

Ambient Systems

Climate Management for Cities of Tomorrow

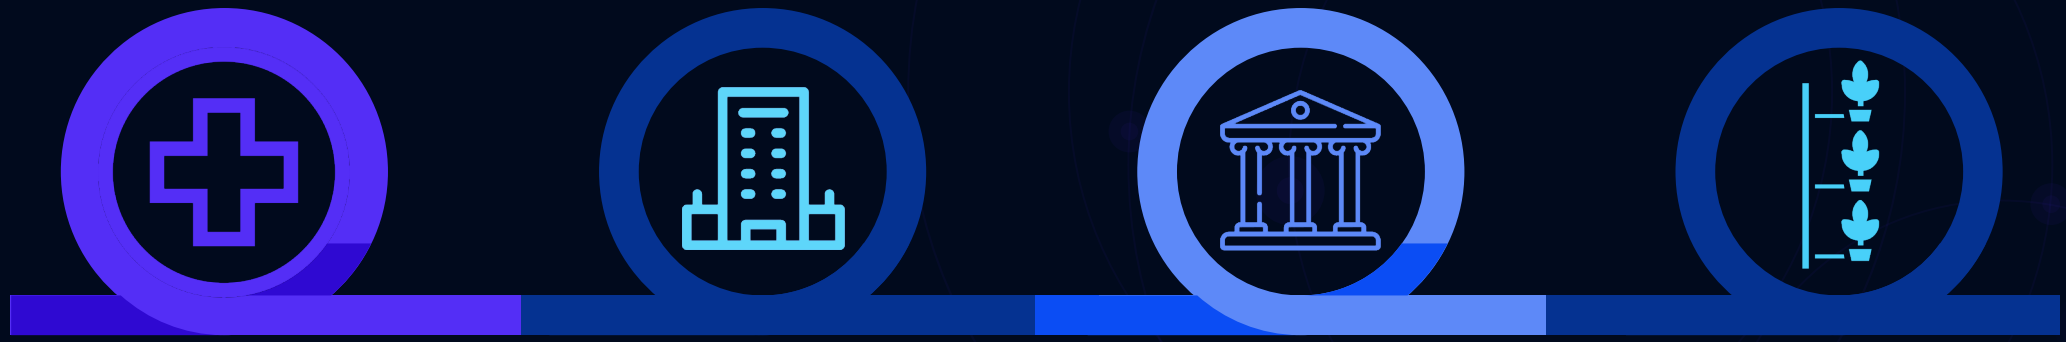

Modern Buildings
Face Many Challenges

1. Climate Change
2. Urban Pollution
3. Indoor Contaminants
4. Rising Energy Costs
5. Increasing Technological Complexity

Competing Priorities

Each building has unique operational needs, yet property owners and facility managers are short on in-house skilled talent that can manage and optimize their existing building systems in real-time.

