Reimagining the future of smart cities

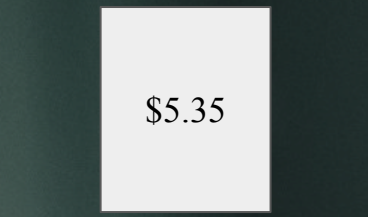

Data Analytics products & services do not adequately address business risks arising from decarbonization trends

01: Challenges Faced by Facility Managers

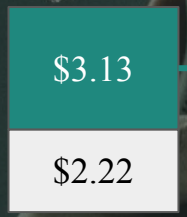

Introducing the Green Premiums

A powerful tool for understanding clean energy and climate change.

By [redacted] September 29, 2020 5 minute read

Low CO2 Product
(e.g., [redacted], Low CO2 Cement, Steel, etc)

Standard Product
(e.g., Market Jet Fuel, Cement, Steel, etc.)

Green Premium

1. Difference between current and low carbon solution
2. Adjusted by making low emission product cheaper or **Standard product more expensive** (or a combination of the two)
3. Guide to action

Source: https://www.gatesnotes.com/Energy/Introducing-the-Green-Premiums

Existing Limitations

Current approaches to managing climate *transition risk* is inefficient, expensive, and outdated

Excessive time spent on collecting and combining data

Expensive Sustainability and Data Science Teams

Shortage of Analytics talent with domain expertise

Savings Potential Through Increased Human Productivity

Utilities
$3

Rent
$30

Human Capital
$300

Rent &
Labour
account for
75%
of retail Opex
(DBS Bank, 2019)

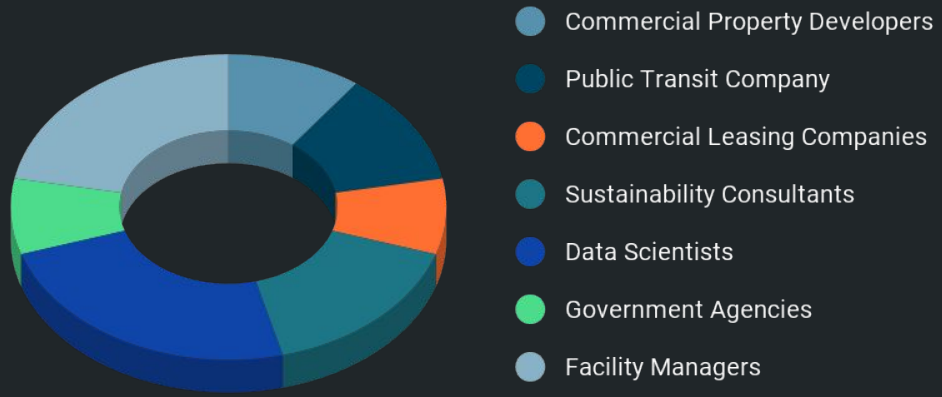

Market Validation

We discovered that many companies in Singapore and abroad are facing this challenge

50+ interviewed
570+ contacted

Insight #1: Solutions are too early or too generic for customer's business needs

Insight #2: Real estate companies are pressured to lead the industry and support the government on tight margins

"We spoke with suppliers offering carbon reporting services and products, but they do not see the industry (built sector) from our perspective." - Top 5 Property Developer in Singapore

Problem

Property developers face difficulty balancing climate risks with revenue and profitability

01 Mitigating Climate Transition Risk

02 Maximizing Revenue & Profitability

Data Science can Help.

02: Ambient’s Solution

Benefits:

