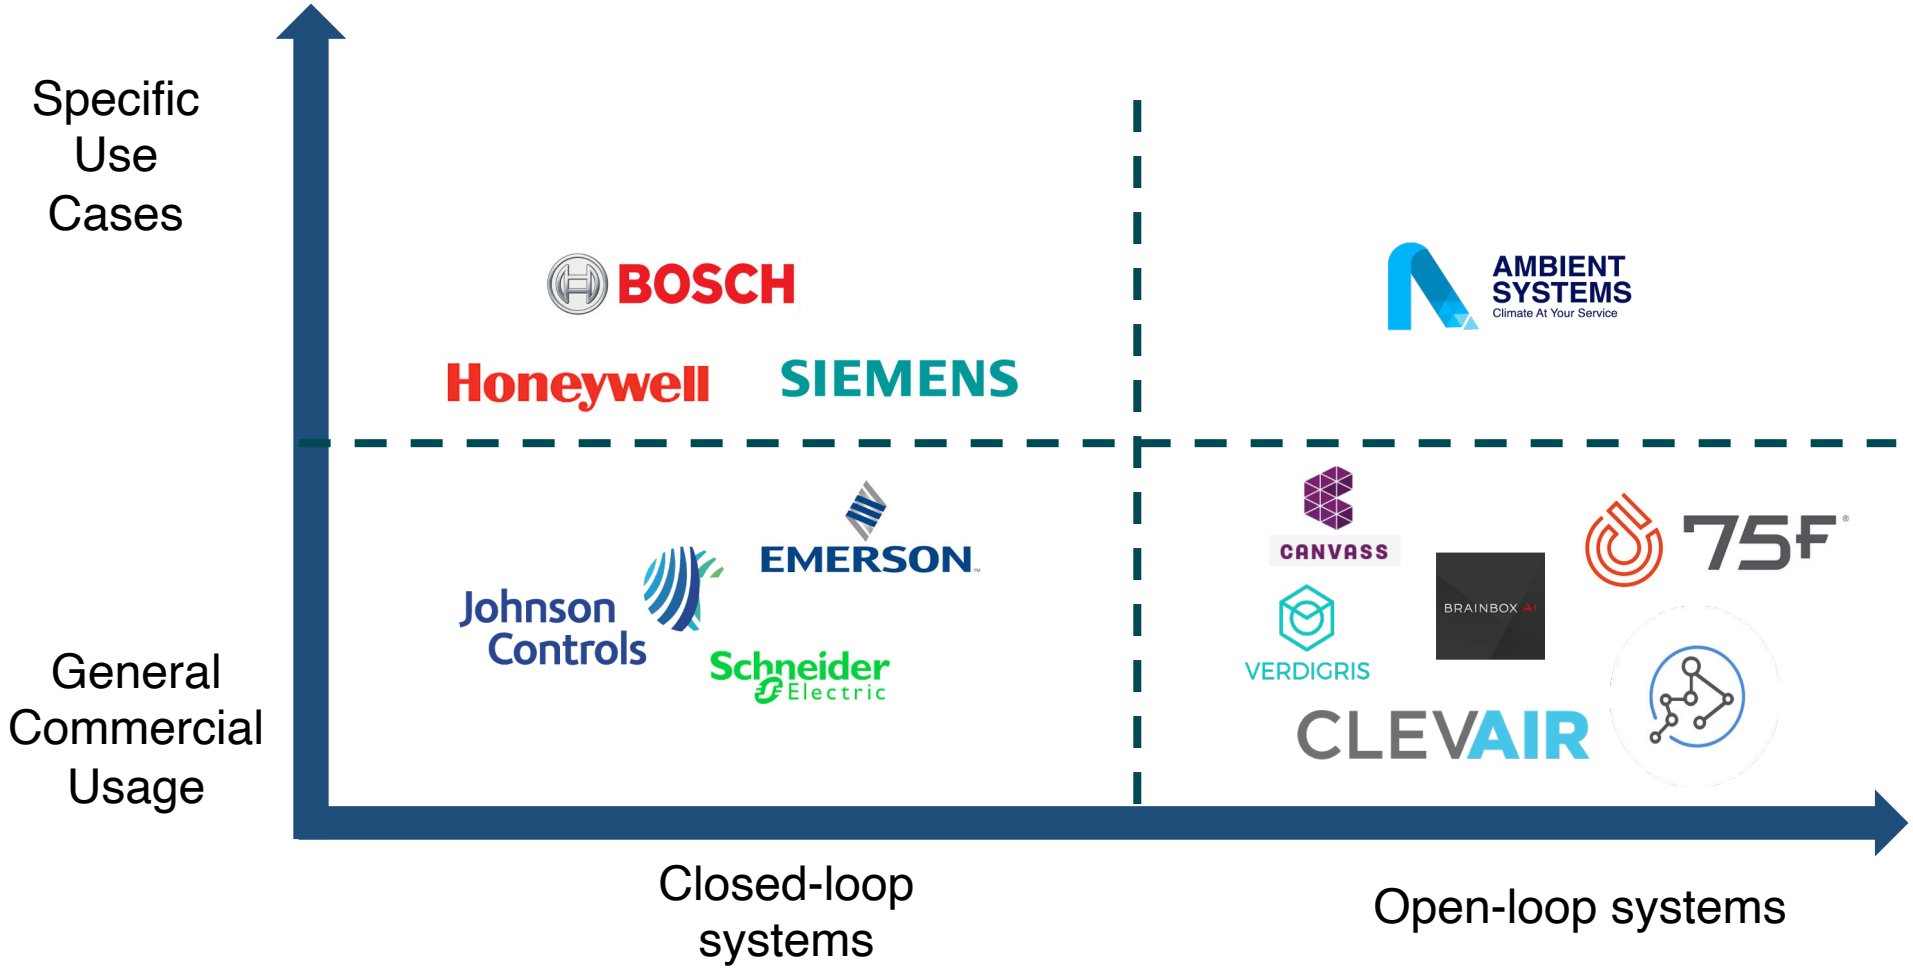

Healthcare Overviewv

Hospitals looking to improve patient satisfaction and automation of equipment management.

