Problem

Real estate owners and operators struggle to optimize their facilities.

1. Limited Resources

It’s hard to find highly trained and experienced building operators who can optimize multiple facilities.

2. Technological Complexity

Many buildings operate using outdated legacy systems and equipment that lack interoperability.

3. Competing Priorities

Different buildings have different system requirements based on the unique needs of occupants and operators.

Specialized buildings require more than typical office buildings

Indoor Farms

Parameter Schedule
Harvest Prediction

Hospitals

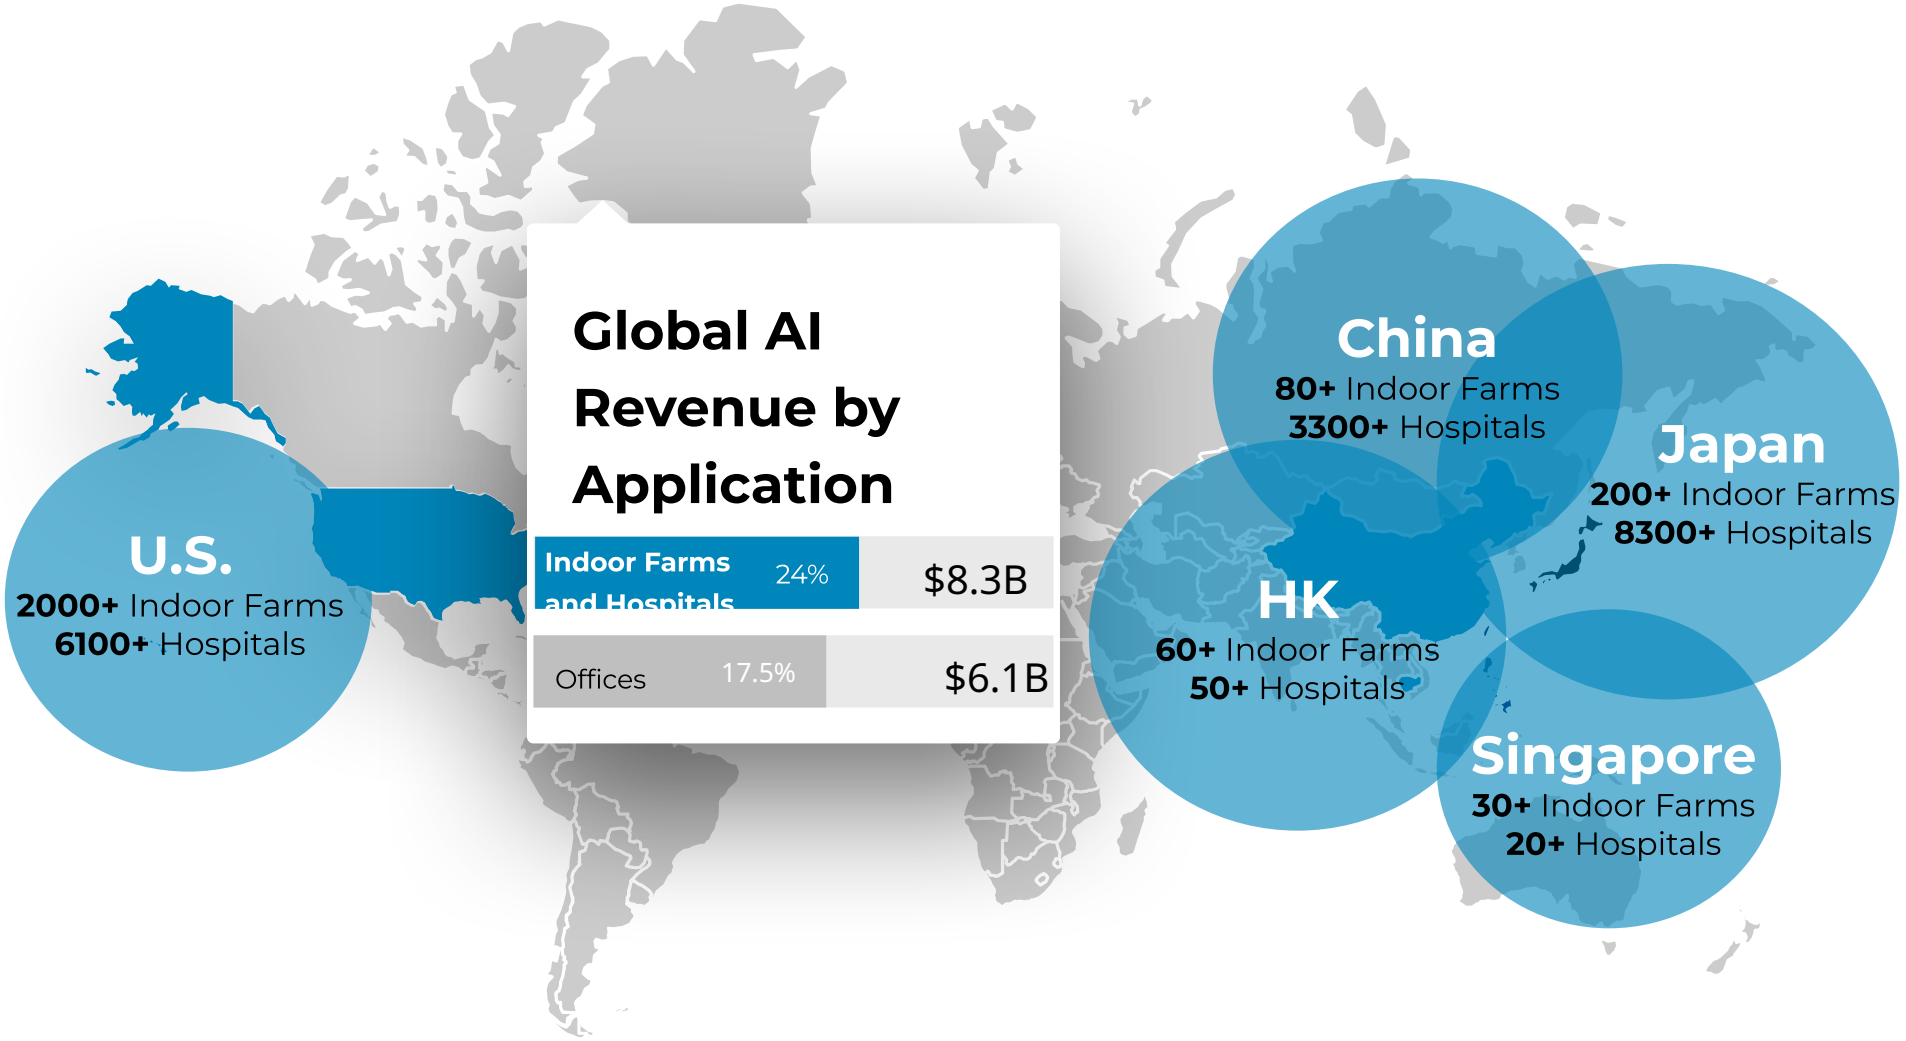

Zone Control Bacteria
Detection