Transition to a net zero business model while making shareholders happy

Outcomes

Solving the three underlying limitations

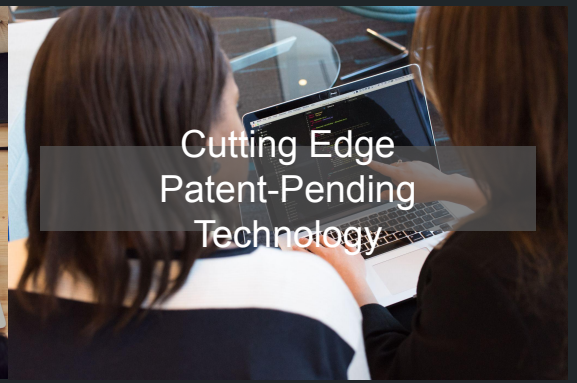

Excessive time spent on collecting and combining data

Expensive Sustainability and Data Science Teams

Shortage of Analytics talent with domain expertise

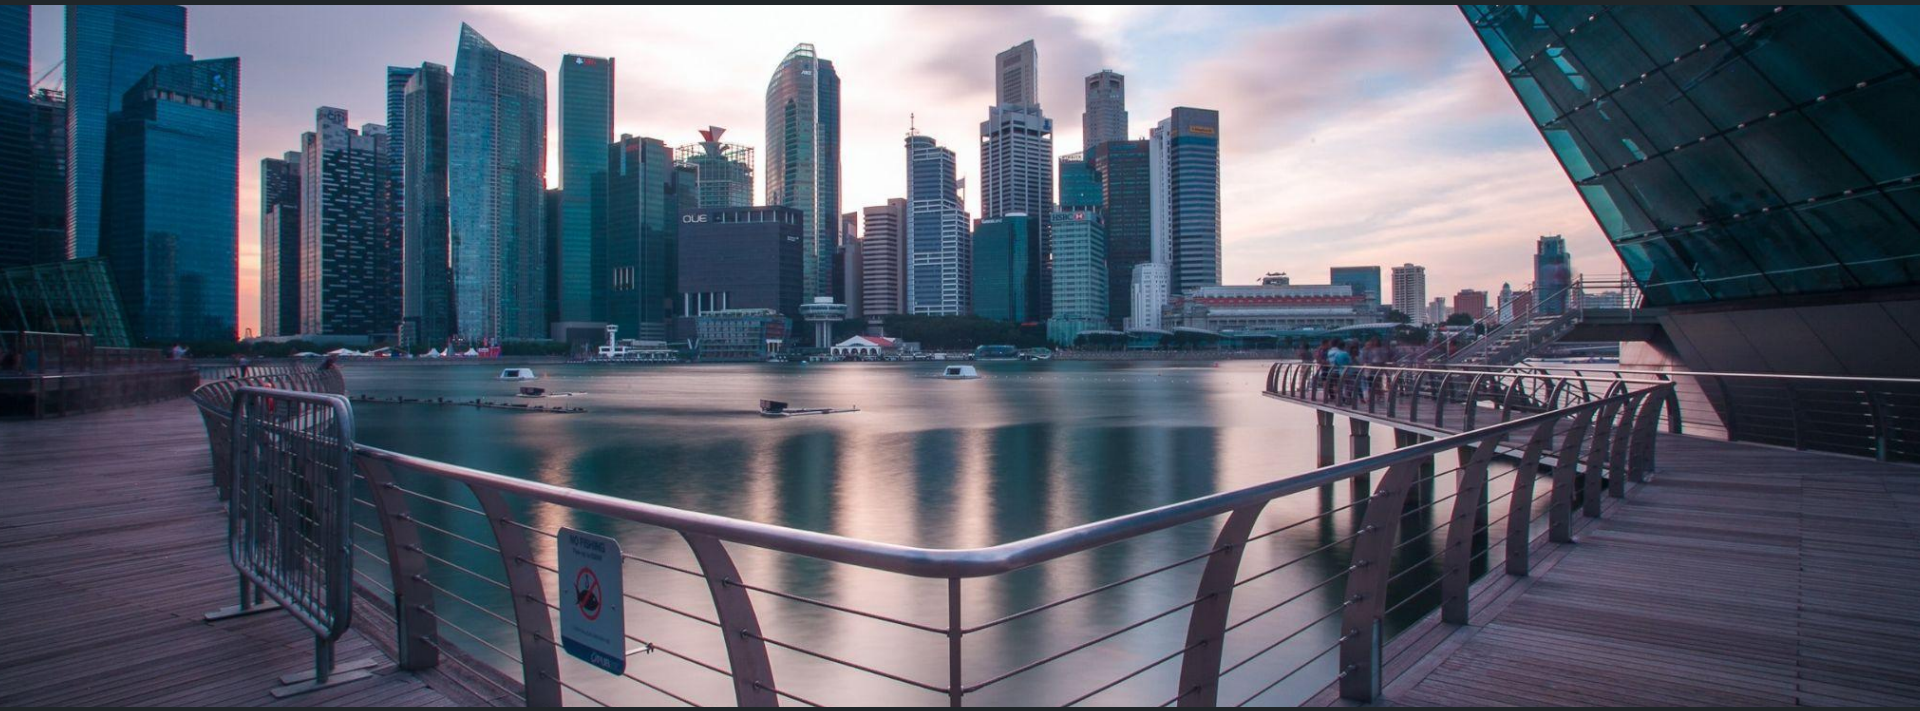

Reduced hours 100 to 5 per month

Reduced cost $10k to $2k per month

[redacted] in days

[redacted]

