Endless Frontier Labs Application 2023

In Progress - Last edited: Jul 11 2023

Application Form

Section 0. CEO Equalivalant/Primary Contact

CEO Equivalent/Primary Contact Information

First Name

Ivan

Last Name

Damnjanovic

Email

ivan@ambientsystems.ai

Contact Phone Number

Country Code	USA (+1)
Phone Number	[redacted]

Where is your company physically headquartered?

Country	Singapore
City	Singapore
State/Province	(No response)

Section 1. Company Information

Company Information

Tell us about your company.

Company Name

NOTE: Do not include Inc., LLC, GmbH, etc. This is how your company will be registered in our records.

Ambient Systems

Describe what your company does in 100 words or less:

Be concise, and consider the following template: "(Company) looks to (the value you deliver) by (what you do) using (your product or technology)".

Example: "TestCo improves family health by removing airborne viruses and bacteria in the household using a patented UV light device."

Ambient Systems improves financial management of businesses by focusing on revenue generating investments and increasing personnel utilization through use of AI technology.

What is your company's long-term vision and why is it important to you as a founder?

Our vision is to revolutionize financial management. This is important to me as a founder because I believe innovation in finance and technology are two key drivers of positive socio-economic development in both emerging and developed markets. Working in Canada and emerging markets in Asia, I've noticed similar challenges faced by businesses of all sizes. I've set out to solve this underlying challenge by pursuing a master's degree in computer science, bridging software innovation with real world problems that I've seen across multiple industries. Ambient Systems is the brainchild of my personal project as a master's student at Asia's top ranked university.

What track best fits your company?

Endless Frontier Labs operates three tracks:

- - for startups developing cutting edge solutions with applications such as robotics, hardware, new materials, quantum computing, advanced manufacturing, renewable energy, Internet of Things, sensors, and more.
- **Digital Tech** - for startups with novel software, AI/ML, or digital services with applications in finance, health, security, supply chains, Enterprise SaaS, education, retail, media, e-commerce, and related verticals.
- **Life Sciences** - for startups tackling complex problems in biology, chemistry or related fields with applications in therapeutics, drug discovery, drug design, delivery, diagnostics, and other human or animal health-focused verticals.

If you are unsure, please pick the best fit, and EFL will make final assignments if admitted.

Have you incorporated or formed any legal entity?

Yes

Please specify (e.g. Inc., LLC, GmbH, etc.)

Ambient Systems Pte. Ltd. (Singapore)

When was your company founded?

Enter a year in YYYY format

2021

Number of full-time employees:

Enter digits only

1

Does your company have a website?

Yes

Company Website

Please enter your full URL, including "https://"

https://www.ambientsystems.ai/

Do you have a ?

Yes

Section 2. Market Information

Market Information

Tell us about the market need you are trying to address.

Describe the customer pain point you are trying to solve. Why was it not solved earlier?

We're solving a series of connected challenges in enterprises seeking to modernize financial operations in . The underlying challenge is financial performance. Companies need to be continuously innovating in order to drive returns and grow their business. However, this is difficult due to various factors such as inefficiency, complexity, and inherent risk (uncertainty in the downside future outcomes). We see this as a practical challenge of financial management. The reason this issue was not solved previously is partially due to a limited technological capabilities, but more due to lack of expertise. With advances in AI and hybrid work, we can bring the benefits of experts to almost any business, enabling them to drive financial returns whether they're an MNC or an SME.

What best describes your business model?

B2B

Who are your current or potential competitors?

We have mostly large enterprise software products as the competitive alternatives.

Here are some of the tools that companies can use to improve their financial performance:
https://www.gong.io/
https://www.oracle.com/financial-services/
https://www.microsoft.com/en-sg/microsoft-365/access
https://www.outreach.io/
https://www.algo.com/platform/
https://www.charthop.com/
https://www.onestream.com/
https://www.cubesoftware.com/

Does your product / service require regulatory approval for commercialization in your target markets?

No

Section 3. Product Information

Product Information

Tell us about your product or service.

