Freight Carriers are left most unserved

Problem

Freight carriers need more timely data to make more accurate financial decisions

Underlying Pain Points (top 3)

1. **Data quality and availability**
   Hard to identify which data and to collect it economically

Go-to-market (GTM) strategy starts with the freight industry as the ‘beachhead’ market

	Freight	Construction	Other
SG/Korea/Japan	**‘Beachhead’** 1,800 ($10.8m ARR)	90	1,000
US/Canada	8,000	2,000	80,000
Others (UK/EU/etc)	6,000	1,500	20,000

Freight is a good launch industry:

1. Frequency of data is important
2. Vehicles replaced frequently
3. Downtime leads to loss of revenues + high replacement costs

- Singapore TAM for freight & logistics: $S2.35B, growing at 7.72%
- US Trucking: $875.5 in 2021

3-5 years:
$90m+ ARR
across 10,000+
customers
(~ $9k ARR per customer)

$1B+ Valuation
