Market Research

Unlocking $1B of revenue across specialized segments

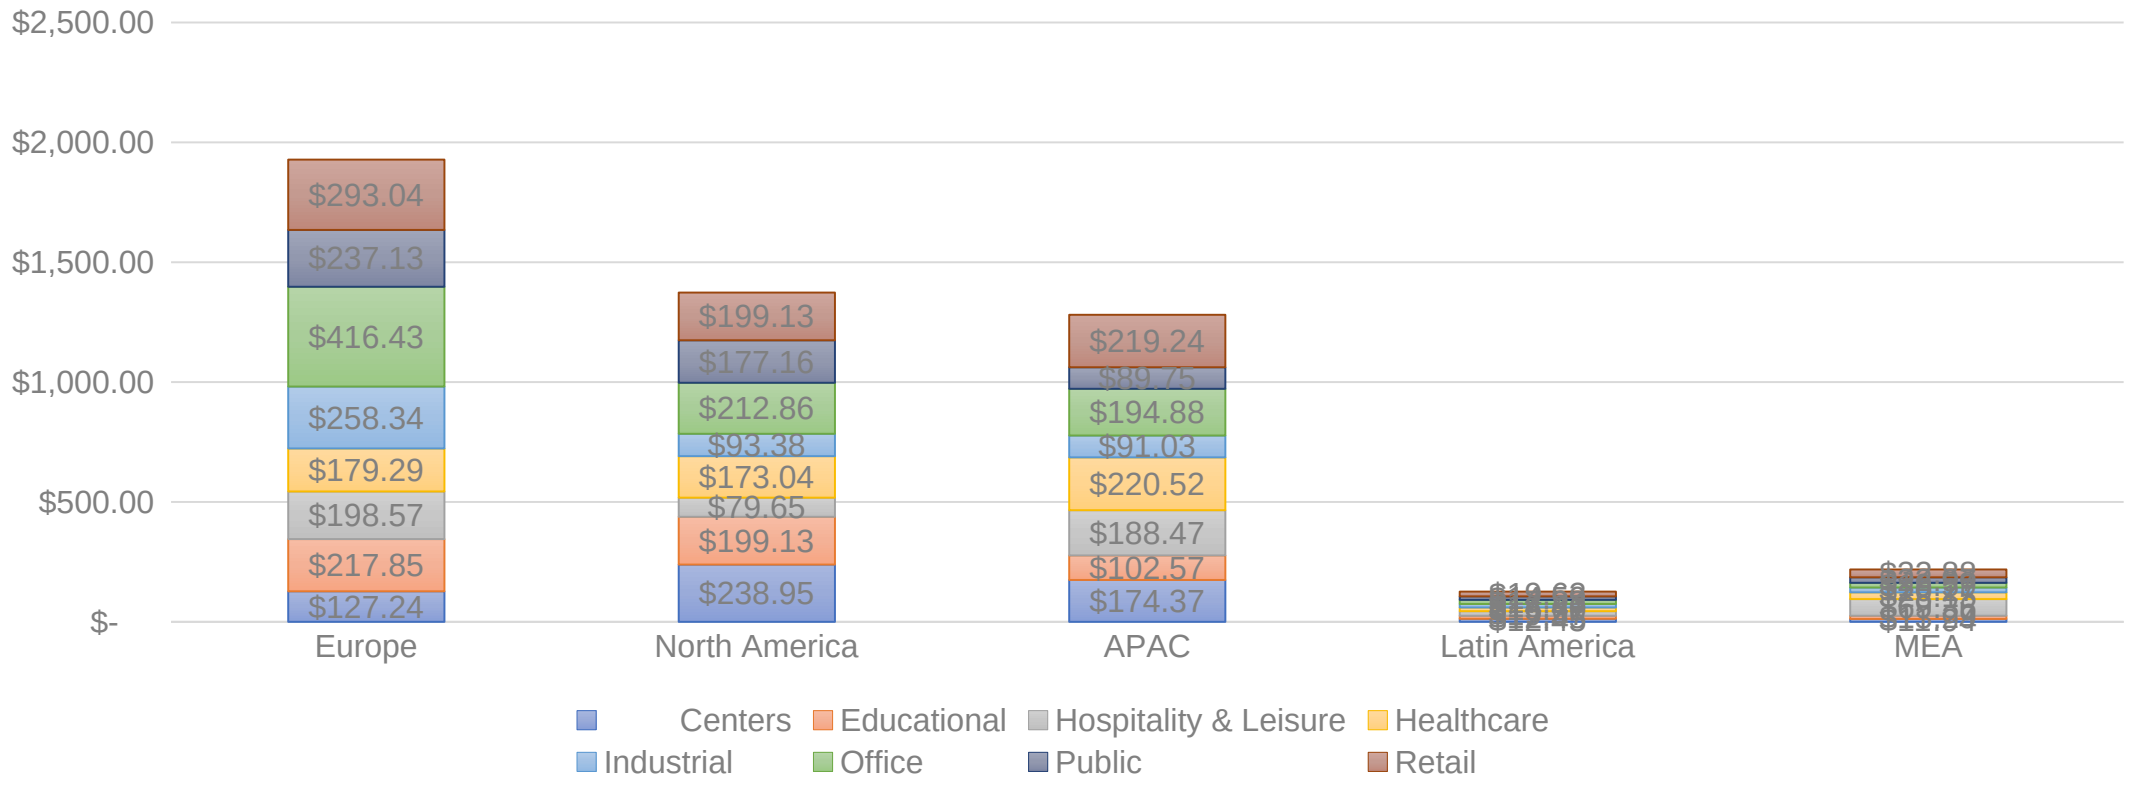

AI adoption in buildings is growing fast

Building Automation Systems Market

SWOT Analysis: Ambient Systems

Strengths

- Use-case specific applied AI solutions
- Optimization using cutting-edge machine learning
- Patented for launch market (indoor farms in Singapore)
- Backed by top university
- Access to major markets (via government collaboration)
- Strong and diverse team

Weaknesses

- Takes time to inform the user about the product
- Long sales cycle for B2B Enterprise SaaS in APAC (6-12+ months)

Opportunities

- Rapidly growing AI industry
- Government and Investor interest and support
- International collaboration and research
- New industry segments and geographies

Threats

- Can be perceived as a risky investment at first
- Customers may try to make a copy-cat version an in-house (i.e., do it themselves)
- Competitors may copy our marketing materials
- Hyper-competitive startup ecosystem