Describe your company's product or service and what it does or will do:

We Propose an Industry-Specific Financial Management Software Powered by AI. It will enable users to continuously identify and make improvements that drive their business forward, as determined by financial performance outcomes. We focus on an analysis of data and a niche set of industries where revenues and increased personnel utilization are positively correlated. These are often in asset heavy industries that are constrained by the amount of capital that they can fundraise. We can help commercial real estate companies maximize their revenues by getting more out of their existing assets while increasing the utilization of their workforce rather than replacing or automating their workflows. This has been demonstrated in a niche commercial real estate property business in Singapore. We're excited to make the benefits of this underlying technology to other companies in similar sectors in North America.

Describe any sources of differentiation and competitive advantage in your product. Please highlight how your technology is novel, differentiated and / or transformational.

Our competitive advantage is in the industry-specific reporting and AI we use for financial planning & analysis (FP&A). For example, we've done a POC project at a vertical farm in Singapore where we used a multi-dimensional data set to improve revenue generation of the farm. We look at the raw sensor data, overlayed it with building management system equipment set-points, and correlated it with market prices for that specific batch of crops in Singapore and Southeast Asia markets. This enabled the application of powerful cloud-based techniques such as multi-level regression, providing a set of instructions to the farm operator in order to maximize the production value of the facility while minimizing the energy and CO2 costs. It's a perfect example of a multi-variate calculus application taught in engineering schools applied to the modern day food production challenges in urban environments such as Singapore. The invention was written in two languages (english and french) and awarded a patent by multiple states around the world.

How have you tested or validated your scientific or technological innovation?

Yes. We've demonstrated the use of technology and concepts at a vertical farm facility in Singapore. We've also developed a functional prototype and demonstrated at a Google for which we've received a 1st runner-up spot in Singapore in 2022. Since then, we've been collaborating with multiple partners on further pilot studies to validate additional use cases.

How far along is your product?

Tell us the stage of your product, service, or technology. Include any work you have done to validate that it works as intended.

We've received a patent in 30+ states around the world in two languages: english and french. We've also won 1st runner-up spot in a Singapore Google . We've also developed an ongoing R&D collaboration with a multi-national firm. We're in the process of validating that the technology can be indeed tied in with a company's financial management process. This requires further validation and testing on the real-time data base integration side.

What is the biggest obstacle that could prevent your product from being successful in the next 6 months?

We think lack of funding is the biggest bottleneck in making sufficient progress in business model validation. We have a potential of several thousand customers in one of the target customer segments in Singapore alone. This is beyond the amount of contacts that a founder or a co-founding team can cover in order to see what the pricing range is for the product or the adoption timeline as many customers will need funding in order to conduct the necessary upgrades for full-scale adoption and revamp of their operations. Without sufficient investment from the customer side, it is difficult to realize the benefits of a transformation project such as this, as it involves innovation across AI, IoT, domain expertise, and financial management to fully leverage. However, the benefits could be immense not just for the individual customers, but the industry as a whole.

Who owns the technology?

Us

How do you plan to protect your technology (e.g., patents, trade-secrecy, etc.)? For any current and pending IP protection, please complete the question below

We own the application and the user management.

We have an exclusive license for the patent in one of the industries where we did the pilot.

Do you have any assigned or pending patents?

Yes

For each patent, please enter your:

- Patent or application numbers

- Listing patent authority

- Application status

1	WO - Granted
2	(No response)
3	(No response)
4	(No response)
5	(No response)

Section 4. Traction and Progress

Traction & Progress

Tell us about your company's progress and accomplishments.

List any of your company's accomplishments to-date. Include any proof of traction or commercial progress.

Examples: Number of early users, pilots, partnerships, awards, media and press releases

Awards and recognition for inventiveness.

Do you have customers?

No

Do you have revenue?

Answer yes if someone has paid you for your product or service

No

How do you plan to generate first revenue? Describe any future milestones.

We need to secure pilot LOIs/POCs.

What is the size of your target market (TAM, SAM, SOM)?

