Freight Carriers are left most unserved

Problem

Freight carriers need more timely data to make more accurate financial decisions

Underlying Pain Points (top 3)

1. **Data quality and availability**
   Hard to identify which data and to collect it economically
2. **Technical expertise**
   Combining and computing datasets requires deep tech expertise
3. **Resistance to change**
   Established processes and legacy systems work for a reason

Go-to-market (GTM) strategy starts with the ‘beachhead’ market: freight industry

Freight is a good launch industry:

1. Frequency of data is important
2. Vehicles replaced frequently
3. Downtime leads to loss of revenues + high replacement costs
