GRIP INVESTMENT READINESS SCREENING METRIC (Form P2)

Project Name _____ **Date of Evaluation** _____

1.

Proposed Team		Problem Identification		Value Proposition		Product		Market		Business Model		Scale	
STRONG Team - Preferably 2 persons with differentiation skill sets		Team has identified a specific, important and large problem		Team has identified their hypothesis of their target customer. The specific type of person whose problem they are solving		Team has the ability to develop low fidelity prototype.		Team can clearly articilate - Total Addressable Market (TAM) - % they will capture of the TAM - Initial Target Market		Team has identified an outline of Revenue Model		Team has identified multiple possible markets or customer segments and has aspiration to scale	

2. Investment Readiness Criteria

Proprosed Team		Problem Identification		Value Proposition		Product		Market		Business Model		Scale	
Team has a senior members with live experience of the problem or Team demonstrate deep understanding of their target customer's problem		Team can solve the problem identified		Team has potential customers who provide evidence that the solution solves key pain points. Product is a painkiller not just a vitamin		Team has a basis low fidelity protoype that solved the problem.		Team understands any regulatory hurdles to enter the market		Company can point to pricing and business model of similar product in the industry as further evidence that their revenue assumptions hold		Initial Evidence that multiple markets experience problem identified	
Team has technical ability to build fully functional product		Team can articulate its vision at scale, i.e., what does the world look like if they succeed		Evidence that customer will pay the target price (**The 1 mil $ revenue customer**)		Team has build a working prototype and a product road map.		Team has a clear strategy to overcome regulatory hurdles to market entry		Team can articulate projected costs along the value chain and target cost points to reach positive unit economic		Clear strategy to move to multiple markets	
Team has a clear understanding of the value chain and cost structure in their industry		Team can articulate why they are the best ones to solve this problem		Evidence of conversations with multiple stakeholders.		Team has a clear understanding of product development cost and clear understanding of how to build the product cost effectively		Initial evidence that team can capture initial target market through sales		Team has financial model with cost and revenue projections articulated		Initial Evidence that multiple types of customers find value in the solution or	
Team has clear understanding of how their target market operates & has strong industry contacts in their target market		Team can articulate system level change their solution would transform the industry		Evidence of differentiation through initial target customer feedback that the solutions solves their problem significantly better than other in the market		Team has freedom to operate not blocked by other patents.		Evidence of $ 1B+ Total Addressable Market		Team has a strategy for hitting the cost and revenue projections.		Initial Evidence that multiple types of customers find value in an extension of the product that the company is well position to develop	
Proposed Team Total	**0**	**Problem Total**	**0**	**Value Proposition Total**	**0**	**Product Total**	**0**	**Market Total**	**0**	**Business Model Total**	**0**	**Scale Total**	**0**

5. VM Comments:

Commercial Champion
(CC) Name _____ **CC Signature** _____

Venture Development Manager
(VM) Name _____ **VM Signature** _____

The **GRIP Investment Readiness Screening Metric** is to be used as an assistive tool to assess and communicate the readiness of a GRIP project for
(a) Pitching to NUS Investment Panel and
(b) Recommendation for Investment.

To qualify to pitch to the NUS Investment Panel, a GRIP team is required to meet all criteria under Section (1) .

Section (2) Investment Readiness Criteria consists of desired early stage new venture attributes. Each attribute is assigned with 1 point. A total score of 18 or more suggests an adequate investment readiness of a project.

Each CC will make his/her recommendation for investment to the Investment Panel through this investment readiness **P2 form** and a 1-2 page summary of their opinions in **GRIP End of Venture Hothouse Report (P3 form)**.
