Problem

Real estate owners and operators struggle to optimize their facilities.

1. Limited Resources

It’s hard to find highly trained and experienced building operators who can optimize multiple facilities.

2. Technological Complexity

Many buildings operate using outdated legacy systems and equipment that lack interoperability.

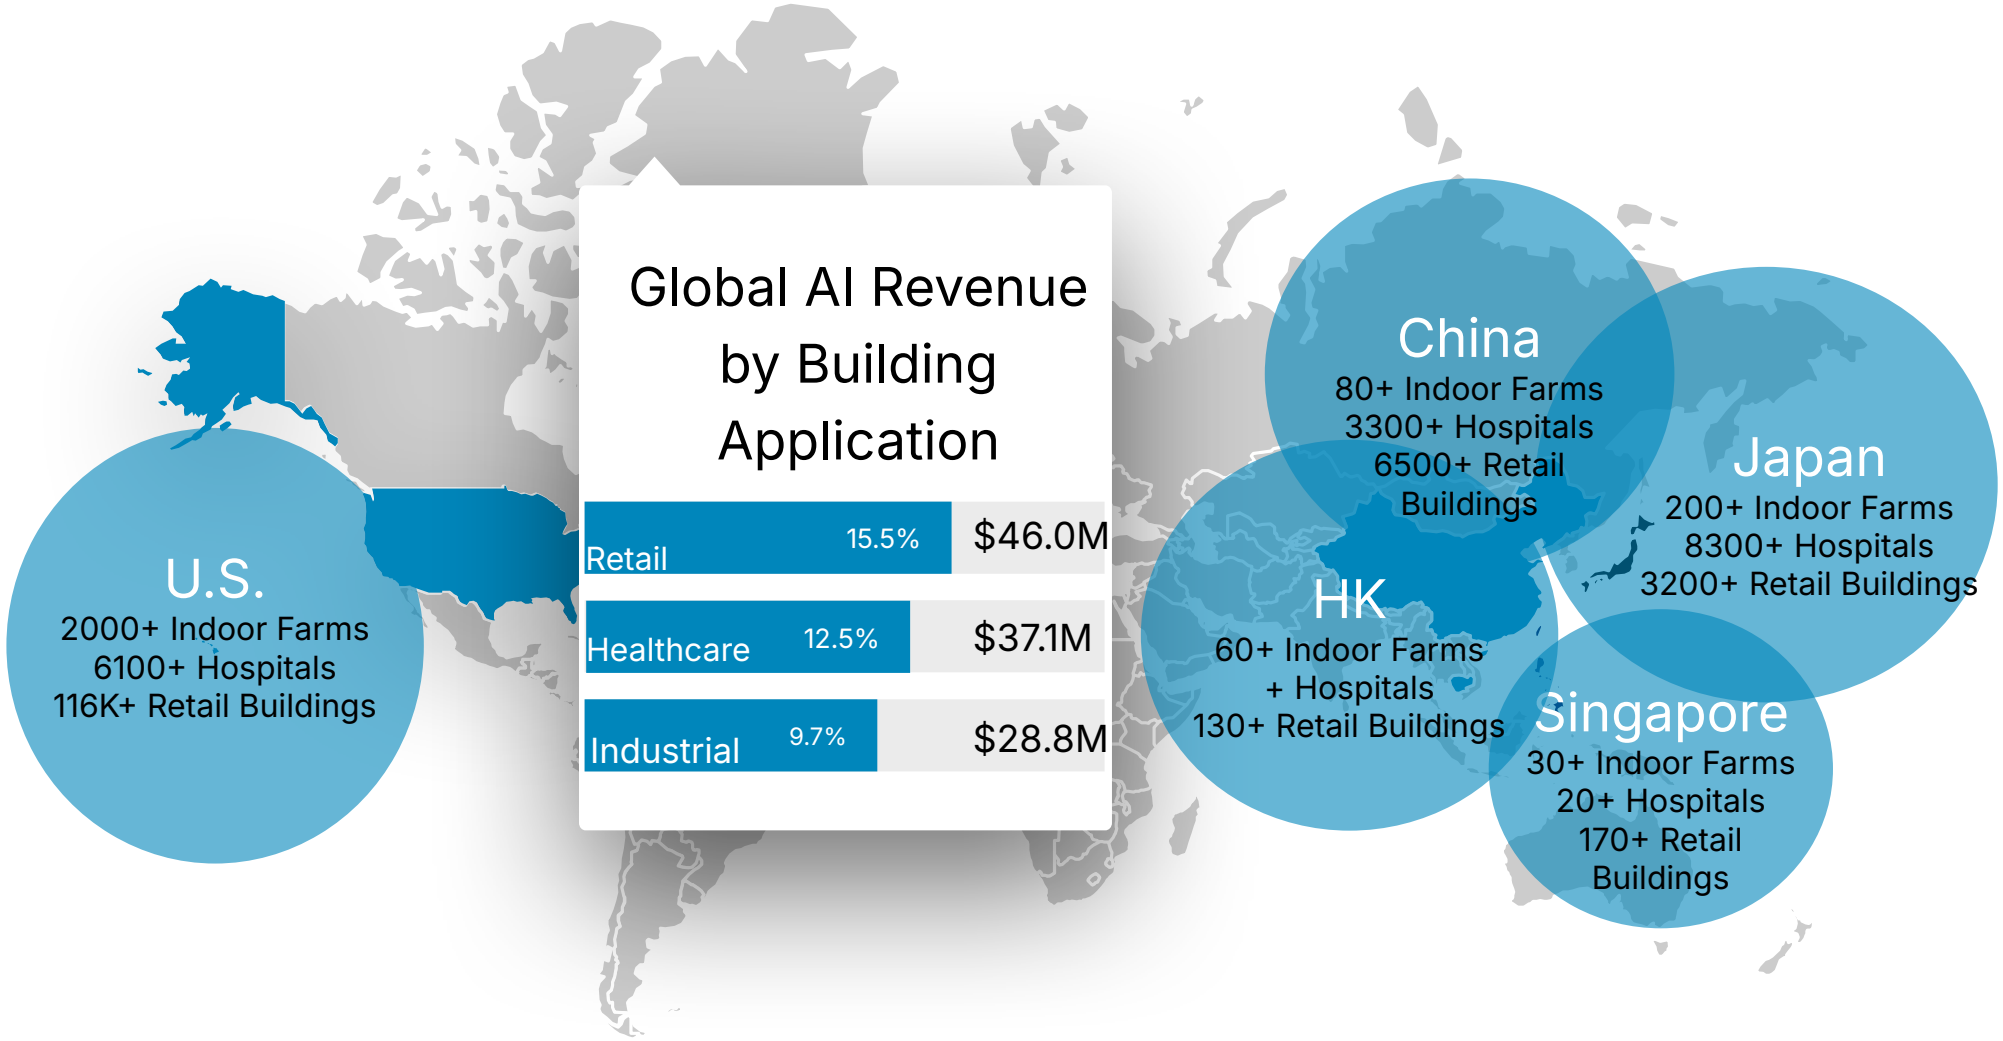

3. Competing Priorities

Different buildings have different system requirements based on the unique needs of occupants and operators.

Specialized buildings require more than energy management

Indoor Farms	Hospitals	Retail Stores
Parameter Schedule Harvest Prediction	Zone Control Bacteria Detection	Customer Experience Footfall and Heatmaps Analysis

Unlocking USD$110M of revenue across specialised segments

AI Platform Backed by IP

Sense

MVP sensors co-designed with manufacturing partners

Increasing Energy Demand and Consumption

Source: Our World in Data

In the built environment, it is imperative for buildings to be even more energy efficient and drive greater reduction in

Increasing Focus on Sustainability

90%

of consumers are concerned about the Environment

Source: Sustainability Matters Now More Than Ever for Consumer Companies BCG, 2020

50%

of CXOs see tackling climate change as their generation's top priority

Source: Industry 4.0: At the intersection of readiness and responsibility Deloitte, 2020

Ambitious targets to green the built environment in Singapore by 2030:

80% green buildings

80% improvements in energy efficiency

80% new buildings to be super lower energy

Source: Industry 4.0: At the intersection of readiness and responsibility Deloitte, 2020

Smart and Healthy Buildings Brings Value

Smart office buildings can potentially garner a **37%**

rent premium per nett square feet, compared to buildings without smart characteristics