Healthcare

Improve patient outcomes and minimize airborne infections

Offices

Increase worker comfort and productivity

Historical Buildings & Museums

Preserve interiors of historical buildings and protect invaluable artifacts

Indoor Farms

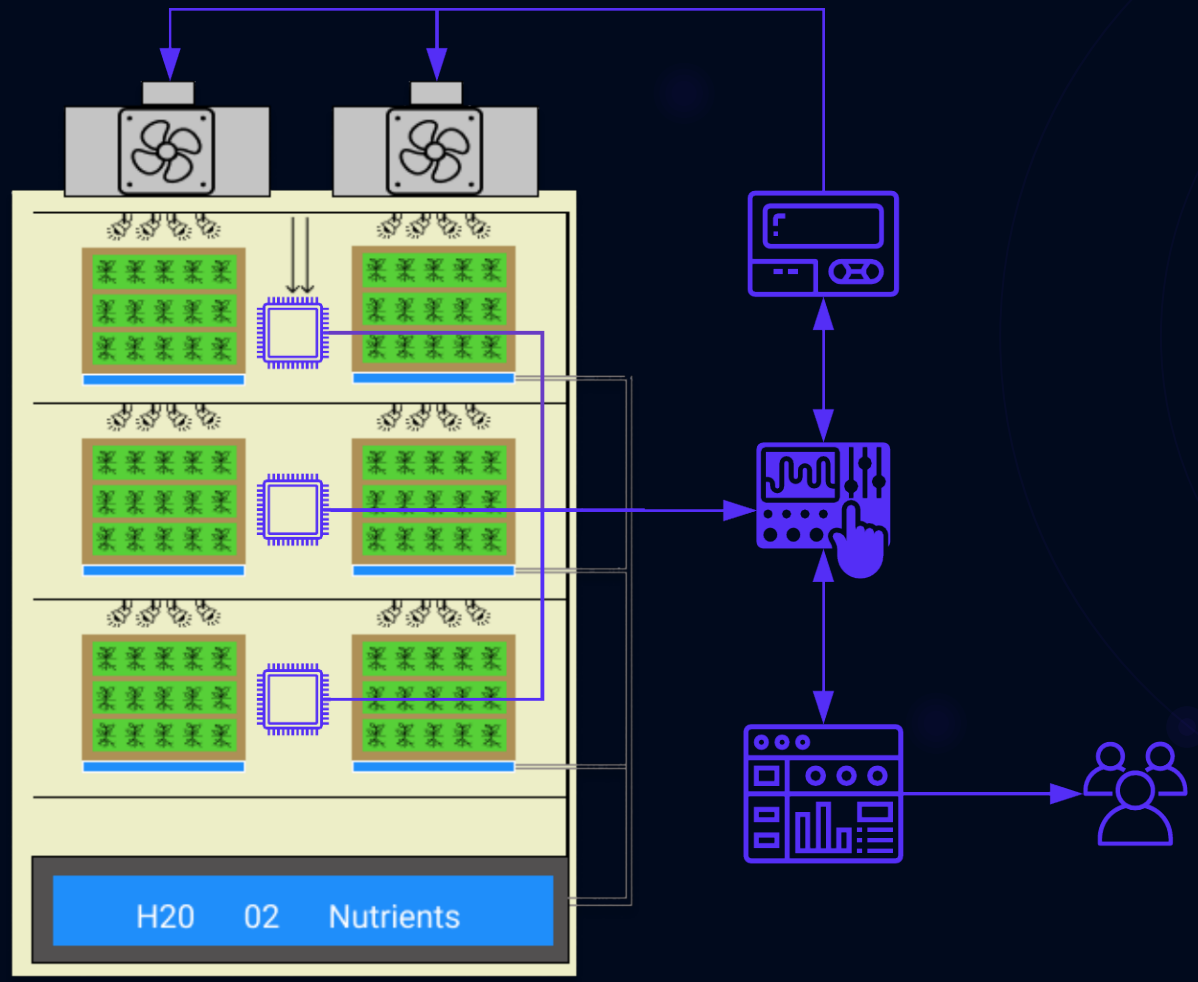

Increase crop yield and streamline operations

Why start with Indoor Farms?

1. Vertical Farming is a new and rapidly growing industry.

2. The potential market that can be addressed is greater than $1B.

3. Market is underserved and we have received indication of interest for this type of solution.

Solution

4-Part Tech Stack

Add Ambient Sensors, [redacted], and Controller to the exiting equipment in order to provide an additional layer of intelligence for building optimization.