How it works:

Transition to a net zero business model while making shareholders happy

Solution

Innovative data management platform enabled by powerful new SaaS technology

Accessible. Accurate. Accelerated.

Business Users

Periodic Data

Live Stream Data

External Data

Carbon Disclosure Reporting

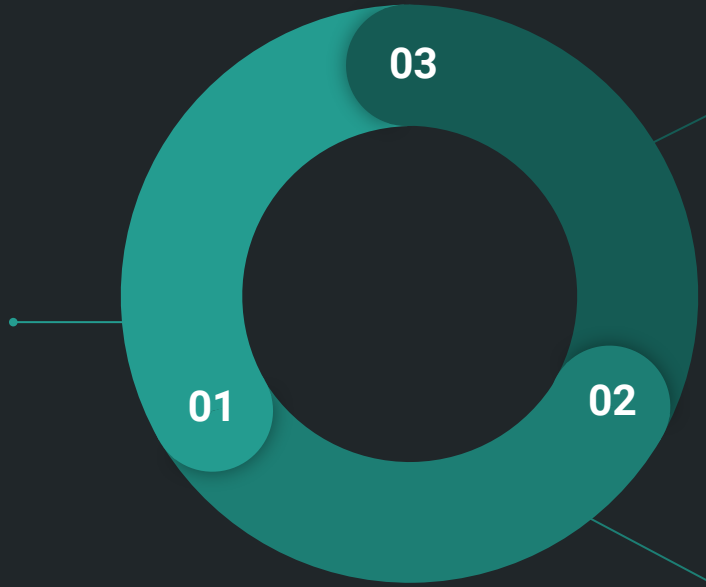

Data Output Formatted for Sustainability Teams*
(not provided by Ambient)

Dozens of Cutting Edge Use Cases based on Data Science

Construction Teams
FM Teams
Investment Teams
Leasing Teams

***Regulatory and compliance reporting is not provided by Ambient**

Our Product Adoption Process

Goal Setting

User start with onboarding by selecting their business priorities & model requirements.

