Ambient Systems provides comprehensive climate management solutions for indoor environments.
Ambient's vision is to create safe, healthy, and productive indoor environment for everyone by leveraging internet-of-things (IoT) and machine learning technologies.

Problem Statement & Solutions

Top **five pain points** of property owners and building operators across building types:

1. Hard to find trained personnel to continuously manage building's indoor environment
2. No or minimal visibility into real-time environmental parameters
3. Outdated and incompatible legacy systems
4. Competing priorities (e.g., improve environmental parameters or reduce energy costs)
5. Evolving legal compliance and certification requirements

Solution

Competitive Advantage

- Integrated hardware-software design
- Streamlined service delivery
- Innovative business model

Intellectual Property

- Confidential

Partners

- Confidential

Timeline and Milestones

Market Potential

Revenue Model

- Subscription Fee (Climate-as-a-Service powered by ML)
- Implementation Fee (Installation & Integration)
- System Maintenance Fee (Hardware Upgrades)

Funding & Financing

- Confidential