Financial Planning Software Market: (CAGR: 16.6% until 2031)

Financial Management Software Market: (CAGR: 9% until 2026)

Global Financial Services Market: (CAGR: 7.5% until 2027)

Section 5. Team Information

Team Information

Tell us about your founding team.

How many C-level founders does your company have?

1

Please pick the option that best describes your founding team.

First startup for all founders

Why do you think your team, including your advisors, is best qualified to succeed in your current business?

Please consider the unique skill sets each person brings, such as business acumen, domain knowledge, and operational experience.

We think we have enough to get the company launched and securing initial customers and investors. We'll need to hire as we go along to deliver the service.

Founder Information (Please repeat for each founder)

First Name:	Ivan
Last Name:	Damnjanovic
Title	CEO and Founder
Email:	ivan@ambientsystems.ai
Time commitment:	Full-Time
	Man
Current or highest education:	MS
Field of study:	Computer Science Masters, Civil Engineering Bachelors
Awarding institution:	National University of Singapore, University of Toronto
LinkedIn	

List any expert advisors (e.g. technical, scientific, business, regulatory, etc.) and the specific expertise they bring to your team. Please include LinkedIn, if applicable.

If none, put "N/A."

Ivan's quite familiar and knowledgable about the technology in this space. We also have industry partners.

Section 6. Funding Information

Funding Information

Tell us about your past funding and how much capital you are currently raising.

Unless otherwise stated, enter amounts in US Dollars. Convert to US Dollar equivalent amount if using another currency.

Please specify your current investment stage.

Pre-seed

Have you raised money from outside investors?

Yes

How much money have you raised from investors to date? Do not include grants or awards.

Investors can be angels, VC's, and family offices. Enter your amount in US Dollars. Convert to US Dollar equivalent amount if using another currency.

$ 150,000

Provide information on the last round closed

Total raised:	(No response)
Date closed:	(No response)
Type of round:	Pre-seed
Type of investor:	Other
List any investors you may want to include in the application	University, Angel, and Friends
What type of Legal instruments were used to raise?	
of Investor - Other:	(No response)

Are you currently fundraising?

Yes

Provide information on your current open round

How much funding are you seeking/raising right now?	(No response)
How much is currently committed:	(No response)
Type of round:	(No response)
List any investors you may want to include with this application	(No response)
What is your current monthly burn rate? (enter as $US)	(No response)
How many months of runway does your company have left?	(No response)
Has your company ever received non-equity grants or awards?	(No response)

Section 7. Concluding Section

Concluding Section

A few last questions for our application review team.

Have you applied to EFL previously?

(No response)

Is anyone in your startup or advisory team affiliated with NYU?

(No response)

Select the specific functions you hope to receive the most assistance with during EFL:

No Responses Selected

What is your main objective for joining the EFL program?

(No response)

Have you been affiliated with another startup program, accelerator, or incubator, either now or in the past?

(No response)

How did you hear of EFL?

No Responses Selected

Tell us a fun fact about your team that is not related to your company.

(No response)

Is there anything else you want to share with us?

(No response)

We strongly advise applicants to submit a product video or demo, if available, along with their application.

This step is available after marking this form complete below.

Provide a link to a product video or demo or upload a product video or demo.

Completed - Jun 29 2023

If available, provide a link to a product video or demo. You may also upload a copy of the video itself. Please enter the full URL, including "https://", or copy the link directly from your browser

Remember to check your sharing settings. Your file should be accessible in incognito mode.