Machine Learning Recommendations

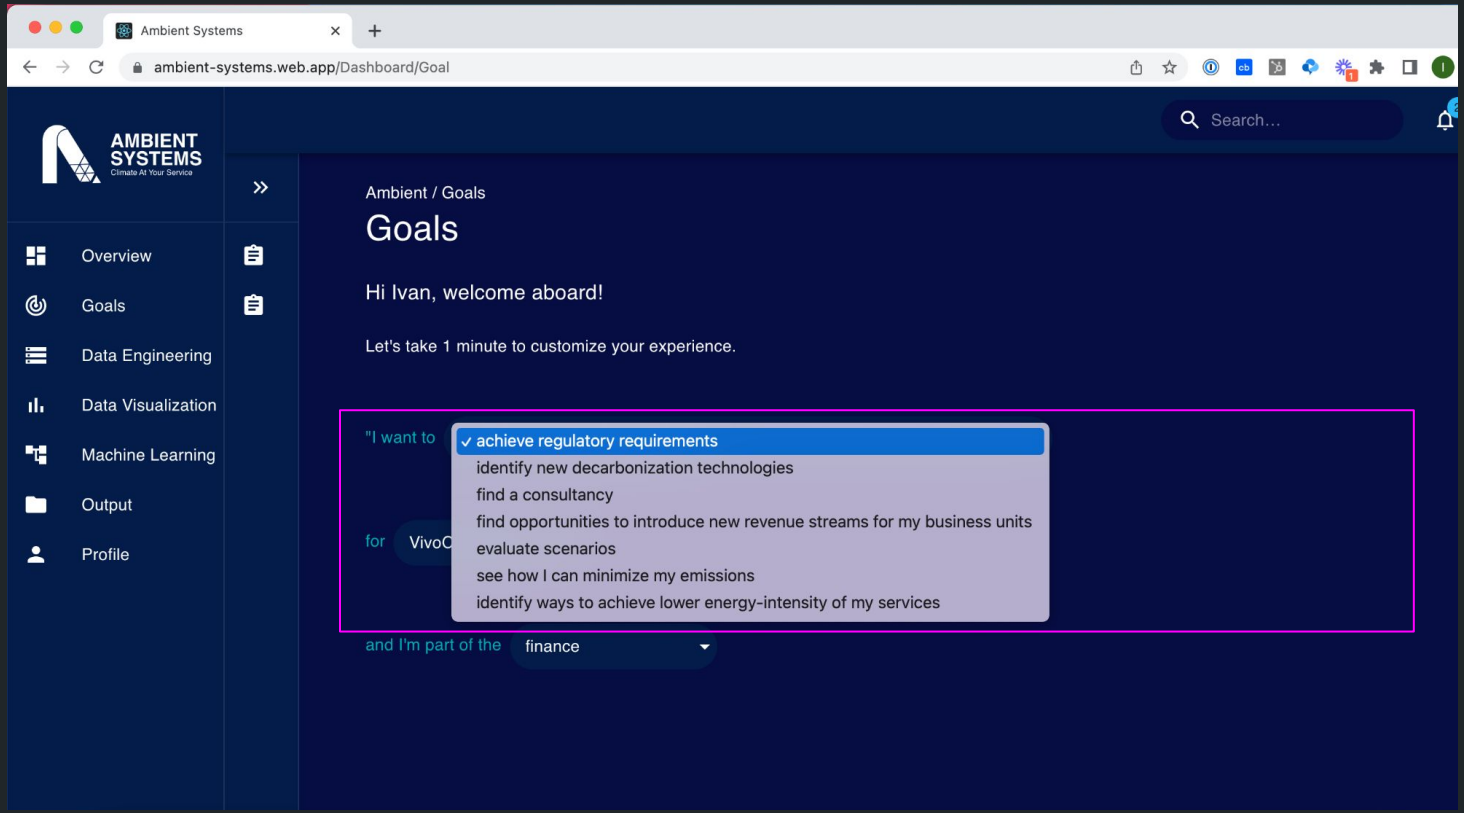

Users will get customized recommendations on how to improve their carbon score at each facility

Data Engineering

Users see which data feeds are connected to the platform or request new ones to be added