Retail Stores

Customer Experience

Unlocking USD$8.3 bn of revenue across specialised segments

AI Platform Backed by IP

Sense

MVP sensors co-designed with manufacturing partners

Optimize

NUS National University of Singapore

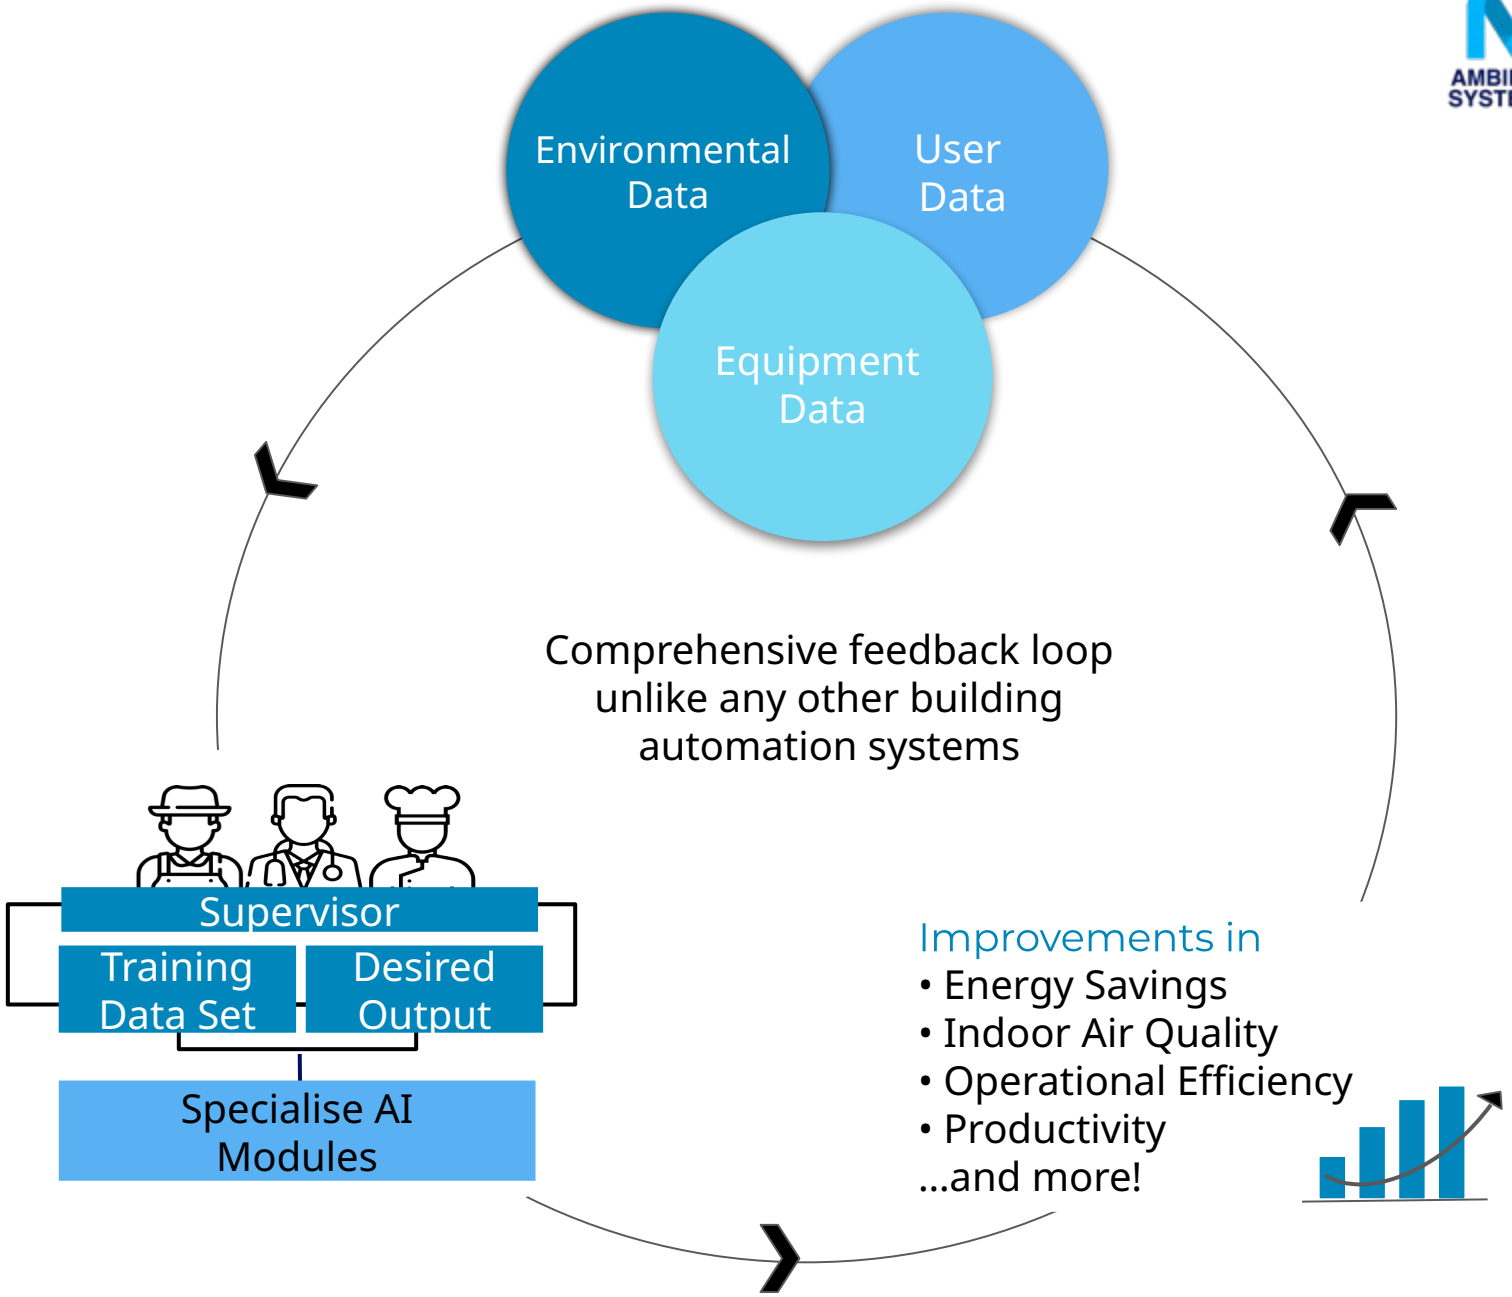

Patent Pending Invention from National University of Singapore (NUS)

