Ambient Systems

Business owners, directors, and enterprise teams

For many small business owners, maintaining positive cash flow.

For many small business owners, maintaining positive cash flow.

Needs, performance benefits, and nice-to-have.

For many small business owners, maintaining positive cash flow.

For many small business owners, maintaining positive cash flow.

Step 1: Identify Target

Step 1: Identify Target

Patricia – Lead of Real Estate at Grocery Chain

Motivations

Automation

Data - driven Efficiency

User Needs

Goals

- Secure and evaluate feasibility of new developments
- Enhance sustainability of the portfolio
- Improve retail efficiency

Pain Points

- Inefficient shopping environment
- Lack of customized service

What we can provide

- Provide the most efficient and satisfying shopping experience through quantitative analysis and data modeling

Background

Constantly seek to renew the social commitment to communities by optimizing shopping environment and factors of production. And provide customers with the best value, quality products and excellent service.

Step 2: Identify Underserved

Identify Underserved

		Satisfaction	Importance
Needs	Accurate financial data	80	90
	Efficient processes	80	90
	Effective collaboration	60	80
	Compliance	50	90
	Real-time reporting	30	50
Benefits	Improved financial performance		
	Better decision-making		
	Increased efficiency		
	Transparency and accountability		
	Competitive advantage		
Nice to Have	Automated Workflows		
	Machine Learning and Predictive Analytics		
	Interactive and engaging data visualizations		
	Social responsibility and sustainability metrics		
	Responsive customer service		

General feedback: too prescriptive / constrained by tool / over-standardized makes it hard to understand

Step 2: Identify Underserved

Define your Value Proposition

We understand that every business is unique, so our platform is fully customizable to meet your specific needs.

		Competitor A	Competitor B	Competitor C	Ambient's Product
		ERP Software	FP&A Software	Strategy planning and execution software	Data Science Platform
Needs	Accurate financial data	Y	N	N	Y
	Efficient processes	Y	Y	Y	Y
	Effective collaboration	Y	Y	Y	Y
	Compliance	Y	N	N	Y
	Real-time reporting	Y	Y	Y	Y
Benefits	Improved financial performance	N	N	N	Y
	Better decision-making	Y	Y	N	Y
	Increased efficiency	Y	Y	N	Y
	Transparency and accountability	Y	Y	Y	Y
	Competitive advantage	N	Y	N	Y
Nice to Have	Automated Workflows	Y	N	Y	Y
	Machine Learning and Predictive Analytics	N	N	N	Y
	Interactive and engaging data visualizations	Y	N	N	Y
	Social responsibility and sustainability metrics	N	N	N	Y
	Responsive customer service	N	N	Y	Y