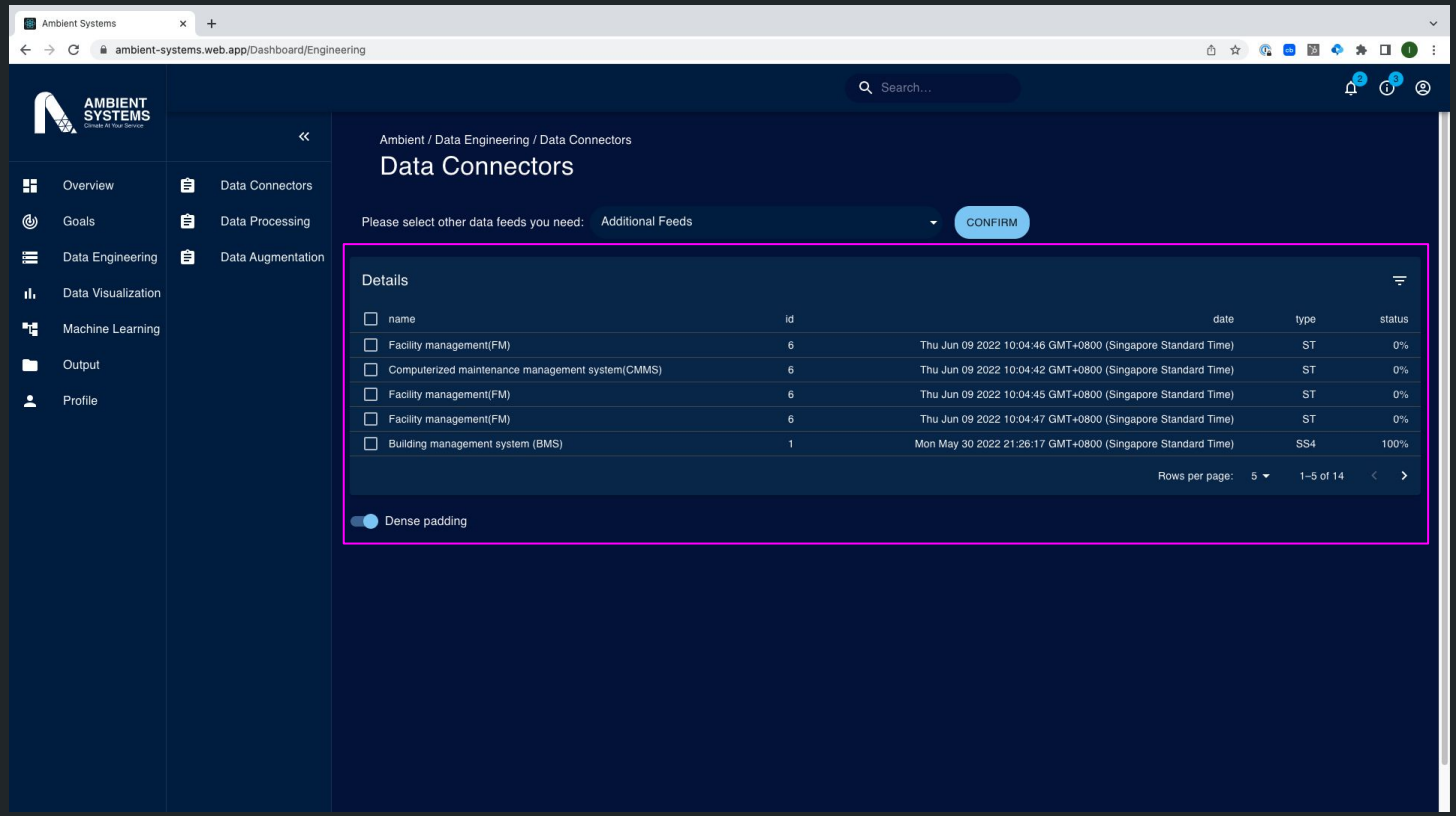

Product – Part 1/3: Goal Setting

User start with onboarding by selecting their business priorities & model requirements

