VISION

Empower real estate leaders
to achieve net zero portfolio growth
through data science innovation

Property Developers face new challenges arising from digitization and carbon taxes

01: Challenges Faced by Real Estate

Introducing the [redacted]

A powerful tool for understanding clean energy and climate change.

By [redacted] September 29, 2020 5 minute read

Over the past several years, I've been making the case that we have to eliminate global [redacted]. To avoid the worst effects of climate change, we need new zero-carbon ways to generate electricity, grow food, make things, move around, and keep warm and cool.

Why are property developers and owners at greater risk?

Global construction accounts for 38% of total global emissions

Buildings equivalent to The Size of Paris are built every week

This needs to be Reduced by Half by 2030 and To Zero by 2050 to achieve the goals of the 2015 Paris Agreement

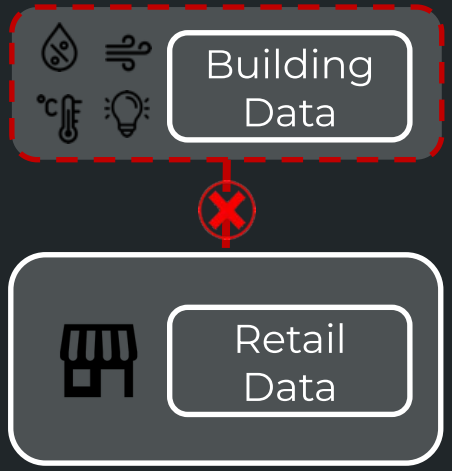

Existing Limitations

The current approach to managing carbon risk is expensive & opaque

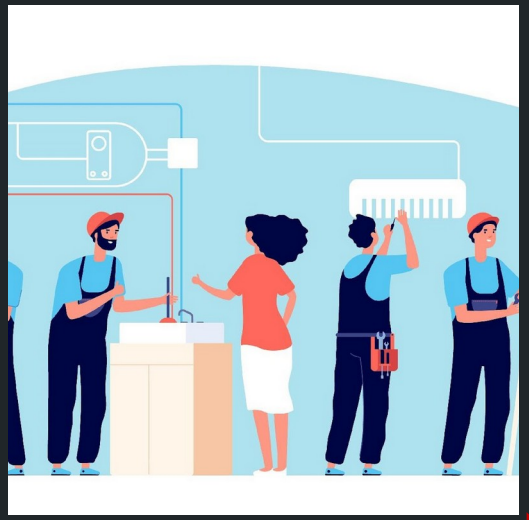

Sustainability Teams are expensive and hard to find

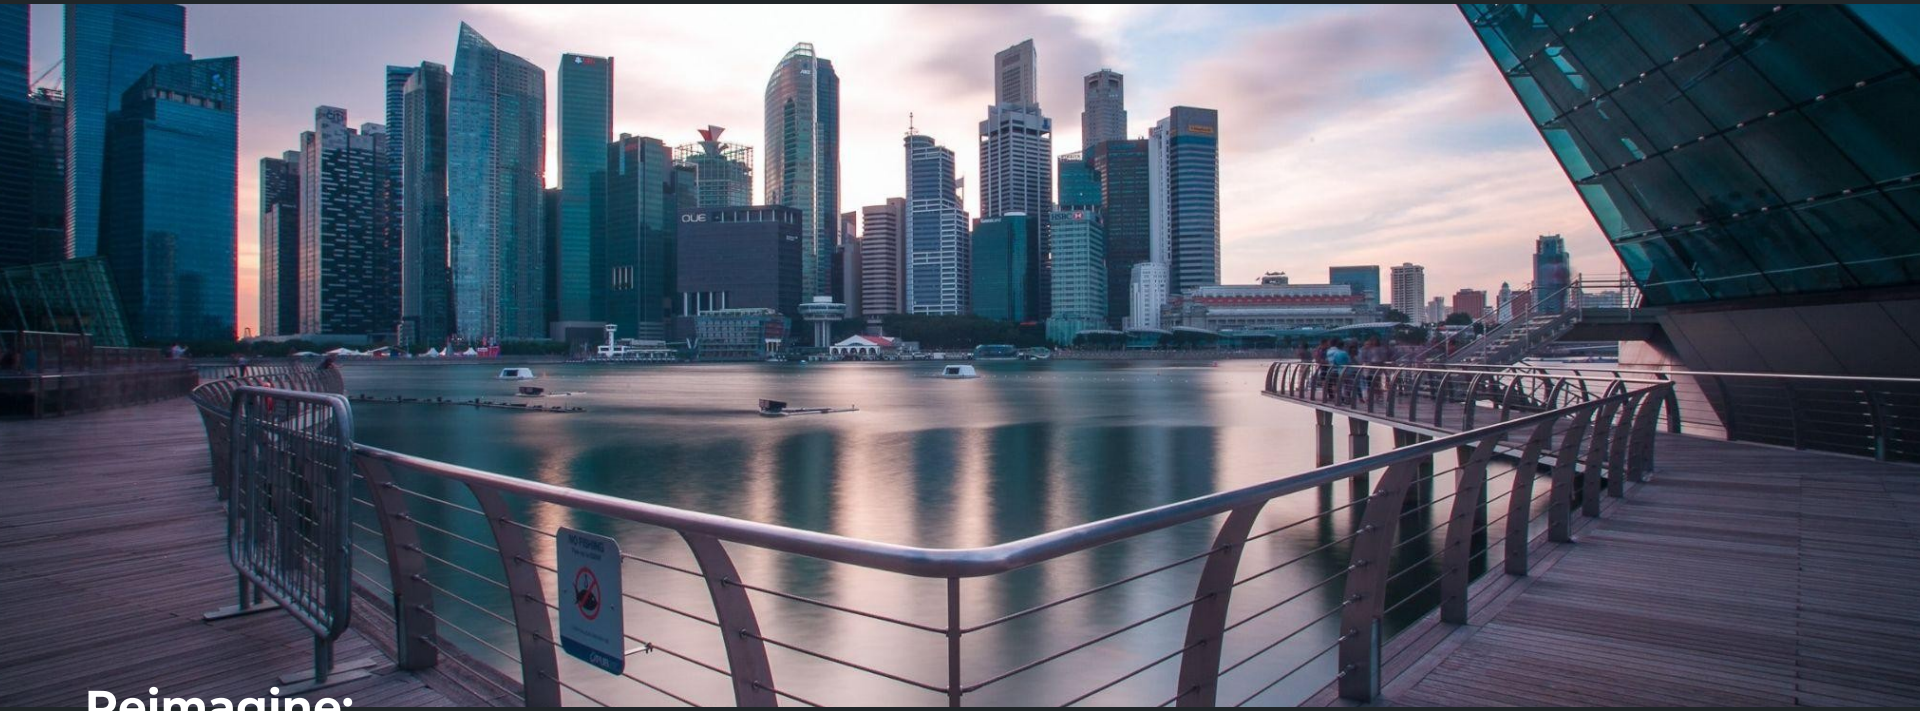

Commercial Data disconnected from Commodities & Risk Data

Shortage of Analytics talent with domain expertise of the built environment

02: Ambient’s Solution

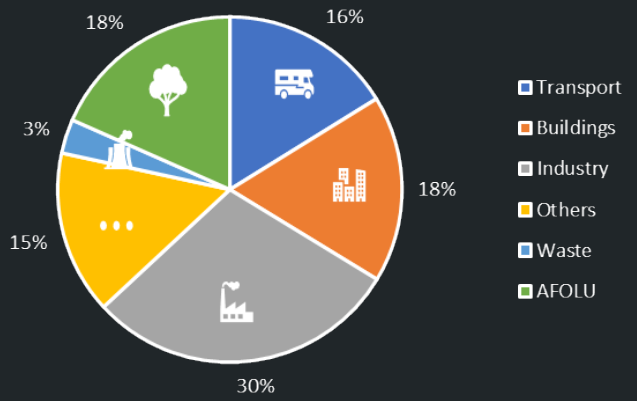

Reimagine:

Decarbonize your buildings while driving innovation forward

Problem

Energy-intensive businesses face difficulty balancing emission costs with revenues and profitability