PRODUCT ROADMAP

Market: Segmentation

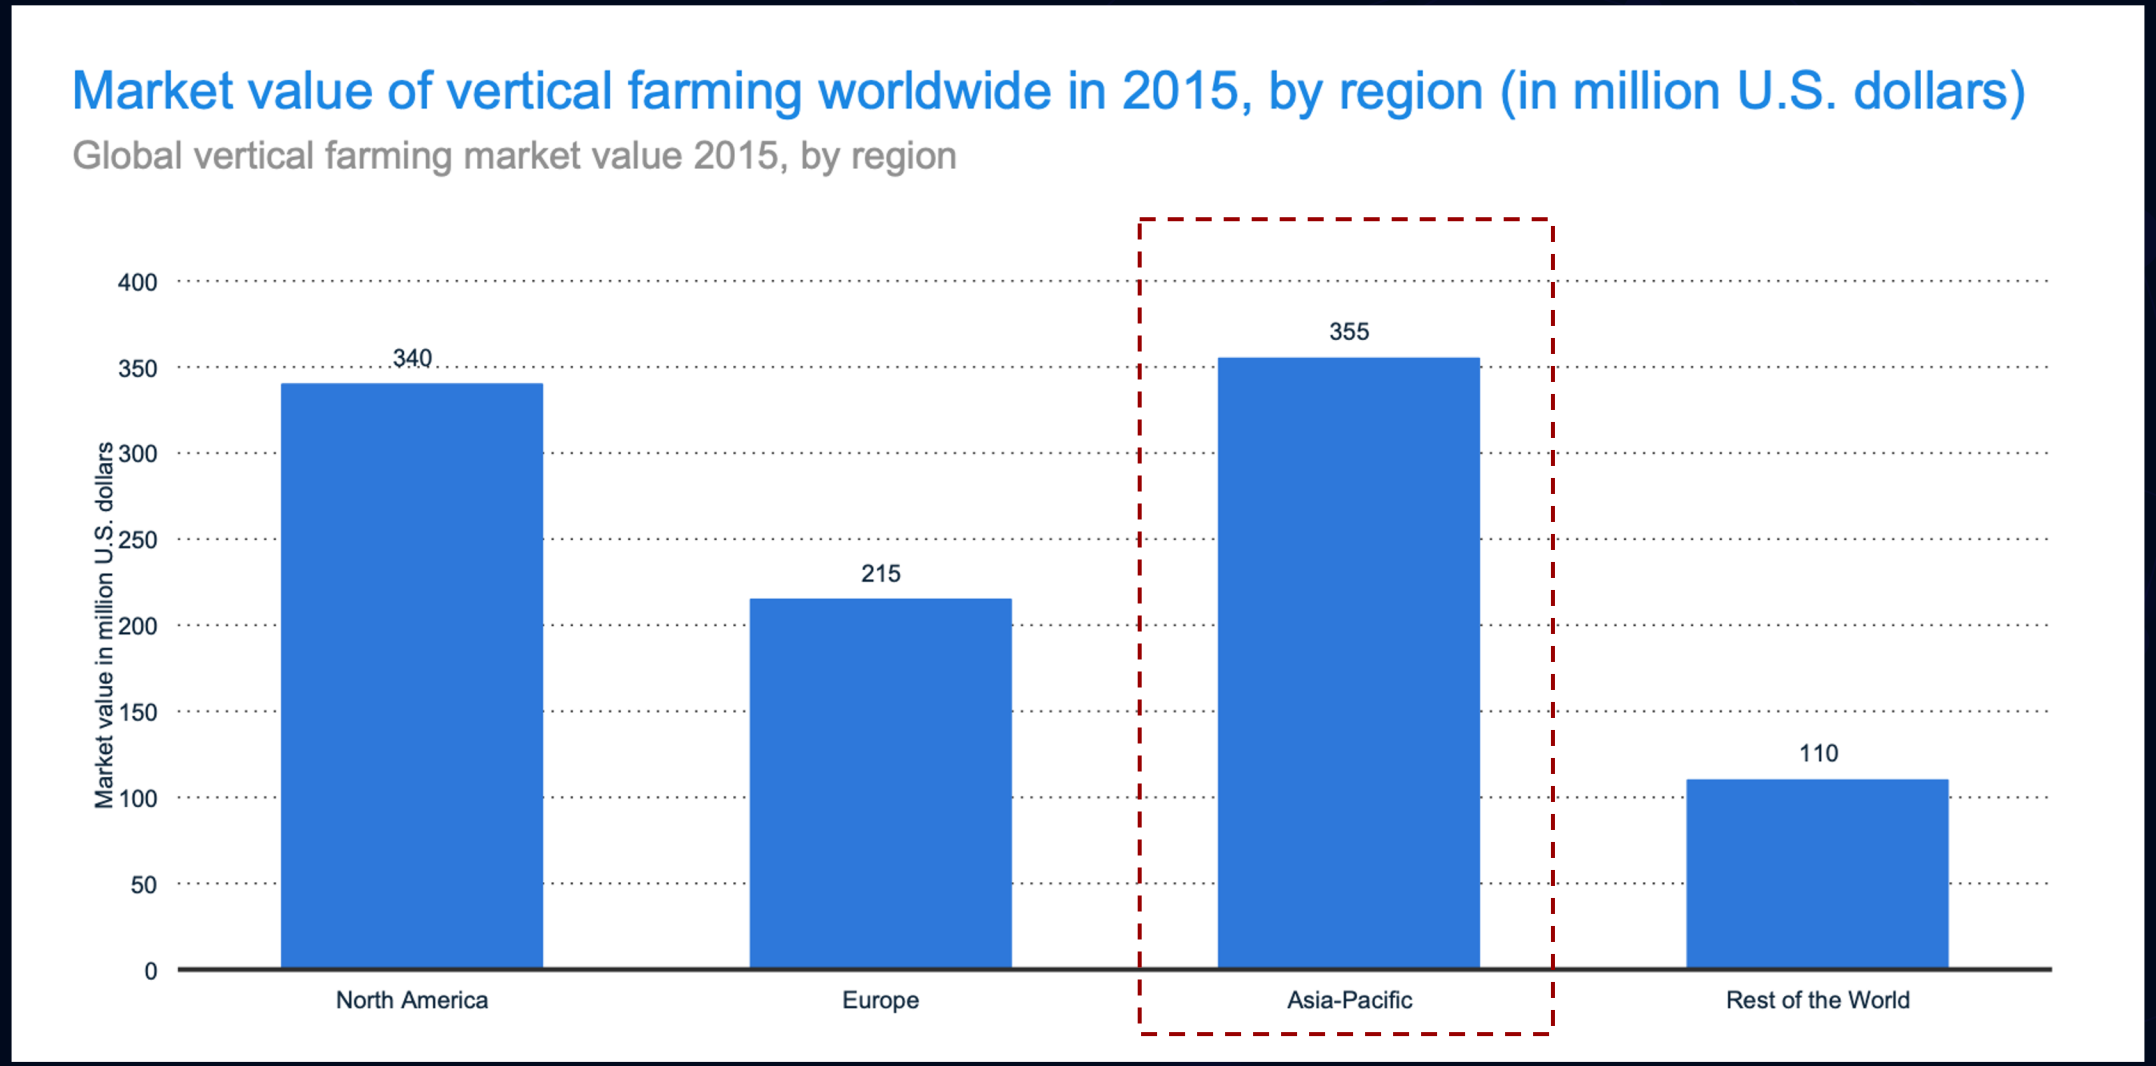

Market: Growth

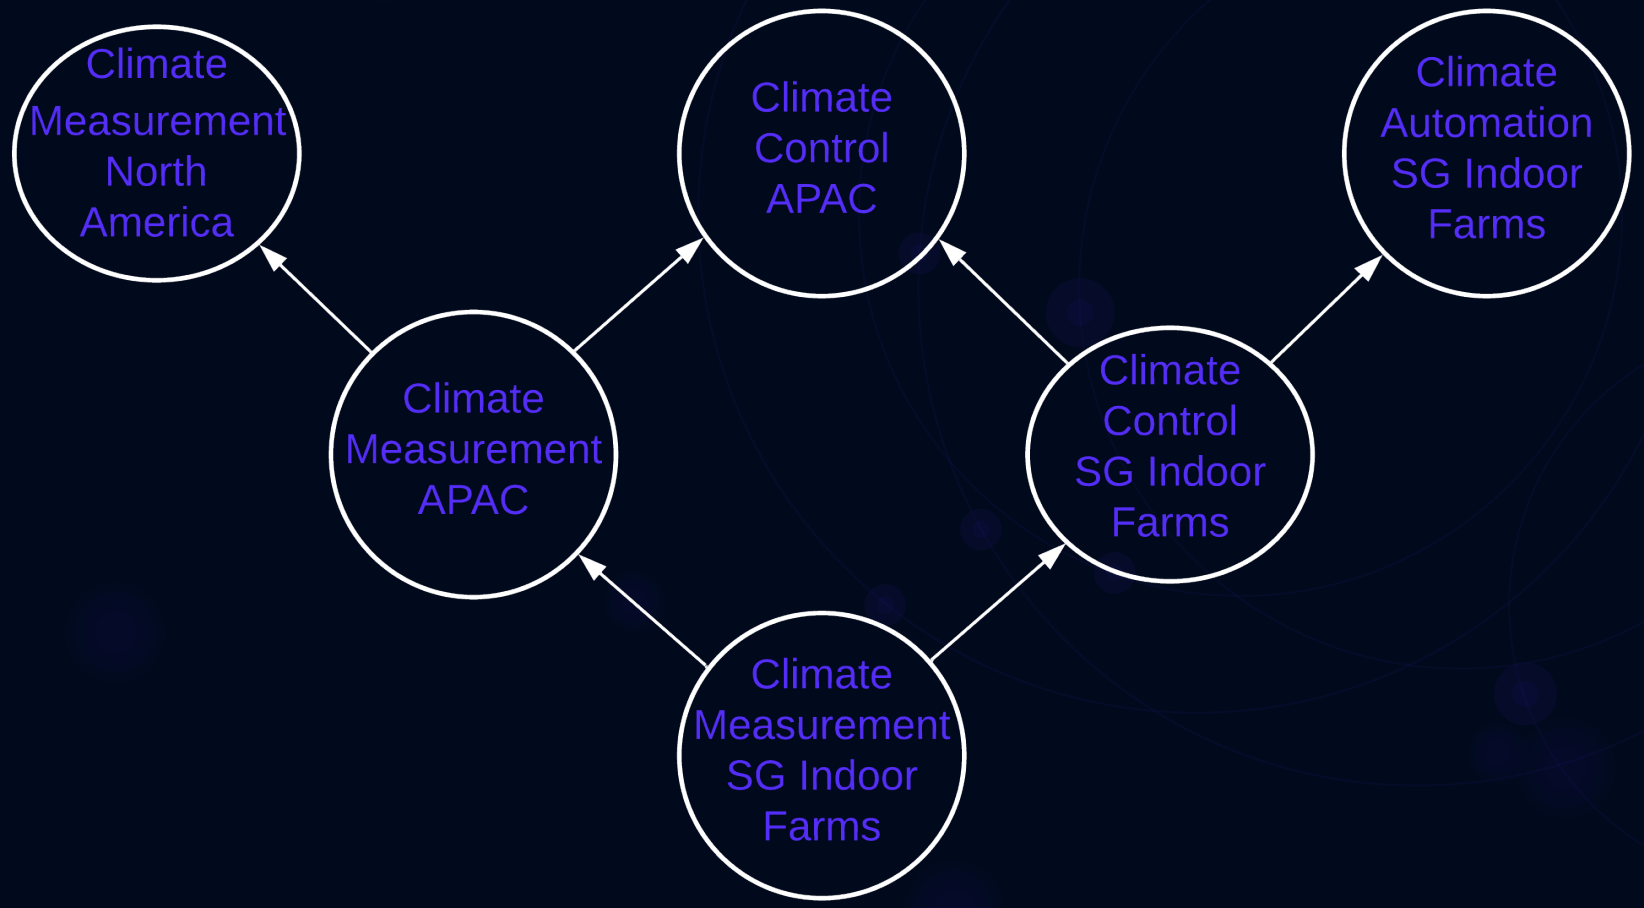

Source: Statista

Market: Geography

Source: Statista

Growth: Beachhead market

Business Model Canvas

Key Partners

NUS GRIP
Farm Operators
Building Owners
HVAC & BMS Vendors
Government Agencies

Key Activities

Requirements Gathering
Platform Development
System Installation
ML model design, development, training, and tuning

Key Resources

IP
Platform
ML Model

Value Proposition

Initial: Enable successful climate management of vertical farms by measuring key parameters and ensuring process repeatability for future harvests.

With data: increase yield, optimize energy use, and reduce labour costs.