Source: How Much Are Smart Buildings Really Worth? NAIOP Massachusetts, 2018

Healthy buildings increase productivity by **US$6,600 per employee**

translating to cost savings and increased revenue for tenants

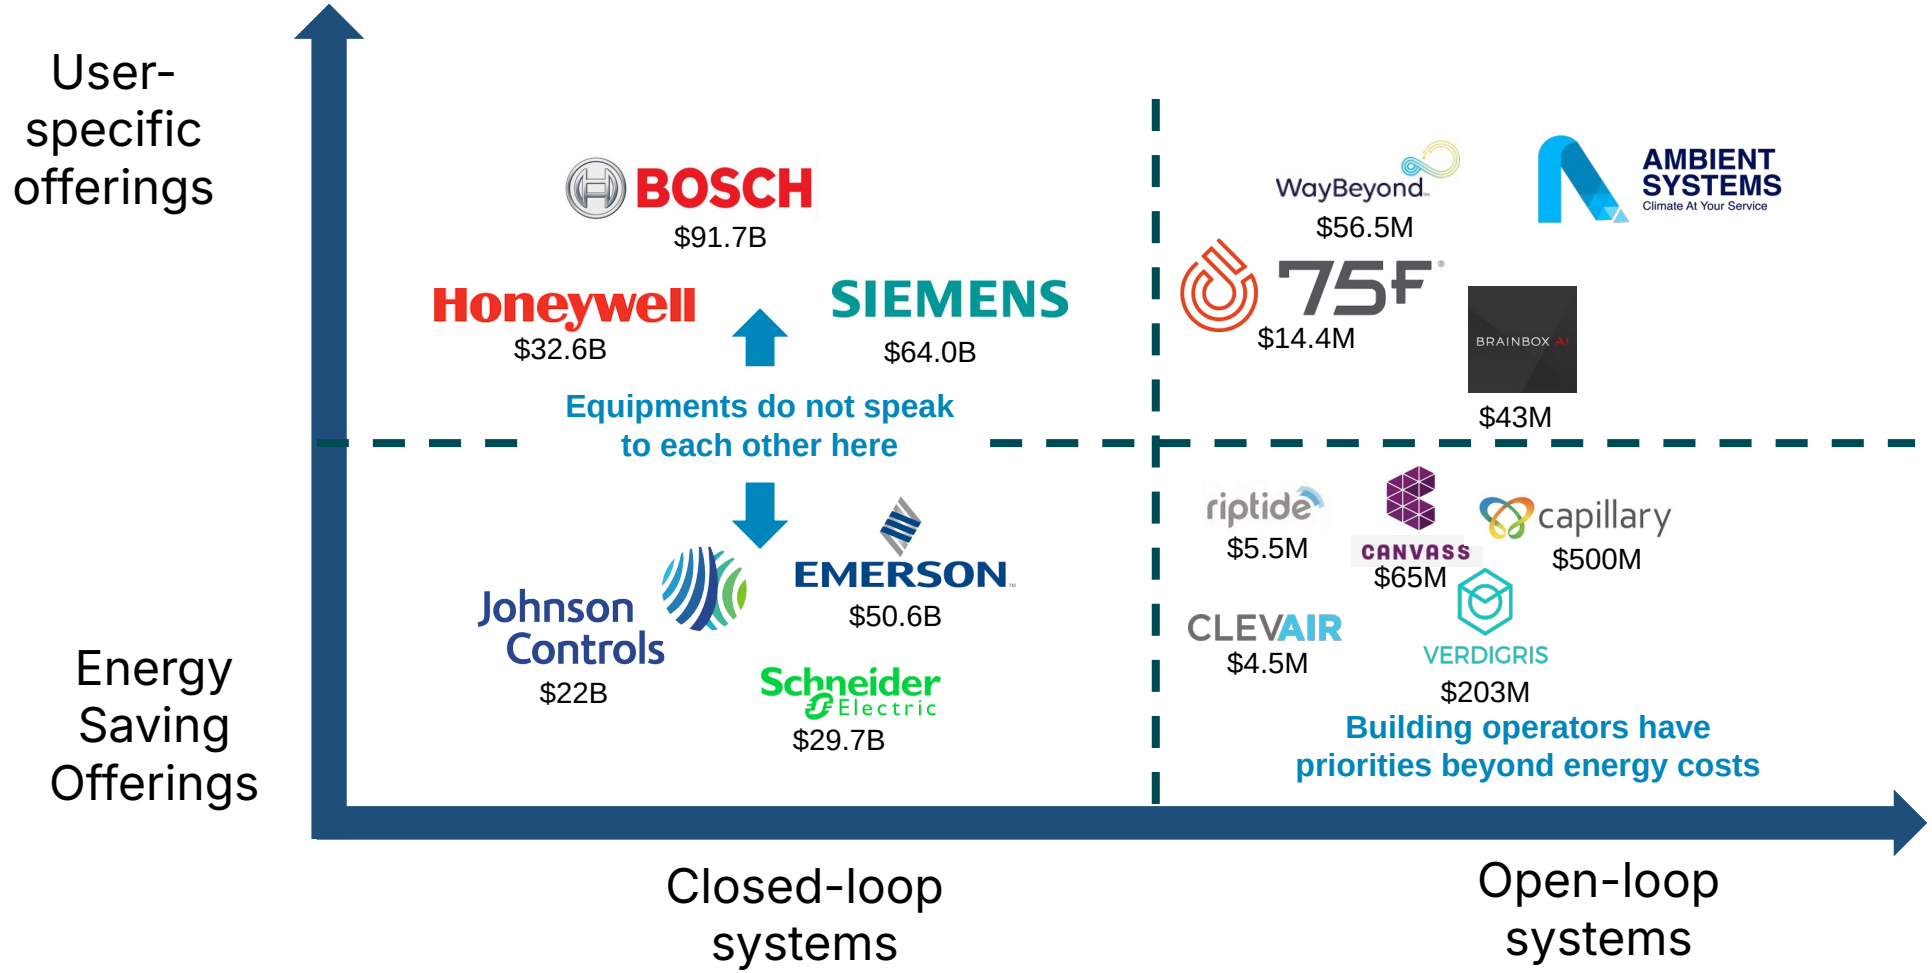

Source: The Best Talent will Demand the Smartest Buildings Memoori Smart Building Research, 2018

Building analytics can reliably drive **3-9%**

energy savings annually, a figure expected to persist or even increase

Appendix

Indoor Farming Overview

Improve crop yield in a market where only **51% of Indoor Farms are profitable**

24% reduction in loss of crops due to poor growing environment

Real-time improvements in farm operations efficiency resulting in **0.5 - 1.5 years** payback period

Indoor farm operators seeking to optimize crop performance through customized insights across key parameters.