Share of global greenhouse gas emissions (%)

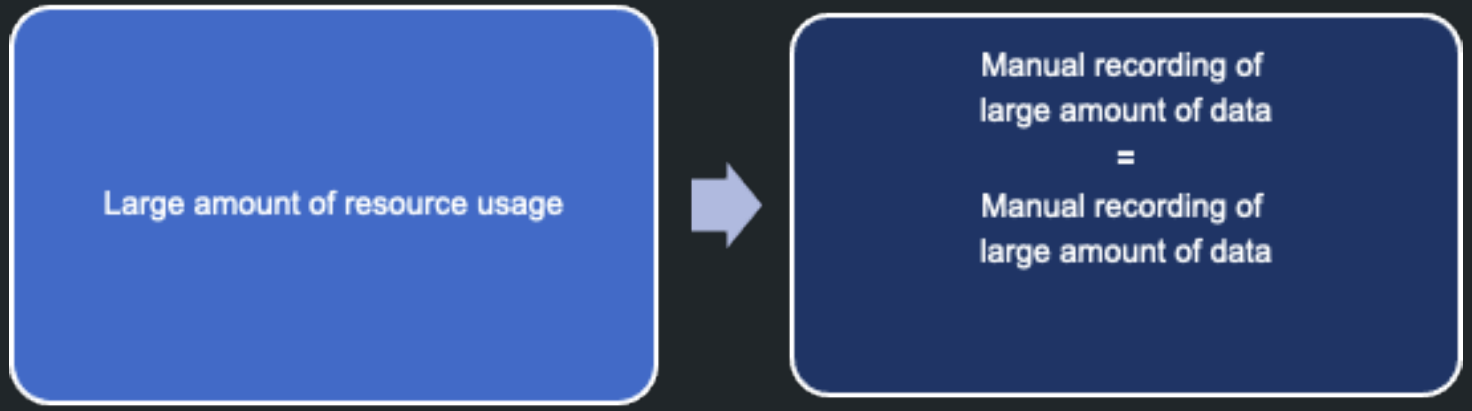

Companies can leverage data science to solve this challenge by:

01 Mitigating Climate Transition Risk

02 Maximizing Revenue & Profitability

Our Purpose

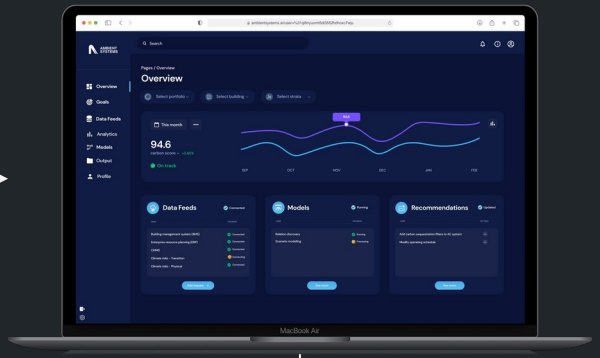

Large amount of resource usage
Manual recording of
large amount of data
=
Manual recording of
large amount of data

