# Ambient Systems

Operations Plan v03

May 26, 2023

# Table of Contents

1. Market Challenges
2. Value Proposition
3. Ambient’s Core Features
4. Comparison & Competitive Analysis
5. Benefits
6. Delivery
7. Financials

# Market Need and Challenges

# Challenges Ambient Aims to Address

- Fragmented Data and System Integration
- Manual and Time-Consuming Forecasting
- Lack of Data Visualization and Reporting
- Compatibility with Legacy Systems
- Limited Scalability and Adaptability

# Value Proposition

# Unique Value Proposition

- Unlock the Power of Integration: Ambient revolutionizes financial management by seamlessly integrating with your existing systems and external datasets, acting as the missing puzzle piece to complete your workflow.
- Intelligent Forecasting and Insights: Experience advanced financial forecasting powered by cutting-edge machine learning models, all within a single platform. Gain a competitive edge with robust data visualization and comprehensive reporting capabilities.

# Features

# Ambient’s Core Features

1. Data Integration and Consolidation
2. Data Visualization
3. Automation of Repetitive Tasks
4. Activity Tracking
5. Data Import/Export

# Competitive Analysis

# Comparison & Competitive Analysis

| | | Competitor A | Competitor B | Competitor C | Ambient's Product |
|---|---|---|---|---|---|
| | | ERP Software | FP&A Software | Strategy planning and execution | Finance Management Platform |
| Needs | Accurate financial data | Y | N | N | Y |
| | Efficient processes | Y | Y | Y | Y |
| | Effective collaboration | Y | Y | Y | Y |
| | Compliance | Y | N | N | Y |
| | Real-time reporting | Y | Y | Y | Y |
| Benefits | Improved financial performance | N | N | N | Y |
| | Better decision-making | Y | Y | N | Y |
| | Increased efficiency | Y | Y | N | Y |
| | Transparency and accountability | Y | Y | Y | Y |
| | | N | Y | N | Y |
| Nice to Have | Automated Workflows | Y | N | Y | Y |
| | Machine Learning and Predictive Analytics | N | N | N | Y |
| | Interactive and engaging data visualizations | Y | N | N | Y |
| | Social responsibility and sustainability metrics | N | N | N | Y |
| | Responsive customer service | N | N | Y | Y |

# Comparative Analysis

| ERP | FP&A Software | Strategy planning and execution software |
|---|---|---|
| 1. Automating financial processes such as billing, invoicing, and payment processing<br>2. Improving inventory management and tracking, especially for companies that maintain warehouses and manage spare parts for their vehicles<br>3. Providing real-time access to financial data, enabling management to make informed decisions based on current financial status<br>4. Enhancing financial reporting capabilities, including cash flow management, budgeting, and forecasting<br>5. Facilitating compliance with regulations and industry standards, such as the International Financial Reporting Standards (IFRS) or Generally Accepted Accounting Principles (GAAP) in the US. | 1. Budgeting and Forecasting: The software can help companies plan and forecast their financials, including revenue, expenses, and capital expenditures, to better manage cash flow and allocate resources.<br>2. Financial Reporting: FP&A software can generate reports to help companies analyze financial data and identify trends and opportunities for improvement.<br>3. Financial Analysis: The software can provide insights and analysis on profitability, cost drivers, and operational performance to help companies make data-driven decisions.<br>4. Scenario Planning: FP&A software can help companies evaluate the potential impact of various scenarios, such as changes in fuel prices or regulatory requirements, on their financial performance.<br>5. Performance Management: The software can track key performance indicators (KPIs) and help companies monitor progress towards their financial goals and objectives. | 1. Facilitating collaboration between departments: Transportation companies often have multiple departments involved in financial planning and execution, and strategy planning and execution software can help to facilitate collaboration and ensure that everyone is working towards the same goals.<br>2. Streamlining financial planning processes: Financial planning can be time-consuming and complex, but strategy planning and execution software can automate many of these processes, making them more efficient and accurate.<br>3. Improving forecasting accuracy: With the help of advanced analytics and modeling tools, strategy planning and execution software can help transportation companies to improve the accuracy of their financial forecasts.<br>4. Enabling scenario planning: Transportation companies need to be prepared for a range of scenarios, from changes in fuel prices to fluctuations in demand, and strategy planning and execution software can help to model and plan for these scenarios.<br>5. Aligning financial plans with strategic goals: Finally, strategy planning and execution software can help transportation companies to ensure that their financial plans are aligned with their strategic goals, and that they are making informed financial decisions that will support their long-term success. |

# Benefits

# Qualitative Benefits

1. Accurate Financial Data: Ensure the integrity and accuracy of financial data, enabling reliable financial reporting and analysis.
2. Efficient Processes: Streamline financial processes and workflows, saving time and reducing manual errors.
3. Team Alignment: Facilitate collaboration and alignment across finance teams, promoting effective communication and shared goals.
4. Compliance: Ensure compliance with regulatory requirements and industry standards, minimizing risks and avoiding penalties.
5. Real-Time Reporting: Access real-time financial reports and insights, enabling timely decision-making and monitoring of financial performance.
6. Improved Financial Performance: Optimize financial performance through enhanced forecasting, budgeting, and revenue management.
7. Better Decision-Making: Make data-driven decisions with confidence, leveraging comprehensive financial insights and analytics.
8. Increased Efficiency: Improve operational efficiency by automating repetitive tasks and optimizing resource allocation.
9. Transparency & Accountability: Foster transparency and accountability in financial management, promoting trust among stakeholders.
10. : Gain a competitive edge by leveraging advanced financial management capabilities, positioning the company for success.
11. financial processes through automated workflows, reducing manual effort and increasing productivity.
12. Predictive Analytics: Utilize predictive analytics to anticipate market trends, identify growth opportunities, and mitigate risks.
13. Interactive & Engaging Data Visualization: Present financial data in visually appealing and interactive formats, facilitating easy interpretation and understanding.
14. Social Responsibility & Sustainability Metrics: Track and report on social responsibility and sustainability metrics, supporting corporate social responsibility initiatives.
15. Responsive Customer Service: Receive dedicated and responsive customer support, ensuring a positive experience and prompt resolution of issues.

