

The Science-Driven Decision Platform to Drive Financial Success

ivan@ambientsystems.ai

The Multi-Trillion Dollar Misalignment

90% of companies do not reach their planned goals.

94% of investors say sustainability reports contain unsupported claims.

This universal misalignment creates **inefficiencies** and **lost revenue**, leaving a massive **opportunity for improvement**.

Introducing Ambient Systems:

A Science-based Decision Support for Finance using AI

$150k+ Already Invested
across R&D, Product Development, and Market Validation

ılidated by Leading Programs:

Google (**Winner**)
NUS GRIP (**Investor**)
Founder University (Graduate)
Panasonic Deep Tech Innovation Challenge (Winner)
SMU BIG for Startups (Graduate)
OVH Cloud Startup Mentorship Programme (Graduate)

Science-based Decision Support for Finance using AI

USP: Rigorous Scientific Principles

Appendix (Investor Q&A)

1. Business Model: How We Make Money
2. Competition: Leading with Real-Time Insights & Scientific Rigo
3. Go to Market: How We Get Customers
4. Team: Meet the Founder
5. Financial Projections
6.
7. Strategic Global Structure
8. The Ask: Invest in the founder, Ambient Systems, and Serbia

Business Model: How We Make Money

- **Mid-Sized to Enterprise-Level** Companies
- Operating in **Vertical Farming & Transportation**
- Responsible for **Finance (Planning/Budgeting)**
- **Mid-Level to Senior Management** Focused
- Strong Emphasis on **Sustainability** and **Data-Driven Decision-Making**

SaaS Subscription Model

- **Monthly & Annual Plans**: Essential, Premium, Enterprise.
- **Tiered Cloud Pricing**: Based on company size, data usage, and feature requirements.

Additional Offerings:

- **Custom AI Models**
- **Optional Hardware Sensors** for deeper data collection

Example Pricing

- **Essential** ($1,500/month): Real-time financial dashboards + basic AI insights
  - *Add Annual Sustainability Report: +$5,000*
- **Premium** ($5,000/month): Advanced analytics + AI-driven scenario planning
  - *Add Custom Model Development: +$20,000*
- **Enterprise** ($15,000+/month): Full-stack AI integration + priority support

Competition: Leading with Real-Time Insights & Scientific Rigor 🏆

Go to Market: How We Get Customers 🚀

Phase	Date Range	Key Focus
Phase 1	Now–Q2 2025	Direct sales to vertical farms & transport firms.
Phase 2	Q3 2025–2026	Strategic partnerships for expansion.
Phase 3	2026+	Scaling via referral programs and case studies.

Key Metrics: test trials, customers, revenue growth, retention rate.

Current Team and Future Hires

Ivan Damnjanovic - Founder

- *9+ years in AI, financial modeling, and risk management*
- Experience scaling **YC-backed startups**
- Currently leading all development and strategic efforts

Potential Hires *(Subject to Available Resources)*

- **Full-Stack Developer** (Potential CTO)
  - Responsible for platform architecture, AI feature builds, and product scaling
- **Graphic Designer**
  - Focus on brand identity, user interface aesthetics, and presentation materials

Advisors & Board *(Planned)*

- **AI, Finance, Sustainability** Experts
  - Offering strategic guidance for **global expansion** and industry partnerships

