AMBIENT SYSTEMS

Unleash the cities of tomorrow with the power of data science

Presented by:
March 19, 2023

Prepared Exclusively for: TAKENAKA

VISION

Leverage data science
to improve occupant well-being
in the commercial property market

Private and Confidential. Copyright Ambient Systems Pte. Ltd.

Emerging pressure to decarbonize buildings while creating healthy environments for aging population

Global construction accounts for 38% of global CO_2 emissions

Elderly population growing to 26% of overall population in Japan and 10% globally

Healthy buildings have 4.4 and 7.7% higher tenant lease value

Challenge Statement Opportunity

Objectives

social health | individual health | standard for well-building design or well-urban design
attract ESG investment | real estate valuation

Collaboration Needs

1. Technologies to estimate actions based on number of people, population density and moving directions of building users.
2. Technologies to estimate relationships based on the distance and direction between building users.
3. Technologies to estimate emotions based on facial expressions and/or other monitoring items, such as sounds of conversation etc.

Opportunity to Optimize for Well-being and Profitability

01 Costs to the business and occupants

02 Maximize tenant well-being and value

Lack of data and expertise is a barrier to confidently balancing this complex ‘equation’.

User Journey: Step 1 - Integrate

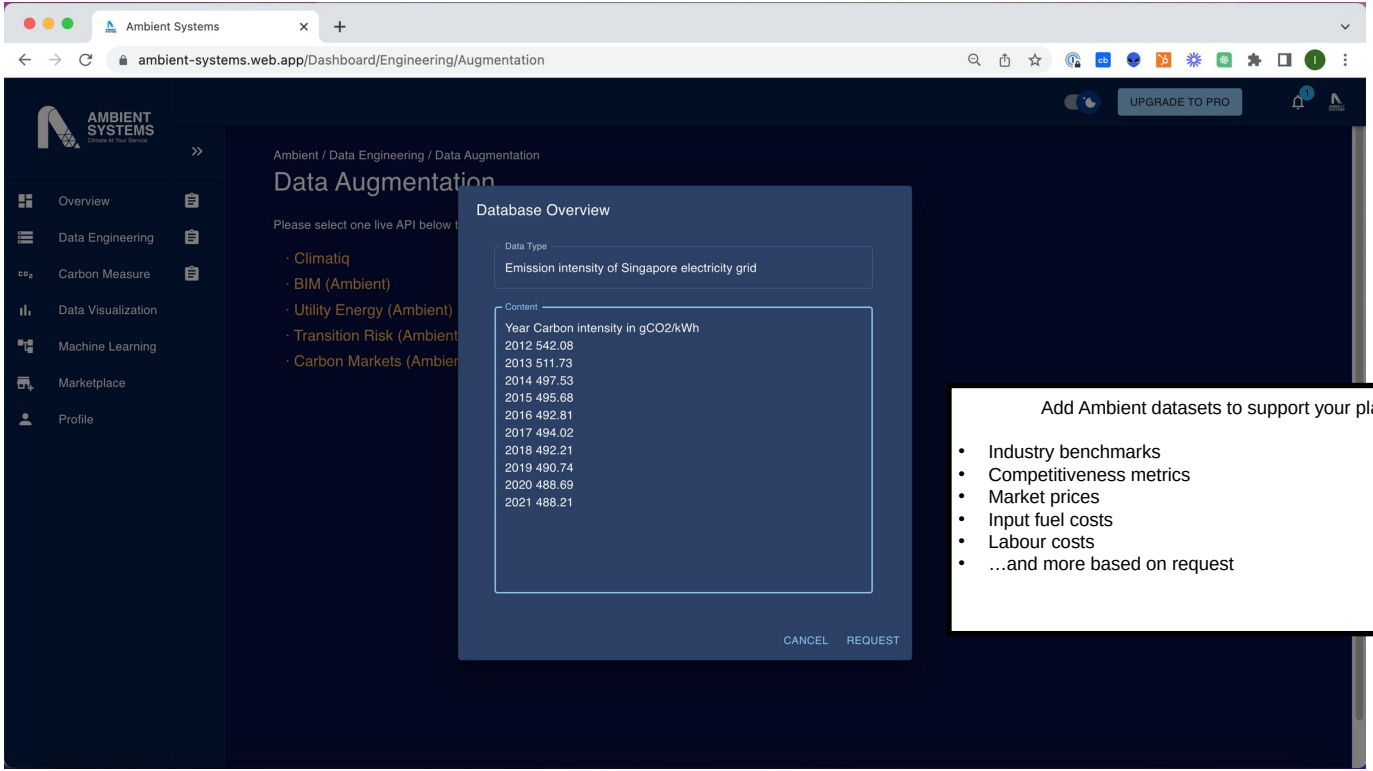

Connect existing platforms

Connect traditional legacy databases without migration.