Solution

Innovative business model enabled by powerful new SaaS technology

Users

Carbon Disclosure Organizations

Consultancies

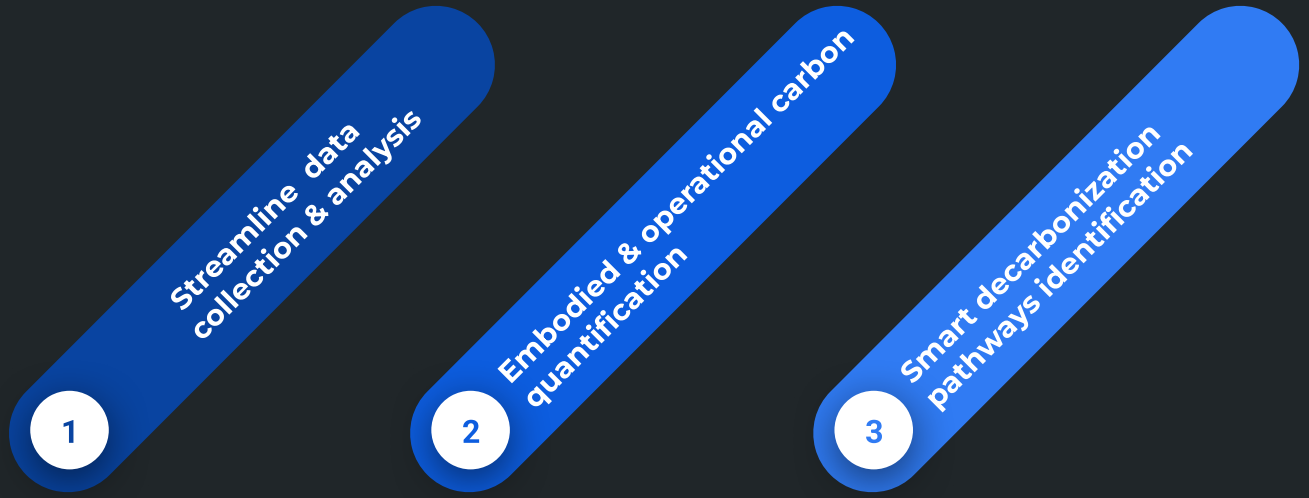

80% Fewer Man Hours
(than conventional in-house processes or consultancies)

100% Transparent
(data and models easily verifiable by qualified auditors)

Minimized Downtime
(minimal business disruption from implementing decarbonization measures)

Our Purpose

- The goal is to help real estate companies monitor and track energy consumption as well as carbon footfall.

