Problem

Real estate owners and operators struggle to optimize their facilities.

1. Limited Resources

It’s hard to find highly trained and experienced building operators who can optimize multiple facilities.

2. Technological Complexity

Many buildings operate using outdated legacy systems and equipment that lack interoperability.

3. Competing Priorities

Different buildings have different system requirements based on the unique needs of occupants and operators.

Specialized buildings require
more than energy management

Indoor Farms

Parameter Schedule
Harvest Prediction

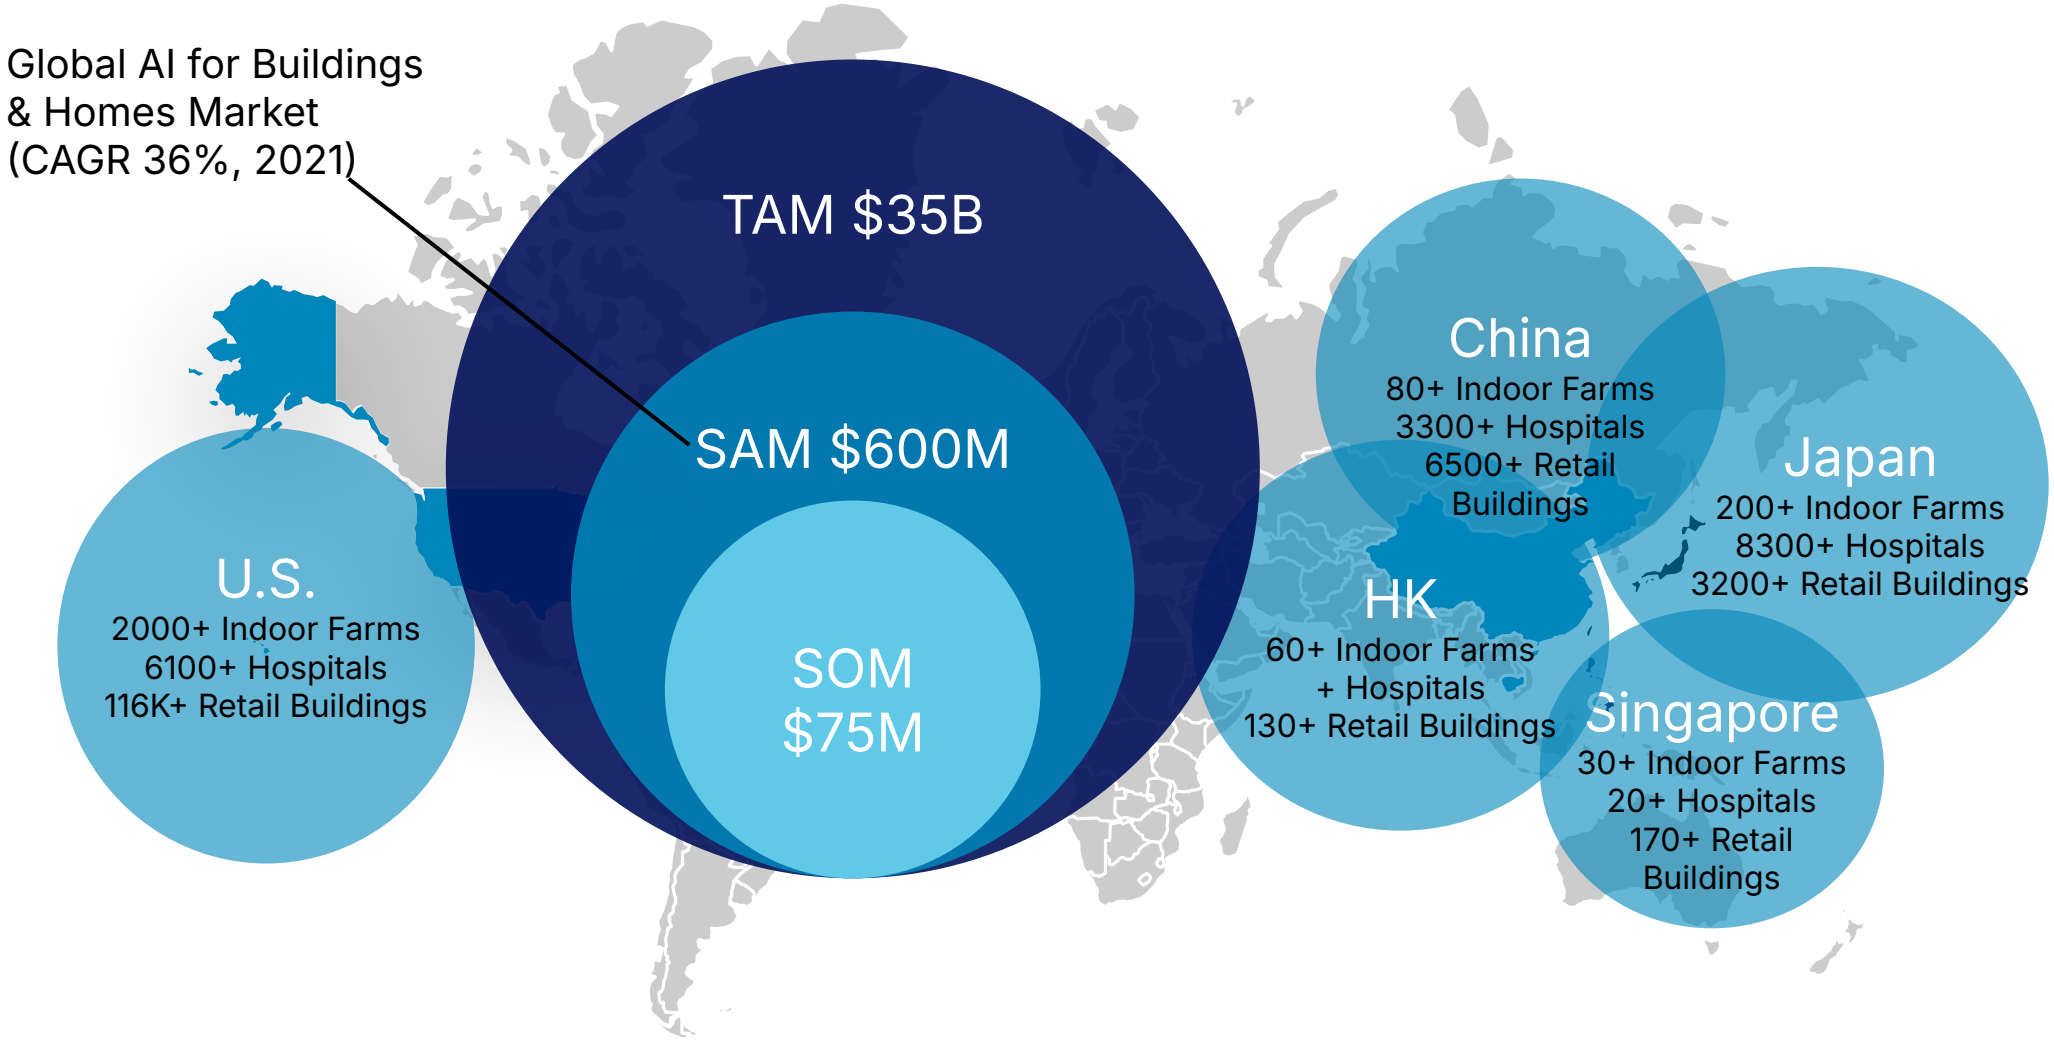

Hospitals

Zone Control Bacteria
Detection

Retail Stores

Customer Experience
Footfall and Heatmaps Analysis

Unlocking more than $75M of revenue across specialised segments

AI Platform Backed by IP

Sense

MVP sensors co-designed with manufacturing partners

Optimize

Building Optimization beyond Energy Savings

Competitive Landscape

Source: Honeywell

Smart and Healthy Buildings Brings Value

Smart office buildings can potentially garner a **37%**

rent premium per nett square feet, compared to buildings without smart characteristics

Source: How Much Are Smart Buildings Really Worth? NAIOP Massachusetts, 2018

Healthy buildings increase productivity by **US$6,600 per employee**

translating to cost savings and increased revenue for tenants

Source: The Best Talent will Demand the Smartest Buildings Memoori Smart Building Research, 2018

Building analytics can reliably drive **3-9%**

energy savings annually, a figure expected to persist or even increase

Source: Industry 4.0: At the intersection of readiness and responsibility Deloitte, 2020

Increasing Focus on Sustainability

90%

of consumers are concerned about the Environment

Source: Sustainability Matters Now More Than Ever for Consumer Companies BCG, 2020

50%

of CXOs see tackling climate change as their generation's top priority

Source: Industry 4.0: At the intersection of readiness and responsibility Deloitte, 2020

Ambitious targets to green the built environment in Singapore by 2030:

80% green buildings

80% improvements in energy efficiency

80% new buildings to be super lower energy

Source: Industry 4.0: At the intersection of readiness and responsibility Deloitte, 2020

One step ahead with AI-enabled prescriptive maintenance