Hiring Roadmap

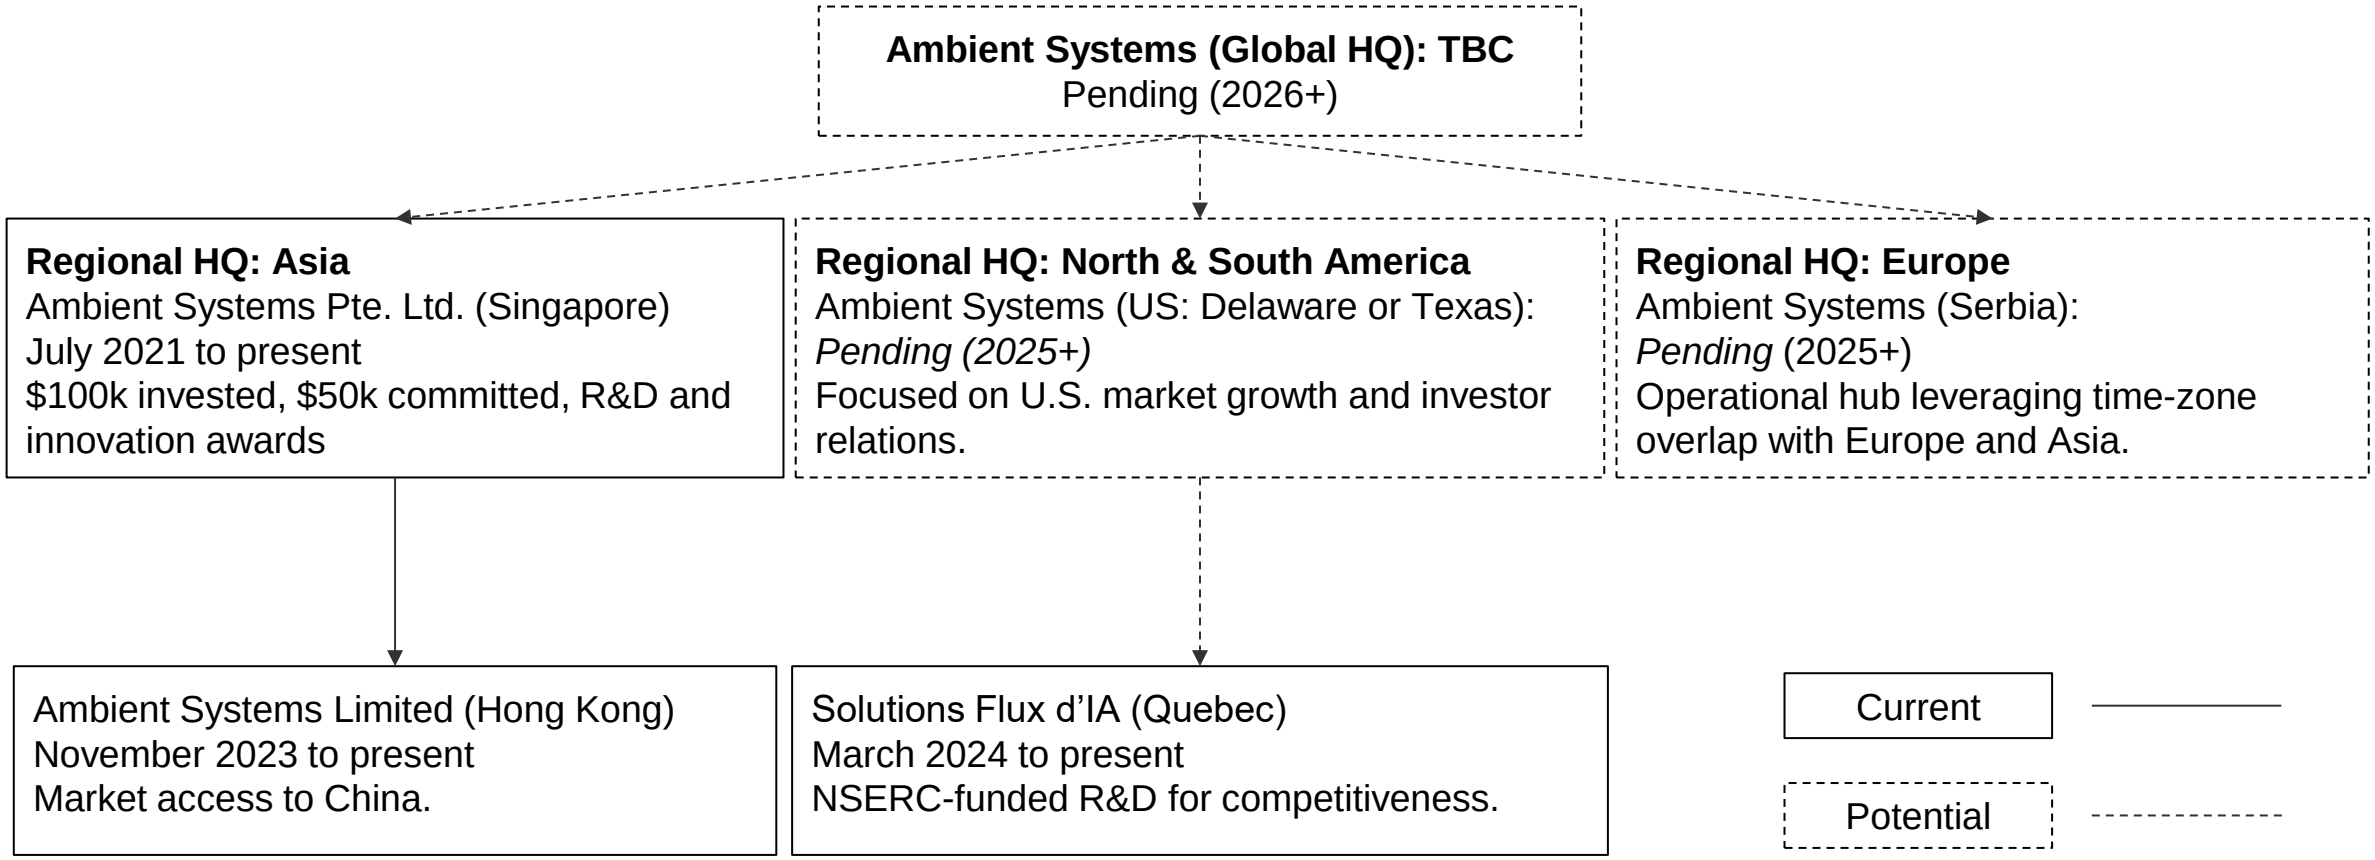

- **Q2 2025:** Hire first technical developer once initial funding is secured
- **Q4 2025:** Onboard a designer and begin forming an advisory board
- **2026+:** Additional roles in data science, business development, and operations as the company scales

Financial Projections: A 3-Year Growth Outlook

Year	Revenue (USD)	
	$500K – $1M (est.)	Direct sales to vertical farms & transport firms.
2026	$5M – $8M (est.)	Strategic partnerships for expansion.
2027	2026+	Scaling via referral programs and case studies.

	Summary	Key Deliverable
Q2 2025	Core AI Model v2	Enhanced vertical farming & transport analytics, scenario testing
Q4 2025	ESG Add-On	Launch sustainability compliance & reporting modules
2026	Renewables/Real	Expand AI models to new verticals for broader industry coverage
Mid–Late 2026	Enterprise Tier	Advanced financial dashboards, priority support, AI-driven risk forecasting
2027+	Global Integration	Multi-region rollouts, deeper data partnerships (sensors, real-time APIs)

Strategic Global Structure 🌍

This structure enables scaling to new markets and redundancy while leveraging regional strengths.

The Ask: Invest in the founder, Ambient Systems, and Serbia

The Ask: 💰

1. $25k: **operate remotely from Serbia** with a 16–24 month runway. 🌍
2. $125K: **consolidate global entities** and establish product development in the U.S..

The only platform combining AI, science-driven financial management, and tailored industry-specific insights.

Why invest in Ambient Systems?

1. **Experience:** Experienced leader with experience at a YC-backed startup and expertise in scaling in Asian markets.
2. **Patented AI Technology:** Scalable platform aligning with U.S. market needs and driving sustainability insights.
3. **Strategic Market Presence:** Hubs in Asia (Singapore, HK) for rapid scaling and global expansion.

Why invest in operations from Serbia?

1. **Lower Operating Costs:** $1M in Serbia = $3M in Silicon Valley, maximizing ROI and extending runway.
2. **s:** Access ecosystem of top-tier founders from the region. (e.g., Nordeus, Startit).
3. **Strategic Location:** Serbia's proximity to European and Asian markets accelerates testing, validation, and expansion.

Let's discuss how Ambient Systems can work with you to drive exceptional returns.

Thanks for joining.