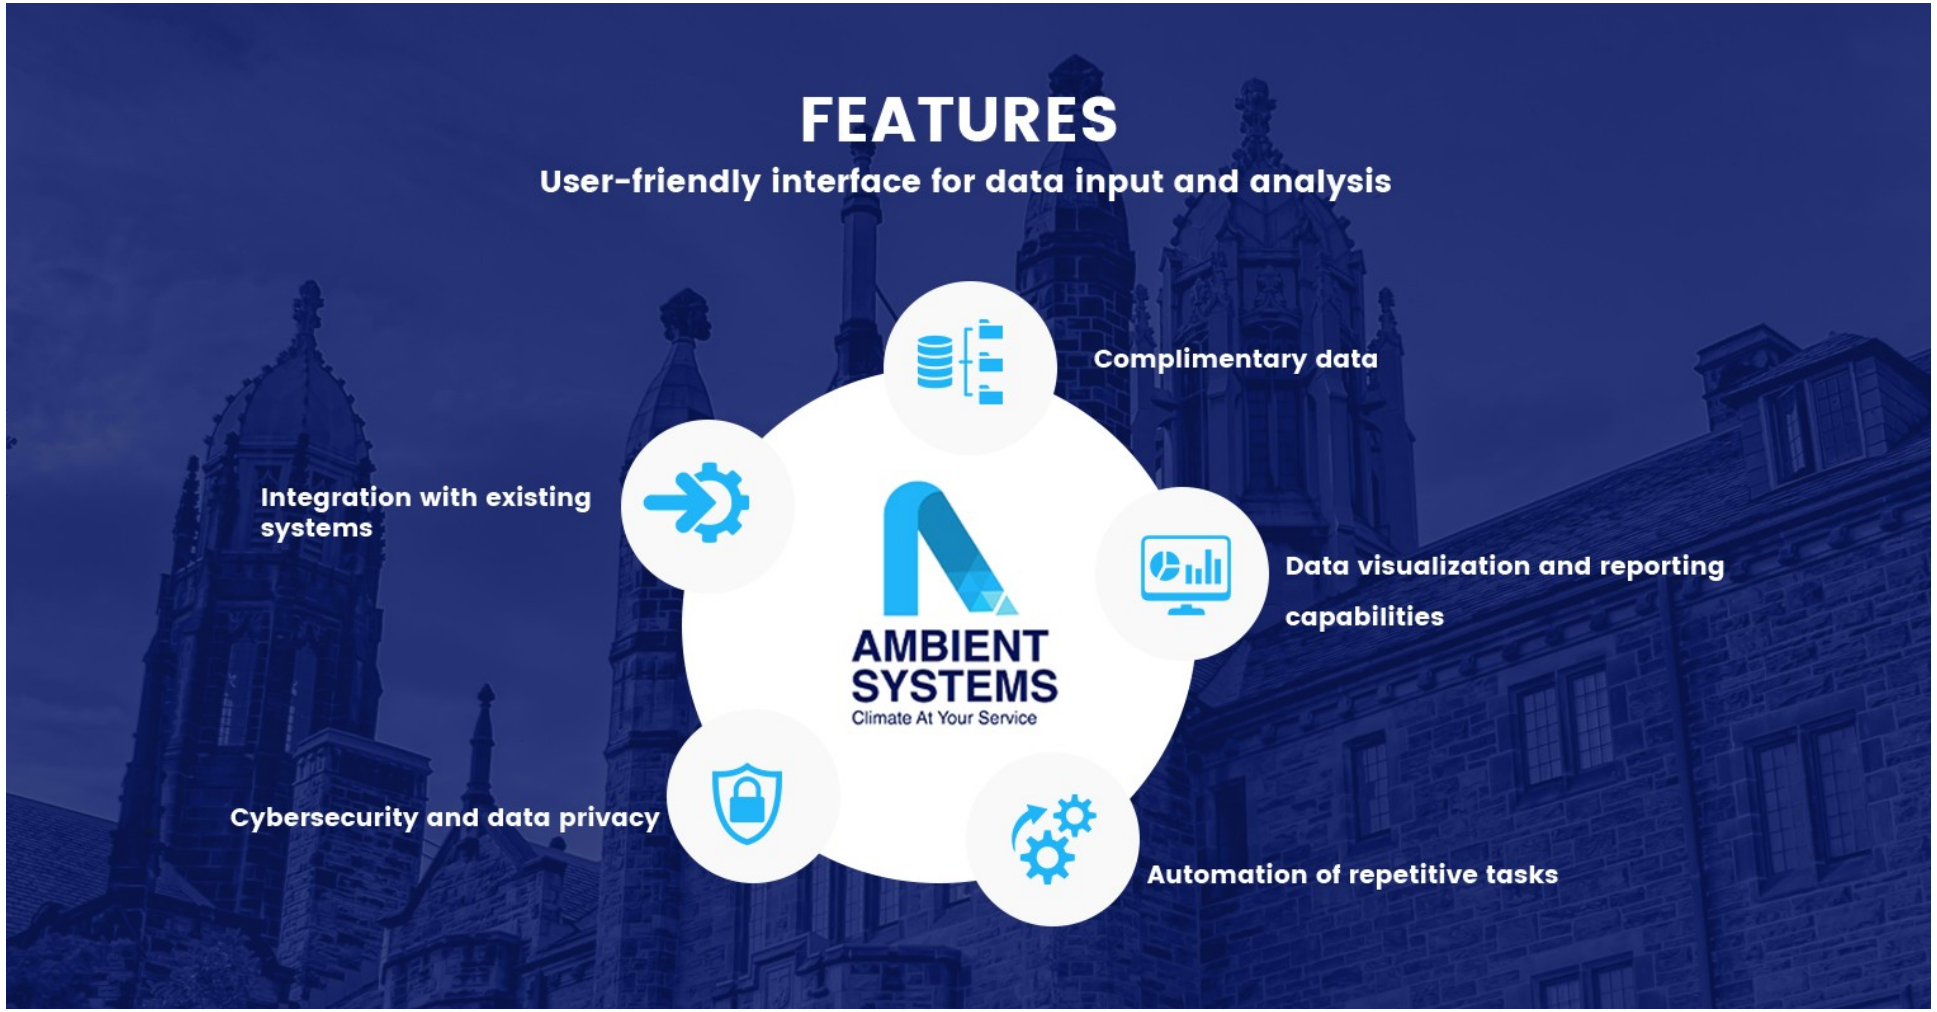

Define your Value Proposition

We understand that every business is unique, so our platform is fully customizable to meet your specific needs.