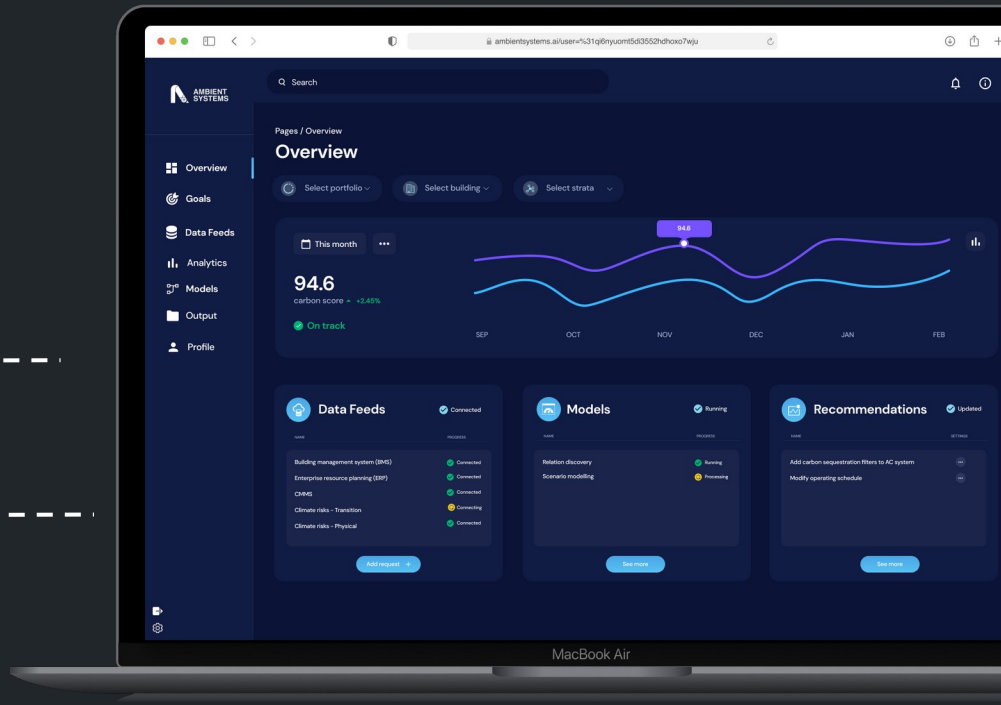

Product

All-in-one Data Science Platform for Retail Real Estate – powered by the Cloud

CONNECT IMPORTANT DATA FEEDS
TO A UNIFIED DATA HUB

IDENTIFY REVENUE OPPORTUNITIES
ACROSS DESIGN & OPERATIONS

TRACK PERFORMANCE &
AUTOMATE ON-DEMAND SERVICES

How our product helps

Benefit 1	Benefit 2	Benefit 3	Benefit 4
Customers can do all this through a single platform purpose-built for real estate and powered by the cloud & data science.	Data science leverages not just cutting-edge machine learning algorithms, but domain expertise within civil engineering and supporting sciences.	This is more than a dashboard or a DIY tool available today, it's the customer's very own in-house expert. Customer has access to a dedicated 'Account Engineer' managing the whole platform on their behalf.	Our models are patented, which means that you'll have access to leading edge innovation before it becomes mainstream.

Our Product’s Architecture

Customer selects the data feeds they need for analysis.

Then the outputs are delivered to the decision makers whether in technical or business teams

We process these inputs end-to-end, providing unparalleled access to our proprietary models

UNIQUE SELLING POINT

Ambient provides a tailored SaaS offering for sustainable real estate

Flexible On-demand Subscription

No more onboarding, training and manpower reliance. Fast up-time and results through Ambient's subscription service

Simple and Affordable Pricing Plans

No more reliance on expensive consultants or in-house teams. One platform powered for all your data science use cases

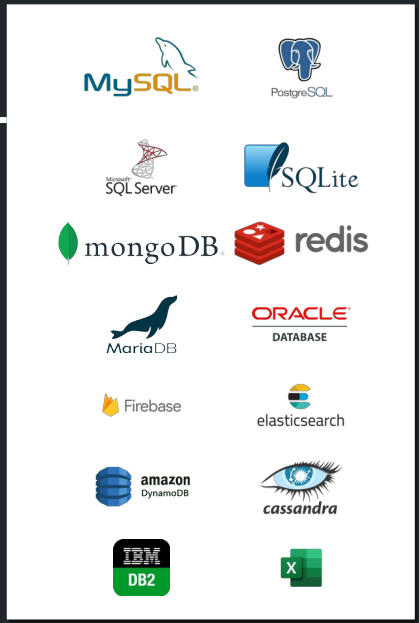

Specialized AI Models built on Domain Expertise

Reach business goals across energy efficiency, environment, and compliance with Ambient's state of the art AI models

Business Model

SaaS subscription based on number of data & AI models deployed

$ 1k / month

$ 10k / month

- Process Optimization
- Predictive Maintenance
- Asset Optimization
- AI-based Demand Response
- AI-based Light Control