Retail Overview

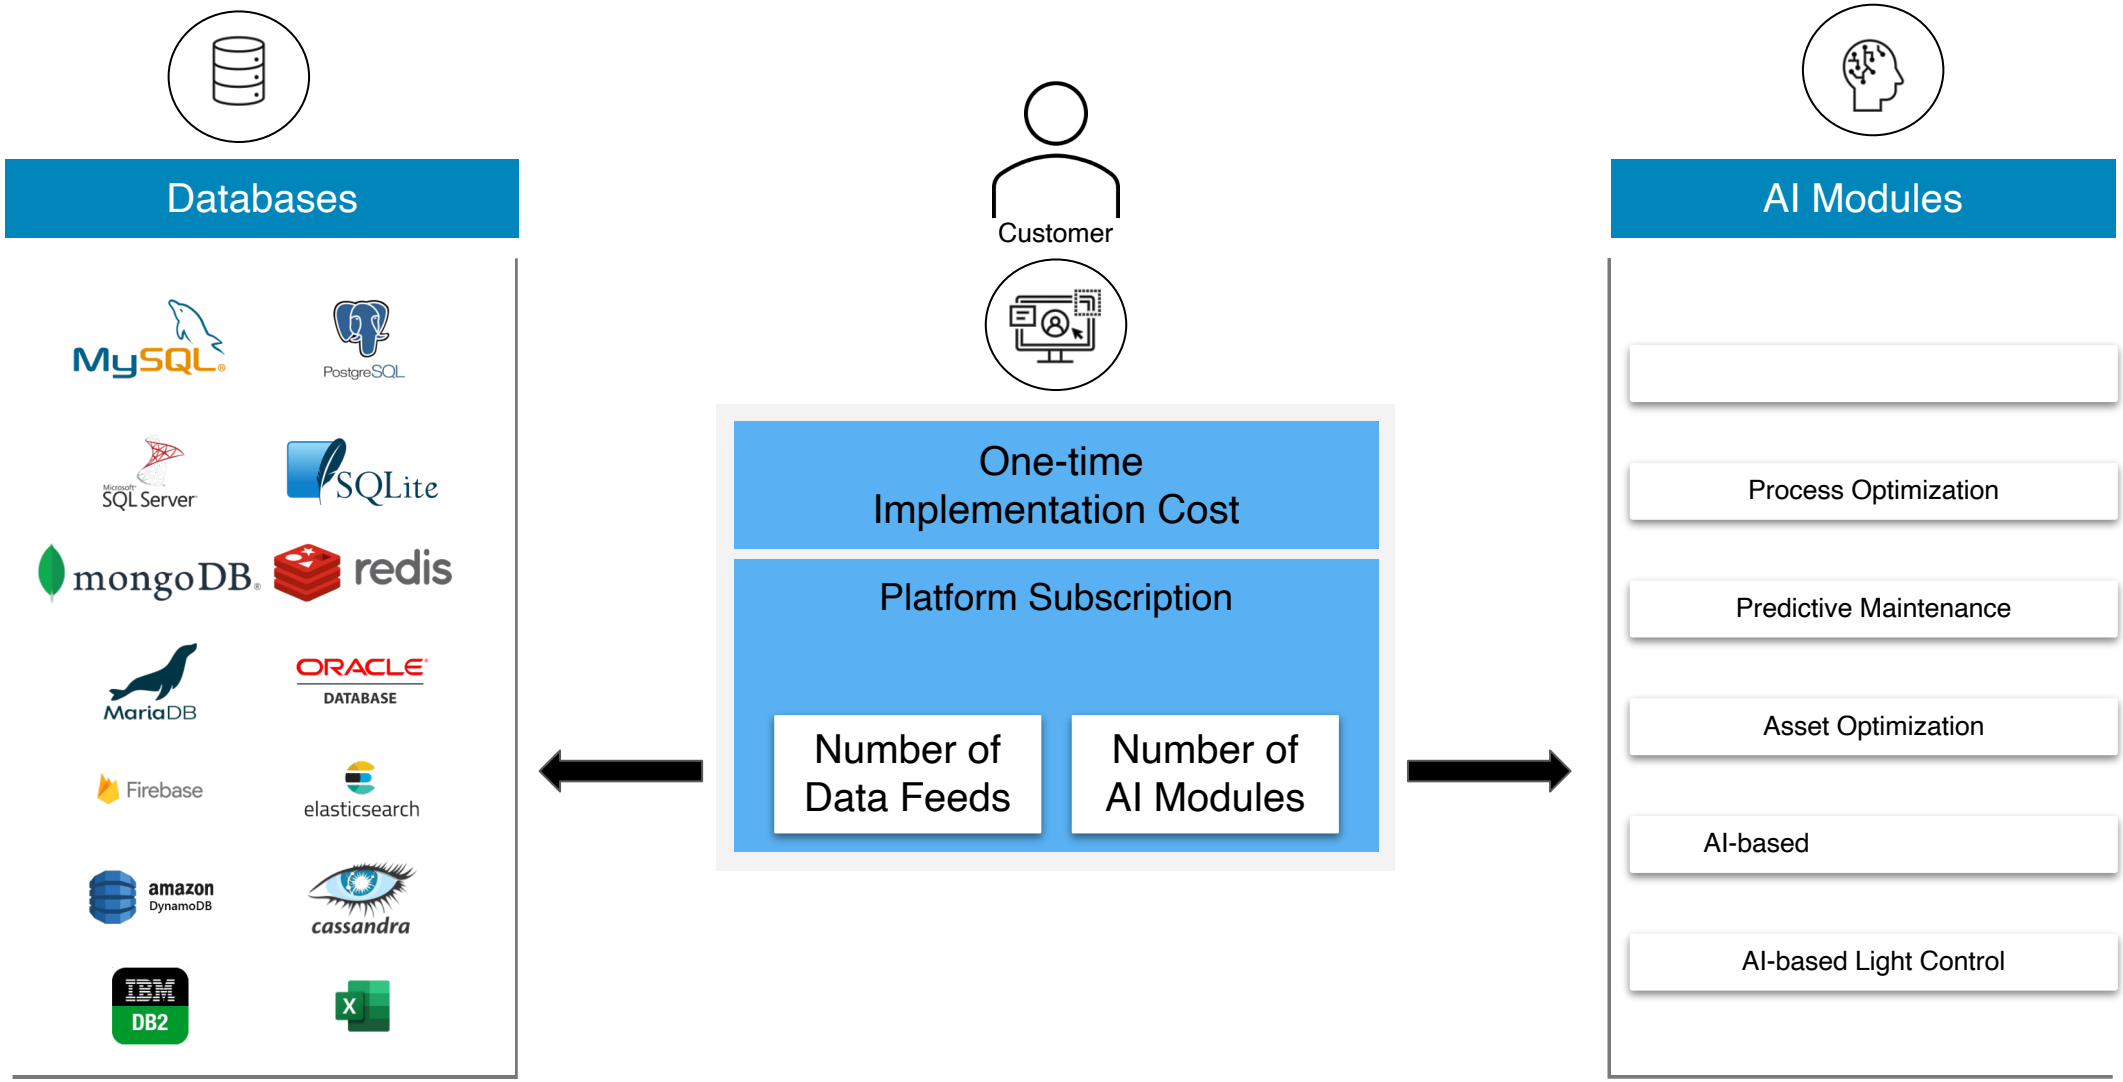

Retailers looking to optimize customer experiences, forecasting, inventory management.