# Value Proposition & Plan Features

# Workflow Transformation

| | Ambient Process | Current Process |
|---|---|---|
| Station 1<br>Integration | 1. Select goals (report, plan, or insight)<br>2. Identify platforms<br>3. Identify legacy databases<br>4. Identify siloed datasets<br>5. Identify cloud providers<br>6. User permissions | 1. Manually handled by IT<br>2. Create a formal request<br>3. Get approval from hire-ups<br>4. Demonstrate ROI<br>5. Version control<br>6. Manually format and email to colleagues |
| Station 2<br>Processing | 1. Check dataset for format and type<br>2. Check dataset for value errors<br>3. Check dataset against benchmarks | 1. Done by different teams<br>2. ?<br>3. Financial Analysts does the BI queries<br>4. Financial Analysts upskill<br>5. Data Science teams support? |
| Station 3<br>Generate | 1. Prepare the output unit: plan, report, or insight (automated with professional guidance in human-in-the-loop system) | 1. Prepared by senior team members with analyst support |
| Station 4<br>Analysis | 1. Select data science needed<br>2. Budgeting or Forecasting<br>3. Financial Analysis<br>4. Visual Analytics Dashboard<br>5. Activity Dashboard | 1. Identify objective<br>2. Find / search for techniques<br>3. Try out and iterate on technique<br>4. Seek new data for the technique |
| Station 5<br>Output | 1. Present output: report, plan, or insight<br>2. Deliver output<br>3. Data export / API | 1. Put in word file, format manually, prepare pdf and email |

# Quantified Benefits

| | Ambient Process | Current Process | Difference and Benefits |
|---|---|---|---|
| Station 1 Integration | • $<br>• Time<br>• Auditable / Traceable | • $<br>• Time<br>• Auditable / Traceable | • X % less time<br>• X % less error<br>• X % more data sources available |
| Station 2 Processing | • $<br>• Time<br>• Auditable / Traceable | • $<br>• Time<br>• Auditable / Traceable | • X % less error<br>• X % more volume<br>• X % more different sources<br>• X % faster |
| Station 3 Generate | • $<br>• Time<br>• Auditable / Traceable | • $<br>• Time<br>• Auditable / Traceable | • X % more analysis<br>• X % faster |
| Station 4 Analysis | • $<br>• Time<br>• Auditable / Traceable | • $<br>• Time<br>• Auditable / Traceable | • X % richer information |
| Station 5 Output | • $<br>• Time<br>• Auditable / Traceable | • $<br>• Time<br>• Auditable / Traceable | • X % faster reports<br>• X % richer information |
| | | **Total Benefit** | X % cost savings<br>X % more value<br>X % faster audit<br>X % comprehensive de-risking |

# Delivery

# Achieving User Adoption and Understanding (Change Management & User Experience)

1. User-Centric Approach:
    1. Understand user needs, pain points, and aspirations.
    2. Involve users in design and development.
    3. Iterate based on continuous feedback.
2. Seamless Onboarding & Training:
    1. Intuitive interface for easy navigation.
    2. Comprehensive onboarding materials.
    3. Dedicated support for assistance.
3. Continuous Support & Education:
    1. Proactive communication with updates and tips.
    2. Rich knowledge base and resources.
    3. Webinars and workshops for advanced features.
4. Feedback-Driven Enhancements:
    1. Collect user feedback through surveys and interviews.
    2. Align roadmap with user needs.
    3. Transparent updates and improvements.

# Customer Acquisition

1. Targeted Marketing
2. Lead Generation
3. Referral Programs
4. Strategic Partnerships
5. Engaging Online Presence
6. Customer Testimonials, Referrals, and

# How We

Ambient Systems will collaborate closely with construction companies to understand their unique requirements and design a customized financial management solution. The proposed implementation process includes the following key steps:

1. Needs Assessment and Solution Design: Our team will conduct a thorough analysis of the company's existing financial processes, pain points, and desired outcomes. Based on this assessment, we will design a tailored solution that aligns with their specific needs.
2. Seamless Integration: XYZ Solutions will seamlessly integrate the financial management platform with the company's existing systems, ensuring a smooth transition and minimal disruption to their ongoing operations.
3. Training and Support: We will provide comprehensive training to the company's finance team to ensure they are equipped with the necessary skills to utilize the new solution effectively. Ongoing support and guidance will also be provided to address any questions or concerns.

# Financials

# Cost Analysis

Goal: $450k per year
Number of Customers: 10
Fire Priced Round: 20% for $1m (Valuation of $5m)

Cost to Service Customer:

| Offering | Price | Cost | Profit |
|---|---|---|---|
| Entry Plan | $499 * 12 = $6,000 | | |
| Entry Plan Extension | | | |
| Machine Learning | $5,000 per month | | |
| Financial Reporting & Planning | $18,000 per year | | |

The End.