		Feature 1	Feature 2	Feature 3	Feature 4	Feature 5
Needs	Accurate financial data	P2	P4			
	Efficient processes	M2	M3	M4		
	Team alignment	P1	M1	M3

Case Study

Ambient Systems Case Study

Problem Statement

As an enterprise software company, we have identified several pain-points among potential customers in various industries, as well as among investors considering our product. Our research has shown that there is a high demand for a flexible, user-friendly forecasting and analysis tool that can integrate with existing systems, automate repetitive tasks, and provide reliable data visualization and reporting capabilities. Specifically, customers in the finance industry have expressed frustration with the high costs and complexity of implementing traditional ERP systems, as well as the limited capabilities of home-grown systems and manual processes. Additionally, users across industries have highlighted the challenges of exporting data to Excel, dealing with multiple pricing channels and models, and quantifying ROI for forecasting efforts.

In response to these challenges, we aim to develop a cutting-edge software platform that provides a comprehensive solution for financial planning and analysis (FP&A), incorporating advanced forecasting, data analytics, and reporting features.

Proposed Solution

Ambient Systems' platform will be designed with a strong focus on user experience and customization, enabling customers to integrate our tool seamlessly into their existing workflows and adapt it to their specific needs. We will also prioritize cybersecurity certification and other measures to ensure our product is reliable, secure, and trustworthy. Through ongoing engagement with our customers, we will continue to refine and improve our product to meet the evolving needs of the market and drive positive ROI for our users.

Its unique value proposition is in offering a customizable and scalable solution that integrates with various data sources to provide real-time insights, predictive analytics, and decision-making tools. It helps finance teams to automate their routine tasks, optimize financial operations, reduce risks, and ultimately make better-informed decisions. The platform also offers a collaborative workspace for teams to work together on financial data and analysis, which improves communication and efficiency. Overall, Ambient Systems provides a customer-centric value proposition by focusing on the specific needs of finance teams and delivering a tailored solution to help them achieve their goals.

External Data

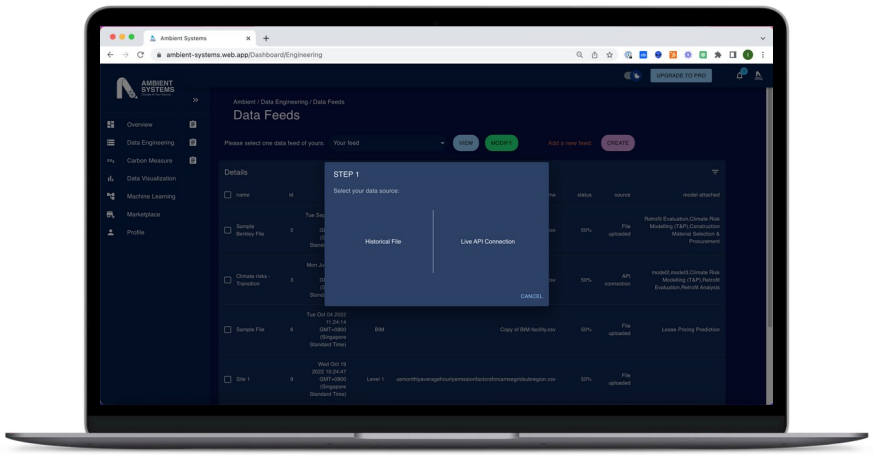

Here are some examples of external data that could be collected and provided to the customer:

Market data: Ambient Systems could provide data on market trends, competitors, industry benchmarks, and macroeconomic indicators that may impact the customer's business.