Competitive Landscape

B2B SaaS Model

Usage-based Pricing Plan

AMBIENT SYSTEMS

One-time Implementation Cost

Installation of sensors and equipment integration

by Project Basis

Basic

SGD$1,000

- Custom data analytics

3 Data Feeds/mo
1 AI modules/mo

Advanced

SGD$1,500

- Basic + two more data feeds
- one more AI module

5 Data Feeds/mo
2 AI modules/mo

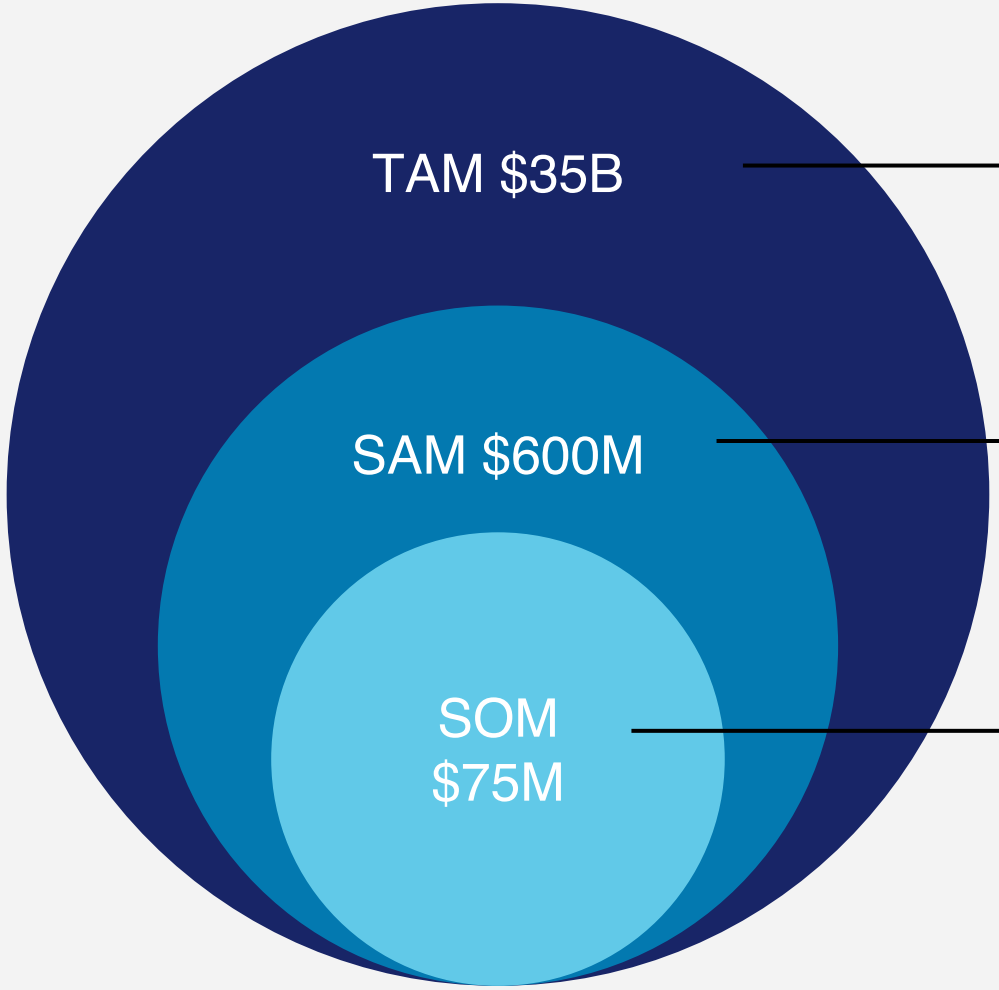

Premium

SGD$2,000

- Advanced + two more data feeds
- Choice of three AI modules
- Choice of three AI modules

7 Data Feeds/mo
3 AI modules/mo

Opportunity

Global AI Market
(CAGR 42%)

Global AI for Buildings & Homes Market
(CAGR 36%)

Target Market: Retail, Healthcare, and
Industrial Buildings in APAC and North America

