HO

Hi Ivan,

Thanks for your application to Iterative.

Unfortunately, we've decided not to move forward with Ambient Systems. As someone that's technical, I had a difficult time (1) understanding what the actual product is, (2) who the initial target customers are and (3) whether the product is live or still being developed.

With that being said, it's almost a certainty that there are startups we reject that go on to be very successful. We hope you continue working on your startup and reapply for the next batch.

Good luck!
