Types of Deliverables

DELIVERABLE	DESCRIPTION	USE CASE
Market Reports	Deep dives into key technologies, markets, trends, and themes providing market size, value chain analyses, tech roadmaps, industry impacts, and/or case studies about relevant opportunities	Understand the market/technology landscape, support business plans or other assessments
Company Evaluations	Proprietary assessments of start-up, mid-sized, and large companies driving innovation; analysis grounded in primary and/or secondary research by subject matter experts	Identify potential partners, investments, or acquisitions; learn about key players in a space; spot competitive threats
Tech Pages	Curated data about the most important technologies, paired with analyst insight about what matters and why, updated as the data changes	Quickly get up to speed on a technology area; monitor a technology for latest developments
Analyst Insights	Concise analysis of a specific topic or new development in the field	Spot new ideas and opportunities, get a quick initial assessment of a tech or market trend
News Commentary	Brief analyst evaluation of recent news headlines assessing the impact and significance	Keep up on latest news developments; understand what's important and what's not

Inquiry

Take research findings to the next level through discussion with Lux analysts; apply their expertise to your organization's key initiatives.

QUICKLY GET UP TO SPEED

- Learn about technologies and associated landscapes / value chains, including:
  - end applications
  - routes to market
  - adoption curves
  - evaluation of best fit for your company
- Compare technologies and/or companies

STAY AHEAD

- Contextualize published research
- Collaborate with Lux Experts:
  - brainstorm strategy
  - stimulate new ideas
  - challenge internal ideas
  - document & project reviews
- Introductions to potential partners or collaborators

ANTICIPATE CHANGES

- Spot trends and disruptions to your industry or product
- Gauge impacts of trends/disruptions
- Create buy-in for or increase urgency of your project by requesting data points

MONITOR BLIND SPOTS

- Discover additional questions you should be asking
- Collect new question sets
- Identify unmet needs for your product
- Understand use cases in adjacent industries

NOTE: Based on existing knowledge covered by your membership; 1-2 hours total time spent by the analyst; typically 1 week turnaround time

Other ways to engage with Lux

MONTHLY CLIENT-ONLY WEBINARS

Each month, a Lux analyst presents a webinar on the most important trends and latest research in their area of expertise.

Webinars are available to all members and their colleagues. Past webinar recordings are accessible via the Lux Member Site.

CLIENT REQUESTED BRIEFINGS (CRB)

Members may submit a request to write or update a profile about a start-up company.

Assuming the start-up meets our criteria, we will do our best to complete the request.

LUX EXECUTIVE SUMMITS (LES)

LES is an invitation-only forum for executives and industry thought leaders tackling critical innovation challenges.

Lux analysts present on strategic, technology, and business model trends that drive growth. LES is also a great networking opportunity.

INDUSTRY EVENTS

Analysts regularly attend important industry events in their field to present, network, and monitor trends.

Connect with analysts at these events, and read about key takeaways on the Lux Member Site.

Lux Research

In Summary

What we are

- A team of engineers and scientists tracking emerging technologies and providing industry insights through primary research.
- Deep dives into key tech, markets, trends providing market size, value chain, tech roadmaps, industry impacts and case studies
- Proprietary assessments of startups, mid-sized and large companies driving innovation.
- Curate data about the most important tech about what matters and why, updated as data changes
- Analyst evaluation of recent news headlines assessing the impact and significance.
- An extension of your team; building up our research based on your objectives and goals.

What we are not

- A newsfeed or journalist articles published in the popular press.
- Information on general industry or commodity trends.
- A patent database (although patent information is included in company profiles).
- Information on mature technologies, or innovations that have already been widely commercialized.