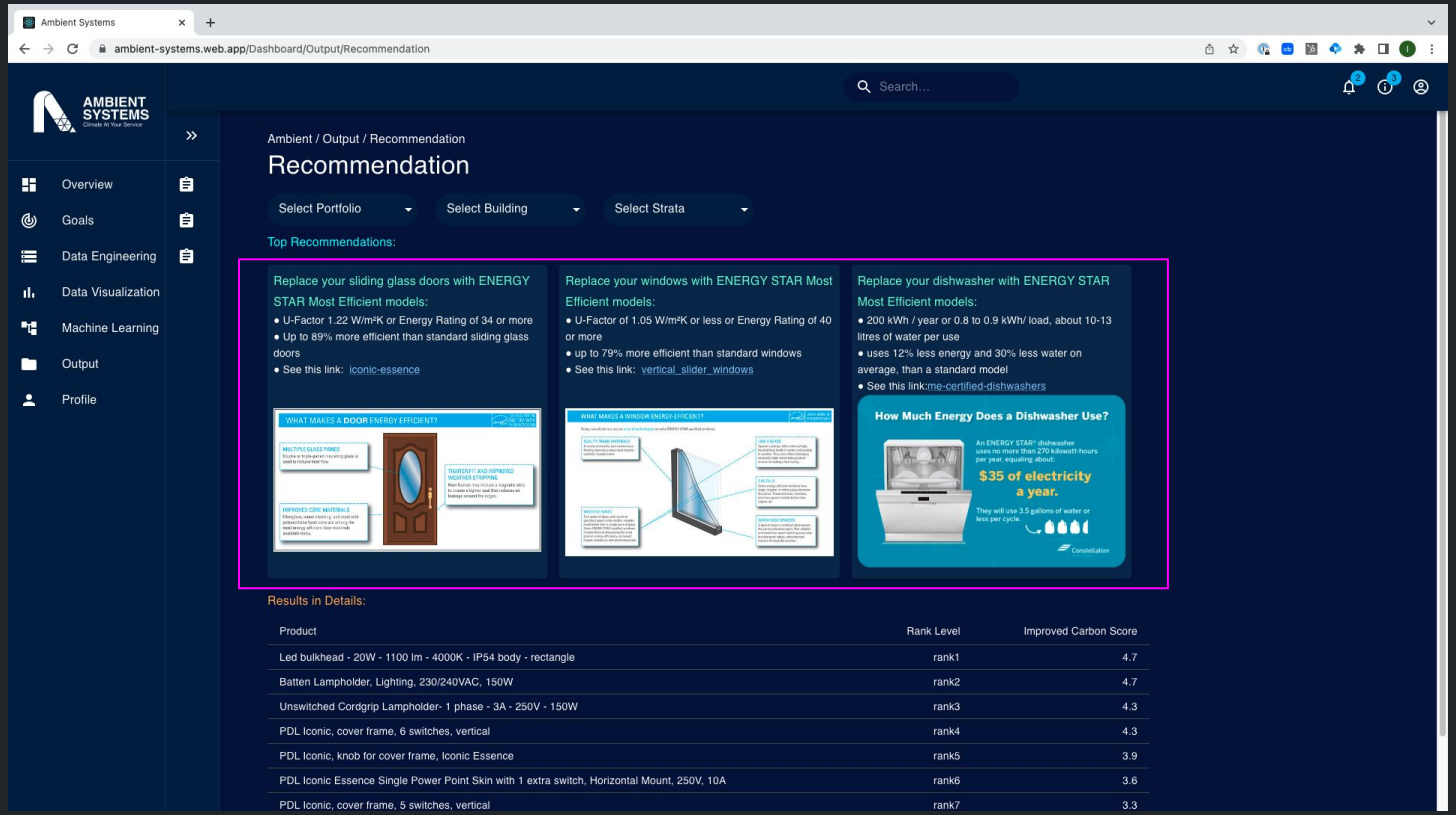

Product – Part 2/3: Data Engineering

Users see which data feeds are connected to the platform or request new ones to be added

Product – Part 3/3: Machine Learning Recommendations

Users will get customized recommendations on how to improve their carbon score at each facility