Source: Frost & Sullivan

Go-to-market Strategy

Monitor

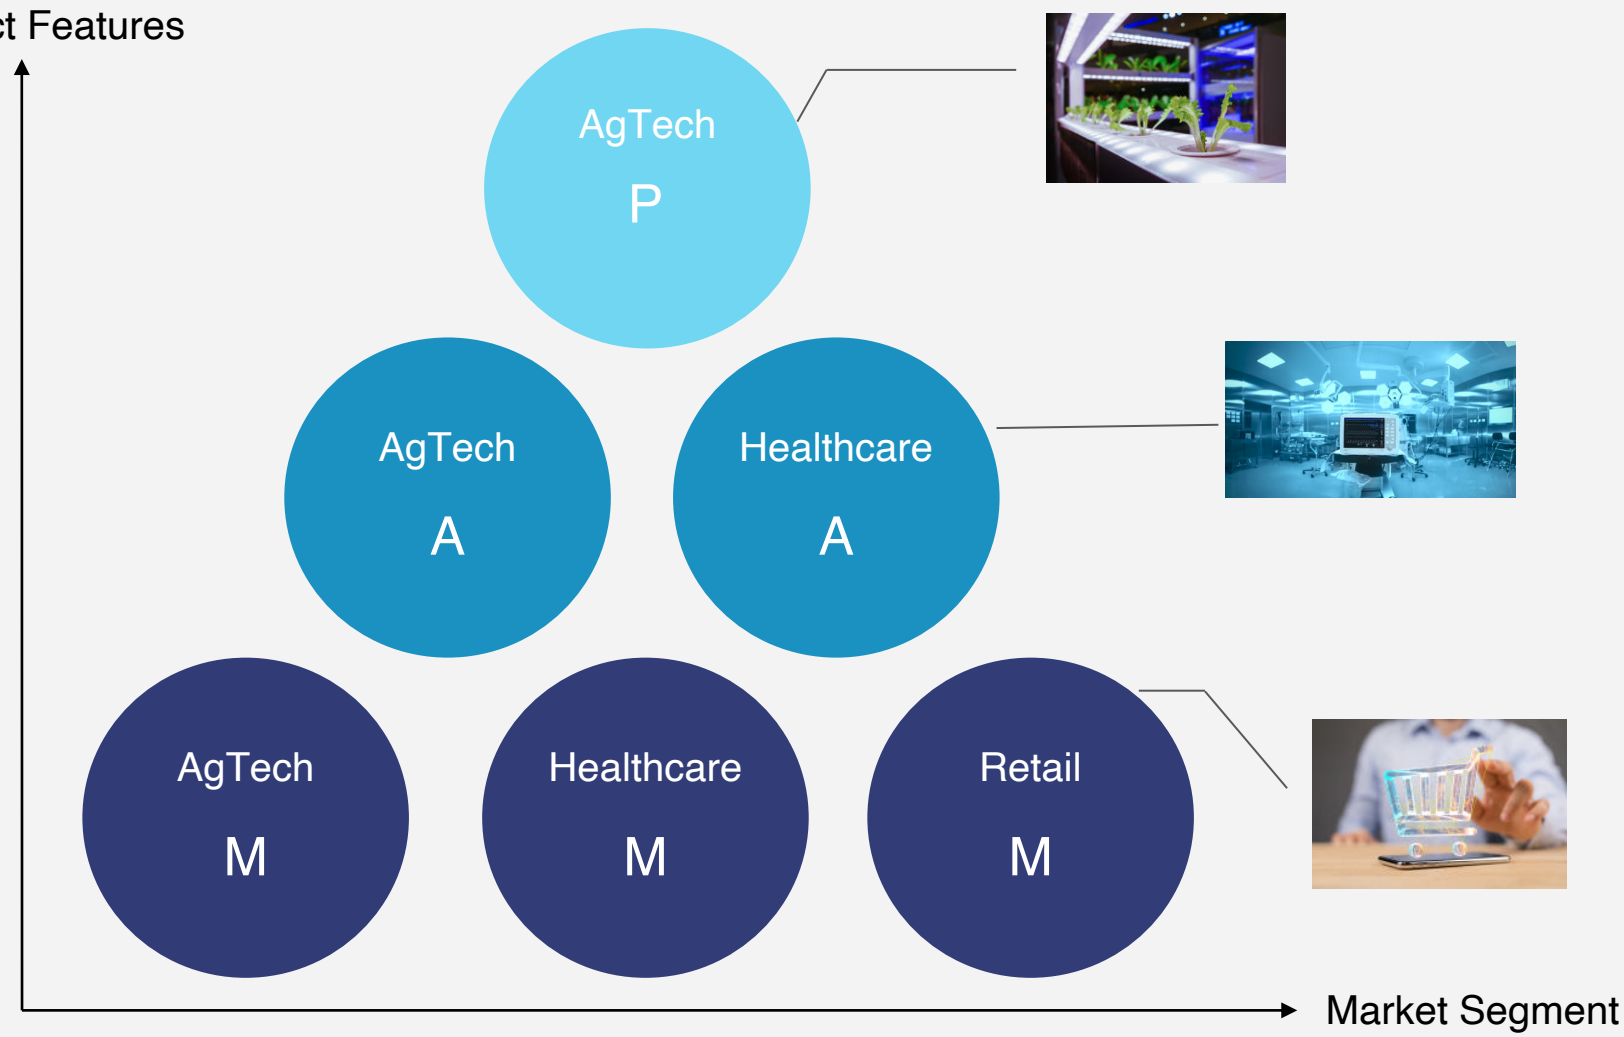

- Real-time data
- Online dashboards
- Push Alerts

Analyze

- Full HVAC connectivity
- Real-time environmental adjustments