No implementation fee

No new hardware

No required training

Application

Ambient supports a broad range of commercial real estate developments

Office

Shopping

Factory

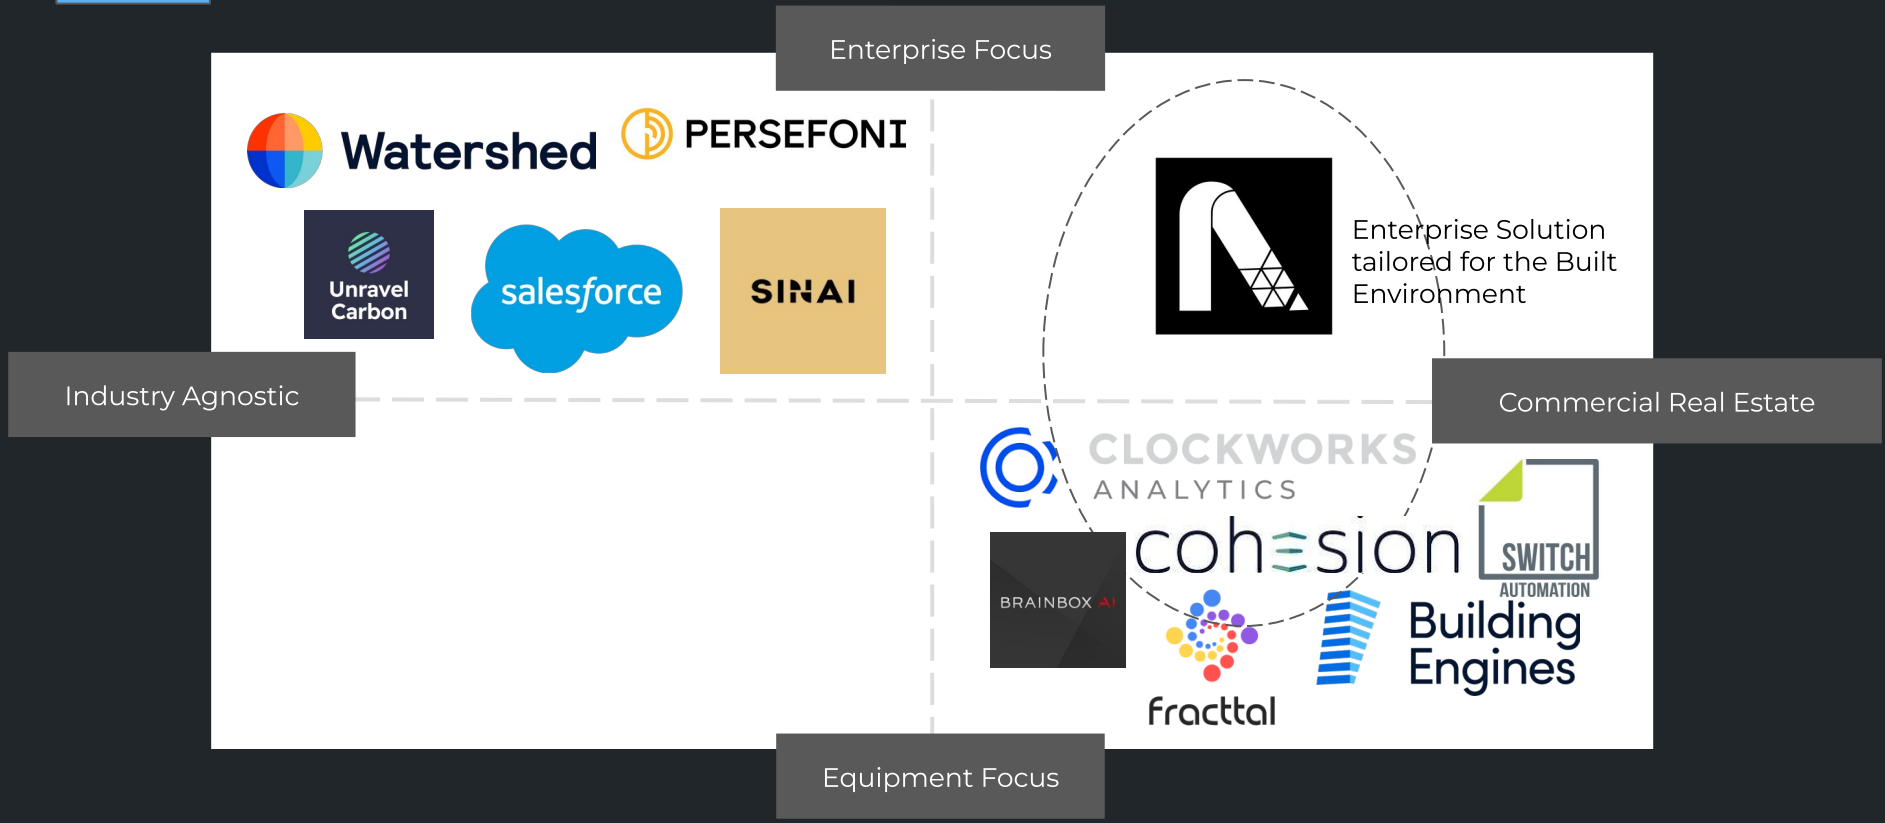

Hotel

03: The Ambient Difference

Competition

Others focus on generic carbon reporting for financial disclosures or building equipment automation

Use Case Deep Dive – Ambient Systems and Team Past Experience

Optimising for maximum Crop output and quality
Indoor Farm
Singapore, 2021

Optimising Energy Costs for Profitability
Gold & Nickel Mines
Africa and Central America, 2014

Distributing Finite Energy Optimally
Sustainable Energy
Nepal, Cambodia, Indonesia, 2017

We applied data management in AgriTech, Mine, and Energy fields.