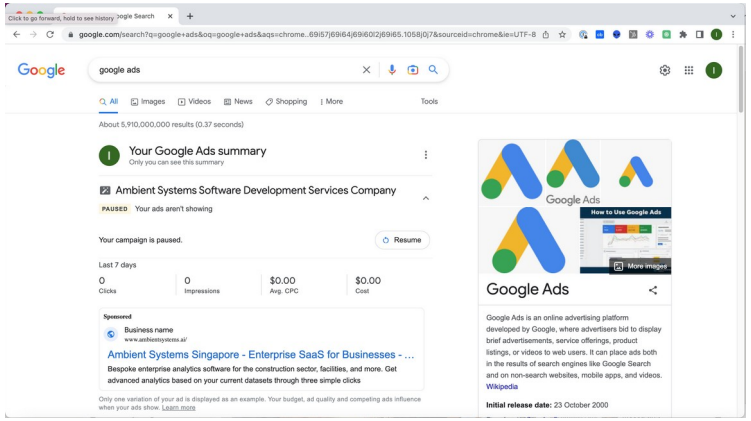

Social media data: Ambient Systems could collect and analyze data from social media platforms to help the customer understand public sentiment, track brand reputation, and identify emerging trends.

Step 5: Test Your MVP

Test your MVP prototype

Current

	Qualitative	Quantitative
Market	• Advisor/Investor Conversations • Market Research • Founder Experience	• LinkedIn Outbound • Email Outbound
Product	• Panasonic • Google Cloud • WIPO	

Planned

	Qualitative	Quantitative
Market	• Case study • LinkedIn Content Marketing	• • Ad Campaign
Product	• Clickable Mockups • Interactive Prototypes	• POC

Key Metrics:

- Number of views/visits
- Number of clicks / CTR
- Time spent
- Sign-ups / Subscriptions (Entry Plan / Premium Plan)

Step 5: Test Your MVP

Test your MVP prototype

Type	Audience	Method or Channel	Cost	Results
Market Qualitative		Founder experience		
Market Qualitative		Market research		
Market Qualitative	Advisor/Investor	Conversations via University Networks		Good
Product Qualitative	Technology Industry	Live Product		Great
Market Quantitative	FP&A	LinkedIn Outbound		20% acceptance 15% reply
Market Qualitative	Diverse	Events		
Market Quantitative	FP&A	Email Outbound		1 response
Market Quantitative	FP&A	LinkedIn Outbound		30% acceptance 20% reply
Planned				
Market Quantitative				X Visitors Y Inbound Leads Z Leads Converted
Market Quantitative		Google Ad Campaign		X Views Y Clicks
Product Qualitative		Demo		X Demos Y Sign-ups
...				

