Team

How many C-level and/or founding team members are full-time? *

1

Please share the name of your founder(s) and a short bio for each person. *

, the CEO and Founder of Ambient Systems, brings a wealth of experience in leading deep tech startups within the financial management sphere. With 10 years of expertise in launching new technology ventures and securing significant capital investments exceeding $1.4 million, Ivan has demonstrated his prowess in innovation and entrepreneurship. Alongside his role at Ambient Systems, Ivan serves as a part-time faculty member at Centennial College in Toronto, Canada, where he imparts knowledge on artificial intelligence and computer science. Prior to establishing Ambient Systems, Ivan honed his skills across technical and business realms, serving as a Risk Analyst at Deloitte Canada, where he developed advanced analytics models and crafted compelling proposals for C-level executives. His tenure as a Research Associate at the University of Toronto further showcased his aptitude for independent research and collaboration within scientific communities, earning him accolades such as the Undergraduate Student Research Awards (USRA) from the Natural Sciences and Engineering Research Council of Canada (NSERC). Ivan's academic background includes a Master's degree in computer science from the National University of Singapore and a Bachelor's degree in civil engineering from the University of Toronto, solidifying his expertise in both technical and managerial domains.

How long have they been working as a team? *

N/A

Please share e-mail addresses of your co-founders: *

This is used for contact purposes if the primary applicant cannot be reached.

N/A

What roles are you looking to hire in the next 6 months? *

(Part-time or Freelance Contract)
Executive Assistant (Part-time)
Marketing Specialist (TBC)
Engineers x 2 (Full Stack x 1, Data Engineering x 1)
Founder/CEO

How many people does your company currently employ full-time? *

1

Business Description

Provide 1-2 sentence description of your company (in English) *

If accepted, this will be the description used on blogs, announcements, etc.

At Ambient Systems, businesses are offered ᴨ

What is the problem that you are solving? *

Ambient Systems addresses critical pain points encountered by commercial real estate teams striving to optimize their financial performance. These teams often grapple with manual, time-consuming processes susceptible to errors and the need for repetitive work. Moreover, they contend with vast amounts of both financial and operational data, which can be overwhelming to manage effectively. Amidst these challenges, team members must juggle multiple competing responsibilities and priorities, further complicating their efforts to achieve financial efficiency and operational excellence. By offering an innovative solution that harnesses the power of IoT and AI technologies, Ambient Systems aims to streamline operations, reduce errors, and empower teams to unlock their full potential in managing commercial real estate finances and infrastructure.

What is your solution to this problem? *

Our solution integrates IoT sensors with ERP systems to empower commercial real estate teams with real-time operational data for informed decision-making. Leveraging advanced AI algorithms, we streamline operations, reduce errors, and enhance adaptability, enabling unparalleled financial efficiency and operational excellence. In a case study within vertical farming, our solution significantly improved crop quality and yield while reducing energy and labor costs. By accessing real-time operational data, businesses experienced increased production, efficient resource use, and minimized output timing risks.

Who are your competitor(s) and how is your solution different from them? *

Ambient Systems occupies a unique position in the market, offering a comprehensive financial planning and management solution that seamlessly integrates IoT sensors with ERP systems to provide real-time operational data insights tailored for commercial real estate teams. Unlike traditional CRMs/ERPs which primarily focus on operational data management, Ambient Systems emphasizes financial , addressing specific challenges such as reducing energy costs while improving worker productivity and comfort. While competitors like Cube and OneStream offer FP&A software with AI features, they lack the seamless integration and organization-specific insights provided by Ambient Systems, positioning us as a leader in driving financial efficiency and operational excellence within the commercial real estate sector.

What are your major product milestones for the next 6 months? *

Over the next six months, we aim to complete architecture diagrams, map user journeys, and identify requirements for IoT integration. Additionally, we'll finalize essential cloud-based development and integrate with existing ERP systems. As we approach launch, we'll identify usability requirements for a market expansion and conduct thorough unit testing.