Customer Relationships

Tailored Pricing
Modern Digital Platform
Personalized Support

Channels

Direct Outreach
Equipment Suppliers
Farmer Cooperatives

Customer Segments

Indoor Farms

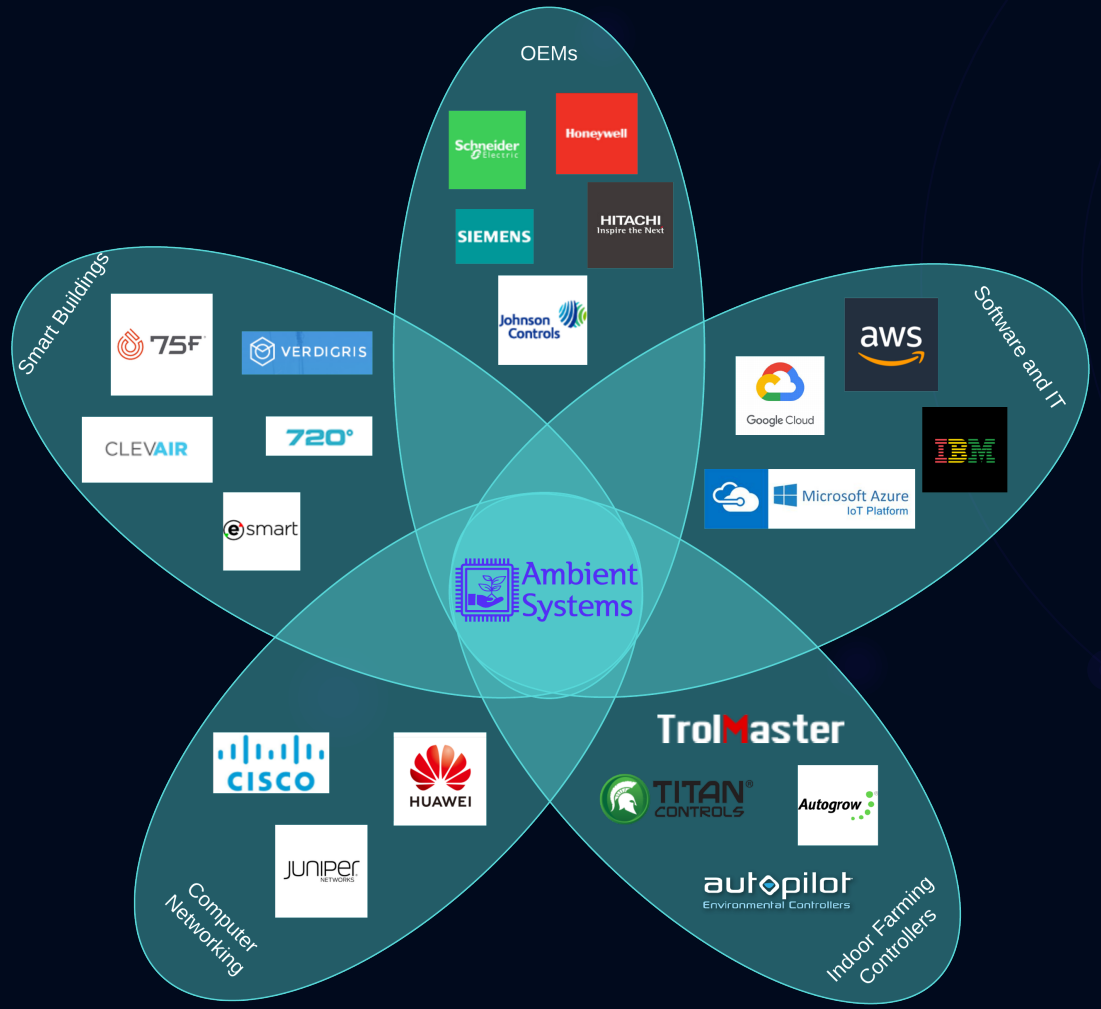

Cost Structure

CAPEX: [redacted] Solution Design and Development
OPEX: User Acquisition, Software Maintenance, System Implementation, ML Model and Improvement

Revenue Streams

[redacted]plementation Costs (Hardware, Installation, and Integration)
Value-sharing (Increased Yield or Reduced Energy Costs)

Competitive Landscape

Ambient is positioned at the intersection of multiple segments in order to provide a tailored solution for the beachhead market: indoor farms.

Competitive Benchmark

	Ambient	Autogrow	75F	Johnson Controls
Segment	Multiple	Indoor Farming Controller	Smart Buildings	OEM
Proximity to Customer (Low Logistics Cost)	✓ Yes	✗ No	✗ No	✓ Yes
Specific vs. Generic	✓ Indoor Farms	✓ Indoor Farms	✗ No	✗ No
Modern Web-based UI	✓ Yes	✗ No	✓ Yes	✗ Some
Wireless IoT Network	✓ Yes	✗ No	✓ Yes	✓ Yes
Advanced Optimization Methods	✓ ML models	✗ No	✗ Some	✗ Some
Pricing	Quotation (based on area)	$3000 for one unit + Installation Fees	Quotation	Quotation