Step 6: Product

AMBIENT'S UNIQUE ADVANTAGE

1 Sensor Data

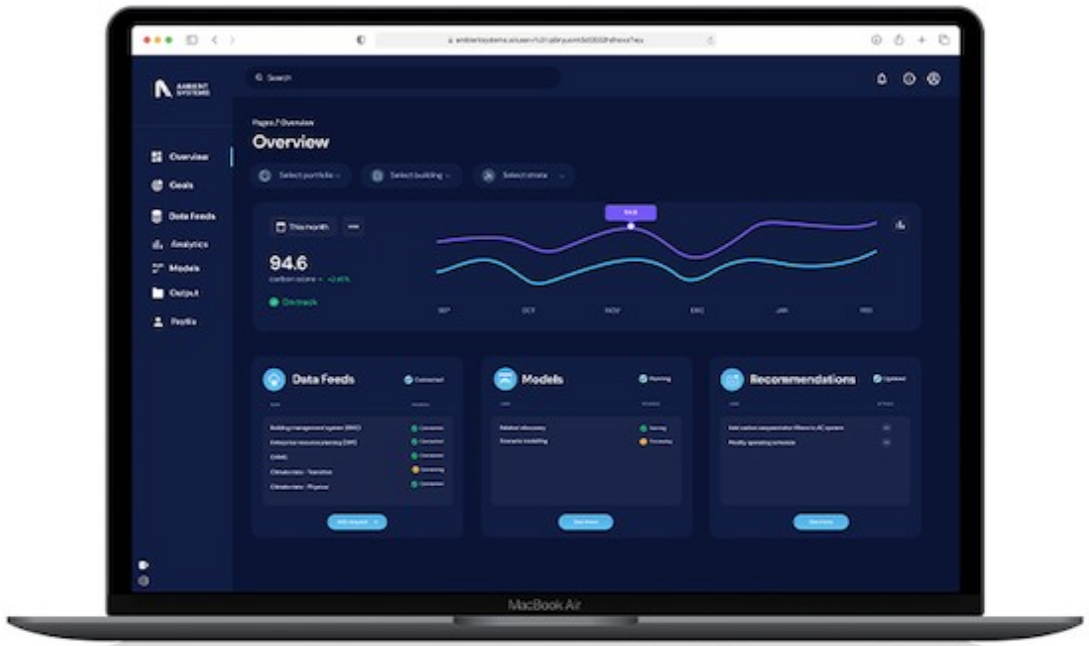

Easily leverage video, audio, and sensor data to empower your state-of-the-art finance department

2 Data Science

Streamlined access to machine learning templates based on expertise in industries few technology vendors cover.

3 Legacy Datasets

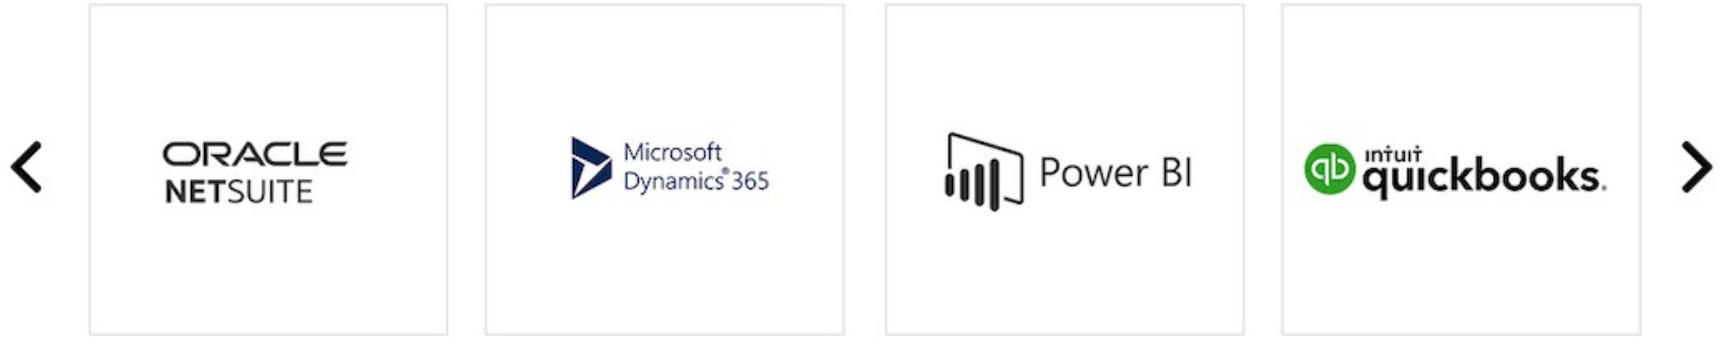

No data migration needed to get current platforms or legacy databases plugged into finance .am•s

Step 6: Product

AMBIENT CONNECTS WITH ALL THESE PLATFORMS AND LEGACY DATABASES

PLATFORMS | LEGACY DATABASES | CLOUD PROVIDERS

Step 6: Product

Plans and Pricing

Entry Subscription Plans

$499/month

Free onboarding for the first 10 customers.

Core Features:

- Platform & Database Integrations (up to 1 GB included)
- Augmentation Datasets (premium datasets separate)
- Verify datasets (up to 3 checks included, $99/year extra for additional)

Additional Features:

- Basic data visualization
- Basic reporting tools
- User management

Premium Subscription Plans

Machine Learning Insights

Tentative: $5k/month

Available Insights:

- Increase Utilization
- Extend Technology Lifetime
- Pricing Optimization
- Optimize Operations
- Increase Access to Capital
- Reduce Parts Failure

Financial Planning & Reporting

Tentative: $18k/year

Available Reports:

- FASB
- IFRS
- CDSB (Climate)
- Quarterly & Yearly report

Internet-of-Things (IoT) Installation

(sensors, network gateway, video, audio, and robotics)