Private and Confidential. Copyright Ambient Systems Pte. Ltd.

User Journey: Step 2 - Reinforce

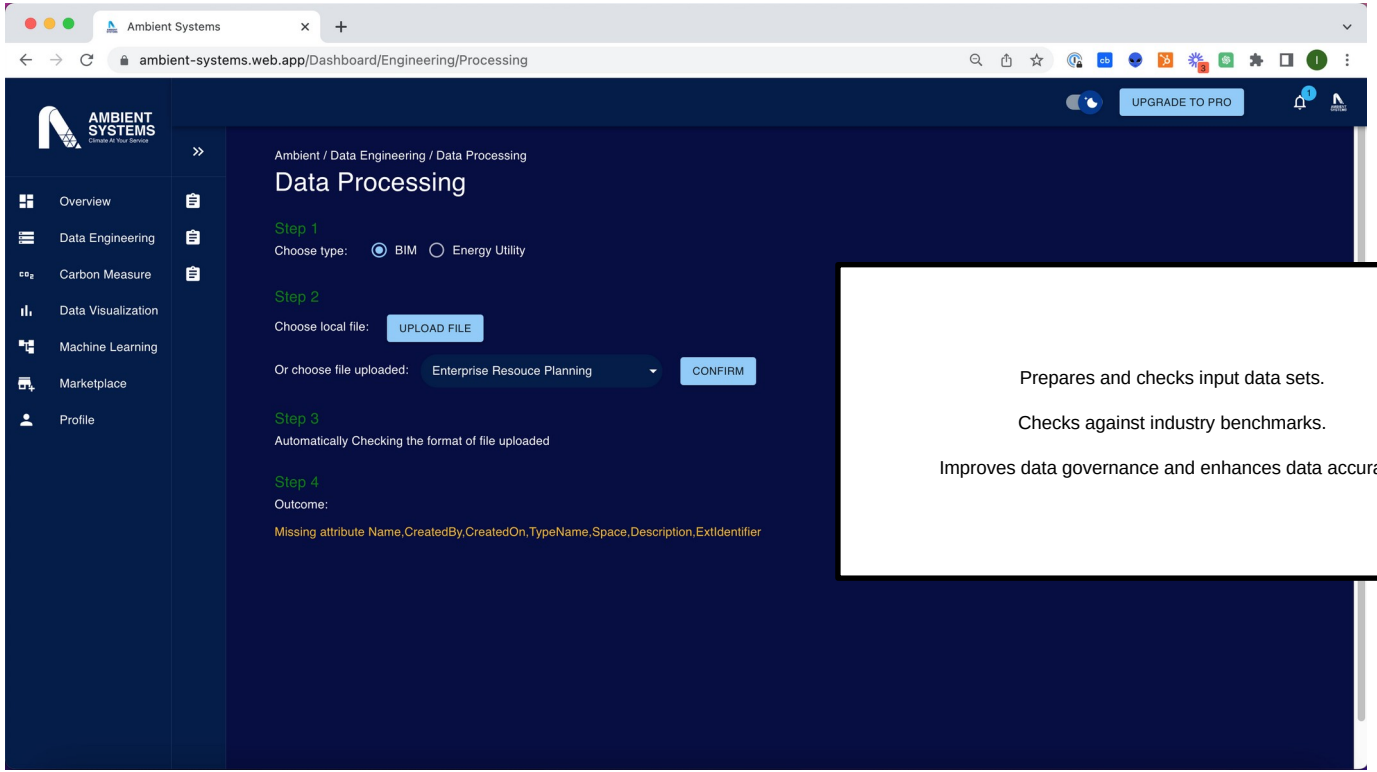

Add Ambient datasets to support your planning.

- Industry benchmarks
- Competitiveness metrics
- Market prices
- Input fuel costs
- Labour costs
- …and more based on request

Private and Confidential. Copyright Ambient Systems Pte. Ltd.

User Journey: Step 3 - Verify

Prepares and checks input data sets.

Checks against industry benchmarks.

Improves data governance and enhances data accuracy.