Traction

- CapitaLand Sustainability X Challenge ‘22 Finalist: Top 30 out of 300 Teams
- Google Competition
- NUS GRIP Graduate
- NUS Enterprise Graduate
- SMU BIG Graduate

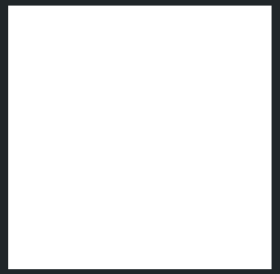

About Us

Ambient Leadership Team

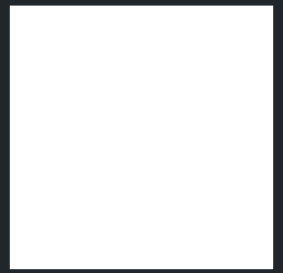

CEO
Serial entrepreneur and inventor with 5 years of experience across sustainable energy and machine learning in Canada and APAC

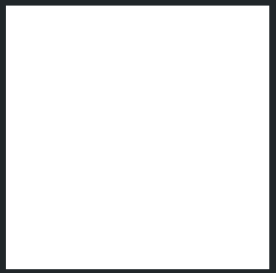

Mentors & Advisors

Dr.
Experienced technology executive, investor, and educator with 35 years of leadership experience at Oracle and Hewlett-Packard

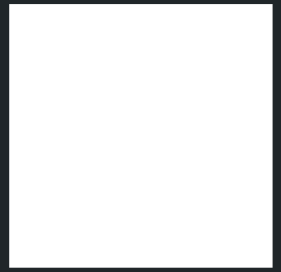

Thought leader and influencer in areas of future of work and human capital with over 50,000 followers across LinkedIn, Spotify, and Youtube

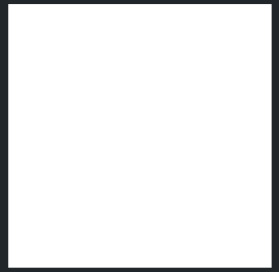

Experienced engineer and entrepreneur currently mentoring innovative IoT and AI spin-offs at the National University of Singapore

About Us

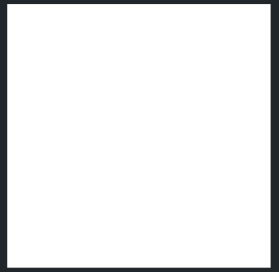

The team behind Ambient

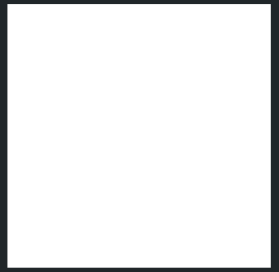

Software Engineering Intern
CS Master student from National University of Singapore School of Computing. Focused on software development.

Data Analyst Intern
Statistics Master student from National University of Singapore. Experience in applied data mining, machine learning, and deep learning.

Analyst Intern
Undergraduate majoring in Data Science and Analytics from National University of Singapore. Experience in data cleaning, visualization and machine learning.

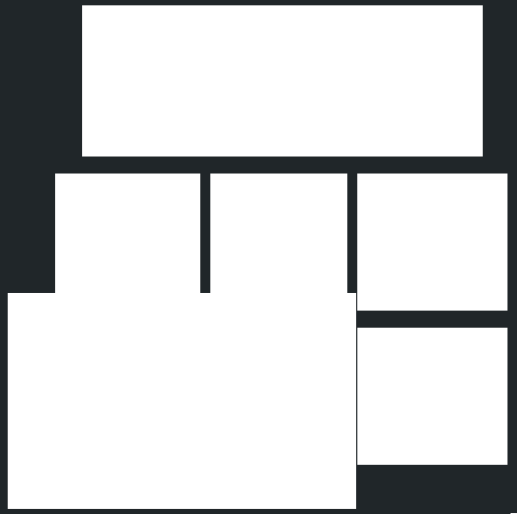

Undergraduate major in Business Administration from National University of Singapore specializing in marketing and finance. Focused on marketing campaigns.