Tentative: Priced Individually

Step 6: Product

Plans and Benefits

		Entry		Premium	
		Entry Subscription	**Entry Plan**	**Machine Learning**	**Reporting**
Needs	Accurate financial data				Financial reporting Financial analysis
	Efficient processes	Data import / Export		Visual Analytics	
	Team alignment	Activity Dashboard	API		Real time reporting
	Compliance				
	Real-time reporting	Drag & Drop	API	Visual Analytics	Visual Analytics
Benefits	Improved financial performance				Budgeting/Forecasting Financial analysis
	Better decision-making			Visual Analytics Forecasting	Budgeting/Forecasting Financial analysis Financial reporting
	Increased efficiency				Visual Analytics
	Transparency and accountability	Data import / Export	Data visualization		Budgeting/Forecasting
	Competitive advantage				
Nice to Haves	Automated Workflows	Drag & Drop	API		Real time reporting
	Predictive Analytics			Forecasting	Budgeting/Forecasting Financial analysis
	Interactive and engaging data visualizations	Activity Dashboard	Data visualization		Visual Analytics
	Social responsibility and sustainability metrics				

Step 6: Product

Here is what 8 customers pay (Goal $300k Annual Revenue)

	Entry		Premium		
Customer	**Entry Subscription**	**Entry Plan**	**Machine Learning**	**Reporting**	**Total**
Customer wants insights throughout the year for one critical operation	1 Annual Plan 12 * $499 = $6,000	No additional data needed	1 Insights 12 * $5000 = $60,000	No Reporting	$66,000
Customer wants one annual report	1 Annual Plan 12 * $499 = $6,000	No additional data needed	No Insights	1 Annual Report $18,000	$24,000
Customer wants insight for half of the year and two annual reports	2 Annual Plan 2 * 12 * $499 = $12,000	1 extra data set needed 2 * 12 * $99 = $2,400	1 Insights 6 * $5000 = $30,000 < 1 year fee: $5,000	2 Annual Report 2 * $18,000 = $32,000	$81,400

Step 6: Product

Unique Value Proposition

- **Doesn't replace the entire process: gives flexibility to finance teams to automate as much or as little as they need to**

  More user friendly and customizable platform

- **Modular: puzzles can add up to integrate data sets together**

  Incorporates external datasets
  Configures with legacy systems: add-on plugin to existing tech stack

- **Advanced: access advanced forecasting machine learning models through single platform**

  Stronger focus on data visualization and reporting

Process Analysis

	Ambient Process	Current Process
Station 1 Integration	1. Select goals (report, plan, or insight) 2. Identify platforms 3. Identify legacy databases 4. Identify siloed datasets 5. Identify cloud providers 6. User permissions	1. Manually handled by IT 2. Create a formal request 3. Get approval from hire-ups 4. Demonstrate ROI 5. Version control 6. Manually format and email to colleagues
Station 2 Processing	1. Check dataset for format and type 2. Check dataset for value errors 3. Check dataset against benchmarks	1. Done by different teams 2. ? 3. Financial Analysts does the BI queries 4. Financial Analysts upskill 5. Data Science teams support?
Station 3 Generate	1. Prepare the output unit: plan, report, or insight (automated with professional guidance in human-in-the-loop system)	1. Prepared by senior team members with analyst support
Station 4 Analysis	1. Select data science needed 2. Budgeting or Forecasting 3. Financial Analysis 4. Visual Analytics Dashboard 5. Activity Dashboard	1. Identify objective 2. Find / search for techniques 3. Try out and iterate on technique 4. Seek new data for the technique
Station 5 Output	1. Present output: report, plan, or insight 2. Deliver output 3. Data export / API	1. Put in word file, format manually, prepare pdf and email

Quantified Benefits

Product = Customer x MVP

	Ambient Process	Current Process	Difference and Benefits
Station 1 Integration	• $ • Time • Auditable / Traceable	• $ • Time • Auditable / Traceable	• X % less time • X % less error • X % more data sources available
Station 2 Processing	• $ • Time • Auditable / Traceable	• $ • Time • Auditable / Traceable	• X % less error • X % more volume • X % more different sources • X % faster
Station 3 Generate	• $ • Time • Auditable / Traceable	• $ • Time • Auditable / Traceable	• X % more analysis • X % faster
Station 4 Analysis	• $ • Time • Auditable / Traceable	• $ • Time • Auditable / Traceable	• X % richer information
Station 5 Output	• $ • Time • Auditable / Traceable	• $ • Time • Auditable / Traceable	• X % faster reports • X % richer information
		Total Benefit	X % cost savings X % more value X % faster audit X % comprehensive de-risking