Ambient Systems - Commercial Real Estate / REITS Decarbonization Reporting - 3 min Demo Recording

https://www.youtube.com/watch?v=nP0qbw6CsJY

Improving Financial Performance is Often a Complex Challenge

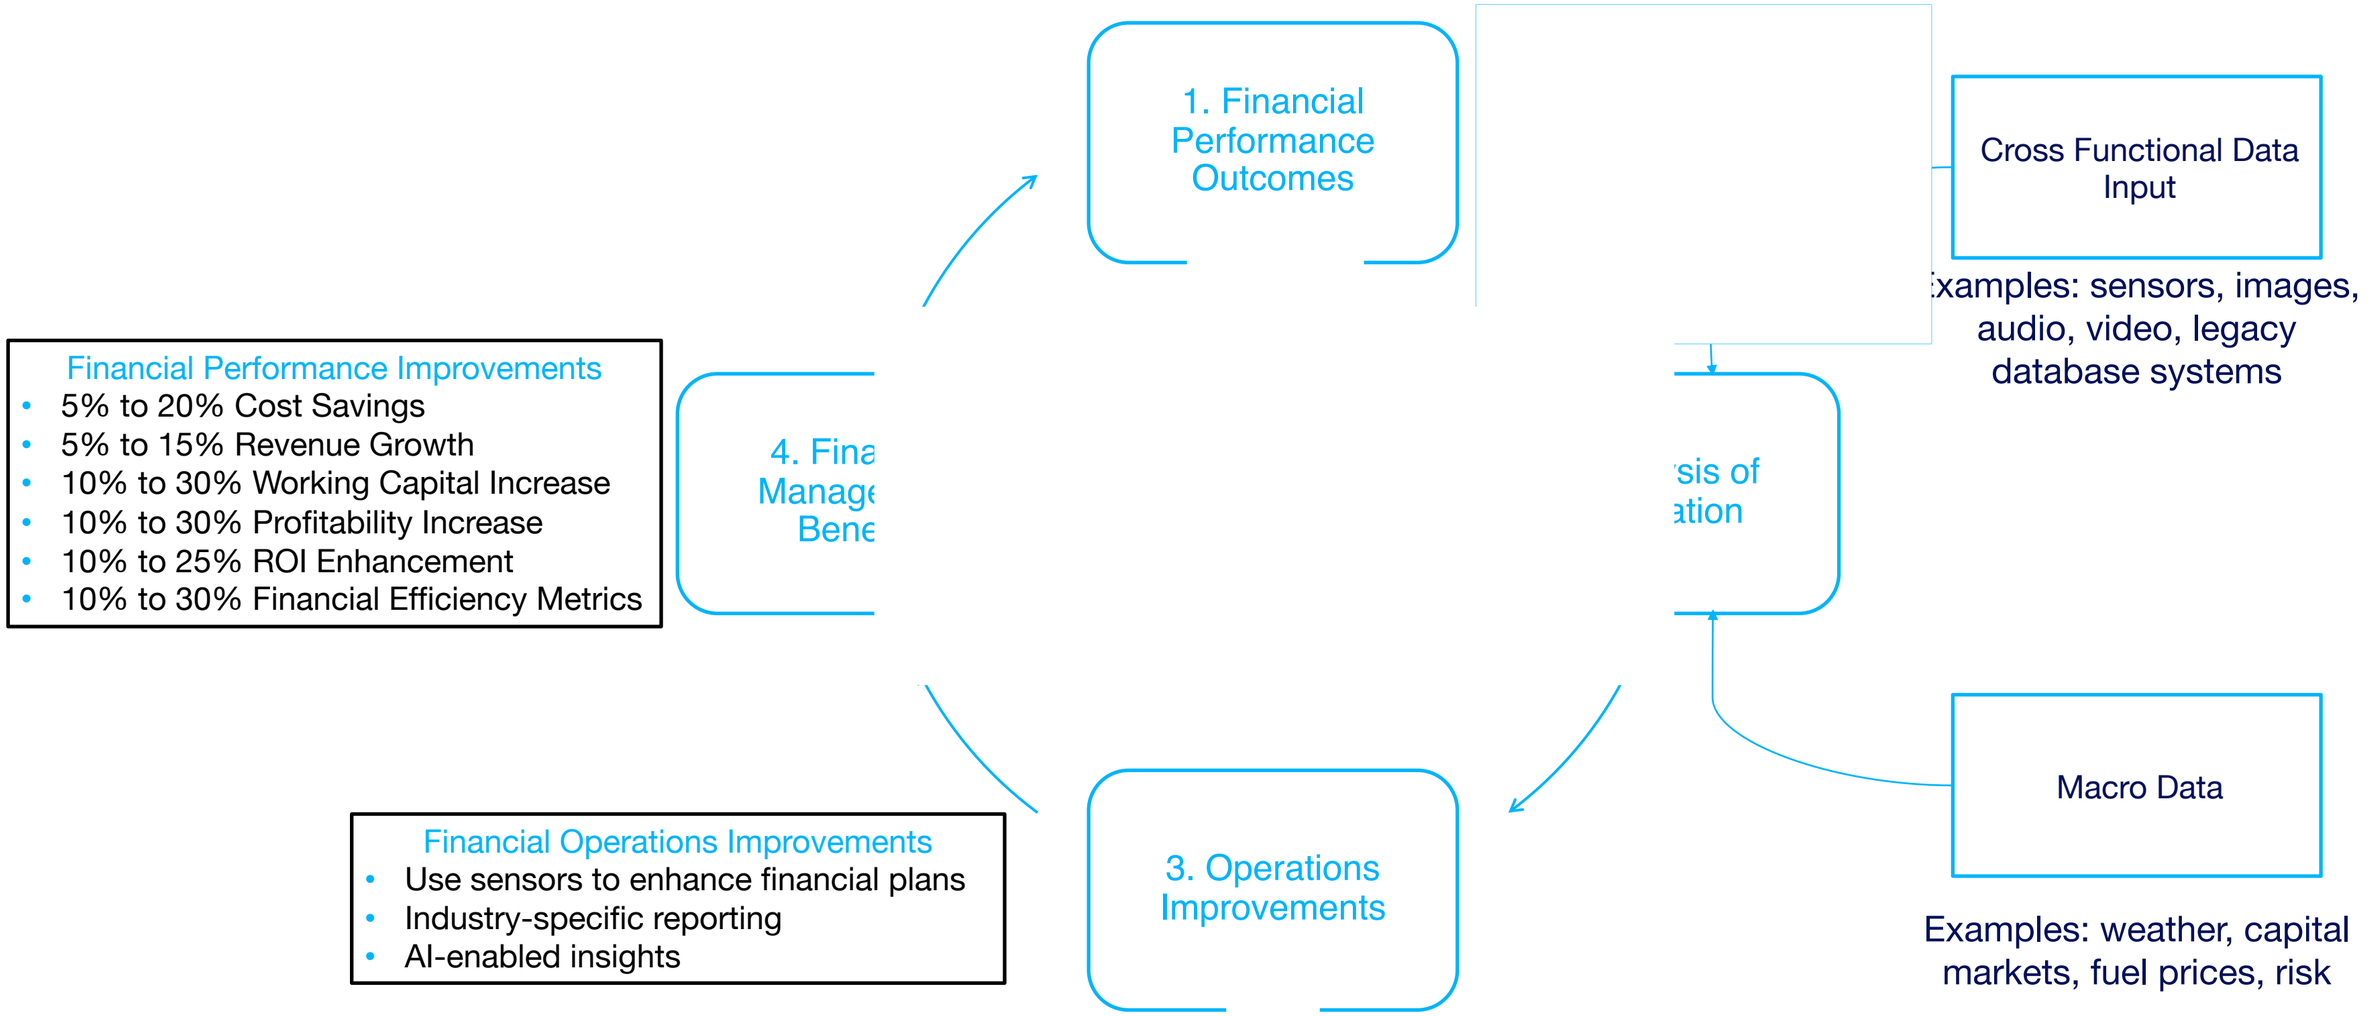

Financial Planning	• Forecast future budget • Make long-term investments • Manage cash flow
Reporting	• New compliance requirements for decarbonization • Traditional accounting is time-consuming, error prone, and difficult to track • Pay/Manage Taxes
Insights	• Require multiple data sources and large volumes of data (hard to group) • Cost-control • Manage risks

Financial experts agree that financial performance and financial operations improvements are positively correlated.