What are your primary and secondary target countries, if applicable? *

Singapore, Hong Kong, US/Canada

If applicable, how many clients/customers did you have 6 months ago? *

Please provide a numerical value or 0 if not applicable.

0

If applicable, how many clients/customers do you have now? *

Please provide a numerical value or 0 if not applicable.

0

Are there any intellectual property or licensing challenges/legal issues currently associated with your business or its founders/executives? *

No

Social Media and Marketing

What is your company X handle?

Please provide a url, if available.

https://twitter.com/ambient_systems

What is your company LinkedIn handle?

Please provide a url, if available.

Finance

Since founded, how much funding has your startup raised in USD? *

Please provide response in USD using numbers only. (Do not convert to millions. i.e. 1 .5 Million = 1500000)

96500

If you've raised funding who are your investors? *

Write N/A if not applicable.

National University of Singapore

What is your company's monthly recurring revenue (MRR)? *

Please provide response in USD using numbers only. (Do not convert to millions. i.e. 50,000 = 50000)

0

Looking back at the last 6 months, what was the primary revenue source for the company? *

N/A -- Bootstrapped

What is your startup's monthly burn rate? *

Please provide response in USD using numbers only. (Do not convert to millions. i.e. 50,000 = 50000)

20000

Product

Please provide a short, 1 sentence summary of app / product. *

Ambient Systems provides a comprehensive financial planning and management solution, integrating IoT sensors with ERP systems to empower commercial real estate teams with real-time operational data, leveraging AI insights and data integration for enhanced financial performance, starting with vertical farms.

What is the stage of your product? *

- [ ] Ideation
- [x] Minimal Viable Product (MVP)
- [ ] Fully Launched
- [ ] Other:

Who would be a typical user/customer? *

Our typical users/customers encompass vario

Do you use artificial intelligence or (AI/ML) today? If so, how? *

Please describe your current use cases and how it is incorporated into your product. If planning to utilize AI/ML, please indicate the phase of implementation and describe how it would be used.

If no current or planned AI/ML use, please write N/A.

Yes, we're using AI and for different components of the solution.

Please describe the main components in your system architecture. *

Cloud Service Provider: We leverage the advanced capabilities of Google (GCP) for our infrastructure needs, particularly benefiting from its robust services.

Compute Resources & Scaling: Google Compute Engine powers our virtual machine instances, providing the necessary computing resources to handle our workload demands. Additionally, we employ auto-scaling features to dynamically adjust resources based on traffic fluctuations.

: To optimize resource utilization and minimize operational overhead, we utilize Google for , allowing us to execute code in response to events without the need to manage servers.

Data Storage: Our data storage solutions are built on Google , providing scalable and durable object storage for various data types, including structured, unstructured, and semi-structured data.

Database Services: For managing relational databases, we rely on Google , a fully managed relational database service that offers high availability, scalability, and automated backups.

API Integration: We ensure seamless integration with external systems and services through Google and API Manager, enabling robust API management, authentication, and monitoring.

Monitoring and Logging: To maintain system health and performance, we utilize Google for real-time monitoring and alerting, coupled with logging solutions to track and analyze system activities effectively.

During the program, startups will identify a specific product or tech problem that they wish to solve. What problem would you be looking to solve during the accelerator? *

During the programme, our focus will be on defining a clear product vision and prioritizing features to meet and stand out in the market. We aim to articulate a compelling vision aligned with customer requirements and market trends, guiding our development efforts. Through careful feature prioritization based on market research, user feedback, and competitor analysis, we'll ensure the most valuable functionalities are implemented efficiently. Collaborating with designers and developers, we'll translate our vision into tangible prototypes, refining the user experience iteratively. These steps aim to strengthen Ambient Systems' market position, enhance , and drive long-term success.

If available, share a demo URL, video link, or screen recording of your product. *