Healthcare Overview

Prevent **65-70%** of hospital-associated infections costing up to USD11B

Hospitals with superior patient experience achieve **50%** more in net margins

Improve air filtration and recirculation on hospital premise to prevent nosocomial outbreaks of COVID-19 **(Mortality rates >60%)**

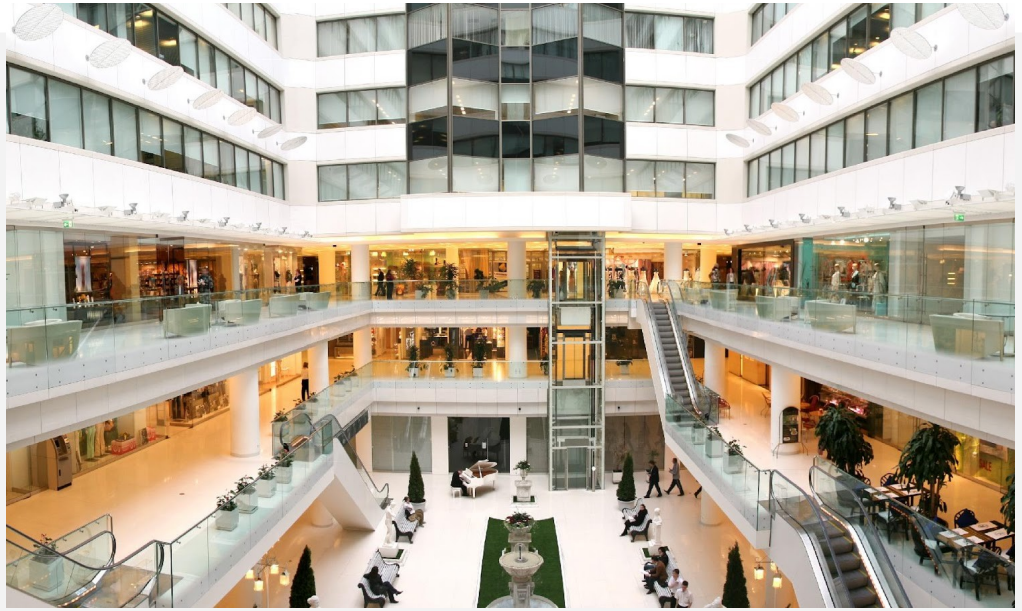

Hospitals looking to improve patient well-being hrough monitoring of indoor air quality

Retail Overview

70% of customers avoid retail stores if they are too hot, too cold or too stuffy

Using retail heatmaps to optimise retail layout resulting in **5%** increase in sales

Improve in-store conversions by more than **10%** by analysing customer footfall trends

Retailers looking to optimize customer experiences through improving retail comfort and analysing footfall behavior