Indoor Farming Overview

- Increasing demand for value-driven solutions
- Cost reduction due to increased operational efficiency
- Increasing penetration of transformative technologies in buildings
- Increasing government support and awareness for AI solutions

Indoor farm operators seeking to optimize crop performance through customized insights across key parameters.

Healthcare Overview

Sche g
with

- Reducing energy wastage and improving efficiency
- Layout planning to reduce queuing time
- Purifying air and improving indoor air quality
- Improving management efficiency and reducing labor cost

Hospitals looking to improve patient satisfaction and automation of equipment management.

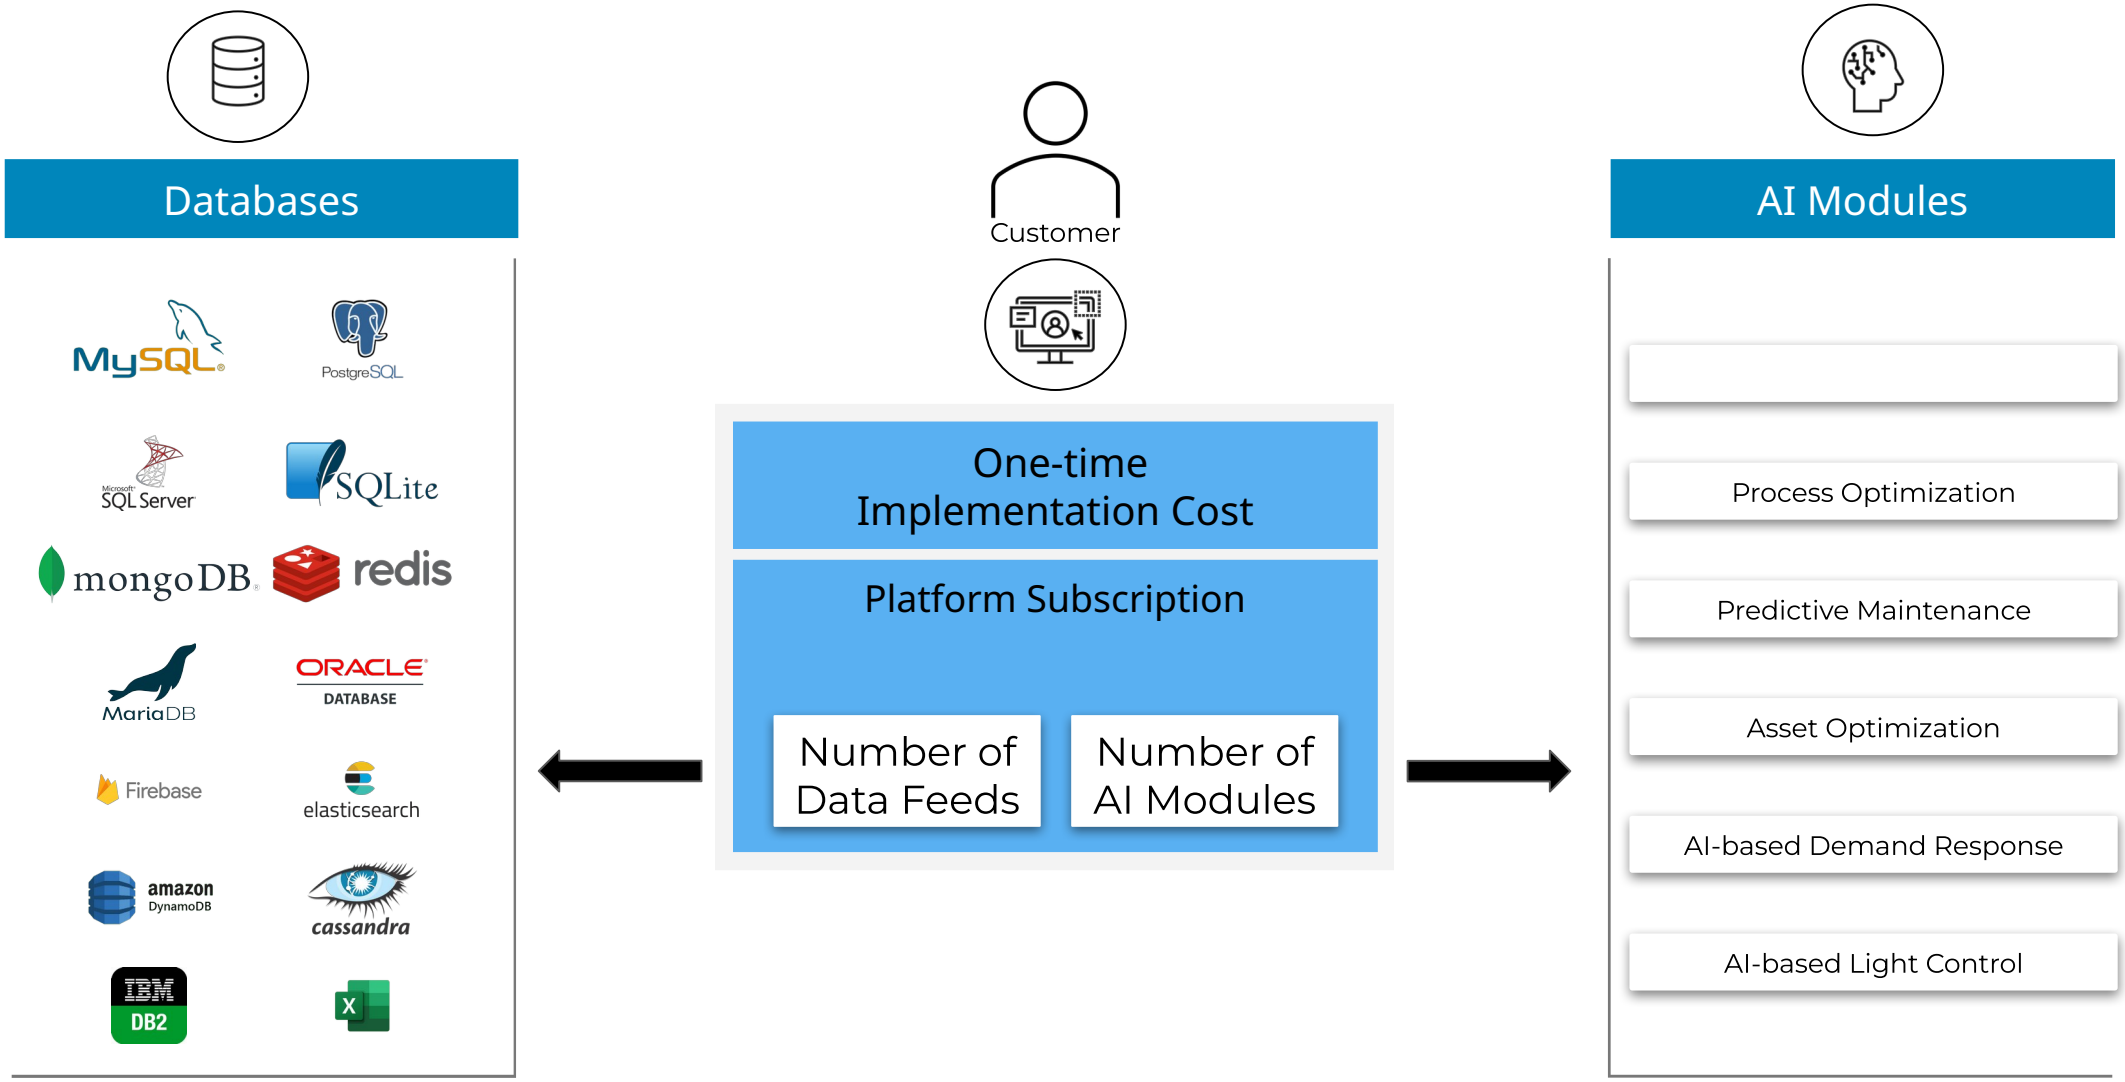

Retail Overview

refine offerings

- Reducing energy wastage and improving efficiency
- Intelligent inventory management and forecasting
- Optimising customer shopping experience
- Improving management efficiency and reducing labor cost

Retailers looking to optimize customer experiences, forecasting, inventory management.

B2B SaaS Model

Usage-based Pricing Plan

AMBIENT SYSTEMS

One-time Implementation Cost
Installation of sensors and equipment integration

by Project Basis

Basic
SGD$XX