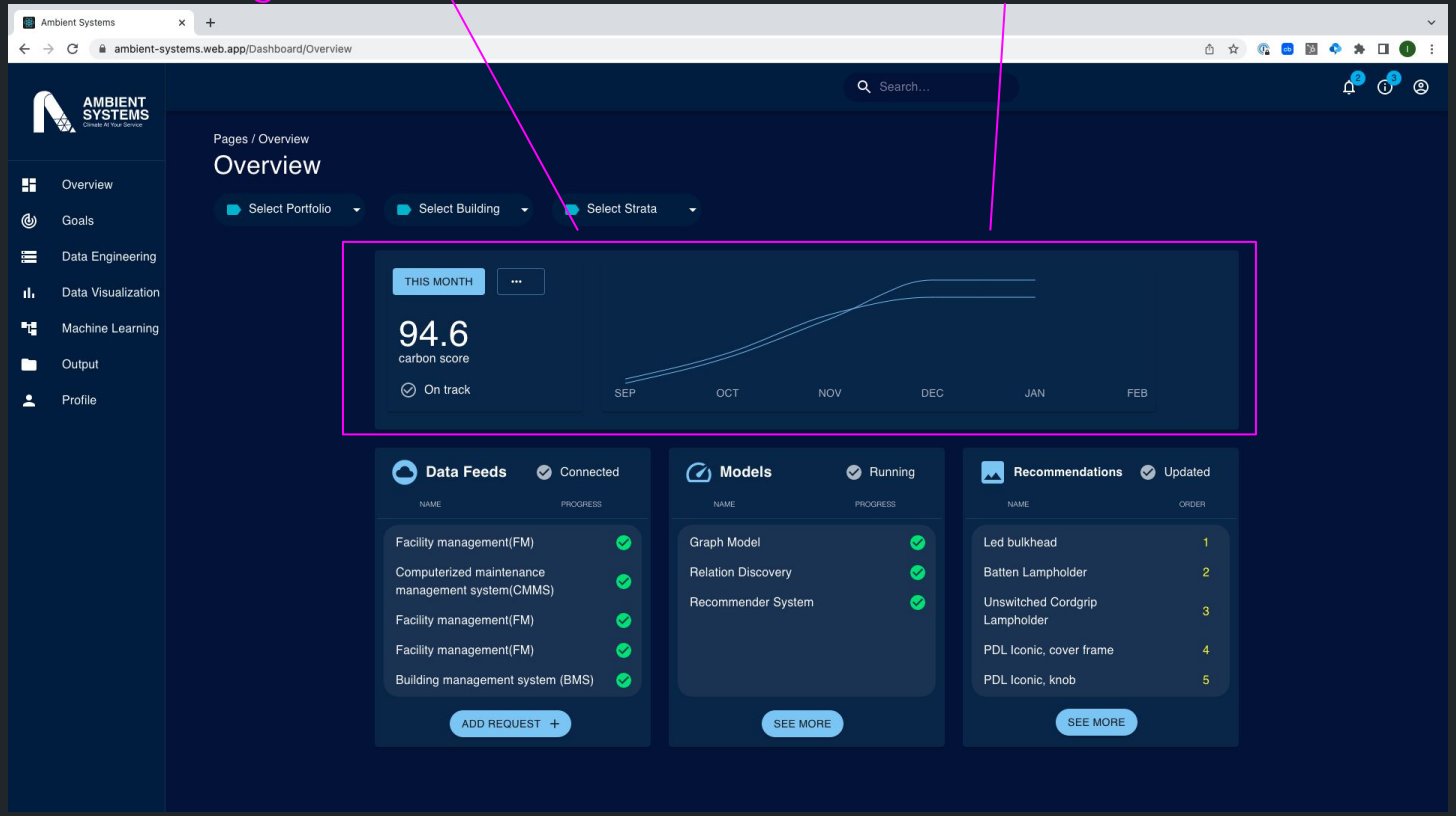

Product	Rank Level	Improved Carbon Score
Led bulkhead - 20W - 1100 lm - 4000K - IP54 body - rectangle	rank1	4.7
Batten Lampholder, Lighting, 230/240VAC, 150W	rank2	4.7
Unswitched Cordgrip Lampholder- 1 phase - 3A - 250V - 150W	rank3	4.3
PDL Iconic, cover frame, 6 switches, vertical	rank4	4.3
PDL Iconic, knob for cover frame, Iconic Essence	rank5	3.9
PDL Iconic Essence Single Power Point Skin with 1 extra switch, Horizontal Mount, 250V, 10A	rank6	3.6
PDL Iconic, cover frame, 5 switches, vertical	rank7	3.3

Overview Page: Easy to See Performance compatible with SGX-approved frameworks

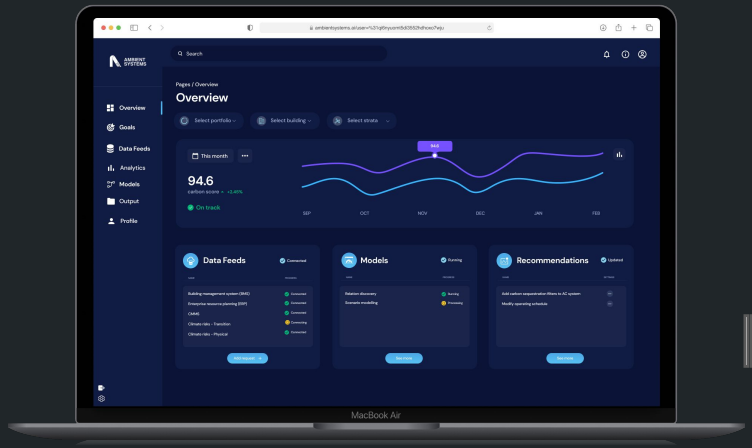

Carbon Score provides a quick snapshot of how well your facility is doing

Based on one of 6 SGX-approved reporting frameworks

Data-driven Reporting

Ambient helps your reporting teams get the right information easily, quickly and accurately

Accessible. Accurate. Accelerated.