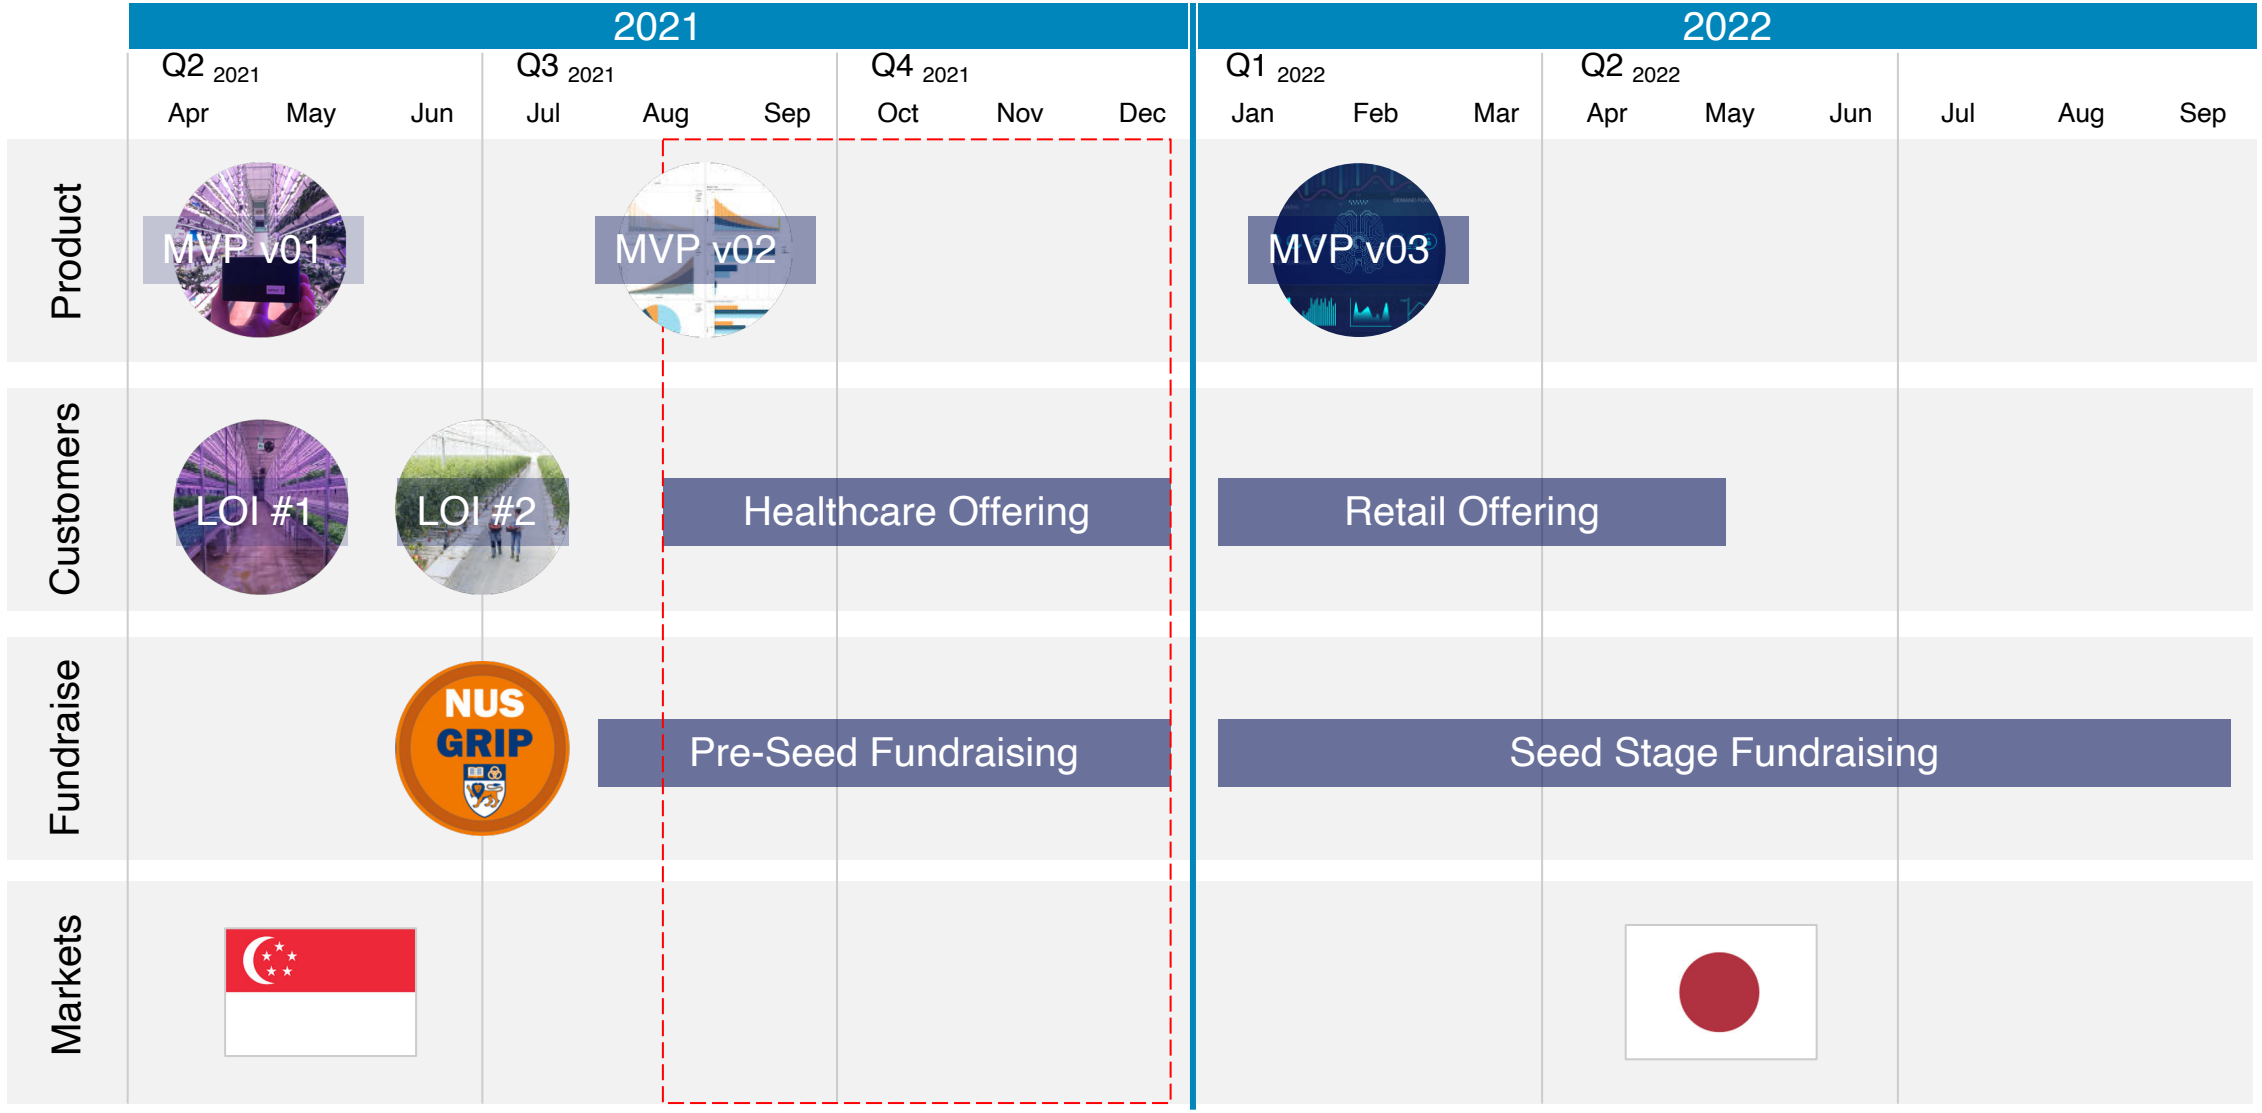

Prescribe

- Integrate user data
- Obtain actionable insights according to needs

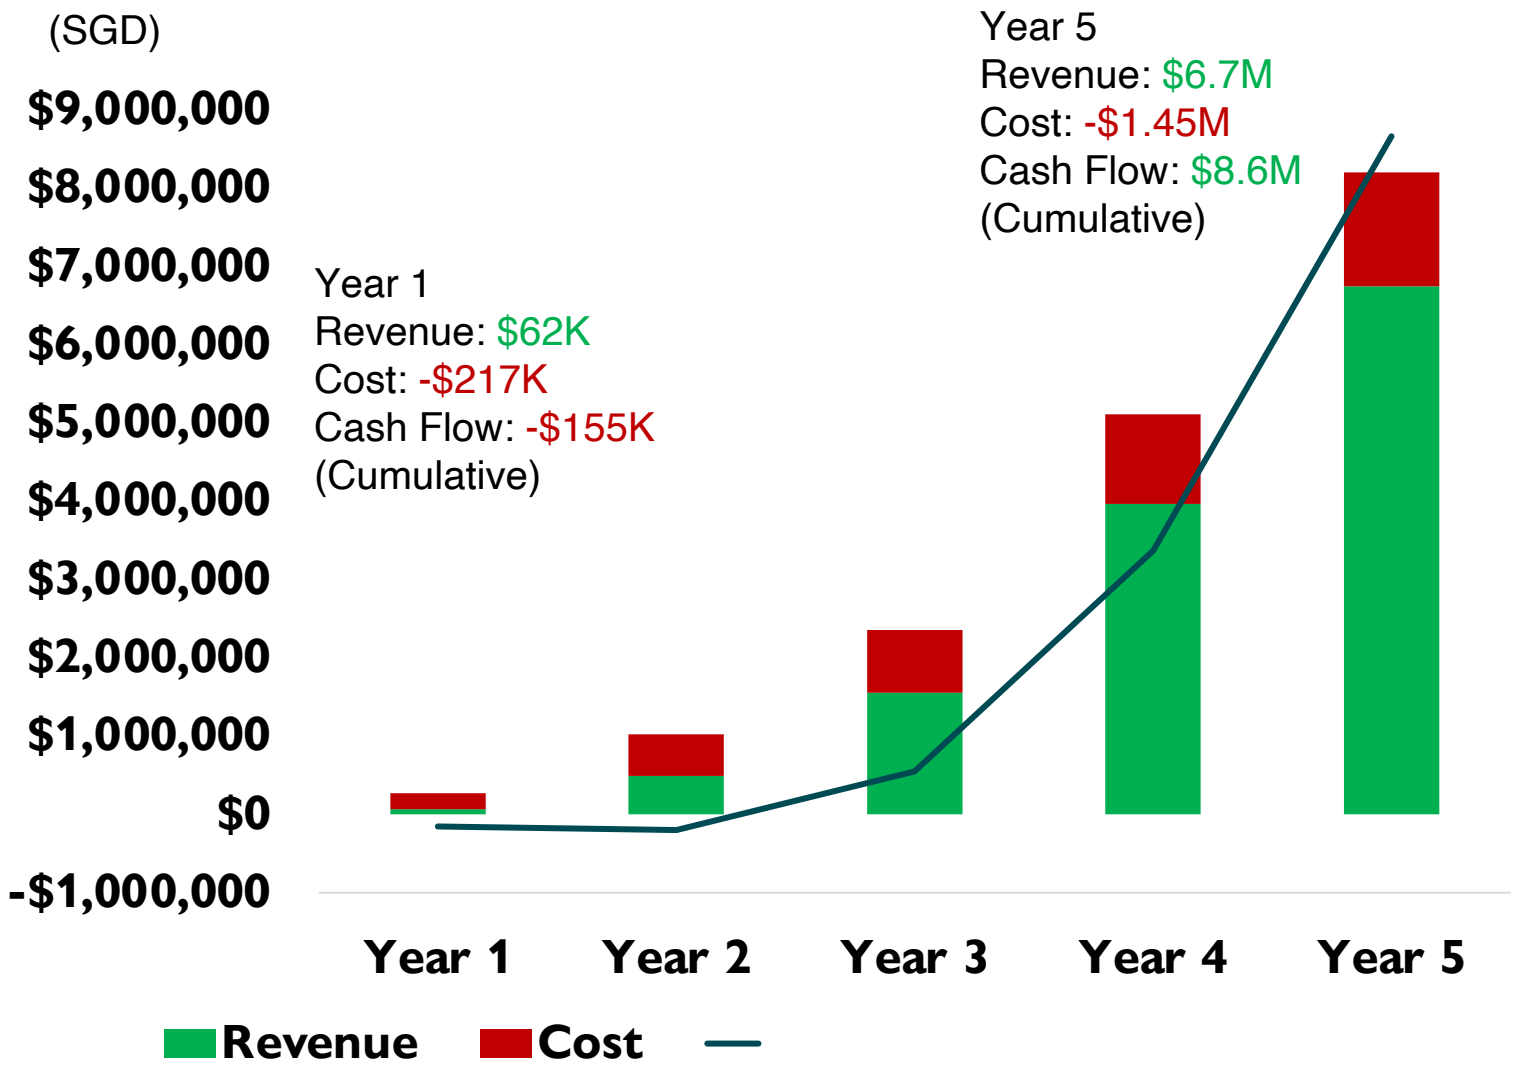

Traction & Current Milestones

AMBIENT SYSTEMS

Revenue Forecast

81.2%
Average Gross Profit

$8.5M
NPV

Our Team

CEO
Background in Engineering and Computer Science

CSO
Experience in fundraising and strategy at APAC Unicorn startup

Data Analyst
Creative Technologist with background in visual communications

Project Management Intern
Marketing at Unilever China

Developer
Built websites and applications for top brands in APAC