Data Collection & Preparation for Sustainability Reporting*

SGX-Recognized Sustainable Finance Reporting Frameworks

ESG Reporting Standards

- Global Reporting Initiative
- SASB (Sustainability Accounting Standards Board)
- Integrated Reporting <IR>

Focused Reporting Standards

- TCFD (Task Force on Climate-related Financial Disclosures)
- CDP (Disclosure Insight Action)
- CDSB (Climate Disclosure Standards Board)

Pricing:

Simple Pricing Options with a Free Open Source Version

Business Model

SaaS Subscription Model based on number of live data streams and machine learning applications

- Process Optimization
- Predictive Maintenance
- Asset Optimization
- AI-based Demand Response
- AI-based Light Control

No consulting fees

No new hardware

No training fees

Pricing Plans

Open Cloud Alternative to Carbon Accounting Software – with added machine learning capabilities

Free | Limit of 2 free data feeds

Perfect for small enterprises with prohibitive budgets for sustainability and data science (up to 5-20 office workers)

$0/month per project

- Up to 500MB database & 1GB file storage
- Up to 50MB file uploads
- Up to 5 free users
- Social OAuth providers
- Up to 500K Edge Function invocations
- 1-day log retention
- Community support
- Complimentary Data Visualization
- Complimentary Notifications

Premium | Minimum 3 data feeds

For medium and large enterprises of with ambitious decarbonization targets (100-500+ office workers)

$1,000/month per live data API

$10,000/month per live AI model

- 8GB database & 100GB file storage
- 5GB file uploads
- Up to 15 users
- Social OAuth providers
- 2M Edge Function invocations
- Daily backups
- Comprehensive Data Visualization
- Comprehensive Notifications
- 7-day log retention
- No project pausing
- Email and chat support

03: The Ambient Difference

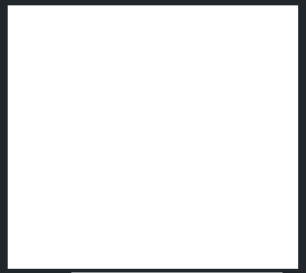

About Us

Ambient Leadership Team

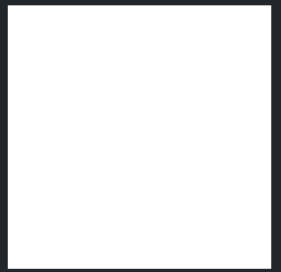

CEO
Serial entrepreneur and inventor with 5 years of experience across sustainable energy and machine learning in Canada and APAC

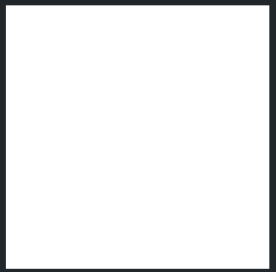

Mentors & Advisors

Dr.
Experienced technology executive, investor, and educator with 35 years of leadership experience at Oracle and Hewlett-Packard

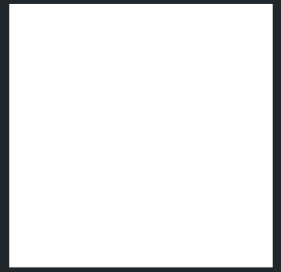

Thought leader and influencer in areas of future of work and human capital with over 50,000 followers across LinkedIn, Spotify, and Youtube

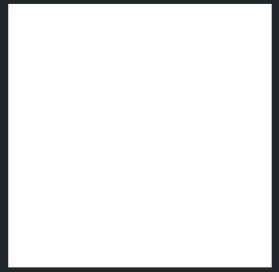

Experienced engineer and entrepreneur currently mentoring innovative IoT and AI spin-offs at the National University of Singapore

About Us

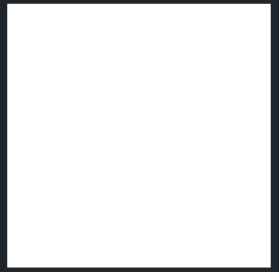

The team behind Ambient

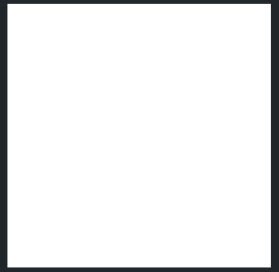

Software Engineering Intern
CS Master student from National University of Singapore School of Computing. Focused on software development.

Data Analyst Intern
Statistics Master student from National University of Singapore. Experience in applied data mining, machine learning, and deep learning.

Analyst Intern
Undergraduate majoring in Data Science and Analytics from National University of Singapore. Experience in data cleaning, visualization and machine learning.

Undergraduate major in Business Administration from National University of Singapore specializing in marketing and finance. Focused on marketing campaigns.
